(6) *Income taxes*—(i) *In general.* The deduction for state, local, and foreign income, war profits and excess profits taxes allowed by section 164 shall be considered definitely related and allocable to the gross income with respect to which such taxes are imposed. For example, if a domestic corporation is subject to state income tax and such state income tax is imposed in part on an amount of foreign source income, that part of the taxpayer's state income tax attributable to foreign source income is definitely related and allocable to foreign source income. A state franchise tax that is

computed on the basis of income attributable to business activities conducted within the state must be allocated and apportioned in the same manner as an income tax.

(ii) *Methods of allocation and apportionment. Examples* (25) through (29) of paragraph (g) of this section illustrate the application of this paragraph (e)(6). Taxpayers may utilize methods of allocation or apportionment other than those illustrated in these examples if it is established to the satisfaction of the District Director upon examination that a different method yields a more accurate allocation and apportionment of state taxes, based on the factual relationship of the state tax to the income on which the tax is imposed.

(iii) *Effective dates.* The rules of § 1.861–8T(e)(6)(i) are effective for all taxable years. The rules of § 1.861–8T(e)(6)(ii) and *Examples* (25) through (29) of § 1.861–8T(g) are effective for taxable years beginning on or after January 1, 1988. At the option of the taxpayer, however, the rules of § 1.861–8T (e)(6)(ii) and *Examples* (25) through (29) of § 1.861–8T(g) may be applied with respect to deductions for state taxes incurred in taxable years beginning before January 1, 1988.

(g) *General examples.* The following examples illustrate the principles of this section. In each example, unless otherwise specified, the operative section which is applied and gives rise to the statutory grouping of gross income is the overall limitation to the foreign tax credit under section 904(a). In addition, in each example, where a method of allocation or apportionment is illustrated as an acceptable method, it is assumed that such method is used by the taxpayer on a consistent basis from year to year (except in the case of the optional method for apportioning interest under paragraph (e)(2)(vi) of this section or the optional method for apportioning research and development expense under paragraph (e)(3)(iii) of this section). Further, it is assumed that each party named in each example operates on a calendar year accounting basis and, where the party is a U.S. taxpayer, files returns on a calendar year basis. The examples contained in this section illustrate the general rule that a deduction must be allocated to the class of gross income with respect to which the deduction is factually related. The application of this general rule is inherently factual in nature. These illustrations of this inherently factual rule are presented as examples because the particular methods of allocation utilized merely illustrate in particular factual situations the regulatory rule requiring an allocation that is reasonable under all the facts and circumstances. These examples do not establish as substantive rules the particular methods of allocation therein set forth. Thus, these particular methods of allocation may not be used if the result is not a reasonable allocation, under all of the facts and circumstances of the particular case, of the deduction to the class of gross income to which it relates.

* * * * *

Example (25)—Income Taxes—(i) *Facts.* X, a domestic corporation, is a manufacturer and distributor of electronic equipment with operations in states A, B, and C. X also has a branch in country Y which manufactures and distributes the same type of electronic equipment. In 1988, X has taxable income from these activities, as determined under the Code (without taking into account the deduction for state taxes), of $1,000,000, of which $200,000 is foreign source general limitation income subject to a separate limitation under section 904(d)(1)(I) ("general limitation income") and $800,000 is domestic source income. States A, B, and C each determine X's income subject to tax within their state by making adjustments to X's taxable income as determined under the Code, and then apportioning the adjusted taxable income on the basis of the relative amounts of payroll, property, and sales with respect to each state as compared to worldwide payroll, property, and sales of the taxpayer. The adjustments made by states A, B, and C all involve adding and subtracting enumerated items from taxable income as determined under the Code. However, in making these adjustments to taxable income, none of the states specifically exempts foreign source income as determined under the Code. On this basis, it is determined that X has taxable income of $550,000, $200,000, and $200,000 in states A, B, and C, respectively. The corporate tax rates in states A, B, and C are 10 percent, 5 percent, and 2 percent, respectively, and X has total state income tax liabilities of $69,000 ($55,000 + $10,000 + $4,000), which it deducts as an expense for Federal income tax purposes.

(ii) *Allocation.* X's deduction of $69,000 for state income taxes is definitely related and thus allocable to the gross income with respect to which the taxes are imposed. Presumptively, states A, B, and C only tax income from domestic sources. However, since the statutes of states A, B, and C do not specifically exempt foreign source income (as determined under the Code) from taxation and since, in the aggregate, states A, B, and C tax $950,000 of X's income while only $800,000 is domestic source income under the Code, it is presumed that state income taxes are imposed on $150,000 of foreign source income. The deduction for state income taxes is therefore related and allocable to both X's foreign source and domestic source income.

(iii) *Apportionment.* For purposes of computing the foreign tax credit limitation, X's income is comprised of one statutory grouping, foreign source general limitation gross income, and one residual grouping, gross income from sources within the United States. The state income tax deduction of $69,000 must be apportioned between these two groupings. Corporation X calculates the apportionment on the basis of relative amounts of foreign source general limitation taxable income and U.S. source taxable income subject to state taxation. In this case, state income taxes are imposed on $800,000 of domestic source income and $150,000 of foreign source general limitation income.

State income tax deduction apportioned to foreign source general limitation income (statutory grouping):	
$69,000 × ($150,000/$950,000)	$10,895
State income tax deduction apportioned to income from sources within the United States (residual grouping):	
$69,000 × ($800,000/$950,000)	58,105
Total apportioned state income tax deduction	69,000

Example (26)—Income Taxes—(i) *Facts.* Assume the same facts as in *Example* (25) except that state A's statute exempts from taxation all foreign source income as determined under the Code, so that foreign source income is not included in adjusted taxable income subject to apportionment in state A (and factors relating to X's country Y branch are not taken into account in computing the state A apportionment fraction).

(ii) *Allocation.* X's deduction of $69,000 for state income taxes is definitely related and thus allocable to the gross income with respect to which the taxes are imposed. Since state A exempts all foreign source income by statute, state A is presumed to impose tax on $550,000 of X's $800,000 of domestic source income. X's state A tax of $55,000 is allocable, therefore, solely to domestic source income. Since the statutes of states B and C do not specifically exclude all foreign source income as determined under the Code, and since states B and C impose tax on $400,000 ($200,000 + $200,000) of X's income of which only $250,000 ($800,000 − $550,000) is presumed to be domestic source, the deduction for the $14,000 of income taxes imposed by states B and C is related and allocable to both X's foreign source and domestic source income.

(iii) *Apportionment.* For purposes of computing the foreign tax credit limitation, X's income is comprised of one statutory grouping, foreign source general limitation gross income, and one residual grouping, gross income from sources within the United States. The deduction of $14,000 for income taxes of states B and C must be apportioned between these two groupings.

Corporation X calculates the apportionment on the basis of relative amounts of foreign source general limitation income and U.S. source income subject to state taxation.

BEST COPY AVAILABLE

States B and C income tax deduction apportioned to foreign source general limitation income (statutory grouping):	
$14,000 × ($150,000/$400,000).....	$5,250
States B and C income tax deduction apportioned to income from sources within the United States (residual grouping):	
$14,000 × ($250,000/$400,000).....	8,750
Total apportioned state income tax deduction.....	14,000

Of X's total income taxes of $69,000, the amount allocated and apportioned to foreign source general limitation income equals $5,250. The total amount of state income taxes allocated and apportioned to U.S. source income equals $63,750 ($55,000 + $8,750).

Example (27)—Income Tax—(i) *Facts.* Assume the same facts as in *Example* (25) except that state A, in which X has significant income producing activities, does not impose a corporate income tax or other state tax imposed on income derived from business activities conducted in state A. X therefore has a total state income tax liability in 1988 of $14,000 ($10,000 paid to state B plus $4,000 paid to state C), all of which is subject to allocation and apportionment under paragraph (b) of this section.

(ii) *Allocation.* (A) X's deduction of $14,000 for state income taxes is definitely related and allocable to the gross income with respect to which the taxes are imposed. An adjustment is necessary, however, before the aggregate state taxable incomes can be compared with U.S. source income on the Federal income tax return in the manner described in *Examples* (25) and (26). Unlike the facts in *Examples* (25) and (26), state A imposes no income tax and does not define taxable income attributable to activities in state A. The total amount of X's income subject to state taxation is, therefore, $400,000 ($200,000 in state B and $200,000 in state C). This total presumptively does not include any income attributable to activities performed in state A and therefore can not properly be compared to total U.S. source income reported by X for Federal income tax purposes, which does include income attributable to state A activities. Under these facts, the application of the method used in *Examples* (25) and (26), which compares total state taxable incomes with total U.S. source income for Federal income tax purposes, would presume that states B and C are taxing U.S. source income attributable to state A before taxing any foreign source income, a result which may or may not be warranted depending on the particular facts.

(B) Before applying the method used in *Examples* (25) and (26) to the facts of this example, it is necessary to estimate the amount of income that state A could reasonably attribute to X's activities in state A. The rules of the Uniform Division of Income for Tax Purposes Act ("UDITPA") attribute income to a state on the basis of the average of three ratios that are based upon the taxpayer's facts—property within the state over total property, payroll within the state over total payroll, and sales within the state over total sales—and may be used, with adjustments, for this purpose. In order to estimate U.S. source income derived from state A activities, the taxpayer's UDITPA factors must be adjusted to eliminate taxable income and any factors attributable to a foreign branch. In this example all taxable income as well as UDITPA apportionment factors (property, payroll, and sales) attributable to X's country Y branch must be eliminated.

(C) Since it is presumed that state A would not attempt to tax the income derived by X's country Y branch, a reasonable estimate of the income that would be taxed by state A if state A had an income tax equals Federally defined taxable income (before deduction for state income taxes) less income derived by X's country Y branch, multiplied by the average of the taxpayer's state A property, payroll, and sales ratios, determined using the principles of UDITPA (adjusted to eliminate the country Y branch factors). The amount so determined is presumed to be imposed exclusively on U.S. source income and the allocation and apportionment method described in *Example* (26) must be applied. If, for example, state A taxable income is determined to equal $550,000, then $550,000 of U.S. source income for Federal income tax purposes is presumed to constitute state A taxable income. The remaining $250,000 of U.S. source income for Federal income tax purposes is presumed to be subject to tax in states B and C. Since states B and C impose tax on $400,000, of which $150,000 is presumed to be foreign source income and $250,000 is presumed to be domestic source income, the deduction for the $14,000 of income taxes of states B and C is related and allocable to both X's foreign source and domestic source income and is subject to apportionment.

(iii) *Apportionment.* The deduction of $14,000 for income taxes of states B and C is apportioned in the same manner as in *Example* (26). As a result, $5,250 of the $14,000 of state B and state C income taxes is apportioned to foreign source general limitation income ($14,000 x $150,000/$400,000), and $8,750 ($14,000 x $250,000/$400,000) of the $14,000 of state B and state C income taxes is apportioned to U.S. source income.

Example (28)—Income Tax—(i) *Facts.* (A) Assume the same facts as in *Example* (25) (X has $1,000,000 of taxable income from Federal income tax purposes, $800,000 of which is U.S. source income and $200,000 of which is foreign source general limitation income), except that $100,000 of X's $200,000 of foreign source general limitation income consists of dividends from controlled foreign corporations ("CFCs") in which X owns stock representing 10 to 50 percent of the vote and value in such corporations. The income derived by the CFCs paying the dividends consists entirely of foreign source general limitation income.

(B) State A taxable income is computed by first making adjustments to X's Federal taxable income. These adjustments result in X having a total of $1,000,000 of apportionable taxable income for state A tax purposes. None of the $100,000 of adjustments made by state A relate to the dividends paid by the CFCs. As in *Example* (25), the amount of apportionable taxable income attributable to business activities conducted in state A is determined by multiplying apportionable taxable income by a fraction (the "state opportionment fraction") that compares the relative amounts of X's payroll, property, and sales within state A with X's worldwide payroll, property and sales. An analysis of state A law indicates that state A includes "portfolio dividends" in its definition of the taxable income of X which is apportionable to X's state A activities. However, the factors of the corporations paying those dividends are not included in the state A apportionment fraction for purposes of apportioning income to the state. Portfolio dividends are defined under state A law as any dividends paid from less than 50 percent owned subsidiaries. The dividends received by X from the 10 to 50 percent owned controlled foreign corporations, therefore, are considered to be portfolio dividends for state A tax purposes. The comparison of X's state A factors with X's worldwide factors results in a state apportionment fraction of 50 percent. Applying this fraction to apportionable taxable income of $1,100,000, as determined under state law, results in attributing 50 percent of apportionable taxable income to state A, and produces total state A taxable income of $550,000. State A imposes an income tax at a rate of 10 percent on the amount of income that is attributed to state A, which results in $55,000 of tax imposed by state A.

(ii) *Allocation.* (A) States A, B, and C impose income taxes of $69,000 which must be allocated to the classes of income upon which the taxes are imposed. A portion of X's Federal income tax deduction of $55,000 for state A income tax is definitely related and thus allocable to the class of gross income consisting of foreign source portfolio dividends. A definite relationship exists between a deduction for state income tax and portfolio dividend income when a state includes portfolio dividends in state taxable income apportionable to the state on the basis of an apportionment fraction that includes the factors of the corporations paying the dividends. By applying a state apportionment fraction that excludes factors of the corporations paying portfolio dividends to apportionable taxable income that includes the $100,000 of foreign source portfolio dividends, $50,000 (50 percent of the $100,000) of the portfolio dividends is attributed to X's activities in state A and subjected to state A income tax. Applying the state A income tax rate of 10 percent to the $50,000 of foreign source portfolio dividends subjected to state A income tax, $5,000 of X's $55,000 total state A income tax liability is definitely related and allocable to a class of income consisting of the foreign source portfolio dividends. (If a state imposes a graduated tax rate, the average effective state tax rate for the taxpayer for the taxable year may be utilized to determine the amount of tax attributable to the portfolio dividends.) Since under the look-through rules of section 904(d)(3) the foreign source portfolio dividends are included within the general

limitation described in section 904(d)(1)(I), the $5,000 of state A tax on foreign source portfolio dividends is allocated entirely to foreign source general limitation income and, therefore, is not apportioned. (If the total amount of state A tax imposed on foreign source portfolio dividends were to exceed the actual amount of X's state A income tax liability (for example, due to net operating losses), the actual amount of state A tax would be entirely allocated to the foreign source portfolio dividends.) After allocation of a portion of the state A tax to portfolio dividends, $50,000 ($55,000–$5,000) of state A tax remains to be allocated.

(B) A total of $64,000 (the aggregate of the $50,000 remaining state A tax, and the $10,000 and $4,000 of taxes imposed by states B and C, respectively) is to be allocated as provided in *Example* (25), by comparing U.S. source taxable income, as determined under the Code, with the aggregate of the state taxable incomes determined by states A, B, and C, after reducing state apportionable taxable incomes by the amount of any portfolio dividends to which tax has been specifically allocated. X's state A taxable income, after reduction by the $50,000 of portfolio dividends taxed by state, equals $500,000. X also has taxable income of $200,000 and $200,000 in states B and C, respectively. In the aggregate, therefore, states A, B, and C tax $900,000 of X's income, after including state taxable income attributable to portfolio dividends. Since X has only $800,000 of U.S. source taxable income for Federal income tax purposes, it is presumed that state income taxes are imposed on $100,000 of foreign source income. The remaining deduction of $64,000 for state income taxes is therefore related and allocable to both X's foreign source and domestic source income and is subject to apportionment.

(iii) *Apportionment.* For purposes of computing the foreign tax credit limitation, there is one statutory grouping, foreign source general limitation income, and one residual grouping, gross income from sources within the United States. The remaining state income tax deduction of $64,000 must be apportioned between these two groupings on the basis of relative amounts of foreign source general limitation taxable income and U.S. source taxable income subject to state taxation. In this case, the $64,000 of state income taxes is considered to be imposed on $800,000 of domestic source income and $100,000 of foreign source general limitation income and is apportioned as follows:

State income tax deduction apportioned to foreign source general limitation income (statutory grouping): $64,000×($100,000/$900,000)	$7,111
State income tax deduction apportioned to income from sources within the United States (residual grouping): $64,000×($800,000/$900,000)	56,889
Total apportioned state income tas deduction	64,000

Of the total state income taxes of $69,000, the amount allocated and apportioned to foreign source general limitation income equals $12,111 ($5,000+$7,111). The total amount of state income taxes allocated and apportioned to U.S. source income equals $56,889.

Example (29)—Income Taxes—(i) *Facts.* (A) P, a domestic corporation, is a manufacturer and distributor of electronic equipment with operations in states F, G, and H. P also has a branch on country Y which manufactures and distributes the same type of electronic equipment. In addition, P has three wholly owned subsidiaries, US1, US2, and FS, the latter a controlled foreign corporation ("CFC") ad defined in section 957 (a) of the Code. P also holds interests ranging from 10 to 50 percent ownership in various controlled foreign corporations.

(B) In 1988, P derives $1,000,000 of Federal taxable income (without taking into account the deduction for state income taxes), which consists of $250,000 of foreign source general limitation income and $750,000 of U.S. (domestic) source income. The foreign source general limitation income consists of a $25,000 Subpart F inclusion with respect to FS, $150,000 of dividends from other CFCs in which P owns stock representing 10 to 50 percent of the vote and value, and $75,000 of manufacturing and sales income derived by P's U.S. operations and country Y branch. The $750,000 of U.S. source income consists of manufacturing and sales income derived by P's U.S. operations.

(C) For Federal income tax purposes, US1 derives $75,000 of taxable income, before deduction for state income taxes, which consists entirely of U.S. source income. US2, a so-called "80/20" corporation described in section 861(c)(1), derives $250,000 of Federal taxable income before deduction for state or foreign income taxes, all of which is derived from foreign operations and consists entirely of foreign source general limitation income. FS is not engaged in a U.S. trade or business and derives $550,000 of foreign source general limitation income before deduction for foreign income taxes.

(D) State F imposes a corporate income tax of 10 percent on P's state F taxable income, which is determined on the basis of a worldwide unitary apportionment. State F determines P's taxable income for state F tax purposes by first making adjustments to the taxable income, as determined for Federal income tax purposes, of the members of the unitary group to determine the unitary business income of the group. State F then attributes a portion of the unitary business income to activities of P that are conducted in state F by multiplying the unitary business income (adjusted Federal taxable income) of the unitary group by a fraction (the "state apportionment fraction") that compares the relative amount of the unitary group's payroll, property, and sales (the "factors") in state F with the payroll, property, and sales of the unitary group. P is the only member of its unitary group that has state F factors and that is thereby subject to state F income tax and filing requirements. State F defines the unitary group to include any corporation more than 50 percent of which is directly or indirectly owned by a state F taxpayer and is engaged in the same unitary business. P's unitary group, therefore, includes P, US1, US2, and FS, but does not include the 10 to 50 percent owned CFCs. The unitary business income of the unitary group excludes intercompany dividends between members of the unitary group and subpart F inclusions with respect to a member of the unitary group. Dividends paid from nonmembers of the unitary group (the 10 to 50 percent owned CFCs) are referred to as portfolio dividends for state F tax purposes and are included in unitary income. None of the factors (in state F or worldwide) of the corporations paying portfolio dividends are included in the state F apportionment fraction for puposes of apportioning unitary business income to P's state F activities.

(E) After adjustments to Federal taxable income, the unitary business income of P's unitary group equals $2,000,000, consisting of $1,050,000 of P's income ($100,000 of foreign source manufacturing and sales income, $150,000 of foreign source portfolio dividends, and $800,000 of U.S. source manufacturing and sales income, but excluding the $25,000 subpart F inclusion attributable to FS since FS is a member of the unitary group), $100,000 of US1's income (from sales made in the United States), $275,000 of US2's income (from an active business outside the United States), and $575,000 of FS's income. The differences between Federal taxable income and state F apportionable taxable income for P, US1, US2, and FS represent adjustments to Federal taxable income pursuant to the tax laws of state F.

(F) The Federal and state taxable income for each member of the unitary group is summarized in the following table. (The items of income listed in the "Federal" column of the table refer to taxable income before deduction for state income tax.)

	Federal	State F
P		
U.S. source income	$750,000	$800,000
Foreign source general limitation income:		
Portfolio dividends	150,000	150,000
Subpart F income	25,000	0
Manufacturing and sales income	75,000	100,000
Total taxable income	1,000,000	1,050,000
US1		
U.S. source income	75,000	100,000
US2		
Foreign source general limitation income	250,000	275,000
FS		
Foreign source general limitation income	550,000	575,000
Unitary business income		2,000,000

(G) P's state F taxable income equals $500,000, which is determined by multiplying the group's unitary business income ($2,000,000) by the group's state F apportionment fraction, which equals 25 percent in these facts. P's state F taxable income is multiplied by the state F tax rate of 10 percent, resulting in a state F tax liability of $50,000. State G and state H, unlike state F, do not tax portfolio dividends. Although state G and state H apportion taxable income to

VOL 53 ISS 238 DE 12 1988 UMI

those states on the basis of an apportionment fraction that compares state factors to total factors. state G and state H, unlike state F, do not tax on a unitary basis and only consider P's taxable income and factors in computing P's taxable income. P's taxable income under state G law equals $300,000, which is subject to a 5 percent tax rate resulting in a state G tax liability of $15,000. P's taxable income under state H law is $300,000, which is subject to a tax rate of 2 percent resulting in a state H tax liability of $6,000. P has a total Federal income tax deduction for state income taxes of $71,000 ($50,000 + 15,000 + 6,000).

(ii) *Allocation.* (A) P's deduction of $71,000 for state income taxes is definitely related and allocable to the gross income with respect to which the taxes are imposed. Adjustments may be necessary, however, before aggregate state taxable incomes can be compared with U.S. source income on the Federal income tax return in the manner described in *Examples* (25) and (26). In allocating P's deduction for state income taxes, it is necessary first to determine the portion, if any, of the deduction that is definitely related and allocable to a particular class of gross income. A definite relationship exists between a deduction for state income tax and dividend income when a state includes portfolio dividends in state taxable income apportionable to the state on the basis of an apportionment fraction (whether or not calculated on a unitary basis) that excludes the factors of the corporations paying portfolio dividends.

(B) In this case, $150,000 of foreign source portfolio dividends are subject to a state F apportionment fraction of 25 percent, which results in a total of $37,500 of state F taxable income attributable to such dividends. As illustrated in *Example* (28), $3,750 ($150,000 × 25 percent state F apportionment percentage × 10 percent state F tax rate) of P's state F income tax is definitely related and allocable to a class of gross income consisting entirely of the foreign source portfolio dividends. Since under the look-through rules of section 904(d)(3) the foreign source portfolio dividends are included within the general limitation described in section 904(d)(1)(I), the $3,750 of state F tax on foreign source portfolio dividends is allocated entirely to foreign source general limitation income and, therefore, is not apportioned.

(C) After reducing state F taxable income of the unitary group by the taxable income attributable to portfolio dividends, state F taxes P on $462,500 ($500,000–$37,500), the income of a unitary group that includes P and other affiliated companies. Accordingly, in order to allocate and apportion the remaining $46,250 of state F tax ($50,000 of state F tax minus the $3,750 of state F tax allocated to foreign source portfolio dividends), it is necessary first to determine if state F is taxing only P's separate company income or is imposing its tax partly on income of other members of the unitary group. If state F is taxing income of other members of the unitary group, a portion of the state F tax must be allocated and apportioned on the basis of the income of the other members of the group subject to state F taxation. In order to determine if state F is taxing only P's separate company income, it is necessary to compute P's separate company taxable income using only P's income (excluding portfolio dividends) and state F apportionment factors. If P's separate company taxable income equals or exceeds the $462,500 of remaining state F taxable income, it is presumed that state F is only taxing P's separate company income and the entire amount of the remaining state F tax should be allocated and apportioned in the manner described in *Example* (25).

(D) If P's separate company taxable income is less than the $462,500 of remaining state F taxable income (after reduction for the $37,500 of state F taxable income attributable to portfolio dividends), it is presumed that state F is taxing the income of other affiliates included in the unitary group. In such a case, it is necessary to determine if the state is imposing tax in part on the foreign source income of foreign affiliates and 80/20 companies included in the unitary group or is limiting its taxation to U.S. source income of domestic members of the unitary group.

(E) Assume for purposes of this example that P's separate company taxable income equals $396,000, computed by multiplying P's state F taxable income of $900,000 (P's state F taxable income (before state F apportionment) of $1,050,000 less the $150,000 of foreign source portfolio dividends) by P's separate company state F apportionment fraction of 44 percent. Because P's separate company taxable income of $396,000 is less than the $462,500 of remaining state F taxable income, state F is presumed to be taxing the income of P's affiliates that are included in the unitary group. To determine if state F tax is being imposed on members of the unitary group (other than P) that produce foreign source income, it is necessary to compute a hypothetical state F taxable income for all companies in the unitary group with significant U.S. operations. (For this purpose, the hypothetical group of companies with significant domestic operations is referred to as the "water's edge group.") State F is presumed to be taxing income of foreign corporations and 80/20 companies to the extent that the remaining state F taxable income ($462,500) exceeds the hypothetical state F taxable income for the water's edge group.

(F) The members of the water's edge group are P and US1. The unitary business income of this water's edge group equals $1,000,000, the sum of $900,000 (P's state F taxable income (before state F apportionment) of $1,050,000 less the $150,000 of foreign source portfolio dividends) and $100,000 (US1's separate company state F taxable income). For purposes of this example, the state F apportionment fraction determined on a unitary basis for this water's edge group is assumed to equal 40 percent, the average of P and US1's state F payroll, property, and sales factor ratios (the water's edge group's state F factors over its worldwide factors). Applying this apportionment fraction to the $1,000,000 of unitary business income of the water's edge group yields state F water's edge taxable income of $400,000. The excess of the remaining $462,500 of state F taxable income over the $400,000 of state F water's edge taxable income equals $62,500, and is attributable to the inclusion of US2 and FS in the unitary group. The state F tax attributable to US2 and FS equals $6,250 and is allocated entirely to a class of gross income consisting of foreign source general limitation income, because the income of FS and US 2 consists entirely of such income. The $6,250 of state F tax attributable to US2 and FS is subtracted from the remaining $46,250 of net state F tax, and P has $40,000 of state F tax remaining to be allocated and apportioned.

(G) To the extent that the remaining state F taxable income ($400,000) exceeds P's separate company state F taxable income ($396,000), it is presumed that state F is taxing U.S. source income of members of the water's edge group other than P. In these facts, the $4,000 excess over P's separate company state F taxable income is attributable to the inclusion of US1 in the unitary group. The $400 of state F tax attributable to the inclusion of US1 in the unitary group (10 percent of $4,000) is allocated entirely to U.S. source income. P's remaining $39,600 of state F tax ($40,000 of state F tax attributable to the water's edge group minus $400 of state F tax attributable to US1 and allocated to U.S. source income) is the state F tax attributable to P's separate company state F taxable income and is to be allocated and apportioned together with P's state G tax of $15,000 and state H tax of $6,000 as illustrated in *Example* (25).

(H) In allocating the $60,600 of state tax liabilities ($39,600 state F tax attributable to P's separate company state F income + $15,000 state G tax + $6,000 state H tax) under *Example* (25), P's state taxable income in state G and state H ($300,000 + $300,000) must be added to P's separate company state F taxable income ($396,000). The resulting $996,000 of combined state taxable incomes is compared with $750,000 of U.S. source income on P's Federal income tax return. It is presumed that the $60,600 of state income taxes are imposed in part on $246,000 of foreign source income, which is the excess of P's combined state taxable incomes over P's Federal U.S. source taxable income. Accordingly, P's remaining deduction of $60,600 ($39,600 + $15,000 + $6,000) for state income taxes is related and allocable to both P's foreign source and domestic source income and is subject to apportionment.

(iii) *Apportionment.* The $60,600 of state taxes (the remaining $39,600 of state F tax + $15,000 of state G tax + $6,000 of state H tax) must be apportioned between foreign source general limitation income and U.S. source income for Federal income tax purposes. This apportionment is based upon the relative amounts of foreign source general limitation taxable income and U.S. source taxable income comprising the $996,000 of income subject to tax by the states after reducing the total amount of income subject to tax by the portfolio dividends and income attributable to the inclusion of other members of the unitary group. The deduction for the $60,600 of state income taxes is apportioned as follows:

State income tax deduction apportioned to foreign source general limitation income (statutory grouping): $60,600 × ($246,000/$996,000)	$14,967
State income tax deduction apportioned to income from sources within the United States (residual grouping): $60,600 × ($750,000/$996,000)	45,633
Total apportioned state income tax deduction	60,600

Of the total state income taxes of $71,000, the amount allocated and apportioned to foreign source general limitation income is $24,967—the sum of $14,967 of state F, state G, and state H taxes apportioned to foreign source general limitation income, $3,750 of state F tax allocated to foreign source portfolio dividend income, and the $6,250 of state F tax allocated to foreign source general limitation income as the result of state F's worldwide unitary method of taxation (*i.e.*, the inclusion of US2 and FS in the unitary group). The total amount of state income taxes allocated and apportioned to U.S. source income equals $46,033—the sum of the $400 of state F tax attributable to the inclusion of US1 in the state F unitary group and $45,633 of combined states F, G, and H tax apportioned under the method provided in *Example* (25).

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

Approved October 7, 1988.

O. Donaldson Chapoton,

Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

VETERANS ADMINISTRATION

38 CFR Parts 2 and 14

Delegations of Authority; Federal Tort Claims

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The Veterans Administration (VA) is amending its regulations to delegate to the VA General Counsel and designees the authority to adjust, determine, compromise, and settle a claim under the Federal Tort Claims Act where the amount of settlement does not exceed $100,000. This authority was granted to the Administrator under 38 U.S.C. 223 and 28 CFR Appendix to Part 14. The previous authority was limited to $25,000 by 28 U.S.C. 2672. This amendment will facilitate processing of claims under the Federal Tort Claims Act in a more timely manner.

EFFECTIVE DATE: November 9, 1988.

FOR FURTHER INFORMATION CONTACT: E. Douglas Bradshaw, Jr., Deputy Assistant General Counsel (021B), Veterans Administration, 810 Vermont Avenue NW., Washington, DC (202) 233-2252.

SUPPLEMENTARY INFORMATION: Section 203 of the Veterans Benefits and Services Act of 1988 (Pub. L. 100-322) added section 223 to Title 38, United States Code, permitting the Administrator to settle tort claims not exceeding an amount to be delegated by the Attorney General, with the delegation not to exceed the maximum amount delegated to the United States Attorneys. The Attorney General has delegated settlement authority to the Administrator not to exceed $100,000.

This amendment to 38 CFR 2.6(e)(1) delegates to the General Counsel, Deputy General Counsel, Assistant General Counsel (Professional Staff Group I), or those authorized to act for them, authority to consider, ascertain, adjust, determine, compromise, and settle a claim arising under the Federal Tort Claims Act; provided that any award, compromise, or settlement in excess of $100,000 shall be effected only with the prior written approval of the Attorney General or his designee. The amendment also provides for the execution of a memorandum explaining the basis for settlement of a claim in excess of $50,000 to be sent to the Department of Justice, as required by the Attorney General's delegation to the Administrator. Authority is also delegated to the District Counsels or those authorized to act for them and the Deputy Assistant General Counsel (Professional Staff Group I) to consider, ascertain, adjust, determine, compromise, and settle any claim under the Federal Tort Claims Act; provided that any award, compromise, or settlement does not exceed $50,000.

Conforming amendments are made to 38 CFR 14.602(a), 14.602(a)(4), and 14.602(b)(2), and sections which are no longer necessary are deleted.

Under 38 CFR 1.12 and 5 U.S.C. 553(d)(3), prior publication of these delegations of authority for public comment is unnecessary since they concern only internal VA management. Because a prior notice of proposed rulemaking is not required and will not be published, these changes do not come within the term "rule" as defined in and made subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 602(2).

In any case, these amendments will not have a significant economic impact on a substantial number of small entities as they are defined in that Act. No regulatory or administrative burdens are imposed upon small entities. Also, since these amendments are related solely to internal agency management, they do not come within the term "rule" as defined in section 1(a)(3) of Executive Order 12291, entitled Federal Regulation; consequently, they are not subject to requirements of that order.

There are no Catalog of Federal Domestic Assistance numbers associated with these amendments.

List of Subjects in 38 CFR Parts 2 and 14.

Administrative practice and procedure, Claims, Government employees, Lawyers, Legal services, Organization and functions.

Approved: November 9, 1988.

Thomas K. Turnage,

Administrator.

In 38 CFR Part 2, *Delegations of Authority*, and Part 14, *Legal Services, General Counsel*, are amended as set forth below:

PART 2—[AMENDED]

1. In § 2.6, introductory text of paragraph (e), paragraphs (e)(1)(i), and (e)(1)(ii) are revised, and paragraph (e)(1)(iii) is removed, to read as follows:

§ 2.6 Administrator's delegations of authority to certain officials (38 U.S.C. 212(a)).

* * * * *

(e) *General Counsel.* (1) Under the Federal Tort Claims Act, pursuant to the provisions of 28 U.S.C. 2672; Pub. L. 100-322; 38 U.S.C. 223, and the delegation of authority from the Attorney General in 28 CFR Appendix to Part 14:

(i) Authority is delegated to the General Counsel, Deputy General Counsel, Assistant General Counsel, or those authorized to act for them, to consider, ascertain, adjust, determine, compromise, and settle any claim accruing on and after January 18, 1967, and asserted under the Federal Tort Claims Act, as amended by Pub. L. 89-506 (80 Stat. 306), and to execute an appropriate voucher and other necessary instruments in connection therewith; *Provided*, that any award, compromise, or settlement in excess of $100,000 shall be effected only with the prior written approval of the Attorney General or his designee; provided further, that whenever a settlement is effected in an amount in excess of $50,000, a memorandum fully explaining the basis for the action taken shall be sent to the Department of Justice.

(ii) Authority is delegated to the District Counsels or those authorized to act for them and the Deputy Assistant General Counsel (Professional Staff Group I) to consider, ascertain, adjust,

determine, compromise, and settle any claim under the Federal Tort Claims Act and to execute an appropriate voucher and other necessary instruments in connection therewith: Provided, That any award, compromise, or settlement does not exceed $50,000.

(Authority: 38 U.S.C. 223; 28 CFR Appendix to Part 14)

* * * * *

2. In § 14.602, paragraphs (a), (a)(4), and (b)(2) are revised to read as follows:

§ 14.602 Scope and authority to consider claims.

(a) The Administrator and those delegated such authority in § 2.6(e) of this chapter are authorized to consider, ascertain, adjust, determine, compromise, and settle claims for money damages against the United States in accordance with regulations prescribed by the Attorney General (38 CFR 14.1 *et seq.*). Any award, compromise, or settlement exceeding $100,000 shall be effected only with the prior written approval of the Attorney General or designee. In addition, a claim may be compromised or settled only after consultation with the Department of Justice when:

(Authority: 38 U.S.C. 223; 28 CFR Appendix to Part 14)

* * * * *

(4) For any reason, the compromise of a particular claim, as a practical matter, will, or may, control the disposition of a related claim in which the amount to be paid may exceed $100,000; or

(Authority: 38 U.S.C. 223; 28 CFR Appendix to Part 14)

* * * * *

(b) * * *

(2) Where full development of a claim indicates that liability exists and the potential settlement value exceeds $50,000, the District Counsel who received the claim will submit the case to the General Counsel for consideration.

(Authority: 38 U.S.C. 223; 28 CFR Appendix to Part 14)

* * * * *

§ 14.602 [Amended]

3. In § 14.602, paragraphs (c) and (e) are removed. Paragraph (d) is redesignated as paragraph (c).

[FR Doc. 88-28427 Filed 12-9-88; 8:45 am]
BILLING CODE 8320-01-M

POSTAL SERVICE

39 CFR Part 111

Endorsement of Single-Piece Rate Third-Class Mail

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This final rule requires that all pieces of third-class matter mailed at the single-piece third-class rate be endorsed "Third-Class", so that postal employees can better identify it in checking postage and providing the appropriate service. Formerly only sealed pieces of single-piece rate third-class mail had to be so endorsed.

EFFECTIVE DATE: March 19, 1989.

FOR FURTHER INFORMATION CONTACT: Leo F. Raymond, (202) 268-5199.

SUPPLEMENTARY INFORMATION: On October 13, 1988, the Postal Service published a proposed rule to require that all mailpieces sent at the third-class single-piece rates of postage, whether sealed or not, be endorsed "Third-Class" (53 FR 40097-40098). The Postal Service received three comments concerning the proposed rule.

One commenter supported the proposal. A second commenter found it "noncontroversial." That same commenter, however, questioned why single-piece rate third-class mail should continue as a subclass since so little demand exists for a level of service that offers no advantage over a superior service of equal price (e.g., single-piece First-Class Mail). While the commenter may be correct in perceiving little to attract customers to single-piece third-class mail in the lower weight increments where it is priced the same as First-Class Mail, the subclass extends up to, but not including, sixteen ounces. In the increments above four ounces, the price spread compared to single-piece First Class Mail grows quickly. Further, regular First-Class rates extend only to pieces not exceeding 11 ounces, beyond which the higher Priority Mail rates apply. For example, a 15.5-ounce item mailed at the existing third-class single-piece rate would cost $1.50; the same item mailed at Priority Mail rates would cost $2.40. Therefore, notwithstanding the aforementioned duplication in the lower weight cells, the Postal Service feels that single-piece rate third-class mail continues to offer an alternative for customers who do not desire the level of service associated with First-Class and Priority Mail.

The third commenter opposed the proposal, stating it would serve no useful purpose and arguing that failure to comply with the proposed rule would result in the piece being reclassified as First-Class Mail. Such action by the Postal Service, it is said, would not represent a real "penalty" to the mailer, and would not serve as an incentive to comply. We recognize the fact that unendorsed single-piece third-class mail will be treated as First-Class Mail; at the same time, however, we must point out that this treatment is not unearned since pieces weighing up to four ounces would bear sufficient postage for that rate and service. Also, as noted above, the third-class single-piece rate is not limited to pieces weighing four ounces or less, and there is little benefit to establishing separate marking criteria based on the weight of the piece and how the applicable rate may compare to the comparable First-Class postage. As stated in the proposed rule, aside from questions of classification, postage, and handling, the Postal Service must be able to identify what is in the mailstream for its own measurement purposes. Therefore, despite the absence of a "penalty" for violators in the lower weight increments, we believe there is a benefit in the rule with little or no appreciable impact on the mailing public.

Accordingly, after consideration of all the comments received, the Postal Service hereby adopts the following revisions to the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR Part 111.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority citation for Part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 403, 404, 3001-3011, 3201-3219, 3403-3406, 3621, 5001.

PART 662—MARKING

2. In Part 662, revise 662.1 to read as follows:

662.1 Single-Piece Rate.

662.11 General.

Each piece mailed at the single-piece third-class rates of postage described in 611.1 must be legibly marked with the words "Third-Class."

662.12 Location.

The marking must appear on the address side of each piece, preferably below the postage and above the name of the addressee. It may be included as part of a permit imprint, or it may be printed adjacent to the meter stamp by a

postage meter. The marking will not be considered adequate if it is included as part of a decorative design or advertisement.

662.13 Unmarked Pieces.

Pieces lacking the endorsement required by 662.11 or not properly marked as required by 662.12 will be treated as First-Class Mail and charged postage at the applicable First-Class rate.

PART 141—STAMPED ENVELOPES, POSTAL CARDS, AEROGRAMMES

3. In Part 141, revise 141.254c to read as follows:

145.254 Postal Instructions.

* * * * *

c. *Third-class Mail.* On single-piece rate third-class mail, whether sealed or not (see also 621.4), the following must appear: *Third-Class.*

A transmittal letter making these changes in the pages of the Domestic Mail Manual will be published and will be transmitted to subscribers automatically. Notice of issuance of the transmittal letter will be published in the **Federal Register** as provided by 39 CFR 111.3.

Fred Eggleston,

Assistant General Counsel, Legislative Division.

BILLING CODE 7710-12-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 52 and 62

[FRL-3481-4; NC-038]

Approval and Promulgation of Implementation Plans; State Plans for Designated Facilities and Pollutants; North Carolina: Approval of Minor Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving minor revisions to various regulations in the State Implementation Plan (SIP) and revisions to regulations developed pursuant to section 111(d) of the Clean Air Act (Plan for designated pollutants and facilities) submitted by the North Carolina Department of Natural Resources and Community Development on May 2, 1988. These revisions are of a bookkeeping nature and are the result of the review of the North Carolina Administrative Code by North Carolina's Administrative Rules Review Commission.

DATES: This action will be effective on February 10, 1989, unless notice is received by January 11, 1989, that someone wishes to submit adverse or critical comments. Such notice may be submitted to Gregg Worley at the EPA Regional Office address listed below.

ADDRESSES: Copies of the State submittal for this action are available for public inspection during normal business hours at the following locations:

EPA Region IV, Air Programs Branch, 345 Courtland Street, NE., Atlanta, Georgia 30365.

Air Quality Section, Division of Environmental Management, North Carolina Department of Natural Resources and Community Development, 512 North Salisbury Street, Raleigh, North Carolina 27611.

Public Information Reference Unit, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Gregg M. Worley at the above EPA address and telephone number (404) 347-2864 or FTS 257-2864.

SUPPLEMENTARY INFORMATION: On May 2, 1988, the State of North Carolina submitted to EPA regulatory amendments which were adopted by the Environmental Management Commission on April 14, 1988. These amendments were the subject of three separate public hearings held on February 15, 1988.

The first of these hearings dealt with the adoption of an additional New Source Performance Standard (NSPS). A notice announcing delegation of authority to enforce this NSPS was published on June 22, 1988 (53 FR 23390).

The second hearing dealt with various amendments to regulations which are included in North Carolina's State Implementation Plan (SIP), including provisions for PM_{10}. These regulatory revisions will be handled in a separate notice.

The third hearing dealt with amendments to various regulations that are part of the federally approved SIP. The amendments were made to make corrections and remove out-of-date material. These amendments were not made to meet EPA requirements but were made upon the recommendation of North Carolina's Administrative Rules Review Commission (ARRC) after a review of all the regulations in the North Carolina Administrative Code. It is these regulatory changes that are being considered in today's notice.

Six of the amendments are to regulations that are included in the SIP: 15 NCAC 2D.0103, Copies of Referenced Federal Regulations; 15 NCAC 2D.0304, Preplanned Abatement Program; 15 NCAC 2D.0604, Sources Covered by Implementation Plan Requirements; 15 NCAC 2D.0608, Program Schedule; 15 NCAC 2D.0606, Other Coal or Residual Oil Burners; and 15 NCAC 2H.0607, Copies of Referenced Documents.

The other amended regulations, 15 NCAC 2D.0528, Total Reduced Sulfur from Kraft Pulp Mills, and 15 NCAC 2D.0529, Fluoride Emissions from Primary Aluminum Reduction Plants, are part of North Carolina's 111(d) plan for designated facilities and pollutants, which are not required to be part of the North Carolina SIP. These regulations are approved pursuant to 40 CFR Part 62 (Approval and Promulgation of State Plans for Designated Facilities and Pollutants).

SIP Amendments

Regulations 15 NCAC 2D.0103, Copies of Referenced Federal Regulation, and 15 NCAC 2H.0607, Copies of Referenced Documents, have been amended to correct the address of the Washington Regional Office. The new address is Washington Regional Office, 1424 Carolina Avenue, Farish Building, Washington, North Carolina 27889. 2D.0103 was first federally approved on April 18, 1977 (42 FR 20133) and subsequently revised three times, with the latest revision being approved on February 29, 1988 (53 FR 5974). 2H.0607 was first federally approved on July 26, 1982 (47 FR 32118), and subsequently revised three times, with the latest revision being approved on February 29, 1988 (53 FR 5974).

Regulation 15 NCAC 2D.0304, Preplanned Abatement Program, was amended to delete an obsolete submittal schedule that required sources to submit emergency abatement plans by April 20, 1972. Language was also added to the regulation to require owners or operators of a source to submit a plan within 30 days of a request for such a plan by the director of the Division of Environmental Management. 2D.0304 was first federally approved on May 31, 1972 (37 FR 10084), and subsequently revised twice, with the latest revision being approved on October 11, 1985 (50 FR 41501).

Regulation 2D.0604, Sources Covered by Implementation Plan Requirements, has been amended to delete an obsolete exemption provision that allowed sources with an approved emissions monitoring system purchased before September 11, 1974, to use that system until April 18, 1982, instead of meeting the new requirements that were adopted

in 1974. 2D.0604 was first federally approved on April 18, 1977 (42 FR 20133), and was revised once, on October 11, 1985 (50 FR 41501).

Regulation 2D.0608, Program Schedule, was amended to delete an obsolete schedule that required sources to submit programs for complying with self-monitoring requirements by October 15, 1976. 2D.0608 was first federally approved on April 18, 1977 (42 FR 20133), and revised once; the revision was approved on October 11, 1985 (50 FR 41501).

Regulation 15 NCAC 2D.0606, Other Coal or Residual Oil Burners, was amended to correct a cross-reference in the statutory authority. 2D.0606 was first federally approved on April 18, 1977 (42 FR 20133), and revised twice, with the latest revision being approved on November 19, 1986 (51 FR 41786).

The preceding amendments are very minor in scope and are of a bookkeeping nature. Consequently, EPA views these regulatory changes as approvable for amendments to the SIP for North Carolina.

Section 111(d) Plan Amendments

Regulation 15 NCAC 2D.0528, Total Reduced Sulfur from Kraft Pulp Mills, was first approved as part of North Carolina's 111(d) Plan for Designated Facilities and Pollutants on July 8, 1983 (48 FR 31407) and amended on July 18, 1986 (51 FR 41788). The original plan contained a compliance schedule which called for final compliance for affected facilities by December 1, 1985. This compliance schedule is now obsolete and consequently is being removed. 2D.0528 is also being amended to make a minor spelling correction.

Regulation 15 NCAC 2D.0529, Fluoride Emissions from Primary Aluminum Reduction Plants, was first federally approved as part of North Carolina's 111(d) plan on December 29, 1981 (46 FR 62852) and amended on July 18, 1986 (51 FR 41788). The original rule contained a compliance schedule which called for final compliance by June 1, 1983. This schedule, which is now obsolete, has been removed. 2D.0529 has also been amended to correct a cross-reference.

The preceding amendments to 2D.0528 and 2D.0529 are minor changes of a bookkeeping nature. Consequently, EPA views these regulatory changes as approvable for amendments to the 111(d) Plan for North Carolina.

EPA is publishing this action without prior proposal because the Agency views it as a noncontroversial amendment and anticipates no adverse comments. This action will be effective February 10, 1989, unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted.

If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective February 10, 1989.

Final Action

In view of the minor nature of the previously discussed regulatory changes, EPA is today approving the changes to Regulations 15 NCAC 2D.0103, 2D.0304, 2D.0604, 2D.0606, 2D.0608, 2D.0607, 2D.0528, and 2D.0529.

Under 5 U.S.C. section 605(b), I certify that these revisions will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 10, 1989. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

BILLING CODE 6560–50–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6818]

List of Communities Eligible for the Sale of Flood Insurance; Florida et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain floodplain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The dates listed in the third column of the table.

ADDRESS: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 457, Lanham, Maryland 20706. Phone: (800) 638–7418.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646–2717. Federal Center Plaza, 500 C Street, Southwest, Room 416, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local floodplain management measurements aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the last column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that the delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance."

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance and floodplains.

PART 64—[AMENDED]

1. The authority citation for Part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*, Reorganization Plan No. 3 of 1978, E.O. 12127.

2. Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 64.6 List of Eligible Communities.

State and location	Community No.	Effective dates of authorization/cancellation of sale of flood insurance in community	Current effective map date
Florida: Hernando County, Unincorporated Areas	120110	Aug. 27, 1974, Emerg.; Apr. 17, 1984, Reg.; Sept. 30, 1988, Susp.; Oct. 25, 1988, Rein.	4–17–84

Proposed Rules

Federal Register
Vol. 53, No. 238
Monday, December 12, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 301

[Docket No. 88-197]

Interstate Movement of Citrus Fruit and Calamondin and Kumquat Plants From Florida

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of reopening and extension of comment periods.

SUMMARY: We are reopening and extending the comment periods for two documents: (1) A proposal to revise the "Citrus Canker" regulations and (2) an interim rule that amended the nursery inspection provisions of those regulations. Extending these comment periods will give interested persons additional time to prepare comments.

DATE: Consideration will be given only to written comments that are postmarked or received on or before December 27, 1988.

ADDRESSES: Send an original and two copies of written comments to Regulatory Analysis and Development, APHIS, USDA, Room 728 Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please specify the document to which your comments are addressed, that is, either Docket 88–105 or Docket 88–180. Comments received may be inspected at USDA, 14th and Independence Avenue, SW., Room 1141, South Building, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Eddie W. Elder, Chief Operations Officer, Domestic and Emergency Operations, PPQ, APHIS, USDA, Room 661, Federal Building, 6505 Belcrest Rd., Hyattsville, MD 20782; 301–436–6365.

SUPPLEMENTARY INFORMATION: On October 21, 1988, we published in the **Federal Register** (53 FR 41538–41549, Docket 88–105) a proposal to revise the "Citrus Canker" regulations, contained in 7 CFR Part 301, Subpart 301.75. Comments on the proposal were to be postmarked or received on or before November 21, 1988. On November 8, 1988, we published in the **Federal Register** (53 FR 45071–45073, Docket 88–180) an interim rule that amended the nursery inspection provisions of the "Citrus Canker" regulations. Comments on this docket also were to be postmarked or received on or before November 21, 1988.

In response to a request from a commenter, we are reopening the comment period for our proposed rule, Docket 88–105. In conjunction with this action, we are also reopening the comment period for Docket 88–180. We will consider all written comments on these dockets that are postmarked or received on or before December 27, 1988. The new deadline will give interested persons additional time to prepare comments.

Done in Washington, DC, this 7th day of December, 1988.

Larry B. Slagle,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 88–28515 Filed 12–9–88; 8:45 am]

BILLING CODE 3410–34–M

Agricultural Marketing Service

7 CFR Part 971

[FV–89–007]

Lettuce Grown in Lower Rio Grande Valley in South Texas; Proposed Amendment to Continuing Handling Regulation To Authorize a New Container and Change the Effective Period

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would authorize a new carton for shipping South Texas lettuce and change the beginning of the effective period of the handling regulation from December 1 to November 15. The intent of these actions is to meet the industry's need for a container of the proper dimensions for palletization and to make the effective period of the handling regulation coincide with the shipping season.

DATE: Comments must be received by January 11, 1989.

ADDRESS: Interested persons are invited to submit written comments concerning this proposal to: Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2085–S, Washington, DC 20090–6456. Three copies of all written material shall be submitted, and they will be made available for public inspection at the office of the Docket Clerk during regular business hours. All comments should reference the date and page number of this issue of the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Todd A. Delello, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone (202) 475–5610.

SUPPLEMENTARY INFORMATION: This rule is proposed under Marketing Agreement No. 144 and Marketing Order No. 971 (7 CFR Part 971), as amended, regulating the handling of lettuce grown in the Lower Rio Grande Valley in South Texas. The agreement and order are authorized by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 through 674), hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposal on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 10 handlers of South Texas lettuce subject to regulation under the marketing order, and approximately 30 producers in the production area. The Small Business

Administration (13 CFR 121.2) has defined small agricultural producers as those having annual gross revenue for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of South Texas lettuce may be classified as small entities.

As of October 14, 1988, estimated South Texas lettuce acreage planted was 1,086 acres compared to 476 acres at the same time in 1987. Total plantings for the 1988–89 season are expected to approximate 2,500 acres, which is up considerably from last year's total of 1,629 acres. Total shipments of South Texas lettuce for the 1987–88 crop were approximately 738,000 cartons. Total shipments for the 1988–89 crop are projected by the committee at 750,000 cartons. The majority of the crop is shipped to the fresh markets, with only a small volume utilized by processors.

The handling requirements for South Texas lettuce are specified in § 971.322 (51 FR 2, January 2, 1986). The current requirements for South Texas lettuce specify the inside dimensions of the four containers that may be used to pack lettuce and the number of heads that may be packed per container. Additionally, inspection is required and packaging lettuce on any Sunday or on Christmas Day is prohibited.

This proposed rule would authorize a new container for shipping South Texas lettuce and change the beginning of the effective period for the handling regulation for December 1 to November 15. These changes were unanimously recommended by the South Texas Lettuce Committee.

The four containers currently authorized under the handling regulation do not have the correct dimensions necessary to be properly stacked on pallets. The recommended new container, with inside dimensions of 23¼ inches (length) × 15¼ inches (width) × 10⅜ inches (depth), is of proper size to be palletized. The dimensions of a standard pallet are 48 inches (length) × 40 inches (width). The recommended container would be stacked in layers of five on the pallet and 100 percent pallet utilization would be possible when using such container.

The majority of lettuce shipped from California and Arizona, the top two lettuce producing States, is shipped on pallets. The use of pallets reduces the handling of individual containers, which in turn reduces damage caused by excessive handling and reduces handling costs. Palletized loads are preferred by produce warehouses and retail outlets because of the ease of loading and unloading palletized merchandise by fork lifts and pallet jacks. Authorizing a container of the correct size to be palletized should facilitate the efficient movement of lettuce from the packinghouse to the consumer.

The use of this container would enable lettuce shippers to take advantage of the benefits derived by the use of pallets. Texas lettuce shippers would also be able to fill orders for palletized loads and compete with California and Arizona shippers for this market. The proposed container is designated as carrier container No. 79–47, which is consistent with the manufacturers identification number. In addition, the proposed regulation would require that only 18, 24, or 30 heads of wrapped and unwrapped lettuce may be packed in this container. Packing 24 or 30 heads of lettuce in the proposed container is the industry norm. However, the committee believes it is necessary to include the 18-count limit to allow for packing larger heads of lettuce.

In recent years, the shipping season for South Texas lettuce has begun in late November rather than early December. This shift has been caused by changes in cultural practices, such as the use of black plastic and the transplanting of seedlings. The committee has recommended that the beginning of the effective period for the handling regulation be changed from December 1 to November 15 wo that it will coincide with the shipping season. This action will ensure the uniform application of marketing order requirements to all shipments of South Texas lettuce.

Based on the above, the Administrator of AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

A 30-day comment period is provided to allow interested persons sufficient time to respond to this proposal. All written comments timely received will be considered before a final determination is made on this matter.

List of Subjects in 7 CFR Part 971

Marketing agreements and orders, Lettuce, South Texas.

For the reasons set forth in the preamble, it is proposed that 7 CFR Part 971 be amended as follows:

PART 971—LETTUCE GROWN IN LOWER RIO GRANDE VALLEY IN SOUTH TEXAS

1. The authority citation for 7 CFR Part 971 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31 as amended; 7 U.S.C. 601–674.

2. Section 971.322 is amended by revising the introductory text, redesignating paragraphs (a)(4) and (a)(5) as (a)(5) and (a)(6), respectively, and adding new paragraphs (a)(4) and (b)(3) to read as follows:

§ 971.322 Handling regulation.

During the period beginning November 15 and ending March 31 each season, no person shall handle any lot of lettuce grown in the production area unless such lettuce meets the requirements of paragraphs (a), (b), and (c) of this section, or unless such lettuce is handled in accordance with paragraph (d) or (e) of this section. Further, no person may package lettuce during the above period on any Sunday, or on Christmas Day unless approved in accordance with paragraph (f) of this section.

(a) * * *

(4) Cartons with inside dimensions of 10⅜ inches × 15¼ inches × 23¼ inches (designated as carrier container No. 79–47), or

* * * * *

(b) * * *

(3) Lettuce heads in carrier container No. 79–47 may be packed only 18, 24, or 30 heads per container.

Dated: December 7, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410–02–M

NUCLEAR REGULATORY COMMISSION

10 CFR Ch. I

Policy Statement on Exemptions From Regulatory Control

AGENCY: Nuclear Regulatory Commission.

ACTIONS: Advance notice of proposed statement and meeting.

SUMMARY: The NRC is in the process of developing a broad policy on exemptions from regulatory control for practices whose health and safety impacts could be considered below regulatory concern. This policy statement would provide for more efficient and consistent regulatory actions in connection with exemptions from various specific Commission requirements. The Commission, in formulating this Advance Notice, is seeking public input on some specific

questions which are key considerations in developing such a policy. The NRC staff will conduct a meeting to inform the public of its intentions, specifically to clarify and answer questions concerning the advance notice, and to hear preliminary views concerning a policy for exemptions with emphasis on the specific questions raised by the Commission.

DATES: Meeting to be held on January 12, 1989. Written comments should be submitted by January 30, 1989. Comments received after this date will be considered if it is practical to do so, but assurance of consideration can only be given as to comments received on or before this date.

ADDRESSES: Meeting will be held at the Holiday Inn, 8120 Wisconsin Avenue, Bethesda, MD 20814 (4 blocks north of the Bethesda Metro Station). Telephone: (301) 652–2000, 1–800–465–4329. Mail written comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC, 20555, Attention: Docketing and Service Branch. Comments may be delivered to 11555 Rockville Pike, Rockville, MD between 7:30 a.m. and 4:15 p.m. weekdays. Copies of the comments received may be examined and copied for a fee at the NRC Public Document Room at 2120 L Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Catherine R. Mattsen, telephone (301) 492–3638, or William R. Lahs, telephone (301) 492–3774, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC, 20555.

SUPPLEMENTARY INFORMATION:

International Workshop

In addition to conducting this public meeting, the Commission has sought input from the international regulatory community through an international workshop on exemptions from regulatory control which was held October 17–19, 1988 in Washington, DC. The importance of such interaction stems from the fact that many existing and potential exemptions involve radioactive materials purposefully used in consumer products or introduced into various products or materials through the recycling of contaminated scrap, either of which may enter international trade. Even effluents and waste disposal can involve exposures to people in countries other than those from which the effluent or waste originated. This aspect is a significant issue in the European community. Thus, some degree of consistency internationally is desirable, since exemption decisions can affect populations outside each country's border. It is hoped that exchanges of ideas and information such as occurred at the international workshop will, besides providing one avenue of input to the Commission's actions, lead toward a greater degree of consistancy in such exemptions world-wide. At the international workshop, the "Advance Notice of the Development of a Commission Policy on Exemptions from Regulatory Control for Practices Whose Public Health and Safety Impacts are Below Regulatory Concern", presented in this notice, was made available for discussion. The transcript of the international workshop which includes all the papers presented at the meeting may be examined and copied for a fee at the NRC Public Document Room at 2120 L Street, NW., Washington, DC.

Advance Notice of the Development of a Commission Policy

Introduction and Purpose

Over the last several years, the Commission has become increasingly aware of the need to provide a general policy on the appropriate criteria for release of radioactive materials from regulatory control. To address this need, the Commission is expanding upon its existing policy for protection of the public from radiation, currently expressed in existing regulations (Title 10, Code of Federal Regulations) and policy statements (30 FR 3462, Use of Byproduct Material and Source Material, dated March 16, 1965; 47 FR 57446, Licensing Requirements for Land Disposal of Radioactive Waste, dated December 27, 1982; and 51 FR 30839, General Statement of Policy and Procedures Concerning Petitions Pursuant to § 2.802 for Disposal of Radioactive Waste Streams Below Regulatory Concern, dated August 29, 1986). The expansion includes the development of an explicit policy on the exemption from regulatory control of practices whose public health and safety impacts are below regulatory concern. A practice is defined in this policy as an activity or a set or combination of a number of similar sets of coordinated and continuing activities aimed at a given purpose which involve the potential for radiation exposure. Under this policy, the definition of "practice" is a critical feature which will assure that the formulation of exemptions from regulatory control will not allow deliberate dilution of material or fractionation of a practice for the purpose of circumventing controls that would otherwise be applicable.

The purpose of this policy statement is to establish the basis upon which the Commission may initiate the development of appropriate regulations or make licensing decisions to exempt from regulatory control persons who receive, possess, use, transfer, own, or acquire certain ratioactive material. This policy is directed principally toward rulemaking activities, but may be applied to license amendments or license applications involving the release of licensed radioactive material either to the environment or to persons who would be exempt from Commission regulations. It is important to emphasize that this polciy does not assert an absence or threshold of risk but rather establishes a baseline where further government regulations to reduce risks is unwarranted.

The concept of regulatory exemptions is now new. For example, in 1960 and 1970, the Commission promulgated tables of exempt quantities and concentrations for radioactive material which a person, under certain circumstances, could recieve, possess, use, transfer, own, or acquire without a requirement for a license (25 FR 7875; August 17, 1960 and 35 FR 6426; April 22, 1970). Other exemptions allowing distribution of consumer products or other devices to the general public, or allowing releases of radioactive material to the environment, have been embodied in the Commission's regulations for some time. More recently, the Low Level Radioactive Waste Policy Amendments Act of 1985 directed the Commission to develop standards and procedures for expeditious handling of petititons to exempt from regulation the disposal of slightly contaminated radioactive waste material that the Commission determined to be below regulatory concern. The Commission responded to this legislation by issuing a policy statement on August 29, 1986 (51 FR 30839). That statement contained criteria which, if satisfactorily addressed in a petition for rulemaking, would allow the Commission to act expeditiously in proposing appropriate regulatory relief on a "practice-specific" basis consistent with the merits of the petition.

The Commission believes that these "practice-specific" exemptions should be encompassed within a broader NRC policy which defines levels of radiation risk below which specified practices would not require NRC regulation based on public health and safety interests. For such exemption practices, the Commission's regulatory involvement could therefore be essentially limited to licensing, inspection, and compliance activities associated with the transfer of

the radioative material from a controlled to an exempt status.

The Commission recognizes that, if a national policy on exemptions from regulatory control is to be effective, Agreement States will pay an important implementation role. In the past, States have been encouraging findings that certain wastes are below regulatory concern and the Commission believes that States will support an expansion of these views to all practices involving exempt distribution or release of radioactive material. The Commission intends that rulemakings codifying regulatory control exemptions will be made a matter of compatibility for Agreement States. Consequently, any rulemakings that evolve from this policy will be coordinated with the States.

Advisory and scientific bodies have offered diverse views to the Commission in anticipation of this Policy Statement. There is not clear consensus based on existing scientific evidence or research regarding the selection of numerical criteria for use in this Policy Statement. Further, the Commission is aware that there are differing views within the NRC staff on the selection of numerical criterial for BRC.

In the absence of a scientific consensus, it is the Commission's task to assess the diversity of views in establishing a responsible BRC policy. The authority and responsibility to make the final selection of criteria rests with the Commission. Criteria selected must: (1) Provide reasonable assurance that public health and safety will be protected, and (2) consistent with such assurance, permit practices in the public domain which involve the use of radioisotopes for which society perceives a demand.

It is recognized that there is a delicate balance here. Criteria can be set sufficiently restrictive such that there is absolute assurance that health and safety will always be protected, no matter what events might transpire. However, in doing so, the regulator may then place undue and unnecessary restrictions on practices which should be permitted because of otherwise reasonable social, economic, or industiral considerations. There is always the danger of over-regulation which results in effects that are felt in areas where the NRC does not have authority and responsibility. Moreover, the Atomic Energy Act does not require absolute assurances of safety in the use of radioactive material and licensed facilities.

The numerical criteria ultimately selected will have significant impact on nuclear regulation here in the United States and potentially in the international community. The values under consideration in this Policy Statement do not necessarily agree with those selected or under consideration by other countries. The Commission has carefully reviewed those alternate criteria, and does not find significant scientific evidence that would dictate preferential selection of any of those views over what is proposed in this Policy Statement.

Radiation Protection Principles

The Commission recognizes that three fundamental principles of radiation protection have historically guided the formulation of a system of dose limitation to protect workers and the public from the potentially harmful effects of radiation. They are: (1) Justification of the practice, which requires that there be some net benefit resulting from the use of radiation or radioactive materials, (2) dose limits, which define the upper boundary of adequate protection for a member of the public which should not be exceeded in the conduct of nuclear activities, and (3) ALARA, which requires that radation dose be as low as is reasonably achievable, economic and social factors being taken into account. The term, ALARA, is an acronym for As Low As is Reasonably Achievable. The Commission is interested in assessing how these principles should be applied in establishing appropriate criteria for release of radioactive materials from regulatory control.

Because of the absence of observed health effects below 5 rem/year (50 mSv/year), scientific experts including the International Commission on Radiological Protection (ICRP) and the National Council on Radiation Protection and Measurements (NCRP) make the assumption that the frequency of occurrence of health effects per unit does at low dose levels is the same as at high doses (10 RAD (0.1 Gy)) where health effects have been observed and studied in humans and animals. This linear non-threshold hypothesis assumes that the risk of radiation induced effects (principally cancer) is linearly proportional to dose, no matter how small the dose might be. The coefficient used in the model as a basis for estimating statistical health risk is on the order of 2×10^{-4} risk of fatal cancer per person-rem of radiation does (2×10^{-2} per SV). The Commission recognizes that it is a conservative model based upon data collected at relatively high doses and dose rates which is then extrapolated to the low dose and dose rate region where there are no statistically reliable epidemiological data available. Alternative hypotheses have been proposed and reevaluations of the data base at higher doses continue. The Commission believes that use of the linear non-threshold hypothesis allows the theoretical establishment of upper limits on the number of heatlh effects that might occur at very low doses which are the subject of the exemption policy.

The risk of death to an individual, as calculated using the linear model, is shown in Table 1 for various defined levels of individual dose. A radiation exposure of 10 mrem per year (0.1 mSv per year) for a lifetime corresponds theoretically to an increase of 0.1% of the individual's annual risk of cancer death. The lifetime risk is based upon the further assumption that the exposure level is the same for each year of a 70-year lifetime.

In estimating the dose rates to members of the public that might arise through the use of various practices for which exemptions are being considered, the Commission has decided to apply the concept of the "effective dose equivalent." This concept, which is based on a comparison of the delayed mortality effects of ionizing radiation exposures, permits through use of weighting factors, the calculation of the whole body dose equivalent of partial body exposures. This approach was originally developed by the International Commission on Radiological Protection and was first expressed in its Publication 26 issued in 1977. Since that time, the concept has been reviewed and evaluated by radiation protection organizations throughout the world and has gained wide acceptance.

TABLE 1 [1]

Incremental annual dose	Incremental annual risk	Lifetime risk from continuing annual dose
100 mrem [3]	$2X10^{-5}$	$1X10^{-3}$
10 mrem [2]	$2X10^{-6}$	$1X10^{-4}$
1 mrem	$2X10^{-7}$	$1X10^{-5}$
0.1 mrem	$2X10^{-8}$	$1X10^{-6}$

[1] Risk coefficient of $2X10^{-4}$ per rem ($2X10^{-2}$ per Sv) based upon publications of the ICRP.

[2] For purposes of comparison, the annual risk to an individual of dying from cancer from all sources in the U.S. is 1 in 500. The additional risk to an individual of dying from cancer when exposed to 10 mrem (0.1 mSv) is 2 in one million.

[3] Unless otherwise indicated, the expression of dose in mrem refers to the Total Effective Dose Equivalent. This term is the sum of the deep dose equivalent for sources external to the body and the committed effective dose equivalent for sources internal to the body.

The Commission recognizes that it is impossible to measure risk to individuals or populations directly, and,

that in most situations, it is impractical to measure annual doses to individuals at the low levels implied by exemption decisions. Typically, radioisotope concentrations or radiation levels from the material to be exempted are the actual measurements that can be made, and doses are then estimated by exposure pathway analysis combined with other types of assumptions related to the ways in which people might become exposed. Under such conditions, conservative assumptions are frequently used in modeling so that the actual dose is on the low side of the calculated dose. The Commission believes that this is the appropriate approach to be taken when determining if an exemption from regulatory controls is warranted.

Collective dose is the sum of the individual doses resulting from a practice or source of radiation exposure. By assigning collective dose a monetary value, it can be used in cost benefit and other quantitative analysis techniques. It is a factor to consider in balancing benefits and societal impact.

Considerations in Granting Exemptions From Regulatory Control

The following elements are being considered by the Commission as a basis for evaluating practices which are proposed to be exempt from regulatory control. These practices, if approved, would result in products containing low levels of radioactive material being distributed to the general public and radioactive effluents and solid waste being released to areas of the publicly-accessible environment.

• Justification—The Commission seeks comment on the extent to which exposures resulting from any practice should be justified. As lower levels of radiation exposure are projected, should lower levels of benefit be required for practice justification? In establishing its exemption policy, should the Commission exclude certain practices for which there appears to be no reasonable justification? In considering proposals for exemptions, should the Commission evaluate the social acceptability of practices? Should the Commission determine a practice to be unjustified if nonradioactive economical alternatives exist?

• Dose Limits and Criterion—Individual doses from practices exempted under this policy should not be allowed to exceed 100 mrem per year (1 mSv per year). This is the dose limit for members of the public specified in the final revision of 10 CFR Part 20, Standards for Protection Against Radiation. The dose limits in the final revision of 10 CFR Part 20 apply to all sources of radiation exposure under a licensee's control (natural background and medical exposures are excluded). Because of the small risks involved, a 10 mrem (0.1 mSv) individual dose criterion is proposed as the basis for exemption decisions based on simple analysis and judgements. The Commission specifically seeks comment on the need for establishing a collective dose limit in addition to an individual dose criterion. If such a collective dose criterion is needed, what is the basis for this need? If the Commission decides that a collective dose criterion is needed, what approaches allowing truncation of individual dose in calculation of collective dose or weighting factors for components of collective dose would be appropriate? What alternatives should be considered for assessing societal impact?

• ALARA—The ALARA principle generally applies to determining dose levels below which exemptions may be granted on a cost-benefit basis. However, it is the purpose of this policy to establish criteria which would, in effect, delineate achievement of ALARA without cost-benefit analysis.

Although it is possible to reasonably project what the dose will be from a practice, and then take this information into account in controlling regulated practices so that the dose limits are not exceeded, exemptions imply some degree of loss of control. The Commission believes that a key consideration in establishing a policy for exemptions, and subsequently in specific rulemaking or licensing decisions, is the question of whether individuals may experience radiation exposure approaching the limiting values through the cumulative effects of more than one practice, even though the exposures from each practice are only small fractions of the limit. The Commission specifically seeks comment on the issue. By appropriate choices of exemption criteria and through its evaluations of specific exemption proposals in implementing the policy, the Commission intends to assure that it is unlikely that any individual will experience exposures which exceed the 100 mrem per year (1 mSv per year) limit.

Principles of Exemption

A major consideration in exempting any practice from regulatory control hinges on the general question of whether or not application or continuation of regulatory controls are necessary and cost effective in reducing dose. To determine if exemption is appropriate, the Commission must determine if one of the following conditions is met:

1. The application or continuation of regulatory controls on the practice does not result in any significant reduction in the dose received by individuals within the critical group and by the exposed population or;

2. The costs of the regulatory controls that could be imposed for dose reduction are not balanced by the commensurate reduction in risk that could be realized.

For purposes of implementing its policy, the Commission recognizes that only under unusual circumstances would practices which cause radiation exposures approaching the 100 mrem per year (1 mSv per year) limit be considered as candidates for exemption. The Commission will consider such circumstances on a case specific basis using the general principles outlined in this policy statement. However, as the doses and attendant risks to members of the exposed population decrease, the need for regulatory controls decreases and the analysis needed to support a proposal for exemption can reasonably be somewhat simplified.

The Commission is evaluating the use of two numerical criteria in defining the region where ALARA has been achieved. They are: (a) A criterion for the maximum individual annual dose reasonably expected to be received as a result of the practice and (b) a measure of societal impact to the exposed population. These criteria are being considered to assure that, for a given exempted practice, no individual will be exposed to a significant risk and that the population as a whole does not suffer a significant impact.

If the individual doses from a practice under consideration for exemption are sufficiently small, the attendant risks will be small compared with other societal risks. The Commission believes that annual individial fatality risks below approximately 10^{-5} (one in 100,000) are of little concern to most members of society. Providing for some margin below this level, the Commission proposes 10 mrem (0.1 mSv) as the level of annual individual exposure. The incremental annual individual cancer fatality risk associated with an exposure level of 10 mrem per year (0.1 mSv per year) is about 2×10^{-6} (two in one million) as indicated in Table 1 and of the order of 0.1 percent (one in one thousand) of the overall risk of cancer death.

In evaluating the need for a collective dose criterion, the Commission recognizes that this criterion could be the limiting consideration for practices involving very small individual doses to very large numbers of people. It is also

recognized that in such cases the collective dose criterion would, in effect, apply the ALARA concept to individual doses less than the below regulatory concern level of 10 mrem per year to the individual. Conversely, where the collective dose criterion would not be limiting, it would serve no purpose. The Commission requests comments on this issue, including comments on what the magnitude of the collective dose criterion, if any, should be.

If the dose is less than the below regulatory concern criteria, then the risk from a practice would be considered to be ALARA without further analysis. The Commission stresses that adoption of the criteria should not be construed as a decision that smaller doses are necessary before a practice can be exempted, while doses above the criteria would preclude exemptions. On the contrary, the criteria simply represent a range of risk which the Commission believes is sufficiently small compared to other individual and societal risks that a cost benefit analysis is not required in order to make a decision regarding the acceptability of an exemption. Practices not meeting these criteria may be granted exemptions on a case-by-case basis in accordance with the principles embodied within this policy. To further emphasize the Commission's recognition that a rigid limitation on collective dose would be inappropriate, it notes that for some practices, such as use of smoke detectors, appreciable benefits can only be attained through extensive utilization and, hence, with a commensurate collective dose.

The Commission is aware that existing regulations of the Environmental Protection Agency establish criteria more restrictive than exemptions which could otherwise be granted under this proposed policy. With regard to its own regulations, the Commission will evaluate whether there are exemption criteria embodied therein for which modification, according to the principles of this policy, would be beneficial.

Exclusions From Exemptions

The Commission's March 16, 1965, notice on the Use of Byproduct Material and Source Material-Products Intended for use by General Public (Consumer Products) (30 FR 3462) provides the basis for the Commission's approval of the use of these materials in consumer products without regulatory control on the consumer-user. This is accomplished by case-by-case exemption of the possession and use of approved items from applicable licensing requirements. Approval of a proposed consumer product depends upon an assessment of exposures of persons to radiation as well as an evaluation of the usefulness of the product.

Certain practices involving radiation or radioactive materials have been judged by NRC to be socially unacceptable regardless of how trivial the resulting dose might be and, therefore, have been excluded from exemption. Excluded practices include, but are not limited to, the intentional introduction of radioactive material into toys and products intended for ingestion, inhalation or direct application to the skin (such as cosmetics).

In addition to socially unacceptable uses of radioactive materials, a question also arises regarding uses where there are clear economical alternatives, and no unique benefits exist from using radioactive material. Where risks are trivial, the regulatory prohibition of such uses could pose an unnecessary regulatory burden by interfering with the conduct of business.

The Commission seeks comments on whether practices should be categorically excluded based on the Commission's judgement regarding social acceptability or the existance of alternatives. An alternative to categorical exclusion could be a case specific determination based on a safety analysis.

Proposals for Exemption

A proposal for exemption must provide a basis upon which the Commission can determine if the basic conditions described above have been satisfied. In general, this means that the proposal should address the individual dose and societal impact resulting from the expected activities under the exemption, including the use of the radioactive materials, the pathways of exposure, the levels of activity, and the methods and constraints for assuring that the assumptions used to define a practice remain appropriate as the radioactive materials move from regulatory control to an exempt status.

If a proposal for exemption results in a rule containing generic requirements, a person applying to utilize the exemption would not need to address justification or ALARA. The Commission decision on such proposals will be based on the licensee's meeting the conditions specified in the rule. The promulgation of the rule would, under these circumstances, constitute a finding that the exempted practice is justified, and that ALARA considerations have been dealt with. This approach is consistent with past practice, e.g., consumer product rules in 10 CFR Part 30.

In evaluating proposals for exemption under this policy, the projected exposures to different components of the exposed population will be considered with regard to the potential that some individuals may receive doses near the 100 mrem per year (1 mSv per year) limit when doses from other practices are also taken into consideration. If exposures from multiple practices can occur which are significantly beyond the individual dose criterion (10 mrem per year (0.1 mSv per year)), the exemption will not be granted without further analysis. As experience is gained, this policy and its implementation will be reevaluated with regard to this issue to assure that the exposures to the public remain well below 100 mrem per year (1 mSv per year).

In addition to considerations of expected activities and pathways, the Commission recognizes that consideration must also be given to the potential for accidents and misuse of the radioactive materials involved in the practice. A proposal for exemption of a defined practice must therefore also address the potentials for accidents or misuse, and the consequences of these exceptional conditions in terms of individuals and collective dose.

Verification of Exemption Conditions

The Commission believes that the implementation of an exemption under this broad policy guidance must be accompanied by a suitable program to monitor and verify that the basic considerations under which an exemption was issued remain valid. In most cases, the products or materials comprising an exempted practice will move from regulatory control to the exempt status under a defined set of conditions and criteria. The monitoring and verification program must therefore be capable of providing the Commission with the appropriate assurance that the conditions for the exemption remain valid, and that they are being observed. The Commission will determine compliance with the specific conditions of an exemption through its established licensing and inspection program and will, from time to time, conduct studies as appropriate to assess the impact of an exempted practice or combinations of exempted practices.

VOL 53 ISS 238 DE 12 1988 UMI

Tentative Meeting Agenda

I. Introduction and Summary-NRC Staff

II. Discussion of Specific Questions-Brief NRC Staff summary and presentations or questions from scheduled participants.

A. Application of principle of justification including the questions:

1. As lower levels of radiation exposures are projected, should lower levels of benefit be required for justification of a practice which is a candidate for exemption?
2. In establishing exemption policy, should the Commission exclude certain practices for which there appears to be no reasonable justification?
3. In considering proposals for exemption, should the Commission evaluate social acceptability of the practice?
4. Should the Commission determine a practice to be unjustified if non-radiological economical alternatives exist?

B. Individual dose criterion for determining achievement of the "as low as reasonably achievable" (ALARA) principle in exemption decision-making:

1. Is the 10 mrem/year criterion proposed by the Commission appropriate?
2. Is the appropriateness of this number affected by the decision regarding whether a collective dose criterion should be used with the individual dose criterion?
3. Should the individual dose criterion be chosen on the basis of negligible risk as is done internationally (i.e., IAEA Safety Series No. 89) or can a somewhat higher number be used based on a Commission policy decision regarding a level of individual risk for which expenditure of resources is not warranted?
4. How important is international consistency in choosing an individual dose criterion?

C. Use of a collective dose criterion for determining achievement of the ALARA principle in exemption decision-making:

1. Is a collective dose criterion needed in addition to an individual dose criterion?
2. If so, what is the basis of that need?
3. If the Commission decides a collective dose criterion should be used, what should its magnitude be?
4. What alternative to a collective dose criterion should be considered for assessing societal impact?
5. In calculating collective dose, what approaches allowing truncation of individual doses or the use of weighting factors for components of collective dose are appropriate?

D. Approaches for assuring total exposures of individuals from mutiple practices will not exceed the 100 mrem/year limit.

1. Is the approach of generally limiting individuals doses from each source or practice to a fraction of the overall limit appropriate?
2. Although most exempted sources would be expected to involve individual doses which are a small fraction of the overall limit, should flexibility be maintained by considering exemptions on a cost-benefit basis above 10 mrem/year?
3. Is the evaluation of collective dose important in considering the multiple exposure issue?
4. Will the application of justification of practice help to maintain a smaller number of sources making it easier to control overall exposures?
5. How important is monitoring to maintaining assurance that individual exposures do not exceed to the overall limit?

III. General Discussion/Question Period-Comments or questions by scheduled participants. Open to the floor as time permits.

Those members of the public who wish to participate by speaking at the meeting should notify one of the contacts listed above, so that they can be scheduled in the agenda.

Dated in Rockville, Maryland, this 2d day of December 1988.

Victor Stello, Jr.,

Executive Director for Operations.

BILLING CODE 7590-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 88-ASW-46]

Airworthiness Directives; Sikorsky Aircraft Model S-76 Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD) that would require a service life limit on the tail rotor horn on Sikorsky Model S-76 series helicopters. The proposed AD is needed to prevent a fatigue failure of the tail rotor horn which could result in loss of directional control of the helicopter and subsequent loss of the helicopter.

DATE: Comments must be received on or before January 11, 1989.

ADDRESSES: Comments on the proposal may be mailed in duplicate to: Rules Docket, Office of the Assistant Chief Counsel, FAA, Fort Worth, Texas 76193-0007, or delivered in duplicate to Office of the Assistant Chief Counsel, Room 158, Building 3B, 4400 Blue Mound Road, Fort Worth, Texas. Comments must be marked: Docket No. 88-ASW-46. Comments may be inspected at the above location between the hours of 8 a.m. and 4 p.m. weekdays, except Federal holidays.

A copy of the applicable service bulletin may be obtained from Sikorsky Aircraft, 600 Main Street, Stratford, Connecticut 06601-1381, or may be examined in the Regional Rules Docket, Office of the Assistant Chief Counsel, FAA, 4400 Blue Mound Road, Fort Worth, Texas.

FOR FURTHER INFORMATION CONTACT: Donald F. Thompson, Airframe Branch, ANE-152, Boston Aircraft Certification Office, New England Region, FAA, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone (617) 273-7113.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the FAA before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket, Office of the Assistant Chief Counsel, FAA, 4400 Blue Mound Road, Forth Worth, Texas, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: Comments to Docket No. 88-ASW-46. The postcard will be date/time stamped and returned to the commenter.

As a result of additional fatigue testing by Sikorsky, the FAA has determined that the Sikorsky Model S–76 series helicopter tail rotor horn, Part Number (P/N) 76101–05006, component has a limited service life. A tail rotor horn component fatigue failure could result in the loss of directional control of the helicopter. Since this condition is likely to exist or develop on Sikorsky Model S–76 series helicopters incorporating this design, the proposed AD would require a service life limit be placed on the tail rotor horn component on Sikorsky Model S–76 series helicopters.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this proposed regulation involves approximately 300 helicopters at an added cost of $16,000 each for every 12,000 flight hours or $1.33 each flight hour. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact, positive or negative, is so minimal; and (4) if promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the FAA proposes to amend § 39.13 of Part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new AD:

Sikorsky Aircraft: Applies to Model S–76 series helicopters certificated in any category that are equipped with tail rotor horn P/N 76101–05006.

Compliance is required as indicated, unless already accomplished.

To prevent possible fatigue failure of the tail rotor component, which could result in a reduction of directional control and hazardous tail rotor vibration in the helicopter, accomplish the following:

(a) Within the next 100 hours' time in service after the effective date of this AD or before the accumulation of 12,000 hours' time in service, whichever occurs later, replace the tail rotor horn, P/N 76101–05006, with a serviceable tail rotor horn that has not exceeded 12,000 hours' time in service. Thereafter, replace the tail rotor horn P/N 76101–05006, with a serviceable tail rotor horn before the accumulation of 12,000 hours' time in service:

(b) Operators who have not kept records of hours' time in service on individual tail rotor horn component parts must substitute the hours' time in service of the tail rotor blade bonded assembly, P/N 76101–05020 or P/N 76088–20077.

(c) For purposes of complying with this AD, the hours' time in service for the individual tail rotor horn and blade components that were not installed at the time of issuance of the initial rotorcraft airworthiness certificate must be determined from rotorcraft records.

(d) Upon request, an alternate means of compliance which provides a level of safety equivalent to the requirements of this AD may be used when approved by the Manager, Boston Aircraft Certification Office, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone (617) 273–7118.

(e) Upon submission of substantiating data by an owner or operator through an FAA maintenance inspector, the Manager, Boston Aircraft Certification Office, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone (617) 273–7118, may adjust the compliance time specified in this AD.

Issued in Fort Worth, Texas, on December 1, 1988.

L.B. Andriesen,

Manager, Rotorcraft Directorate, Aircraft Certification Service.

[FR Doc. 88–28432 Filed 12–9–88; 8:45 am]

BILLING CODE 4910–13–M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 101

Organization and Functions; Proposed Consolidation of Tampa, St. Petersburg, and Port Manatee, FL, for Marine Purposes

AGENCY: Customs Service, Treasury.

ACTION: Proposed limited consolidation of ports.

SUMMARY: This document proposes to amend the Customs Regulations to consolidate the ports of entry of Tampa, St. Petersburg, and Port Manatee, Florida, for marine purposes only. If adopted, this change would enable Customs to obtain more efficient use of its personnel, facilities and resources. It would eliminate duplication of port functions and permit better control of staffing resources without impairing services to area businesses or the general public. Moreover, it would simplify vessel entry and clearance procedures and reduce expenses and paperwork for all parties involved, thereby enabling Customs to provide better and more economical service to carriers, importers, and the public.

DATE: Comments must be received on or before February 10, 1989.

ADDRESS: Written comments (preferably in triplicate) may be addressed to the Regulations and Disclosure Law Branch, U.S. Customs Service, 1301 Constitution Avenue NW., Room 2119, Washington, DC 20229 (202–566–8237).

FOR FURTHER INFORMATION CONTACT: Joseph O'Gorman, Office of Inspection and Control, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229 (202–566–9425).

SUPPLEMENTARY INFORMATION:

Background

As part of a continuing program to obtain more efficient use of its personnel, facilities, and resources, and to continue to provide better service to carriers, importers, and the public, Customs proposes to consolidate the ports of entry of Tampa, St. Petersburg, and Port Manatee, Florida, located in the Tampa, Florida, Customs district in the Southeast Customs Region, for marine purposes only.

Because of the close proximity of the respective ports of entry in the Tampa Bay area, and the similar services performed, it was estimated that the proposed consolidation would significantly reduce costs without impairing Customs ability to provide services to area businesses and to the general public. Customs believes that the proposed consolidation will result in a more economical and efficient use of its personnel and resources in carrying out the Customs mission.

Under the present system, a vessel entering Tampa Bay and wishing to touch at more than one port must enter at the first port and obtain a permit to proceed to travel up the bay a short distance to the next port where it also must enter. This is an unnecessary documentation burden on both Customs

and the vessel operators. Under the proposed consolidation, each of the ports, Tampa, St. Petersburg, and Port Manatee, would retain its port code and geographic limits. Although each port would retain its identity, the 3 ports would be designated as a consolidated port in Tampa Bay for purposes of the vessel arrival, entry and clearance laws, which would benefit all the ports. It would not be necessary for vessels entering one of the consolidated ports to obtain a permit in order to proceed to another of the consolidated ports. The original vessels entry documentation would describe the ports which the vessel intended to touch and the cargo to be unladen at each location. In addition, vessel entry could be filed either at the port for which the cargo is destined or at the Tampa District office.

The 3 ports would be considered to be one port for the purposes of the navigation laws. All of the requirements prescribed by the navigation laws administered and enforced by Customs, such as reporting the arrival and making formal entry of vessels arriving at the consolidated marine port from a foreign or another U.S. port (depending upon the vessel's nationality) and obtaining a permit to proceed between the consolidated port and other U.S. ports, would have to be complied with, as is now the case in existing consolidated ports.

It is anticipated that the proposed consolidation will also result in reducing penalties incurred under the navigation laws if carriers fail to enter and properly clear merchandise being shipped in a residue cargo movement within the consolidated marine port, and will reduce paperwork for carriers, importers, and Customs.

If this proposal is adopted, there would be no change in the current geographic limits of each port. However, it will be necessary to amend the list of Customs regions, districts, and ports of entry set forth in § 101.3(b), to reflect the consolidation of these ports for the purposes of the navigation laws.

Executive Order 12291

Because this proposal relates to the organization of Customs, it is not a regulation or rule subject to E.O. 12291.

Regulatory Flexibility Act

It is certified that the provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604), are not applicable to this proposal because it will not have a significant economic impact on a substantial number of small entities.

Customs routinely establishes, expands, and consolidates Customs ports of entry throughout the United States to accommodate the volume of Customs-related activity in various parts of the country. Although the proposal may have a limited effect upon some small entities in the affected areas, it is not expected to be significant because changes in the Customs field organization in other areas have not had a significant economic impact upon a substantial number of small entities to the extent contemplated by the Act. Nor is it expected to impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

List of Subjects in 19 CFR Part 101

Customs duties and inspection, Exports, Imports, Organization and functions (Goverment agencies).

PART 101—GENERAL PROVISIONS

If the proposed consolidation of the ports of Tampa, St. Petersburg, and Port Manatee, Florida, for the purposes of the navigation laws, is adopted, the list of Customs regions, districts, and ports of entry in § 101.3(b), Customs Regulations (19 CFR 101.3(b)), will be amended as follows:

§ 101.3 [Amended]

In the Southeast Region-Miami, Fla., under the column headed "Name and headquarters," the following phrase would be added under the listing "Tampa, Fla." (The ports of Tampa, St. Petersburg, and Port Manatee, consolidated for purposes of the navigation laws. See T.D. 89– ____, 54 FR ____, 1989.)

The authority citation for Part 101 continues to read as follows:

Authority: R.S. 251, as amended, sec. 624, 46 Stat. 759, 77A Stat. 14, 79 Stat. 1317; 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. H'dnote. 11), 1624, Reorganization Plan of 1965; 3 CFR 1965 Supp.

Comments

Before adopting this proposal, consideration will be given to any written comments timely submitted to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations and Disclosure Law Branch, Room 2119, Customs Headquarters, 1301 Constitution Avenue NW., Washington, DC 20229.

Authority

This change is proposed under 19 U.S.C. 66 and 1624 as well as the authority vested in the President by section 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order 10289, September 17, 1951 (3 CFR 1949–1953 Comp., Ch. II), and pursuant to authority provided by Treasury Department Order No. 101–5 (47 FR 2449).

Drafting Information

The principal author of this document was Earl Martin, Regulations and Disclosure Law Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Michael H. Lane,

(Acting) Commissioner of Customs.

Approved: November 4, 1988.

Salvatore R. Martoche,

Assistant Secretary of the Treasury.

BILLING CODE 4820–02–M

Internal Revenue Service

26 CFR Part 1

[INTL–41–88]

Allocation and Apportionment of Deduction for State Income Taxes

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations portion of this issue of the **Federal Register**, the Internal Revenue Service is issuing temporary Income Tax Regulations relating to the allocation and apportionment of deductions for state income taxes in computing taxable income from sources inside and outside the United States. The text of those

temporary regulations also serves as the text for this Notice of Proposed Rulemaking.

DATES: Written comments and requests for a public hearing must be delivered or mailed by February 10, 1989. This regulation is proposed to be effective on the date that final regulations are published in the **Federal Register**.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:CORP:T:R (INTL–41–88), Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: David F. Chan of the Office of the Associate Chief Counsel (International), within the Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 (Attn: CC:CORP:T:R) (202–634–5404, not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The temporary Income Tax Regulations in the Rules and Regulations portion of this issue of the **Federal Register** supplement the Income Tax Regulations (26 CFR Part 1) under sections 861(b), 862(b), and 863(a) of the Internal Revenue Code. These temporary Income Tax Regulations add paragraph (e)(6) and examples (25) through (29) of paragraph (g) of § 1.861–8T. Paragraph (e)((6)(i) of § 1.861–8T as promulgated herein restates the previously promulgated general principle that state, local and foreign income, war profits and excess profits taxes are definitely related and allocable to the gross income with respect to which such taxes are imposed. Paragraph (e)(ii) of § 1.861–8T refers to five examples of the application of the principle in paragraph (e)(6)(i) and provides that methods other than those illustrated in the examples may be more appropriate in facts that differ from those in the examples. Paragraph (e)(6)(iii) of § 1.861–8T provides taxpayers with the option to apply the provisions of paragraph (e)(ii) of § 1.861–8T and examples (25) through (29) of paragraph (g) of § 1.861–8T to deductions for state tax incurred in taxable years beginning before January 1, 1988, which is the effective date of the temporary Income Tax Regulations. Paragraph (g) of § 1.861–8T restates and supplements the language preceding the examples in § 1.861–8(g), and adds examples (25) through (29) to provide five specific examples of the allocation and apportionment of the deduction for state income taxes.

Special Analyses

It has been determined that this proposed rule is not a major legislative regulation subject to Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required. Although this document is a notice of proposed rulemaking which solicits public comment, it has been concluded that the proposed regulations are interpretative and that the notice and public comment procedural requirements of 5 U.S.C. 553 do not apply. Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

Comments and Requests for a Public Hearing

Before adopting as final regulations these proposed regulations, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is to be held, notice of the time and place will be published in the **Federal Register**.

Drafting Information

The principal author of these regulations is David F. Chan of the Office of Associate Chief Counsel (International), within the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing these regulations.

List of Subjects in 26 CFR 1.861–1 Through 1.997–1

Income taxes, Aliens, Exports, DISC, Foreign investment in United States, Foreign tax credit, FSC, Sources of income, United States investments abroad.

Proposal of Regulations

The temporary Income Tax Regulations, FR DOC. [T.D. 8236], published in the Rules and Regulations portion of this issue of the **Federal Register** are hereby also proposed as final regulations under sections 861(b), 862(b), and 863(a) of the Internal Revenue Code.

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

Branch Tax; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to notice of public hearing on proposed regulations.

SUMMARY: This document contains a correction to a notice of a public hearing on proposed regulations relating to the branch tax. This regulation will provide immediate guidance to taxpayers concerning the imposition of tax on profits of a U.S. branch of a foreign corporation that are removed from the branch and on interest that is paid, or deemed paid, by the branch.

FOR FURTHER INFORMATION CONTACT: Angela D. Wilburn of the Regulations Unit, Assistant Chief Counsel (Corporate), Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224, telephone 202–566–3935, (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

On Tuesday, December 6, 1988, the **Federal Register** published a notice of public hearing on proposed regulations under section 884, as added to the Code by section 1241 of the Tax Reform Act of 1986. The notice of public hearing appeared in the **Federal Register** for Tuesday, December 6, 1988, at page 49208 (53 FR 49208).

Need for Correction

As published, the notice of public hearing contains an typographical error in the deadline date for submitting outlines of oral comments to be presented at the public hearing.

Correction of Publication

Accordingly, the publication of the notice of public hearing which was the subject of FR Doc. 88–28032 (53 FR 49208), is corrected as follows:

PARTS 1 AND 602—[AMENDED]

Par. 1. On page 49209, first column, sixth line from the top of the column should read, "January 3, 1989, an outline of the oral".

Dale D. Goode,

Chief, Regulations Unit, Assistant Chief Counsel (Corporate).

Treatment of Related Person Factoring Income; Certain Investments in United States Property; Stock Redemptions Through Related Corporations; and Definition of a Controlled Foreign Corporation and Foreign Personal Holding Company Income of a Controlled Foreign Corporation After December 31, 1986

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to the treatment of related person factoring income; the determination of the amount of earnings of a controlled foreign corporation invested in United States property; redemptions of stock through the use of related corporations; and, the definition of a controlled foreign corporation and the definitions of foreign base company income and foreign personal holding company income of a controlled foreign corporation for taxable years of foreign corporations beginning after December 31, 1986.

DATES: The public hearing will begin at 10:00 a.m. on Thursday, February 9, 1989, and continue, if necessary, at the same time on Friday, February 10, 1989. Outlines of oral comments must be delivered or mailed by Thursday, January 26, 1989.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, DC. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, Attn: CC:CORP:T:R (INTL-49-86 and INTL-362-88), Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Jackie Burgess or Carroll Field of the Regulations Unit, Assistant Chief Counsel (Corporate), Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224, telephone 202-566-3935 (not a toll-free call).

SUPPLEMENTARY INFORMATION: The subject of the public hearing relates to proposed regulations under sections 864 (d) and 956 (b) (3) on the treatment of related person factoring income; certain investments in United States property; stock redemptions through related corporations which were added to the Internal Revenue Code of 1954 by section 123 of the Tax Reform Act of 1984 (Pub. L. 98-369, 98 Stat. 644, 646) and amended by sections 1201 (d) (4), 1221 (a) (2), 1223 (b) (1), 1275 (c) (7) and 1810 (c) of the Tax Reform Act of 1986 (Pub. L. 99-514, 100 Stat. 2085, 2525, 2550, 2558, 2599, 2824).

On June 14, 1988, proposed and temporary regulations (T.D. 8209) interpreting sections 864 (d) and 956 (b) (2) of the Internal Revenue Code of 1986 were published in the **Federal Register** (53 FR 22186, 22163).

In addition, the subject of the public hearing relates to proposed regulations under sections 954 (b), 954 (c), and 957 (a), which were amended by sections 1201, 1221, 1222, and 1223 of the Tax Reform Act of 1986 (Pub. L. 99-514).

On July 21, 1988, proposed and temporary regulations (T.D. 8216) interpreting sections 954 (b), 954 (c), and 957 (a) were published in the **Federal Register** (53 FR 27532, 27489).

The rules of § 601.601 (a) (3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted comments within the time prescribed in the notices of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit, not later than Thursday, January 26, 1989, an outline of the oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

Dale D. Goode,

Chief, Regulations Unit, Assistant Chief Counsel (Corporate).

Capital Construction Fund; Extension of Comment Period

AGENCY: Maritime Administration, DOT.

ACTION: Proposed rulemaking; extension of comment period.

SUMMARY: This notice extends the comment period for a Notice of Proposed Rulemaking (NPRM) that MARAD has issued with respect to its Capital Construction Fund Program, 46 CFR Part 390 (Docket No. R-120) published October 31, 1988 (53 FR 43907). In view of the errors in the original publication of the NPRM and the subsequent correction of errors in the NPRM, MARAD believes that an extension of the comment period is warranted in order to allow more time for preparation of comments.

DATE: NPRM comment period expiration date is extended to January 3, 1989.

ADDRESSS: Submit comments to James E. Saari, Secretary, Maritime Administration, Room 7300, 400 Seventh Street, SW., Washington, DC 20590. The Maritime Administration requests that commenters submit five copies of their comments.

FOR FURTHER INFORMATION CONTACT: Jean E. McKeever, Chief, Division of Capital Assets Management, 400 Seventh Street, SW., Washington, DC 20590, Tel: (202) 366-1905.

Date: December 7, 1988.

By Order of the Maritime Administrator.
Approved:

James E. Saari,

Secretary, Maritime Administration.

49 CFR Part 173

[Docket No. HM-149F, Notice No. 88-9]

Exceptions for Specified Quantities of Radioactive Materials

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Notice of proposed rulemaking.

BEST COPY AVAILABLE

SUMMARY: RSPA proposes to renew for two years the exceptions (statutory exemptions) for specified quantities of radioactive materials found in 49 CFR 173.4, 173.421–1 and 173.421–2. This action is necessary to update the exceptions in these sections which permit the transportation by passenger-carrying aircraft of certain quantities of radioactive materials under the existing restrictions. Updating these exceptions will prevent the disruption of routine and ongoing shipments which have been made safely for 12 years under the existing exceptions. These materials do not present a significant hazard to passengers or crew on an aircraft.

DATE: Comments must be received on or before January 11, 1988.

ADDRESS: Address comments to Dockets Unit, Office of Hazardous Materials Transportation, (DHM–30), U.S. Department of Transportation, Washington, DC 20590. Comments should be submitted, when possible, in five copies and should identify the docket number. Persons wishing to receive confirmation of receipt of their comments should include a self-addressed, stamped postcard. The Dockets Unit is located in Room 8421 of the Nassif Building, 400 Seventh Street SW., Washington, DC 20590. Office hours are 8:30 a.m. to 5:00 p.m., Monday through Friday, except public holidays.

FOR FURTHER INFORMATION CONTACT: Ann Boylan, Standards Division, Office of Hazardous Materials Transportation, U.S. Department of Transportation, 400 Seventh Street SW., Washington, DC 20590. (202) 366–4488.

SUPPLEMENTARY INFORMATION: On May 1, 1987, RSPA published a final rule under Docket HM–149E (52 FR 15948). In that final rule, RSPA renewed for two years the exceptions (statutory exemptions) for specified quantities of radioactive materials found in 49 CFR 173.4, 173.421–1 and 173.421–2. This action was taken because the existing exceptions were due to expire on May 2, 1987.

In accordance with section 107 of the Hazardous Materials Transportation Act (HMTA) (49 U.S.C. 1806) governing exemptions, the exceptions provided in §§ 173.4, 173.421–1 and 173.421–2 are limited to two years unless reexamined and renewed. These exceptions expire on May 2, 1989. Historically, these exceptions have been issued and subsequently renewed under Docket HM–149. The legal background and regualtory history of these exceptions can be found in Docket HM–149C (46 FR 24184) published on April 30, 1981, and in preceding amendments dating back to April 17, 1975 (40 FR 17141).

In accordance with 49 CFR 106.13 and 49 U.S.C. 1806, RSPA is once again reexamining the provisions of the exceptions provided in §§ 173.4, 173.421–1 and 173.421–2 and proposes to extend the effective dates of these exceptions. Specifically, in §§ 173.4(b), 173.421–1(b)(2) and 173.421–2(d), the date "May 2, 1989" would be amended to read "May 2, 1991". These amendments would permit the continued transportation of specified quantities of radioactive material by passenger-carrying aircraft.

Administrative Notices

Executive Order 12291

The RSPA has determined that this rulemaking (1) is not "major" under Executive Order 12291; (2) is not "significant" under DOT's regulatory policies and procedures (44 FR 11034); (3) will not affect not-for-profit enterprises or small governmental jurisdictions; and (4) does not require an environmental impact statement under the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*). A regulatory evaluation is available for review in the Docket.

Executive Order 12612

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the proposed rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Impact on Small Entities

Based on limited information concerning the size and nature of entities likely to be affected by this proposed rule, I certify that the regulations proposed herein would not, if adopted, have a significant economic impact on a substantial number of small entities.

List of Subjects in 49 CFR Part 173

Hazardous materials transportation, Packaging and containers.

In consideration of the foregoing, Part 173 of Title 49 of the Code of Federal Regualtions would be amended as follows:

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

1. The authority citation for Part 173 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1806, 1807, 1808; 49 CFR Part 1, unless otherwise noted.

§ 173.4 [Amended]

2. In paragraph (b) of § 173.4, the year "1989" would be changed to read "1991".

§ 173.421–1 [Amended]

3. In paragraph (b)(2) of § 173.421–1, the year "1989" would be changed to read "1991".

§ 173.421–2 [Amended]

4. In paragraph (d) of § 173.421–2, the year "1989" would be changed to read "1991".

Issued to Washington, DC, on December 7, 1988, under the authority delegated in 49 CFR Part 1, Appendix A.

Alan I. Roberts,

Director, Office of Hazardous Materials Transportation.

DEPARTMENT OF AGRICULTURE

Forest Service

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ES-030-09-4143-09; ES-00157-004]

Environmental Impact Statement; Mark Twain National Forest, Carter, Oregon and Shannon Counties, MO

AGENCY: Forest Service, USDA and Bureau of Land Management (BLM), Interior.

ACTION: Notice of availability of the Final Environmental Impact Statement and U.S.D.A. Forest Service Record of Decision for Hardrock Mineral Leasing, Mark Twain National Forest, Carter, Oregon, and Shannon Counties, Missouri.

SUMMARY: The Doe Run Company holds interest in two preference right lease applications (PRLA's) filed with the Bureau of Land Management (BLM) for lead and associated metals underlying the Winona Ranger District of the Mark Twain National Forest, Missouri. Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the BLM and U.S.D.A.-Forest Service, in cooperation with the U.S. Fish and Wildlife Service, National Park Service, U.S. Army Corps of Engineers, and the Missouri Department of Conservation, have prepared a Final Environmental Impact Statement (FEIS) for hardrock mineral leasing for an area encompassing approximately 119,000 acres of National Forest System Lands and Federally-owned minerals. Although the two PRLA's comprise only 3,743 acres, the FEIS has been prepared for a much larger area in the anticipation of future leasing activity.

The Draft EIS (DEIS), which was published in November 1987, analyzed five alternatives identified by the letters A through E. The preferred alternative identified in the DEIS was Alternative D, Modified Forest Plan (visual quality). In response to comments received during the review of the DEIS, and agency concerns, it was determined that none of the original alternatives were acceptable and a new alternative (F) was developed. Alternative F permits only exploration and development drilling on the two lease areas and includes a "No Guaranteed Development" stipulation along with other standard and special stipulations. The FEIS incorporates the entire DEIS by reference.

This notice announces the availability of the FEIS and the Forest Service Record of Decision whereby the Forest Service has decided to consent to the issuance of the two leases in accordance with Alternative F, which includes the "No Guarantee Development" stipulation allowing for exploration and development drilling while denying any mine development activities pending further environmental review and public involvement.

The BLM has the authority to issue leases for National Forest System Lands but only after receiving the consent of the Forest Service. The BLM will consider whether or not to issue the leases after receiving a letter of consent from the Forest Service. BLM's final decision will be published in a Record of Decision.

SUPPLEMENTARY INFORMATION: Public reading copies of the FEIS are available for review at the public libraries in Alton, Birch Tree, Columbia, Eminence, Jefferson City, Kansas City, Mountain View, St. Louis, St. Louis County, Springfield, Thayer, West Plains, and Winona, Missouri. In addition, copies of the FEIS may be inspected at the following locations:

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of the Census
Title: Survey of Income and Program Participation, 1989 Panel Wave 2
Form Number: SIPP–9200, Wave 2 Questionnaire SIPP–9205L, Introductory Letter
Agency Approval Number: 0607–0643
Type of Request: Revision
Burden: 12,180 hours
Number of Respondents: 24,360
Avg Hours Per Response: 30 minutes
Needs and Uses: This survey provides the executive and legislative branches

improved statistics on income distribution and data not previously available on eligibility for and participation in government programs. Changes in status and participation will be measured over time. The data will be used to support policy and program planning.
Affected Public: Individuals or households
Frequency: One time only
Respondent's Obligation: Voluntary
OMB Desk Officer: Francine Picoult, 395–7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–3271, Department of Commerce, Room H6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Francine Picoult, OMB Desk Officer, Room 3208, New Executive Office Building, Washington, DC 20503.

Edward Michals,
Department Clearance Officer, Office of Management and Organization.

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).
Agency: Bureau of the Census
Title: Survey of State and Local Agencies Preparing Population Estimates
Form Number: S–136
Agency Approval Number: N/A
Type of Request: New
Burden: 333 hours
Number of Respondents: 1,500
Avg Hours Per Response: 13.3 minutes
Needs and Uses: This survey is used to identify those public agencies making population estimates, the methodology used, and the areas estimated; and to collect population and housing unit estimates for census tracts for 1990 census review of the field counts.
Affected Public: State or Local Governments
Frequency: Every 10 years
Respondent's Obligation: Voluntary
OMB Desk Officer: Francine Picoult, 395–7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–3271, Department of Commerce, Room H6622, 14th and Constitution Avenue NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Francine Picoult, OMB Desk Officer, Room 3208, New Executive Office Building, Washington, DC 20503.

Dated: December 6, 1988.

Agency: Bureau of the Census
Title: Charter, Rural, and Intercity Bus Survey
Form Number: B–530, B–531
Agency Approval Number: N/A
Type of Request: New
Burden: 4,000 hours
Number of Respondents: 2,000
Avg Hours Per Response: 2 hours
Needs and Uses: This survey will be the only annual source of data for the universe of employer firms providing intercity, rural, and charter bus transportation services. These data will be used by the Federal Government for computation of the national accounts, and by private industry for marketing analysis.
Affected Public: Businesses, small businesses
Frequency: Annually
Respondent's Obligation: Mandatory
OMB Desk Officer: Francine Picoult, 395–7340.

National Institute of Standards and Technology

Announcement of Workshop for Users and Implementors of Integrated Services Digital Network (ISDN)

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Notice.

SUMMARY: The NIST announces another workshop of a continuing workshop series to discuss issues related to the use and implementation of Integrated Services Digital Network (ISDN) technology. These workshops are part of the North American ISDN Users' Forum (NIU–FORUM) which was formed recently under the auspices of NIST to create a strong user voice in the implementation of ISDN and ISDN applications and to ensure that the emerging ISDN meets users' application needs.

DATES: A joint ISDN Users' and Implementors' Workshop will be held in Gaithersburg, Maryland on January 17, 18, and 19, 1989. A tutorial "An Introduction to ISDN" will be conducted on the afternoon of January 16, 1989. The Users' Workshop will continue to identify, define and prioritize applications of ISDN and the Implementators' Workshop will define implementation agreements for ISDN and sponsor multivendor trials and demonstrations.

ADDRESS: To obtain registration forms for the North American ISDN Users' Forum, contact: ISDN Workshop Series, Attn: Kim Brashears, National Institute of Standards and Technology, Building 225, Room A224, Gaithersburg, MD 20899, Telephone: (301) 975–4853.

FOR FURTHER INFORMATION CONTACT: Steve Recicar (301) 975–2937.

SUPPLEMENTARY INFORMATION: A registration fee will be charged for attending the workshop. Credit cards will not be accepted. Participants are expected to make their own travel arrangements and accommodations. NIST reserves the right to cancel any part of the workshop.

Date: December 6, 1988.

Raymond G. Kammer,

Acting Director.

National Oceanic and Atmospheric Administration

National Marine Fisheries Service; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

TIME AND DATE: Meeting will convene at 9:00 a.m., December 16, 1988.

PLACE: Auditorium of Building 9, 7600 Sand Point Way, NW., Seattle, Washington.

MATTERS TO BE CONSIDERED: Implementation of recent amendments to the Marine Mammal Protection Act. These major changes to the law are especially important in the conduct of commercial fisheries, and will require much work to successfully implement. NOAA Fisheries has formed a Task Force and given them the responsibility to design and carry out implementation of the new legislation. Before any important decisions are made, NOAA Fisheries would like to hear your points of view. We will discuss the major tasks necessary to implement the amendments. However, we will not deal with tuna-porpoise issues at this meeting, since these are being addressed separately by the NOAA Fisheries Southwest Regional Office. A similar meeting with the same agenda is scheduled for December 19 at the Main Commerce Building, Room 5230 at 9:00 a.m., in Washington, DC. Upon conclusion of the meetings we will formulate our decisions and publish in the **Federal Register**. You will have the opportunity for additional comments on our decisions at that time.

FOR FURTHER INFORMATION CONTACT: Herb Kaufman, Task Force Coordinator, Office of Protected Resources, NOAA Fisheries, 1335 East-West Highway, Silver Spring, Maryland. Telephone: (301) 427-2319.

Date: December 7, 1988.

James W. Brennan,

Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration.

BILLING CODE 3510-08-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Limits and Guaranteed Access Levels for Certain Cotton and Man-Made Fiber Textile Products from Haiti

December 6, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits and guaranteed access levels for the new agreement year.

EFFECTIVE DATE: January 1, 1989.

Authority: E.O. 11651 of March 3, 1972, as amended; sec. 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); President's February 20, 1986 announcement of a Special Access Program.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION: A copy of the current bilateral textile agreement between the Governments of the United States and Haiti is available from the Textiles Division, Bureau of Economic and Business Affairs, U.S. Department of State, (202) 647-1998.

A description of the textile and apparel categories in terms of HTS numbers is available in the *Correlation:* Textile and Apparel Categories with Tariff Schedule of the United States Annotated (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 51 FR 21208, published on June 11, 1986, and 52 FR 26057, published on July 10, 1987.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 6, 1988

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 26 and 30, 1986, as amended, between the Governments of the United States and Haiti; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1989, entry into the United States for consumption or withdrawal from

warehouse for consumption of cotton and man-made fiber textile products in the following categories, produced or manufactured in Haiti and exported during the twelve-month period which begins on January 1, 1989 and extends through December 31, 1989, in excess of the following designated levels:

Category	Twelve-month restraint level
237	160,000 dozen.
331	310,000 dozen pairs.
340/640	310,000 dozen.
341/641	320,000 dozen.
347/348	350,000 dozen.
350	32,000 dozen.

Imports charged to these category limits for the period January 1, 1988 through December 31, 1988 shall be charged against the levels of restraint to the extent of any unfilled balances. In the event limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustments in the future according to the provisions of the current bilateral agreement between the Governments of the United States and Haiti.

In accordance with the provisions of the Special Access Program, as set forth in 51 FR 21208 (June 11, 1986) and 52 FR 26057) (July 10, 1987), you are directed to establish guaranteed access levels for properly cerfified cotton and man-made fiber textile products in the following categories which are assembled in Haiti from fabric formed and cut in the United States and exported to the United States from Haiti during the twelve-month period which begins on January 1, 1989 and extends through December 31, 1989.

Category	Guaranteed access level
237	300,000 dozen.
331	500,000 dozen pairs.
340/640	440,000 dozen.
341/641	440,000 dozen.
347/348	800,000 dozen.
349/649	2,500,000 dozen.
350	120,000 dozen.

Any shipment for entry under tariff number 9802.00.80.10 which is not accompained by a valid and correct certification and CBI Export Declaration in accordance with the provisions of the certification requirements established in the directive of February 19, 1987 shall be denied entry unless the Government of Haiti authorizes the entry and any charges to the appropriate designated consultation levels. Any shipment which is declared as tariff number 9802.00.80.10 but found not to qualify for the Special Access Program shall be denied entry into the United States.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88-28415 Filed 12-9-88; 8:45 am]

BILLING CODE 3510-DR-M

Announcement of Import Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Japan

December 6, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits for the new agreement year.

EFFECTIVE DATE: January 1, 1989.

Authority: E.O. 11651 of March 3, 1972, as amended; sec. 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 343-6583. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION: In addition to establishing limits for the new agreement year, deferred import charges for goods in Category 611 exported during 1986 in the amount of 2,926,446 square meters will be charged to the 1989 limit established for Category 611.

A copy of the current bilateral textile agreement between the Governments of the United States and Japan is available from the Textiles Divsion, Bureau of Economic and Business Affairs, U.S. Department of State, (202) 647-1998.

A description of the textile and apparel categories in terms of HTS numbers is available in the *Correlation:* Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States Annotated (see **Federal Register** notice 53 FR 44937, published on November 7, 1988).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 6, 1988

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further amended on July 31, 1986; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 6, 1987 between the Governments of the United States and Japan; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1989, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Japan and exported during the twelve-month period which begins on January 1, 1989 and extends through December 31, 1989, in excess of the indicated restraint limits:

Category	Twelve-month restraint limit
Group I:	
237, 239, 330-354, 359, 431-448, 459, 630-654 and 659, as a group.	111,556,119 square meters equivalent.
Sublevels within group I:	
237	105,010 dozen.
239	431,523 kilograms.
331/631	2,360,200 dozen pairs.
333	16,390 dozen.
334	27,683 dozen.
335	185,671 dozen.
338	824,521 dozen.
339	1,292,243 dozen.
340	109,261 dozen.
341/641	530,604 dozen.
342/642	359,490 dozen.
347/348	1,639,091 dozen.
350	22,073 dozen.
435	29,042 dozen.

Category	Twelve-month restraint limit
442	22,474 dozen.
444	186,709 numbers.
448	37,982 dozen.
634	105,205 dozen.
644	248,918 numbers.
645/646	194,320 dozen.
659pt.[1]	47,087 kilograms.
Group II:	
200–229, 300, 301, 313–326, 360–369, 400–414, 464–469, 603, 604, 607, 611–629 and 665–670, as a group.	430,222,860 square meters equivalent.
Subgroup:	
218–220, 225–227 and 313–326, as a group.	111,153,079 square meters.
Sublevels within the subgroup:	
218	30,155,778 square meters.
313	6,901,574 square meters.
314	23,252,307 square meters.
315	14,671,005 square meters.
317/326	13,281,756 square meters of which not more than 8,503,935 square meters shall be in Category 326.
Sublevels within group II:	
300/301	1,299,283 kilograms.
410	9,045,360 square meters.
604pt.[2]	1,683,807 kilograms.
611	15,311,662 square meters.
613/614/615/617.	9,527,051 square meters.
619	109,532,684 square meters
620	47,380,457 square meters.
624	7,322,434 square meters.
624	7,322,434 square meters.
625/626/627/628/629.	16,518,231 square meters.
Group II:	
600 and 606, as a group.	114,995,457 square meters equivalent.

[1] In Category 659pt., coveralls, overalls, etc., in tariff numbers 6103.23.00.55, 6103.43.20.20, 6103.49.20.00, 6103.49.30.38, 6104.63.10.20, 6104.69.10.00, 6104.69.30.14, 6114.30.30.40, 6114.30.30.50, 6203.43.20.10, 6203.49.10.10, 6204.63.15.10, 6204.69.10.10, 6211.33.00.10 and 6211.43.00.10.

[2] In Catetory 604pt., only tariff number 5509.32.00.00.

Imports charged to these category limits, except Category 439, for the period January 1, 1988 through December 31, 1988 shall be charged against the levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustment in the future according to the provisions of the bilateral agreement between the Governments of the United States and Japan.

Also effective on January 1, 1989, you are directed to charge 2,926,446 square meters, for shipments exported in 1986, to the limit established in this directive for Category 611.

In carrying out the above directions the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

604	782,156 kilograms.
634/635	476,342 dozen of which not more than 207,866 dozen shall be in Category 635.
638/639	280,602 dozen.
645/646	214,621 dozen.
647/648	1,009,982 dozen of which not more than 706,987 dozen shall be in Category 647-K [3] and not more than 706,987 dozen shall be in Category 648-K.[4]
Group II:	
201, 222-224, 229, 239, 330, 332, 349, 350, 352-354, 359-362, 369-O [5], 400-434, 436, 438-O [6], 439, 440, 443, 444, 447, 448, 459, 464-469, 600-603, 606, 607, 611, 618-622, 624-630, 632, 633, 643, 644, 649, 650, 652-654, 659, 665-670, 831-834, 836, 838, 839, 840 and 843-859, as a group.	25,097,541 square meters equivalent.

[1] In Category 369-S, only tariff number 6307.10.20 10.

[2] In Category 438-W, only tariff numbers 6104 21.00.60, 6104.23.00.20, 6104.29.20.48, 6106.20.10.10, 6106.20.10.20, 6106.90.10.10, 6106.90.10 20, 6106.90.20.20, 6106.90.30.20, 6109.90.15.40, 6110.10.10.60, 6110.10.20.80, 6110.30.15.60, 6110 90.00.74 and 6114.10.00.40.

[3] In Category 647-K, only tariff numbers 6103 23.00.40, 6103.29.10.20, 6103.43.15.20, 6103.43 15.40, 6103.49.10.20, 6103.49.30.14, 6112.12.00 50, 6112.19.10.50, 6112.20.10.60, 6113.00.00 45, 6103.23.00.45, 6103.29 10.30, 6103.43.15.50, 6103 43 15.70 and 6103.49.10.60.

[4] In Category 648-K, only tariff numbers 6104.23.00.32, 6104.23.00.34, 6104.29.10.30, 6104.29.10.40, 6104.29.20.38, 6104.63 20.10, 6104.63.20.25, 6104.63.20.30, 6104.63.20.60, 6104.69.20.10, 6104.69.20.20, 6104.69.30.26, 6112.12.00.60, 6112.19.10.60, 6112 20.10.70, 6113.00.00.50 and 6117.90.00.46.

[5] In Category 369-O, all tariff numbers except 6307.10.20.10 in Category 369-S.

[6] In Category 438-O, only tariff numbers 6103.21.00.50, 6103.23.00.25, 6105.20.10.00, 6105.90.10.00, 6105.90.30.20, 6109.90.15.20, 6110.10.10.50, 6110.10.20.70, 6110 30.15.50, 6110.90.00.72, 6114.10.00.20 and 6117.90.00.24.

Imports charged to these categories, except Categories 439 and 839, for the period January 1, 1988 thourgh December 31, 1988 shall be charged against the levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the limits set forth in this directive.

The limits set forth above are subject to adjustment in the future according to the provisions of the bilateral agreement of July 1 and 11, 1985, as amended, between the Governments of the United States and Malaysia.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Announcement of Import Limits for Certain Cotton Textile Products Produced or Manufactured in Nepal

December 6, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits for the new agreement year.

EFFECTIVE DATE: January 1, 1989.

Authority: E.O. 11651 of March 3, 1972, as amended; sec. 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

FOR FURTHER INFORMATION CONTACT: Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION: A copy of the current bilateral agreement between the Governments of the United States and Nepal is available from the Textiles Division, Bureau of Economic and Business Affairs, U.S. Department of State, (202) 647-1998.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States Annotated (see **Federal Register** notice 53 FR 44937, published on November 7, 1988).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 6, 1988

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); pursuant to the Bilateral Cotton Textile Agreement of May 30 and June 1, 1986, between the Governments of the United States and Nepal; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1989, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in the following categories, produced or manufactured in Nepal and exported during the twelve-month period beginning on January 1, 1989 and extending through December 31, 1989, in excess of the following restraint limits:

Category	Twelve-month restraint limit
340	214,383 dozen.
341	714,610 dozen.
342	119,102 dozen.

Imports charged to these category limits for the period January 1, 1988 through December 31, 1988 shall be charged against the levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustment in the future according to the provisions of the current bilateral agreement between the Governments of the United States and Nepal.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Establishment of Import Limits for Certain Man-Made Fiber, Silk Blend and Other Vegetable Fiber Luggage Produced or Manufactured in Thailand

December 6, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 343–6581. For information on embargoes and quota re-openings, call (202) 377–3715. For information on categories on which consultations have been requested, call (202) 377–3740.

SUPPLEMENTARY INFORMATION:

Authority: E.O. 11651 of March 3, 1972, as amended; sec. 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

Inasmuch as recent consultations between the Governments of the United States and Thailand have not resulted in mutually satisfactory limits for Categories 670–L and 870, the United States Government has decided to control imports in these categories for the period May 25, 1988 through May 24, 1989.

There is no visa requirement for Categories 670–L and 870 imported from Thailand. If visas for these categories will be required in the future, advance notice will be given in the **Federal Register.**

The United States remains committed to finding a solution concerning Categories 670–L and 870. Should such a solution be reached in consultations with the Government of Thailand, further notice will be published in the **Federal Register.**

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the *Correlation:* Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, published on December 16, 1987). A description of the textile and apparel categories in terms of HTS numbers is available in the *Correlation:* Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States Annotated (see **Federal Register** notice 53 FR 449237, published on November 7, 1988). Also see 53 FR 22205, published on June 14, 1988.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 6, 1988

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on December 13, 1988, entry into the United States for consumption and withdrawal from warehouse for consumption of man-made fiber, silk blend and other vegetable fiber luggage in Categories 670–L [1] and 870, produced or manufactured in Thailand and exported during the twelve-month period which began on May 25, 1988 and extends through May 24, 1989, in excess of the following levels of restraint:

Category	Twelve-month limit
670–L	6,082,616 pounds.
870	5,917,287 pounds.

Textile products in Categories 670–L and 870 which have been exported to the United States prior to May 25, 1988 shall not be subject to this directive.

You are directed to charge 1,977,332 pounds and 214,624 pounds to the limits established in this directive for Categories 670–L and 870, respectively. These charges are for goods imported during the period May 25, 1988 through September 30, 1988.

Merchandise exported from Thailand to the United States in Categories 670–L and 870 does not require a visa.

Textile products in Categories 670–L and 870 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

COMMODITY FUTURES TRADING COMMISSION

New York Cotton Exchange; Proposed Amendments Relating to Minimum Fiber Tensile Strength Requirements Applicable to Cotton Delivered on the Cotton No. 2 Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed contract market rule changes.

SUMMARY: The New York Cotton Exchange ("NYCE" or "Exchange") has submitted proposed amendments to the cotton No. 2 futures contract establishing a requirement that cotton must have a minimum fiber tensile strength of 22 grams per tex, in addition to the other current specifications of the contract, in order to be deliverable on the contract. In accordance with section 5a(12) of the Commodity Exchange Act and acting pursuant to the authority delegated by Commission Regulation 140.96, the Director of the Division of Economic Analysis ("Division") of the Commodity Futures Trading Commission ("Commission") has determined, on behalf of the Commission, that this proposal is of major economic significance. On behalf of the Commission, the Division is requesting comment on this proposal.

DATE: Comments must be received on or before January 11, 1989.

ADDRESS: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Reference should be made to the amendments to the NYCE cotton No. 2 futures contract.

FOR FURTHER INFORMATION CONTACT: Fred Linse, Division of Economic Analysis, 2033 K Street NW., Washington, DC 20581, telephone (202) 254–7303.

SUPPLEMENTARY INFORMATION: The current terms of the cotton No. 2 futures contract do not specify any fiber strength requirement for deliverable cotton. Under the proposed amendments, cotton would be required to have a minimum fiber strength of 22 grams per tex in order for it to be deliverable on the cotton No. 2 futures contract. The Exchange intends to make the proposed amendments effective for all deliveries made in October 1990 and all subsequent delivery months.

The proposed amendments would set only a minimum fiber strength requirement. The proposal does not include any system of premiums and

discounts for cotton of different fiber strengths that satisfy the minimum requirement of 22 grams per tex.

The Exchange stated that cotton with a strength of less than 22 grams per tex is susceptible to breakage on today's high-speed spinning equipment. According to the Exchange, the testing of cotton for fiber strength is expected to be a regular industry practice for all cotton by the 1991 crop year.

The Division, on behalf of the Commission, specifically requests comment on the following questions regarding current commercial practices for cotton, in addition to any other information or views that commenters may wish to provide:

1. What minimum standards for fiber strength currently are used in the cotton trade?

2. What percentage of commercial transactions is based on such fiber-strength standards?

3. To what extent are premiums or discounts applied to the pricing of commercial transactions based on the level of fiber strength?

4. In instances where a system of premiums or discounts for differences in fiber strength is utilized for commerical cotton transactions, what schedule of specific premiums and discounts currently is used for various fiber strengths? What is the par specification?

Copies of the proposed amendments will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Copies of the amended terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by telephone at (202) 254–6314.

The materials submitted by the Exchange in support of the proposed amendments may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1987)). Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the proposed amendments should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC, by the specified date.

Issued in Washington, DC on December 6, 1988.

Paula A. Tosini,

Director, Division of Economic Analysis.

BILLING CODE 6351–01–M

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 88–C0003]

Miracle Recreation Equipment Co., a Corporation; Provisional Acceptance of a Settlement Agreement and Order

AGENCY: Consumer Product Safety Commission.

ACTION: Provisional acceptance of a settlement agreement under the Consumer Product Safety Act.

SUMMARY: It is the policy of the Commission to publish settlements which it provisionally accepts under the Consumer Product Safety Act in the **Federal Register** in accordance with the terms of 16 CFR 1118.20(e). Published below is a provisionally-accepted Settlement Agreement with Miracle Recreation Equipment Co., a corporation.

DATE: Any interested person may ask the Commission not to accept this agreement or otherwise comment on its contents by filing a written request with the Office of the Secretary by December 27, 1988.

ADDRESS: Persons wishing to comment on this Settlement Agreement should send written comments to the Office of the Secretary, Consumer Product Safety Commission, Washington, DC 20207.

FOR FURTHER INFORMATION CONTACT: Melvin I. Kramer, Directorate for Compliance and Administrative Litigation, Consumer Product Safety Commission, Washington, DC 20207; telephone (301) 492–6626.

Dated: November 29, 1988.

Sheldon D. Butts,

Deputy Secretary.

SUPPLEMENTARY INFORMATION:

CONSUMER PRODUCT SAFETY COMMISSION

Consent Agreement and Order

In the matter of Miracle Recreation Equipment Co., a corporation, CPSC Docket No. 88–C0003.

1. In 1986 the United States Department of Justice, at the request of the Consumer Product Safety Commission, filed a civil penalty action, pursuant to section 20 of the Consumer Product Safety Act (CPSA), 15 U.S.C. 2059, against Miracle Recreation Equipment Co., a corporation (hereinafter referred to as Miracle or Respondent), in the U.S. District Court for the Southern District of Iowa. The case involves two types of public playground equipment manufactured by Miracle known as "Bounce-Around Whirl" and the "Buckaroo Whirl," *United States* v. *Miracle Recreation Equipment Co.*, Civil No. 86–334–B. That case is still pending, however, the Consumer Product Safety Commission will request that the United States Department of Justice seek dismissal with prejudice upon the execution of this Agreement.

Early in 1986 the staff began an investigation of all of Miracle's various products and narrowed the scope of its investigation down to the products named in this Agreement.

In December 1987, the Commission authorized that staff to issue an Administrative Complaint (CPSC Docket No. 87–1) pursuant to section 15 of the Federal Hazardous Substances Act (hereinafter referred to as FHSA), as amended, 15 U.S.C. 1274, against Miracle seeking public notification and remedial action regarding an item of public playground equipment known as the "Flying Animal Swing." That action is also still pending, however, it will be settled with the entry of an order in that case as agreed to by the parties.

2. This Consent Agreement (hereinafter referred to as Agreement) is made by and between Miracle and the staff of the Consumer Product Safety Commission (hereinafter referred to as staff). This Agreement and accompanying Order are entered into to resolve allegations regarding alleged hazards presented by several items of public playground equipment manufactured by Miracle including, but not limited to, the "Slashproof Swing Seats," the "Lifetime Whirl," the "Therapeutic Whirl," and the "Arch Swing."

3. The provisions of this Agreement shall apply to the Respondent and its successors and assigns.

4. Settlement shall be contingent upon the Consumer Product Safety Commission's (hereinafter referred to as Commission) approval and acceptance of the Agreement and its issuance of the attached Order. It is agreed by the parties that should the Commission fail to approve and accept this Agreement, the parties will jointly request the Administrative Law Judge in CPSC Docket No. 87–1 for an extension of time to resume discovery at the point where the parties left off. Respondent by entering into this Agreement consents to the issuance of the attached Order. The

terms of the Order shall take effect upon its issuance.

Parties

5. The Commission is an independent regulatory commission of the United States of America established pursuant to section 4 of the Consumer Product Safety Act (CPSA), as amended (15 U.S.C. 2053).

6. Respondent Miracle is a corporation organized and existing under the laws of the State of Iowa with its principal corporate offices located at Hwy 6 West, P.O. Box 275, Grinnell, Iowa 50112 and at Highway 60 and Bridal Lane, P.O. Box 420, Monett, Missouri 65708.

Staff Allegations and Miracle's Responses

Staff Allegation

7. The staff alleges that Miracle's "Slashproof Swing Seat" contains a defect in that the rubber casing can crack allowing the inner spring steel core of the seat (which serves to reinforce the rubber casing) to be exposed to moisture and corrode to the point where it breaks. The staff alleges that once the core breaks, the seat becomes weakened and the rubber casing will eventually tear at the points of maximum stress, usually where the grommets are attached. The staff alleges that when this occurs, the grommets pull through the rubber casing. The staff alleges that when the rubber casing tears, the user can drop to the ground, abruptly and without warning, potentially resulting in an injury.

The staff alleges that there have been numerous reported injuries to children associated with this defect in the Slashproof Swing Seat. The injuries allegedly consist of fractures of the vertebrae, ankle, lower leg, and wrist.

Miracle's Response

8. Miracle contends that it does not and never has manufactured the Slashproof Seat. Miracle contends that any problem with the seat is due to manufacturing imperfections or problems. Also, premature wear that can lead to breakage has been caused by improper maintenance and use by others of the incorrect size S-hook. When the too small S-hook is closed, it pinches the ends of the seat, breaking it. To further put the staff allegations in context, Miracle points out that it has sold more than 300,000 Slashproof Swing Seats since approximately 1960. Miracle denies each and all of the staff allegations.

Staff Allegation

9. The staff further alleges that the welds on the horizontal support of Miracle's models 296 and 298 "Arch Swing" can fail causing the horizontal support and the attached swings to collapse. The staff alleges that falls from this sudden, unexpected failure have resulted in at least ten (10) injuries to children using the swings. The injuries ranged from bruises and scrapes to a fractured pelvis and skull.

Miracle's Response

10. Miracle states that it has sold approximately 70 model 298 "Arch Swings" through 1976, the last year of sale of that model, and approximately 550 model 296 "Arch Swings" between 1960 and 1984. Miracle denies each and all of the staff allegations. Miracle contends that the few incidents involving "Arch Swings" are due to a failure to observe and maintain the units since weld deterioration occurs gradually over a long period.

Staff Allegation

11. The staff further alleges that because of its design, the center plate of Miracle's "Lifetime Whirl" is susceptibnle to removal. The staff alleges that once removed, and if not replaced, the stationary inner structure becomes exposed and readily accessible to children. The staff alleges that this exposed cavity creates a risk of fracture and laceration should a child insert an arm or a leg while the whirl is rotating. In addition, the staff alleges that the "Lifetime Whirl" has a design or manufacturing defect that results in a sharp metal edge or sharp burrs or irregularities along the under turned portion of the platform. The staff alleges that the accessibility of the sharp metal edge and burrs creates an added risk of severe laceration.

The staff further alleges that this whirl has been involved in at least eight (8) incidents of severe lacerations or fractures of children's legs and feet.

Miracle's Response

12. To place the staff's allegations in context, Miracle notes that the Lifetime Whirl has been sold and used throughout the country since approximately 1946. Miracle denies each and all of the staff allegations and contends that the few incidents reported were due to a failure to properly maintain the unit.

Staff Allegation

13. The staff further alleges that Miracle's "Therapeutic Whirl", designed for use by people in wheelchairs, poses a risk of injury to non-wheelchair bound children who sit on the edge of it with their legs or feet dangling. The staff alleges that as the "Therapeutic Whirl" rotates, the legs of unsuspecting children strike that stationary boarding ramp. The staff alleges that such incidents have caused three (3) fractures and two (2) reports of severe laceration to children's legs.

Miracle's Response

14. To place the staff allegations in context, Miracle notes that it has sold 199 "Therapeutic Whirls" between 1977 and 1985. Miracle denies each and all of the staff allegations. Miracle contends that the cause of any accident is due to a lack of supervision and misuse since the Therapeutic Whirl was designed for use by wheelchair-bound children.

Staff Allegation

15. The staff further alleges that each of the products described in paragraphs 7, 9, 11, and 13 above, may contain a defect or defects which create a substantial risk of injury to children within the meaning of section 15(c) of the FHSA, 15 U.S.C. 1274(c).

Miracle's Response

16. Miracle denies each and all of the staff allegations herein. It further specifically denies that any of its products contain a defect which creates or could create a substantial risk of injury to children or others in general or within the meaning of section 15(c) of the FHSA, 15 U.S.C. 1274(c).

Staff Allegation

17. The staff finally alleges that although it has conducted only a preliminary investigation, Miracle may have violated the reporting requirements of section 15(b) of the CPSA, 15 U.S.C. 2064(b) with respect to the hazards presented by its "Slashproof Swing Seats," "Arch Swing," "Lifetime Whirl," "Therapeutic Whirl," and "Flying Animal Swing" (the subject of CPSC Docket No. 87–1).

Miracle's Response

18. Miracle specifically denies that any of its products contain a defect which creates or could create a substantial risk of injury to children or others in general or within the meaning of any relevant statutes and also specifically denies any violation of its obligation to report information to the Commission under section 15(b) of the CPSA, 15 U.S.C. 2064(b).

Agreement of the Parties

19. The staff and Miracle are entering into this Agreement because they agree

that it is in the public interest to minimize any possibility of further injury as soon as possible. The Commission has not made and does not hereby make any determination that any of the products described herein contain a defect which creates a substantial risk of injury to children or any determination that Miracle may have failed to report a defect which could create a substantial product hazard as required by section 15(b) of the CPSA, 15 U.S.C. 2064(b). Respondent by so doing, does not admit the allegations raised by the staff herein.

20. Respondent agrees that the Commission has jurisdiction over it and over the subject matter of this Agreement for purposes for entry and enforcement of this Agreement.

21. The parties agree that the Respondent will knowingly, voluntarily, and completely waive any rights it may have in this matter (1) to an administrative or judicial hearing and any other procedural steps; (2) to seek judicial review or otherwise challenge or contest the validity of the Commission's Order; (3) to a determination by the Commission whether any of its products described in paragraphs 7, 9, 11, 13 above present a substantial risk of injury to children and whether action under 15 U.S.C. 1274 (c), (d) and (e) is in the public interest; and, (4) to a statement of findings of fact and conclusions of law by the Commission. Miracle does not agree to waive any rights it may have on any other matter or any other rights it may have in this matter.

22. Miracle agrees to notify the public of the remedial actions it is taking, in accordance with the attached Order. It shall inform the public of actions being taken to repair/retrofit or otherwise change the products described in paragraphs 7–14 above and in the attached Order.

23. The parties agree that for purposes of information disclosure which shall be pursuant to section 6(b) of the CPSA, 15 U.S.C. 2055(b), this matter shall be treated as if a Complaint pursuant to 15 U.S.C. 1274 had been issued in this matter. The staff of the Consumer Product Safety Commission agrees that records produced in this matter by Miracle shall be held as confidential documents to the extent required by the Freedom of Information Act, 5 U.S.C. 553 or by section 6 of the CPSA, 15 U.S.C. 2055(a).

24. The parties agree that mutual consideration has been given for this Agreement as follows: (1) Miracle has agreed to a payment of a $100,000 civil penalty to be recited in Case No. 86–334–B; (2) Miracle agrees to carry out the specified corrective actions involving the "Slashproof Swing Seats," the "Lifetime Whirl," the "Therapeutic Whirl," and the "Arch Swing." Because the staff believes that it is in the public interest to expedite these corrective action plans, the staff, in consideration for the payment of the $100,000 civil penalty and corrective actions to be taken by Miracle, agrees that this Agreement providing for the payment of the $100,000 civil penalty resolves any potential civil penalty proceeding for any violations of section 15(b) of the CPSA, 15 U.S.C. 2064(b), involving the "Flying Animal Swing," "Slashproof Swing Seats," "Lifetime Whirl," "Therapeutic Whirl," "Arch Swing," "Bounce-A-Round Whirl," "Buckaroo Whirl," and any other Miracle product based on the information Miracle has previously provided to the Commission as of the date this Agreement is entered into.

Miracle has an obligation to report pursuant to 15 U.S.C. 2064(b) based on (1) new information that it obtains or becomes aware of after the date that this Agreement is entered into, when this new information evidences or reveals problems other than those evidenced or revealed in information previously made available to the Commission by Miracle, (2) information it has previously obtained and not made available to the Commission concerning the "Bounce-Around-Whirl," "Buckaroo Whirl," "Flying Animal Swing," "Slash Proof Swing Seat," "Lifetime Whirl," "Therapeutic Whirl," and "Arch Swing" when this information evidences or reveals problems other than those identified in paragraphs 7 through 14 of this Agreement, (and, in the case of the Bounce-Around-Whirl" and "Buckaroo Whirl", problems other than those identified in paragraphs 7 through 8 of the complaint filed in *United States* v. *Miracle Recreation Equipment Company*, Civil Action No. 86–334–B (S.D. Iowa)), and (3) information it has previously obtained and not made available to the Commission concerning any products other than those identified above in this paragraph, if such information reasonably supports the conclusion that a Miracle product contains a defect that could create a substantial product hazard.

This Agreement eliminates any claim under section 15(b) of the CPSA, 15 U.S.C. 2064(b), that the Commission had or may have had that would have been revealed by the information Miracle previously provided to the Commission. Miracle has no obligation to report when it has actual knowledge that the Commission has been adequately informed of a defect that could create a substantial product hazard. For the sole purpose of determining the effectiveness of the remedial and notice activities *set out* in the Order, Miracle agrees, however, that it will inform the Commission of any new incidents or injuries regarding the seven (7) products named herein. Nothing in this Agreement shall be interpreted as limiting Miracle's obligation to report pursuant to section 15(b) of the CPSA, 15 U.S.C. 2064(b); and nothing herein shall be interpreted as expanding Miracle's legally required duties beyond those established by law.

25. Upon provisional acceptance of this Consent Agreement and Order by the Commission, this Consent Agreement and Order shall be placed on the public record and shall be published in the **Federal Register** in accordance with the procedure set forth in 16 CFR 1118.20(e). If the Commission does not receive any written request not to accept the Consent Agreement and Order within 15 days, the Consent Agreement and Order will be deemed finally accepted on the 16th day after the date it is published in the **Federal Register**, in accordance with 16 CFR 1118.20(f).

26. The parties further agree that the incorporated Order be issued under the FHSA, 15 U.S.C. 1261 *et seq.*, and that a violation of the Order will subject Miracle to appropriate legal action.

27. No agreement, understanding, representation, or interpretation not contained in this Consent Agreement and Order may be used to vary or to contradict its terms.

Dated: October 25, 1988.

Miracle Recreation Equipment Co.,

Paul K. Wallen,

President and CEO, Miracle Recreation Equipment Co., Hwy 60 and Bridal Lane, P.O. Box 420, Monett, Missouri 65708.

Consumer Product Safety Commission,

David Schmeltzer,

Associate Executive Director Directorate for Compliance and Administrative Litigation.

Alan H. Schoem,

Director, Division of Administrative Litigation, Directorate for Compliance and Administrative Litigation.

Dated: October 26, 1988.

Melvin I. Kramer,

Staff Attorney, Directorate for Compliance and Administrative Litigation.

Order

The staff and Miracle having entered into a Consent Agreement in this matter whereby Miracle has agreed to take the remedial action specified below in consideration of the undertakings of the

Commission set forth in the Agreement and the Commission having approved the terms of the Consent Agreement;

It is therefore ordered that;

1. Miracle will carry out the remedial action described in the "Safety Notice" (contained in Attachment A—which is available at the Office of the Secretary, Consumer Product Safety Commission, Washington, DC 20207) for its "Slashproof Swing Seats," its "Arch Swing," its "Senior/Lifetime Whirl," and its "Thereapeutic Whirl."

2. Miracle will search its records and compile a list of anyone who has ever purchased any of its products.

3. Miracle will send, by certified mail, a copy of the "Important Safety Notice" (Attachment A) to anyone identified by Miracle, by the Commission, or by any other source, as having purchased, owned, or presently owning one of the "Arch Swings." Miracle will send a follow-up mailing, to be approved by the Commission staff, to any such purchaser who, within a reasonable time, fails to respond to the initial mailing.

4. All purchasers or present owners of any Miracle product identified through Miracle's records search or which come to Miracle's attention through any other source, will receive a copy of the "Important Safety Notice" with Miracle's 1989 product catalogue to be mailed in October 1988.

5. All letters, notices, communications and the envelopes containing them will be imprinted with the words "IMPORTANT SAFETY NOTICE" in bold, red letters prominently across the top.

6. Miracle will carry out the retrofit program detailed in the "Important Safety Notice" in Attachment A, for all "Slashproof Swing Seats" purchased since 1978, and all "Senior/Lifetime Whirls," "Thereapeutic Whirls," and "Arch Swings," still in existence.

7. Miracle will expend its best efforts to ensure that this retrofit/repair program is performed on all of the products specified in paragraph 1 above, incuding any of these products identified through means other than those specified in paragraphs 3 and 4 above, (e.g., Miracle becomes aware that the original owner has sold, or no longer owns the product, and the product and present owner or location of the product is identified or identifiable).

8. Miracle will, as detailed in the "Important Safety Notice" at Attachment A, supply the replacement "Slashproof Swing Seats" for $13 each (including handling and shipping changes); and the warning signs for the "Therapeutic Whirls" and the hardware to repair the "Arch Swing", free-of-charge (including the handling and shipping charges).

9. Miracle will, as detailed in the "Important Safety Notice" (Attachment A), pay $50 to cover the welding costs for repair of the "Arch Swing". Further, if necessary on an individual basis, Miracle will negotiate a higher fee for the welding costs.

10. Miracle will, upon request, provide the list of known purchasers of any of these four (4) products to the staff.

11. Miracle will file monthly compliance reports detailing the progress of the retrofit program until such time as the staff determines that the reports are no longer necessary.

12.. The staff will assess the results of the October 1988 mailing and, if the staff determines it to be necessary, Miracle will conduct another mailing (the form and content of the notice to be approved by the staff).

Provisionally accepted on 28th day of November, 1988.

By Order of the Commission.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on Army Subgroup on Low Observable Technologies; Advisory Committee Meetings

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on Army Subgroup on Low Observable Technologies will meet in closed session on March 8–9 and March 29–30, 1989 at the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Task Force will examine and provide advice regarding Army activities in the area.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. 92–463, as amended (5 U.S.C. App. II, (1982), it has been determined that these DSB Task Force meetings, concern matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly these meetings will be closed to the public.

December 7, 1988.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Defense Science Board Task Force on Defense Industrial Cooperation With Pacific Rim Nations; Advisory Committee Meetings

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on Defense Industrial Cooperation with Pacific Rim Nations will meet in closed session on February 3, 1989 at the Hughes Corporation, Rosslyn, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will examine the potential for achieving US security objectives in the Pacific Rim area through defense industrial cooperation with the nations of that area.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. 92–463, as amended (5 U.S.C. App. II, (1982)), it has been determined that this DSB Task Force meeting, concerns matters listed in 5 U.S.C. 552(c)(1) (1982), and that accordingly this meeting will be closed to the public.

December 7, 1988.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Defense Science Board Task Force on Follow on Forces Attack (FOFA); Advisory Committee Meetings

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on Follow on Forces Attack (FOFA) will meet in closed session on January 11, 1989 at the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the

perceived needs of the Department of Defense. At this meeting the Task Force will continue to review, in detail, classified material associated with conventional military capabilities in NATO to include special targeting requirements.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. 92–463, as amended (5 U.S.C. App. II, (1982)), it has been determined that this DSB Task Force meeting, concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly this meeting will be closed to the public.

December 7, 1988.

BILLING CODE 3810–01–M

Department of Defense Wage Committee; Closed Meetings

Pursuant to the provisions of section 10 of Pub. L. 92–463, the Federal Advisory Committee Act, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, January 3, 1989; Tuesday, January 10, 1989; Tuesday, January 17, 1989; Tuesday, January 24, 1989 and Tuesday, January 31, 1989 at 10:00 a.m. in Room 1E801, The Pentagon, Washington, DC.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Force Management and Personnel) concerning all matters involved in the development and authorization of wage schedules for federal prevailing rate employees pursuant to Pub. L. 92–392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Pub. L. 92–463, meetings may be closed to the public when they are "concerned with matters listed in 5 U.S.C. 552b." Two of the matters so listed are those "related solely to the internal personnel rules and practices of an agency," (5 U.S.C. 552b(c)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 U.S.C. 552b(c)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy) hereby determines that all portions of the meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 U.S.C. 552b(c)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b(c)(4)).

However, members of the public who may wish to do so are invited to submit material in writing to the chairman concerning matters believed to be deserving of the Committee's attention.

Additional information concerning this meeting may be obtained by writing the Chairman, Department of Defense Wage Committee, Room 3D264, The Pentagon, Washington, DC 20301.

December 7, 1988.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810–01–M

Per Diem, Travel and Transportation Allowance Committee; Publication of Changes in Rates

AGENCY: Per Diem, Travel and Transportation Allowance Committee, DOD.

ACTION: Publication of changes in per diem rates.

SUMMARY: The Per Diem, Travel and Transportation Allowance Committee is publishing Civilian Personnel Per Diem Bulletin Number 145. This bulletin lists changes in per diem rates prescribed for U.S. Government employees for official travel in Alaska, Hawaii, Puerto Rico, the Northern Mariana Islands and possessions of the United States. Bulletin Number 145 is being published in the **Federal Register** to assure that travelers are paid per diem at the most current rates.

EFFECTIVE DATE: November 1, 1988.

SUPPLEMENTARY INFORMATION: This document gives notice of changes in per diem rates prescribed by the Per Diem, Travel and Transportation Allowance Committee for non-foreign areas outside the continental United States. Distribution of Civilian Per Diem Bulletins by mail was discontinued effective June 1, 1979. Per Diem Bulletins published periodically in the **Federal Register** now constitute the only notification of change in per diem rates to agencies and establishments outside the Department of Defense.

The text of the Bulletin follows:

Civilian Personnel Per Diem Bulletin Number 145 to the Heads of the Executive Departments and Establishments

Subject: Maximum Per Diem Rates for Official Travel in Alaska, Hawaii, the Commonwealths of Puerto Rico and the Northern Mariana Islands and Possessions of the United States by Federal Government Civilian Employees

1. This bulletin is issued in accordance with Executive Order 12561, dated July 1, 1986, which delegates to the Secretary of Defense the authority of the President in 5 U.S. Code 5702(a) to set maximum per diem rates and actual expense reimbursement ceilings for Federal civilian personnel traveling on official business in Alaska, Hawaii, the Commonwealths of Puerto Rico and the Northern Mariana Islands, and possessions of the United States. When appropriate and in accordance with regulations issued by competent authority, lesser rates and ceilings may be prescribed.

2. The maximum per diem rates shown in the following table are continued from the preceding Bulletin Number 144 except for the cases identified by asterisks which rates are effective on the date of this Bulletin unless otherwise indicated.

3. Each Department or establishment subject to these rates shall take appropriate action to disseminate the contents of this Bulletin to the appropriate headquarters and field agencies affected thereby.

4. The maximum per diem rates referred to in this Bulletin are:

[1] Commercial facilites are not available. The per diem rate covers charges for meals in available facilities plus an additional allowance for incidental expenses and will be increased by the amount paid for Government quarters by the traveler. For Adak, Alaska: on any day when Government quarters are not used and quarters are obtained at a construction camp, a daily travel per diem allowance of $69 is prescribed to cover the costs of lodging, meals and incidental expenses.

[2] Commercial facilities are not available. Only Government-owned and contractor operated quarters and mess are available at this locality. This per diem rate is the amount necessary to defray the cost of lodging, meals and incidental expenses.

[3] On any day when U.S. Government or contractor quarters and U.S. Government or contractor messing facilities are used, a per diem rate of $13 is prescribed to cover meals and incidental expenses at Shemya AFB and the following Air Force Stations: Cape Lisburne, Cape Newenham, Cape Romanzof, Clear, Cold Bay, Fort Yukon, Galena, Indian Mountain, King Salmon, Kotzebue, Murphy Dome, Sparrevohn, Tatalina and Tin City. This rate will be increased by the amount paid for U.S. Government or contractor quarters and by $4 for each meal procured at a commercial facility. The rates of per diem prescribed herein apply from 0001 on the day after arrival through 2400 on the day prior to the day of departure.

[4] On any day when U.S. Government or contractor quarters and U.S. Government or contractor messing facilities are used, a per diem rate of $34 is prescribed to cover meals and incidental expenses at Amchitka Island, Alaska. This rate will be increased by the amount paid for U.S. Government or contractor quarters and by $10 for each meal procured at a commercial facility. The rates of per diem prescribed herein apply from 0001 on the day after arrival through 2400 on the day prior to the day of departure.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for a permit application by the Puerto Rico Electric Power Authority (PREPA) To Dredge the Aguirre Channel in Jobos Bay, PR

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: The Jacksonville District U.S. Army Corps of Engineers intends to prepare a Draft Environmental Impact Statement (DEIS) on a permit application by the Puerto Rico Electric Power Authority (PREPA) to dredge the Aguirre Channel in Jobos Bay to facilitate delivery of oil to the Aguirre Power Plant. PREPA is investigating widening and deepening the existing natural and dredged portions of the Aguirre ship channel and turning basin in Bahia de Jobos, to accommodate ocean-going bulk carriers of up to 30,000 DWT capacity. The approximately 7 million cubic yards of dredged material may be transported to an ocean disposal site located approximately 6 miles offshore the eastern end of the island.

FOR FURTHER INFORMATION CONTACT: Ms. Lizabeth Rhodes, (904) 791-1691, U.S. Army Corps of Engineers, Jacksonville District, P.O. Box 4970, Jacksonville, Florida. Requests for information on the permit should be directed to Ms. Marie Burns, (904) 791-1687, at the same address.

SUPPLEMENTARY INFORMATION:

a. The PREPA has applied for a Department of the Army permit to dredge and enlarge a navigation channel through Jobos Bay. The existing channel is 150 feet wide by 28 feet deep and turning basin diameter and depth is 350 feet and 26 feet, respectively; and, the proposed channel dimensions are 425 feet wide by 38 feet deep, with a 13,000-foot-diameter by 36-foot-deep turning basin. Alternative modes of transporting fuel (including using other port facilities and the railroad) to the power plant will be considered as will alternative disposal methods. A no-action plan will also be evaluated.

b. Scoping: The scoping process as outlined by the Council on Environmental Quality will be utilized to involve Federal, Commonwealth, local agencies, and other interested persons and organizations. A scoping letter will be sent to interested Federal, Commonwealth, and local agencies requesting their comments and concerns. Interested persons and organizations wishing to participate in the scoping process should contact the Corps of Engineers at the address above. Significant issues anticipated include concern for: Local groundwater; estuarine habitats such as grass beds, coral reefs, and mangroves; fish and wildlife; water qualify; threatened and endangered species; and air quality.

c. Coordination with the U.S. Fish and Wildlife Service and National Marine Fisheries Service will be accomplished in compliance with section 7 of the Endangered Species Act. Coordination required by applicable Federal and Commonwealth laws and policies will be conducted. Any discharge of materials into waters of the United States will be specified by application of the criteria of section 404(b) of the Clean Water Act, or section 103 of the Marine Protection, Research, and Sanctuaries Act.

d. DEIS Preparation: It is estimated that the DEIS will be available to the public in the fourth quarter of calendar year 1989.

* Date: November 28, 1988.

A.J. Salem,

Chief, Planning Division.

BILLING CODE 3710-08-M

DEPARTMENT OF ENERGY

Hearings and Appeals Office

Cases Filed With the Office of Hearings and Appeals During the Week of October 7 through October 14, 1988

During the Week of October 7 through October 14, 1988, the appeals and applications for other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy. Submissions inadvertently omitted from earlier lists have also been included.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

December 5, 1988.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of October 7 through October 14, 1988]

Date	Name and Location of Applicant	Case No.	Type of Submission
Sept. 29, 1988	Coline/Maryland, Baltimore, MD	RM2-132	Request for Modification/Rescission. If Granted: The November 28, 1986 Decision and Order issued to the State of Maryland regarding the State's application in the Coline second stage refund proceeding (Case No. RM2-29) would be modified.
Sept. 29, 1988	Perry Gas/Maryland, Baltimore, MD	RM183-133	Request for Modification/Rescission. If Granted: The November 28, 1986 Decision and Order issued to the State of Maryland regarding the State's application in the Perry Gas second stage refund proceeding (Case No. RF183-31) would be modified.
Oct. 7, 1988	Marathon/Rogers Oil Co., Washington, DC	RR250-5	Request for Modification/Rescission. If Granted: The August 1, 1988 Decision and Order issued to the Rogers Oil Company regarding the firm's application for refund in the marathon special refund proceding would be modified.
Oct. 11, 1988	Amoco/South Dakota and Belridge/South Dakota, Pierre, SD.	RM21-130 RM8-131	Request for Modification/Rescission. If Granted: The November 24, 1987 Decision and Order issued to the State of South Dakota (Case Nos. RM21-89 and RM8-90) regarding the State's application in the Amoco and Belridge second stage refund proceedings would be modified.
Oct. 11, 1988	Compton Corp., Washington, DC	KRD-0033 KRH-0033	Motions for Discovery and Evidentiary Hearing. If Granted: Discovery would be granted and an evidentiary hearing convened in connection with the proposed remedial order issues to the Compton Corporation and the Gratex Corporation (Case No. HRO-0230).
Oct. 11, 1988	Local Union 425, IBEW, Fairmont, WV	KFA-0224	Appeal of an Information Request Denial. If Granted: The October 4, 1988 Freedom of Information Request issued by the Morgantown Energy Technology Center would be rescinded, and Local Union 425 of the International Brotherhood of Electrical Workers would receive access to copies of the Electrical Equipment Company's employee benefits records.
Oct. 11, 1988	Maryland, Baltimore, MD	KEG-0035	Petition for Special Redress. If Granted: The Office of Hearings and Appeals would review and approve the State of Maryland's proposed expenditures for Stripper Well funds which were disapproved by the Assistant Secretary for Conservation and Renewable Energy.
Oct. 12, 1988	Anchor Gasoline Corp., Washington, DC	KEF-0120	Implementation of Special Refund Procedures. If Granted: The Office of Hearings and Appeals would implement Special Refund Procedures pursuant to 10 CFR Part 205, Subpart V, in connection with the September 19, 1988 Consent Order entered into with the Anchor Gasoline Corporation.
Oct. 13, 1988	Coca Cola Bottling Co. of L.A. and Mid-South Bottling Co., Washington, DC.	RR272-14 RF272-15	Request for Modification/Rescission. If Granted: The August 25, 1988 Decision and Order issued to Coca Cola Bottling Co. of Los Angeles and Mid-South Bottling Co. (Case Nos. RF272-288 and RF 272-329) regarding the firm's application submitted in the Crude Oil refund proceeding would be modified.
Oct. 12, 1988 Getty/Atchison, Topeka, Santa Fe Railway, Washington, DC,.	RR265-1	Request for Modification/ Rescission. If Granted:	The June 19, 1987 Decision and Order issued to the Atchison, Topeka, Santa Fe Railway regarding the firm's application in the Getty refund proceeding (Case No. RF265-1411), would be modified.

Cases Filed With the Office of Hearing and Appeals During the Week of October 21 Through October 28, 1988

During the week of October 21 through October 28, 1988, the appeals and applications for other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

George B. Breznay,

Director, Office of Hearings and Appeals.

December 5, 1988.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of October 21 through October 28, 1988]

Date	Name and Location of Applicant	Case No.	Type of Submission
Oct. 24, 1988	Mobil/Cantro Petroleum Corp., New Haven, CT	RR225–37	Request for Modification/Rescission. If Granted: The August 2, 1988, Decision and Order issued to Cantro Petroleum Corporation (Case No. RF225–6740) would be modified, regarding the firm's application in the Mobil Oil refund proceeding.
Oct. 25, 1988	Meeker and Co., Washington, DC	KEF–0121	Implementation of Special Refund Procedures. If Granted: The Office of Hearings and Appeals would implement Special Refund Procedures pursuant to 10 CFR Part 205, Subpart V, in connection with the September 19, 1985, Consent Order (Case No. 6A0C00070) entered into with Meeker and Company.
Oct. 27, 1988	Technology for Energy Corp., Knoxville, TN	KFA–0228	Appeal of an Information Request Denial. If Granted: The September 27, 1988 Freedom of Information Request Denial issued by the Savannah River Operations Office would be rescinded and the Technology for Energy Corporation would receive access to complete copies of information on Delta M Corporation Proposal Number DMQ70060 Volumes I and II.
Oct. 28, 1988	Toledo Coalition for Safe Energy, Toledo, OH	KFA–0227	Appeal of an Information Request Denial. If Granted: The October 17, 1988 Freedom of Information Request Denial issued by the Office of Remedial Action and Waste Technology and Office of Nuclear Energy would be rescinded and Toledo Coalition for Safe Energy would receive access to certain DOE documents.

BILLING CODE 6450-01-M

Economic Regulatory Administration

[ERA Docket No. 88-38-NG]

Consumers Power Co.; Order Granting Authorization To Import Natural Gas

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of order granting authorization to import natural gas from Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice that it has issued an order granting Consumers Power Company (Consumers Power) authorization to import natural gas from Canada pursuant to four supply contracts with Norcen Energy Resources Limited, Shell Canada Ltd., Canterra Energy Ltd., and TransCanada PipeLines Limited. The order issued in ERA Docket No. 88-38-NG authorizes Consumers Power to import up to an aggregate of 59,000 Mcf of Canadian natural gas per day from these suppliers over a 15-year period beginning on the date of first delivery. The gas would be used for Consumers Power's system supply at an initial weighted average delivered price of $2.16 per Mcf from the border. The price consists of a demand/commodity rate that is indexed to the monthly weighted average cost of Consumers Power's domestic interstate gas purchase.

A copy of this order is available for inspection and copying in the Natural Gas Division Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, December 6, 1988.

Constance L. Buckley,

Acting Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 88-30-NG]

Union Gas Limited; Order Granting Blanket Authorization To Import and Export Natural Gas From and to Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of order granting blanket authorization to import and export natural gas.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice that it has issued an order granting Union Gas Limited (Union) blanket authorization to import and export natural gas from and to Canada. The order issued in ERA Docket No. 88-30-NG authorizes Union to import and then re-export up to 100 Bcf of Canadian natural gas and to export up to 250 Bcf of domestic gas over a two-year period beginning on the date of the first delivery.

A copy of this order is available for inspection and copying in the Natural Gas Division Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday, except Federal holidays.

Issued in Washington, DC, November 28, 1988.

Constance L. Buckley,

Acting Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Project No. 2376; Virginia]

Appalachian Power Co.; Intent To File an Application for a New License

December 8, 1988.

Take notice that on November 8, 1988, Appalachian Power Company, the existing licensee for the Ruesens Hydroelectric Project No. 2376, filed a notice of intent to file an application for a new license, pursuant to section 15(b)(1) of the Federal Power Act (Act), 16 U.S.C. 808, as amended by section 4 of the Electric Consumers Protection Act of 1986, Pub. L. 99-495. The original license for Project No. 2376 was issued effective January 1, 1964, and expires December 31, 1993.

The project is located on the James River in Campbell County, Virginia. The principal works of the Ruesens Project include a concrete and masonry gravity dam, 86 feet high and about 700 feet long; a pond about 7 miles long; two powerhouses at the dam with a combined installed capacity of 12,500 kW; transmission line connections; and appurtenant facilities.

Pursuant to section 15(b)(2) of the Act, the licensee is required to make available certain information described in Docket No. RM87-7-000, Order No. 496 (Final Rule issued April 28, 1988). A copy of this Docket can be obtained from the Commission's Public Reference Branch, Room 1000, 825 North Capitol Street, NE., Washington, DC 20426. The above information as described in the rule is now available from the licensee at G. O. Hydro Department, 40 Franklin Road, Roanoke, Virginia 24022.

Pursuant to section 15(c)(1) of the Act, each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by December 30, 1991.

Lois D. Cashell,

Secretary.

[FR Doc. 88-28517 Filed 12-9-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CI74-118-001 and CS76-842]

Devon Energy Corp. (Nevada); Redesignation

December 8, 1988.

Take notice that on November 21, 1988, Devon Energy Corporation (Nevada) of 1500 Mid-America Tower, 20 North Broadway, Okalhoma City, Oklahoma 73102-8260, filed an application pursuant to §§ 154.21, *et seq.*, and §§ 157.23, *et seq.*, of the Federal Energy Regulatory Commission's Regulations to amend the certificates held by Devon Energy Corporation in Docket Nos. CI74-118-000 and CS76-842 to reflect the change in name from Devon Energy Corporation to Devon Energy Corporation (Nevada) and to substitute Devon Energy Corporation (Nevada) for Devon Energy Corporation in any pending proceedings before the Commission. The application is on file with the Commission and open for public inspection.

Effective September 29, 1988, Devon Energy Corporation changed its name to Devon Energy Corporation (Nevada) as evidenced by a Certificate of Amendment of Articles of Incorporation dated September 29, 1988.

Notice is hereby given that the certificates of Devon Energy Corporation in Docket Nos. CI74-118-000 and CS76-842 and Devon Energy Corporation's related FERC Gas Rate Schedule No. 1 are hereby redesignated to reflect the corporate name change from Devon Energy Corporation to Devon Energy Corporation (Nevada) and that Devon Energy Corporation (Nevada) is substituted for Devon Energy Corporation in all pending proceedings.

Lois D. Cashell,

Secretary.

[FR Doc. 88-28516 Filed 12-9-88; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 2579; Indiana]

Indiana Michigan Power Co.; Intent To File an Application for a New License

December 8, 1988.

Take notice that on November 8, 1988, Indiana Michigan Power Company, the existing licensee for the Twin Branch Hydroelectric Project No. 2579, filed a notice of intent to file an application for a new license, pursuant to section 15(b)(1) of the Federal Power Act (Act), 16 U.S.C. 808, as amended by section 4 of the Electric Consumers Protection Act of 1986, Pub. L. 99-495. The original license for Project No. 2579 was issued effective April 1, 1962, and expires December 31, 1993.

The project is located on the St. Joseph River in St. Joseph County, Indiana. The principal works of the Twin Branch Project include a 402-foot-long concrete-topped timber crib dam with flashboards; a reservior of about 1,100 acres at elevation 717.4 feet m.s.l.; a powerhouse with an installed capacity of 7,200 kW; a transmission line connection; and appurtenant facilities.

Pursuant to section 15(b)(2) of the Act, the licensee is required to make available certain information described in Docket No. RM87-7-000, Order No. 496 (Final Rule issued April 28, 1988). A copy of this Docket can be obtained from the Commission's Public Reference Branch, Room 1000, 825 North Capitol Street NE., Washington, DC 20426. The above information as described in the rule is now available from the licensee at Hydro Generation, 13840 East Jefferson Road, Mishawaka, Indiana 46545, telephone (219) 255-8946.

Pursuant to section 15(c)(1) of the Act, each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by December 30, 1991.

Lois D. Cashell,

Secretary.

[FR Doc. 88-28518 Filed 12-9-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CI89-104-000]

Mobil Oil Exploration and Producing Southeast, Inc.; Petition for Declaratory Order

December 7, 1988.

Take notice that on November 23, 1988, Mobil Oil Exploration & Producing Southeast, Inc. (Petitioner) filed a petition requesting the Commission to issue a declaratory order stating that it has no jurisdiction over certain natural gas facilities which petitioner intends to construct and operate in state and federal waters offshore Alabama. Petitioner contends that the facilities are gathering and production facilities under section 1(b) of the Natural Gas Act (NGA) and are, therefore, exempt from jurisdiction and the certificate requirements of the NGA.

Petitioner states that the proposed facilities will deliver sour gas from offshore wells completed in the Norphlet formation to an onshore processing facility for removal of hydrogen sulfide and carbon dioxide. Residue gas will be sold at the tailgate, and may be moved

through one or more of the "Mobile Bay Pipeline Projects" to be considered by the Commission in Docket No. CP88–570–001. Petitioner requests expedited consideration, in part because of the relationship of the subject facilities to the proceedings in Docket No. CP88–570–001.

Any person desiring to be heard or to protest this petition should file a motion to intervene or protest in accordance with Rules 214 or 211 of the Commission's rules of practice and procedure. All motions to intervene or protest should be submitted to the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, within 15 days after publication of this notice in the **Federal Register**. All protests will be considered by the Commission, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene in accordance with Rule 214. Copies of this petition are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

Office of Hearings and Appeals

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, DOE.

ACTION: Notice of implementation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy announces the procedures for disbursement of $7,652,000 (plus accrued interest) obtained as a result of a consent order which the DOE entered into with Crown Central Petroleum Corporation of Baltimore, Maryland (Case No. KEF–0044). The fund will be available to customers who purchased refined petroleum products from Crown during the period August 20, 1973 through January 27, 1981.

DATE AND ADDRESS: Applications for Refund of a portion of the consent order fund must be filed in duplicate no later than July 31, 1989 and should be addressed to: Crown Central Corporation Refund Proceeding, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585. All applications should conspicuously display a reference to Case No. KEF–0044.

FOR FURTHER INFORMATION CONTACT: Gary Comstock, Staff Attorney, Office of Hearings and Appeals, 1000 Independence Avenue SW, Washington, DC 20585, (202) 586–6602.

SUPPLEMENTARY INFORMATION: In accordance with the procedural regulations of the Department of Energy, 10 CFR 205.282(c), notice is hereby given of the issuance of the Decision and Order set out below. The Decision and Order relates to a consent order entered into by the DOE and Crown Central Petroleum Corporation of Baltimore, Maryland. The consent order settled possible violations of the Federal petroleum price and allocation regulations with respect to the firm's operations during the period August 20, 1973 through January 27, 1981. On August 15, 1986, the Office of Hearings and Appeals issued a Proposed Decision and Order which tentatively established refund procedures and solicited comments from interested parties concerning the proper disposition of the consent order fund. 51 FR 30404 (August 26, 1986).

As the Decision and Order indicates, Applications for Refunds from the portion of the Crown consent order fund available for distribution to purchasers of Crown refined petroleum products may now be filed. Applications will be accepted provided they are filed no later than July 31, 1989. Applications will be accepted from customers who purchased refined petroleum products from Crown during the period August 20, 1973 through January 27, 1981. The specific information required in the Application for Refund is set fourth in the Decision and Order.

Date: December 5, 1988.

George B. Breznay,

Director, Office of Hearings and Appeals.

DECISION AND ORDER—DEPARTMENT OF ENERGY IMPLEMENTATION OF SPECIAL REFUND PROCEDURES

December 5, 1988.

Name of Firm: Crown Central Petroleum Corporation.

Date of Filing: June 30, 1986.

Case Number: KEF–0044.

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special procedures to distribute funds received as a result of an enforcement proceeding, in order to remedy the effects of actual or alleged violations of the DOE regulations. *See* 10 CFR Part 205, Subpart V. On June 30, 1986, ERA filed a Petition for the Implementation of Special Refund Procedures in connection with a Consent Order entered into with the Crown Central Petroleum Corporation (Crown).

I. Background

During the period of Federal petroleum price and allocation controls, Crown was engaged in the production, importation, sale, and refinement of crude oil; the sale of residual fuel oil, motor gasoline, middle distillates, aviation fuel, propane, and other refined petroleum products; and the extraction, fractionation, and sale of natural gas liquids and natural gas liquid products. The firm was therefore subject to the Mandatory Petroleum Price and Allocation Regulations set forth at 6 CFR Part 150 and 10 CFR Parts 210, 211, and 212. During the period of controls, the ERA conducted audits of Crown's operations and, as a result of the audits, alleged in several judicial and administrative proceedings that Crown had violated certain applicable DOE pricing and allocation regulations in its sales of covered products.

On March 4, 1986, ERA and Crown signed a Proposed Consent Order settling a number of issues pertaining to Crown's crude oil and refined petroleum product operations during the period January 1, 1973 through January 27, 1981 (consent order period).[1] 51 FR 8532 (March 12, 1986). Under the terms of the Proposed Consent Order, Crown agreed to remit a total of $8,300,000, plus interest, to the DOE and the ERA agreed not to pursue its allegations regarding Crown's compliance with the DOE regulations, with the exception of certain specific issues.[2] *See id.*, ¶ 501, 51 FR at 8536. The Proposed Consent Order specifically stated that "[e]xecution of this Consent Order constitutes neither an admission by Crown nor a finding by DOE of any violation by Crown of any statute or regulations." *Id.*, ¶ 506, 51 FR at 8537. On April 29, 1986, the DOE and Crown finalized the Crown Consent Order as proposed. 51 FR 15959 (April 29, 1986). Pursuant to the terms of the Consent Order, Crown remitted a total of $8,431,323.68 (the consent order

[1] Although the "consent order period" begins on January 1, 1973, no Crown products were "covered" by mandatory controls prior to August 20, 1973. Accordingly, we have determined that because refunds in this proceeding are only warranted for purchases of regulated products, the appropriate "refund period" should be August 20, 1973 through January 27, 1981 rather than January 1, 1973 through January 27, 1981.

[2] These issues concerned Crown's compliance with the terms of the Entitlements Program and related reporting requirements.

BEST COPY AVAILABLE

fund) [3] to the DOE for distribution through Subpart V. These consent order monies were paid in full on July 10, 1986, and were placed in an interest-bearing escrow account maintained at the Department of the U.S. Treasury, pending a determination regarding their proper distribution.

On August 15, 1986, we issued a Proposed Decision and Order (PDO) setting forth a tentative plan for the distribution of the Crown consent order funds. In order to notify all interested parties, the PDO was published in the **Federal Register**, 51 FR 30404 (August 26, 1986). We allowed 30 days for interested parties to comment on the proposed refund procedures. In this Decision and Order we will address the comments which were submitted in response to the PDO, and will adopt final refund procedures for distribution of the funds in the Crown escrow account.[4]

II. Distribution of the Crown Crude Oil Funds

Because the Crown Consent Order resolves alleged violations involving both the sales of crude oil and refined petroleum products, in the PDO we proposed dividing the consent order funds into two pools. *Accord Standard Oil Co. (Indiana)*, 10 DOE ¶ 85,048 (1982). As we stated in the PDO, approximately 7.8 percent of the alleged violations settled by the consent order concern Crown's production and sales of crude oil. We therefore proposed that this same percentage of the Crown principal, or $647,400, plus accrued interest, be set aside as a pool of crude oil funds available for disbursement. There were no objections to this division, and final procedures for disbursing the Crown crude oil refund pool were set forth in *Ernest A. Allerkamp*, 17 DOE ¶ 85,079 (1988).

[3] This amount consists of the principal consent order amount of $8,300,000 plus $131,323.68 in interest which accrued prior to Crown's payment to the DOE.

[4] In its audit of Crown, ERA did not allege that the firm committed any allocation violations. However, because the consent order covers Crown's compliance with all aspects of the Federal Petroleum Price and Allocation Regulations, the escrow funds may be used to provide restitution to firms that show that they were injured by Crown's allocation practices. For these claimants, we will follow the same procedures that have been used in prior Subpart V proceedings involving alleged allocation violations. *See, e.g.*, Mobil Oil Corp./ Reynolds Industries, 17 DOE ¶ 85,608 (1988); Tenneco Oil Co./Research Fuels, Inc., 10 DOE ¶ 85,012 (1982). The remainder of this Decision concerns only the filing of claims involving Crown's alleged pricing violations.

III. Final Refund Procedures for the Crown Refined Product Funds

In the PDO we further proposed that the remaining 92.2 percent of the principal contained in the Crown escrow account, $7,652,600, plus interest, be made available for distribution to purchasers of Crown refined petroleum products who demonstrate that they were injured as a result of Crown's alleged regulatory violations. The PDO set forth a two-stage procedure we have used in previous decisions under which purchasers of Crown refined products could apply for refunds from this pool. *See, e.g., Marathon Petroleum Comany*, 14 DOE ¶ 85,269 (1986) *(Marathon)*.

In the PDO, however, we did not propose specific procedures for disbursing residual petroleum product monies which may remain after all such Applications for Refund have been considered. In three sets of comments, the Controller of California and the Attorneys General of the states of Arkansas, Delaware, Iowa, Louisiana, Maryland, North Dakota, Pennsylvania, Rhode Island, and West Virginia requested that these funds be distributed to state governments as a way of effecting indirect restitution to their citizens. On October 21, 1986, after the PDO had been issued and after these comments had been filed, Congress enacted the Petroleum Overcharge Distribution and Restitution Act of 1986, Pub. L. 99–509, Title III (PODRA). *See* Fed. Energy Guidelines ¶ 11,702 *et seq.* The PODRA requires the Secretary of Energy to determine annually the amount of petroleum product overcharge funds that will not be required to refund monies to injured parties in Subpart V proceedings, and to make those funds available to state governments for use in four energy conservation programs. PODRA, sections 3003 (c) and (d). The Secretary has delegated these responsibilities to OHA, and any funds in the product portion of the Crown escrow account that OHA determines will not be needed to effect direct restitution to injured parties are to be distributed in accordance with the provisions of PODRA. Pursuant to PODRA, $1,986,391.63, comprised of $1,943,420.11 in principal plus $42,971.52 in accrued interest, was disbursed from the Crown refined product pool in 1986. 51 FR 43965 (December 5, 1986). Because all PODRA monies will ultimately be distributed to the states, compliance with the PODRA essentially responded to the commenters' suggestion.

In view of the initial PODRA distribution noted above, approximately $5,709,180, of the Crown refined product monies, plus accrued interest, remains available to provide direct refunds to claimants that demonstrate that they were injured by the regulatory violations allegedly committed by Crown. From our experience with Subpart V proceedings, we expect that most applicants will fall into the following categories of Crown refined product purchasers: (1) End users, *i.e.*, ultimate consumers; (2) resellers and retailers; and (3) regulated entities, such as public utilities, and cooperatives.

In order to receive a refund, each claimant will be required to submit a schedule of its purchases of Crown refined petroleum products during the refund period.[5] Crown has agreed to assist claimants with these purchase schedules where a claimant's purchase records have been lost, destroyed, or are otherwise unavailable.[6] If the product was not purchased directly from Crown, the claimant must provide a statement setting forth its reasons for maintaining that the product originated with Crown.[7]

A. *Calculation of refund amounts.* In establishing the procedures which will govern this refund proceeding, we will adopt certain presumptions [8] which will permit claimants to participate without incurring inordinate expense, and which will enable OHA to consider and process refund applications in the most efficient manner possible. *See Marathon, supra.* First, in order to determine the potential refund amounts for applicants in this proceeding, we adopt the presumption that the alleged

[5] The OHA has developed a sample set of refund application forms, with instructions, as well as answers to questions commonly asked by refund applicants. These documents are available upon request. Such requests should be addressed to: Crown Central Corporation Refund Proceeding, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

[6] Claimants that require this assistance should address a request by mail to: Paul J. Ebner, General Manager, Marketing Support Services, Crown Central Petroleum Corporation, P.O. Box 1168, Baltimore, Maryland 21203, or by calling Mr. Ebner at: (301) 539–7400.

[7] Indirect purchasers who establish that the purchases originated with Crown will be eligible for a refund unless the direct purchaser has filed a refund claim and established that it did not pass through the alleged Crown overcharges to its customers. *Compare* Southern Union Co./Union Carbide Corp., 16 DOE ¶ 85,026 (1987) (full refund to indirect purchaser) with Resources Extraction & Processing Co./Mobil Oil Corp., 15 DOE ¶ 85,145 (1986), *reconsideration denied*, 15 DOE ¶ 85,334 (1987), (no refund to indirect purchaser). The level of the refund will depend on (i) whether the indirect purchaser falls within one of the classes of applicant whose injury is presumed, or demonstrates injury, and (ii) whether the intermediate supplier demonstrates that it absorbed a portion of the alleged overcharges.

[8] The Subpart V regulations specifically authorize the use of presumptions in special refund proceedings. *See* 10 CFR Part 205, Subpart V.

overcharges were spread equally over all the gallons of covered products that Crown sold during the refund period and that refunds therefore should be made on a volumetric basis. Under this volumetric presumption, a claimant's maximum potential refund will generally be computed by multiplying $0.001 per gallon, the per-gallon refund amount, by the number of gallons of refined covered products [9] that the applicant purchased from Crown during the refund period.[10] The resulting figure is referred to as the claimant's "full volumetric share" of the Crown consent order funds.[11] Successful applicants will also receive proportionate shares of the interest that has accrued on the Crown escrow account.

The volumetric refund presumption is rebuttable. Because we realize that the impact on an individual claimant may have been greater than its full evidence detailing the specific amount of overcharges that it incurred in order to be potentially eligible for a larger refund. *See, e.g., Standard Oil Company (Indiana)/Army and Air Force Exchange Service*, 12 DOE ¶ 85,015 (1984).

B. *Determination of injury.* The calculation of potential refund amounts is only the first step in the distribution process. We must also determine whether claimants were injured by the alleged overcharges. In this regard, injury means that the claimant was forced to absorb the alleged overcharges. Our experience in Subpart V refund proceedings has led us to adopt several presumptions concerning injury. Applicants that are not covered by one of the presumptions must demonstrate injury in accordance with the non-presumption procedures outlined below in section 2.

1. Injury Presumptions. The injury presumptions we have adopted in this case are designated to allow claimants to participate in the refund process without incurring inordinate expenses, and to enable OHA to consider refund applications in the most efficient way possible. Each of these presumptions is listed below along with the rationale underlying its use.

a. End Users. In keeping with prior Subpart V proceedings, we will presume that end users, *i.e.*, ultimate consumers of Crown covered petroleum products whose businesses are unrelated to the petroleum industry, were injured by Crown's alleged overcharges. Unlike regulated firms in the petroleum industry, members of this group generally were not subject to price controls during the consent order period. Therefore, they were not required to base their pricing decisions on cost increases or to keep records that would show whether they passed cost increases through to their customers. Consequently, an analysis of the impact of the alleged overcharges on the final prices of goods and services produced by members of this group would be beyond the scope of a special refund proceeding. *See Marion Corporation*, 12 DOE ¶ 85,014 (1984), and cases cited therein. Therefore, end users need only document the volume of Crown refined covered products that they purchased during the refund period in order to show that they were injured by the alleged overcharges and are eligible to receive a refund.

b. Regulated Firms and Cooperatives. Public utilities, agricultural cooperatives, and other firms whose prices are regulated by government entities or governed by cooperative agreements do not have to submit detailed proof of injury. Such firms would have routinely passed through price increases to their customers. Likewise, it is expected that their customers will share the benefits associated with refunds. *See, e.g., Office of Special Counsel*, 9 DOE ¶ 82,538 at 85,203 (1982); *Office of Special Counsel*, 9 DOE ¶ 82,545 at 85,244 (1982). In order to ensure this result, such firms applying for refunds, in addition to documenting the volume of their Crown purchases, must certify that they will pass through any refund received to their customers and also submit a plan explaining both how their customers will benefit from a refund and how they will alert the appropriate regulatory body or membership group to the refund monies received. Purchases by a cooperative that were subsequently resold to nonmembers will not be covered by this presumption.

c. Resellers and Retailers Filing Small Claims. Resellers and retailers of Crown refined covered products claiming refunds of $5,000 or less, excluding accrued interest, are presumed to have been injured by Crown's alleged overcharges. Without this presumption, such an applicant would have to gather and analyze records dated as far back as 1973 in order to assemble proof that it absorbed the alleged overcharges. The cost to the applicant of gathering this information and to OHA of analyzing it, could exceed the actual refund amount. Under this injury presumption, a small claimant must only document the volume of Crown refined covered products that it purchased during the refund period in order to demonstrate injury. *See Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 at 88,210; *Office of Special Counsel*, 11 DOE ¶ 85,226 (1984).

d. Resellers and Retailers Filing Medium-Range Claims. In the PDO we proposed adopting the presumption that medium-range resellers and retailers (those seeking refunds of more than $5,000 but less than $50,000) absorbed 35 percent of Crown's alleged overcharges. Therefore, such resellers and retailers could elect to receive 35 percent of their full volumetric shares, without providing detailed demonstrations of injury. The use of a medium-range presumption reflects our conviction that these larger claimants were likely to have experienced some injury as a result of the alleged overcharges. *See Marathon, supra.* Joint comments on the PDO were received from the Controller of California and the Attorney General of Maryland objecting to the 35 percent injury presumption as being excessive, and unsupportable as to the amount of

[9] Purchases of deregulated products, *i.e.*, products that were no longer "covered" by the Mandatory Petroleum Price and Allocation Regulations, cannot be use in the calculation of an applicant's potential refund amount. Below is a list of products sold by Crown and the dates on which they were deregulated:

Product	Deregulation date
Motor gasoline, propane	January 28, 1981.
Butane, natural gasoline	January 1, 1980.
Aviation gas, jet fuel	February 26, 1979.
Naptnas, gas oils	September 1, 1976.
Benzene, toluene	September 1, 1976.
Middle distillates	July 1, 1976.
Residual fuel	June 1, 1976.

[10] The volumetric factor of $0.001 per gallon was computed by dividing the $7,652,600 in Crown consent order funds that were attributable to Crown's sales of refined covered products during the refund period by the 7,893,654,932 gallons of covered products sold by the firm during that same period. In the PDO the volumetric factor was incorrectly set at $0.0011 per gallon due to an unintentional understatement of the amount of Crown's sales of refined covered products.

[11] Only claims for at least $15 in principal will be processed. This minimum has been adopted in previous refund proceedings because the cost of processing claims for refunds of less than $15 outweighs the benefits of restitution in those situations. *See e.g.*, Uban Oil Company et al., 9 DOE ¶ 82,541 at 85,225 (1982). *See also* 10 CFR 205.286(b). In this proceeding, this consideration precludes claims based on purchases of less than 14,500 gallons of Crown refined covered products.

[12] Citing Getty Oil Company, 15 DOE ¶ 85,064 (1986) (Getty), Energy Refunds asserts that when calculating refund amounts under the medium-range presumption, the following absorption fractions should apply: (1) 40% for motor gasoline; (2) 50% for middle distillates; (3) 60% for natural gas liquid products; and (4) 100% for all other products. The different absorption fractions that we adopted in Getty, however, were based strictly on Getty's pricing data. Getty at 88,117. They are not relevant to the present proceeding. In addition, the use of a single average absorption fraction simplifies the refund procedures for the benefit of both the claimants and the DOE. Therefore, we will not adopt Energy Refunds' suggestion in this regard.

overcharge absorption. These comments, however, have been overtaken by more recent decisions in which we have adopted a general 40 percent absorption presumption for all medium-range claimants. *See* discussion, *infra*. In its comments on the PDO, Energy Refunds, Inc. of Hardin, Kentucky, (Energy Refunds) suggested that we adopt a variety of absorption fractions for the different products sold by Crown.[12] In a number of prior special refund proceedings, we performed a detailed economic analysis in order to determine product-specific levels of injury. *See, e.g., Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). Based upon the results of that prior analysis, and also based upon national average profit margin data for resellers and retailers, we determined in *Gulf Oil Corp.*, 16 DOE ¶ 85,381 (1987) (*Gulf II*), that it was most efficient to adopt a single general presumptive level of injury of 40 percent for all medium-range claimants. *Gulf II* at 88,737. Because our decision in *Gulf II* was issued subsequent to the issuance of the Crown PDO, we will adopt the 40 percent presumptive level of injury for all medium-range claimants in this proceeding.

Therefore, in lieu of making a detailed showing of injury, a reseller or retailer claimant whose full volumetric share of the Crown refined product consent order funds exceeds $5,000 may elect to receive as its refund the larger of $5,000 or 40 percent of its full volumetric share up to $50,000.[13]

e. Spot Purchaser. In the PDO we also proposed adopting the presumption that resellers and retailers that were spot purchasers of refined covered products from Crown, *i.e.*, made only sporadic, discretionary purchases, were not injured by the alleged overcharges, and therefore generally will not be eligible for refunds. The basis for this presumption is that spot purchasers tended to have considerable discretion as to where and when to make purchases and therefore would not have made purchases from Crown Central at increased prices unless they were able to pass through the full amount of their purchase price to their own customers. *See Office of Enforcement*, 8 DOE ¶ 82,597 at 85,396–97 (1981). Energy Refunds, citing *Tresler Oil Company/ Swifty Oil Company*, 16 DOE ¶ 85,659 (1987) (*Tresler*), also suggests that we allow spot purchasers to receive twenty percent of their full volumetric shares, without demonstrating injury. There is nothing in *Tresler*, however, to support such a suggestion,[14] and Energy Refunds has not provided any other reasoning that would support its suggestion regarding spot purchasers. Consequently, we will adopt the presumption of non-injury for spot purchasers outlined in the PDO.

The spot purchaser presumption, however, is rebuttable. In past refund proceedings, we have waived the presumption of non-injury for spot purchasers that demonstrated that (i) they did not have discretion in making the spot purchases; and (ii) they were forced by market conditions to resell the product at a loss that was not subsequently recouped. If a spot purchasers is able to rebut the non-injury presumption, its refund application will be evaluated according to the standards applicable to the claims of all other resellers and retailers. *See, e.g. Saber Energy, Inc./Mobil Oil Corp.*, 14 DOE ¶ 85,170 (1986).

f. Consignees. As in previous cases, in the PDO we proposed that consignees of Crown refined covered products were not injured by Crown's alleged pricing violations. *See, e.g., Jay Oil Company*, 16 DOE ¶ 85,147 (1987). In its comments, Energy Refunds, citing *Gulf II*, suggests that we allow Crown consignees to receive ten percent of their full volumetric shares without demonstrating injury. We explicitly stated in *Gulf II*, however, that the decision to adopt a ten percent injury level presumption for Gulf consignees was based solely on our previous experience in Gulf refund proceedings. *Gulf II* at 88,739. There is no basis for assuming that the factual body underlying the consignee presumptions in *Gulf II* is applicable to this case. Consequently, we will not adopt Energy Refunds' suggestion with regard to consignees. A consignee agent is an entity that sold products pursuant to an agreement whereby its supplier established the prices to be charged by the consignee with a fixed commission based upon the volume of products sold. A consignee may rebut this presumption of non-injury by showing that its sales volumes and corresponding commission revenues declined due to the alleged uncompetitiveness of Crown's pricing practices. *See Gulf Oil Corporation/C.F. Canter Oil Co.*, 13 DOE ¶ 85,388 at 88,962 (1986).

2. Non-Presumption Demonstration of Injury. A reseller or retailer with a full volumetric share in excess of $5000 that does not elect to receive a refund under either the small claims presumption or the 40 percent medium-range presumption will be required to document its injury. This showing will generally consist of two distinct elements. First, the claimant will be required to show that it maintained "banks" of unrecouped increased product costs (banked costs) in excess of the refund claimed [15] for each refined covered product that it purchased from Crown during the consent order period. *See 10 CFR 212.93(e).* Cost banks for a product should cover the period November 1, 1973,[16] through the date on which the product was decontrolled.[17] If a firm no longer has records of contemporaneously calculated cost banks for a particular product, it may approximate those banks by submitting the following information:

(1) The weighted average gross profit margin that the firm received for the product on May 15, 1973;

(2) A monthly schedule of the weighted average gross profit margins that it received for the product between

---

[12] Citing Getty Oil Company, 15 DOE ¶ 85,064 (1986) (Getty). Energy Refunds asserts that when calculating refund amounts under the medium-range presumption, the following absorption fractions should apply: (1) 40% for motor gasoline; (2) 50% for middle distillates; (3) 60% for natural gas liquid products; and (4) 100% for all other products. The different absorption fractions that we adopted in Getty, however, were based strictly on Getty's pricing data. Getty at 88,117. They are not relevant to the present proceeding. In addition, the use of a single average absorption fraction simplifies the refund procedures for the benefit of both the claimants and the DOE. Therefore, we will not adopt Energy Refunds' suggestion in this regard.

[13] That is, claimants who purchased between 5,000,000 gallons and 125,000,000 gallons of Crown refined petroleum products during the refund period (medium-range claimants) may elect to utilize this presumption. It should be noted, however, that claimants who purchased less than 12,500,000 gallons (and whose full volumetric share therefore does not exceed $12,500) could receive a larger refund under the small claims presumption than under the 40 percent medium-range injury presumption. Large resellers and retailers, *i.e.*, those who purchased more than 125,000,000 gallons (and whose full volumetric shares would therefore exceed $125,000) may elect to limit their claims to $50,000 and thereby qualify for a refund under the medium-range injury presumption.

[14] In Tresler, the applicant was granted a refund on its purchases that were made under a long-term contract with the consent order firm, but was denied a refund on its spot purchases.

[15] Claimants who have previously relied upon banked costs in order to receive refunds in other special refund proceedings should subtract those refunds from the cumulative banked costs submitted in this proceeding. *See* Husky Oil Co./Metro Oil Products, Inc., 16 DOE ¶ 85,090 at 88,179 (1987).

[16] The regulations allowing resellers and retailers to bank unrecouped increased product costs did not take effect until November 1, 1973. *See* 10 CFR 212.93(e)(1)(i).

[17] Retailers and resellers of motor gasoline were required to maintain cost banks only until July 15, 1979 and April 30, 1980, respectively. Therefore, in showing injury with respect to their purchases of motor gasoline, such claimants will not be required to submit cost bank data up to the January 28, 1981 decontrol date of motor gasoline.

November 1, 1973, and the date on which the product was decontrolled. Because cost banks were not supplier specific, the calculation of these monthly weighted average gross profit margins should be based on the claimant's purchases of the product from all of its suppliers; and

(3) A monthly schedule of the firm's sales of the product between November 1, 1973, and the date on which the product was decontrolled.[18]

Second, a claimant must also provide evidence that market conditions forced it to absorb the alleged overcharges. *See National Helium Corp./Atlantic Richfield Co.*, 11 DOE ¶ 85,257 (1984), *aff'd sub nom. Atlantic Richfield Co. v. DOE*, 618 F.Supp. 1199 (D. Del. 1985). Such a showing could consist of a demonstration that the firm suffered a competitive disadvantage as a result of its purchases from Crown. *Id.; see also Allied Materials Corp./Great Plains Corp.*, 13 DOE ¶ 85,289 (1985). Generally, we will infer this to be true if the prices the applicant paid Crown were higher than average market prices for the same level of distribuition.[19] Accordingly, a claimant attempting to demonstrate injury should submit a monthly schedule of the weighted average prices that it paid Crown for each covered product that it purchased between August 20, 1973, and the date on which the product was decontrolled. *See* note 9, *supra*.

If a firm provides the above-mentioned cost bank and price data and subsequent analysis by this office shows that the firm is entitled to a smaller refund than it would have received under the small or medium-range claims injury presumptions, the firm cannot elect to receive a refund using either of those injury presumptions. If our analysis shows that the firm was not injured by any of its purchases, the firm will not be eligible to receive any refund.

IV. Applications for Refund

We will not accept Applications for Refund from purchasers of refined covered products sold by Crown during the period August 20, 1973, through January 27, 1981. All Applications for Refund must contain the following information:

(1) A conspicuous reference to the "Crown Central Corporation Refund Proceeding", the applicant's present name and address, and the name and address of the applicant during the refund period;

(2) The name, title, and telephone number of a person who may be contacted for additional information concerning the application;

(3) An explanation of how the claimant used the Crown products, *i.e.*, whether the applicant was a reseller, retailer, consignee, end user, public utility, cooperative, etc.;

(4) For each refined covered product, a monthly schedule of the number of gallons that it purchased from Crown during the August 20, 1973 through January 27, 1981 refund period.[20] If a claimant was an indirect purchaser of Crown refined covered products, it must also submit the name of its immediate supplier and indicate why it believes the products were originally sold by Crown;

(5) All relevant material necessary to support its claim in accordance with the injury presumptions and requirements outlined above in Section III, Part B;

(6) If the applicant was or is in any way affiliated with Crown, an explanation of the nature of that affiliation;

(7) A statement as to whether there was a change in ownership of the applicant's firm during or since the refund period. If there was such a change, the applicant must submit a detailed explanation of the transaction, as well as provide the names and addresses of the previous or subsequent owners;

(8) A statement as to whether the claimant is or has been involved in any DOE enforcement proceeding or private action filed under section 210 of the Economic Stabilization Act. If these actions have been concluded, the applicant should furnish a copy of any final order issued in the matter. If the action is still in progress, the applicant should briefly describe the action and its change in status. The applicant must inform OHA of any change in status while its Application for Refund is pending. *See* 10 CFR 205.9(d);

(9) A statement as to whether the applicant has received a refund, from any source, for the alleged overcharges identified in the ERA audits underlying this proceeding;

(10) A statement as to whether the claimant or a related firm has filed any other Application for Refund in this proceeding;

(11) A statement as to whether the claimant or a related firm has authorized any other firm or individual(s) to file an Application for Refund on the claimant's behalf in the Crown proceeding; and

(12) The following statement signed by the applicant or a responsible official of the business or organization claiming the refund: "I swear [or affirm] that the information submitted is true and accurate to the best of my knowledge and belief." *See* 10 CFR 205.283(c).

All Applications for Refund should be sent to: Crown Central Corporation Refund Proceeding, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

All applications must be filed in duplicate. A copy of each application will be available for public inspection in the Public Reference Room of the Office of Hearings and Appeals. Any claimant that believes that its Application for Refund contains confidential informaiton must submit two additional copies of the application from which the confidential information has been deleted, together with a statement specifying why the information is confidential.

It Is Therefore Ordered That:

(1) Applications for Refund from the funds remitted to the Department of Energy by Crown Central Petroleum Company pursuant to the Consent Order finalized on April 29, 1986, may now be filed.

(2) All applications for Refund from the alleged Crown Central Petroleum Company refined product overcharge funds must be postmarked by July 31, 1989.

(3) This is a final order of the Department of Energy.

Date: December 5, 1988.

George B. Breznay,

Director, Office of Hearings and Appeals.

[FR Doc 88-28526 Filed 12-9-88; 8:45 am]

BILLING CODE 6450-01-M

[18] For motor gasoline, retailers and resellers have to submit the information detailed in subparagraphs (2) and (3) only through July 15, 1979 and April 30, 1980, respectively. *See* note 17, *supra*.

[19] We generally obtain average market price information from Platt's Oil Price Handbook and Oilmanac (Platt's). If price data for a particular product is not available from Platt's, the burden of supplying alternative information will be on the claimant.

[20] Because we will not process claims for less than $15 in principal, *see* note 11, *supra*, an applicant must have purchased at least 14,500 gallons of refined covered products from Crown during the refund period in order for us to consider its application. If an applicant submits estimated purchase volume figures, it must provide a detailed explanation of how it derived the estimates.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3489-8]

Carcinogen Risk Assessment Guideline Meeting

AGENCY: U.S. Environmental Protection Agency.

VOL 53 ISS 238 DE 12 1988 UMI

ACTION: Notice of meeting.

SUMMARY: This notice announces a scientific workshop, sponsored by the Environmental Protection Agency (EPA), for analysis and review of issues relating to EPA's Guidelines for Carcinogen Risk Assessment (51 FR 33992, September 24, 1986). The meeting will be held at the Virginia Beach Hotel and Conference Center in Virginia Beach, Virginia.

DATES: The Workshop will be held on January 11, 12, and 13, 1989, beginning on Wednesday, January 11 at 8:30 a.m. and ending Friday, January 13 at approximately 12:00 noon. Members of the public may attend as observers.

ADDRESSES: Eastern Research Group, Inc., an EPA contractor, is providing logistical support for the Workshop. To attend the Workshop as an observer, contact Ms. Trish Hasch, Eastern Research Group, Inc., 6 Whittemore Street, Arlington, Massachusetts 02174, Tel. (617) 646–7811/7800 by December 19, 1988. Space is limited.

FOR FURTHER INFORMATION CONTACT: Linda C. Tuxen, U.S. Environmental Protection Agency, RD–689, 401 M Street SW., Washington, DC 20460, Tel. (202) 475–6743 (FTS: 475–6743).

SUPPLEMENTARY INFORMATION: In 1984, EPA proposed, and Agency scientists began to apply, risk assessment guidelines for carcinogenicity, mutagenicity, suspect developmental toxicants, chemical mixtures, and exposure assessment. This guidance was developed with the understanding that risk assessment is an evolving scientific process and that continued study would lead to changes. As expected, there is new information and thinking in several areas of carcinogen risk assessment and the Agency has decided that review of EPA's Guidelines for Carcinogen Risk Assessment is appropriate at this time.

EPA is now assembling a panel of scientifically and technically qualified persons to discuss these guidelines at the workshop. Workshop panelists will address technical issues such as qualitative criteria for identifying carcinogenic hazards to humans and quantitative methods for extrapolating animal tumor data to expected levels of human exposure. Panelists will study and exchange information on the technical basis for the carcinogen risk assessment guidelines, and discuss any need for possible amendments. Approximately forty experts in toxicology, pharmacology, statistics, and related disciplines, are expected to participate as panelists.

EPA will use the workshop discussions as part of its information gathering efforts to assess the advisability of revising the Agency's carcinogen risk assessment guidelines. If the Agency proposes any changes in those guidelines, ample opportunity will be provided for public review and submission of written comments.

Dated: December 6, 1988.

Erich Bretthauer,

Acting Assistant Administrator for Research and Development.

[FR Doc. 88–28649 Filed 12–9–88; 8:45 am]

BILLING CODE 6560–50–M

[FRL–3489–8]

Sole Source Aquifer Designation for the Head of the Neponset Aquifer Area, Massachusetts

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In response to a petition from the Town of Walpole, Massachusetts, notice is hereby given that the Regional Administrator, Region I, of the U.S. Environmental Protection Agency (EPA) has determined that the Head of the Neponset Aquifer (HNA) satisfies all determination criteria for designation as a sole source aquifer, pursuant to section 1424(e) of the Safe Drinking Water Act. The designation criteria include the following: The Head of the Neponset Aquifer area is the principal source of drinking water for the residents of that area; there are no viable alternative sources which can completely replace the drinking water supplied by the aquifer; the boundaries of the designated area and project review area have been reviewed and approved by EPA; and if contamination were to occur, it would pose a significant public health hazard to the area's residents. As a result of this action, all federal financially assisted projects proposed for construction or modification within the HNA area can be reviewed by EPA to reduce the risk of ground water contamination from these projects.

DATES: This determination shall be promulgated for purposes of judicial review at 1:00 p.m. Eastern time December 27, 1988.

ADDRESSES: The data upon which these findings are based are available to the public and may be inspected during normal business hours at the U.S. Environmental Protection Agency, Region I, JFK Federal Building, Water Management Division, WGP–2113, Boston, MA 02203. The designation petition submitted may also be inspected at the Wapole Town Library in Walpole, Massachusetts.

FOR FURTHER INFORMATION CONTACT: Robert E. Mendoza, Chief of the Ground Water Management Section, EPA Region I, JFK Federal Building, WGP–2113, Boston, MA 02203, 617–565–3600.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1424(e) of the Safe Drinking Water Act (42 U.S.C. 300f, 300h–3(e), Pub. L. 93–523) states:

> If the Administrator determines, on his own initiative or upon petition, that an area has an aquifer which is the sole or principal drinking water source for the area and which, if contaminated, would create a significant hazard to public health, he shall publish notice of that determination in the Federal Register. After the publication of any such notice, no commitment for Federal financial assistance (through a grant, contract, loan guarantee, or otherwise) may be entered into for any project which the Administrator determines may contaminate such aquifer through a recharge zone so as to create a signficant hazard to public health, but a commitment for Federal financial assistance may, if authorized under another provision of law, be entered into to plan or design the project to assure that it will not so contaminate the aquifer.

On May 10, 1988, EPA received a petition from the Town of Walpole, Massachusetts requesting designation of the Head of the Neponset Aquifer area as a sole source aquifer. EPA determined that the petition, after receipt and review of additional requested information fully satisfied the Completeness Determination Checklist. A public hearing was then scheduled and held on September 8, 1988, in Walpole, Massachusetts, in accordance with all applicable notification and procedural requirements. A four week public comment period followed the hearing.

II. Basis for Determination

Among the factors considered by the Regional Administrator as part of the detailed review and technical verification process for designating an area under section 1424(e) were:

(1) Whether the aquifer is the sole or principal source (more than 50%) of drinking water for the defined aquifer service area, and that the volume of water from an alternative source is insufficient to replace the petitioned aquifer;

(2) whether contamination of the aquifer would create a significant hazard to public health; and

(3) whether the boundaries of the deisgnated area; the project review area;

the aquifer service area; and the steamflow source area are appropriate. On the basis of technical information available to EPA at this time, the Regional Administrator has made the following findings in favor of designating the HNA area as a sole source aquifer:

1. The HNA is the principal source of drinking water to the residents within the service area.

2. There exists no reasonable alternative drinking water source or combination of sources of sufficient quantity to replace the amount supplied to the designated service area.

3. EPA has found that the Town of Walpole has appropriately delineated the boundaries of the designated area, project review area, aquifer service area and streamflow source area.

4. Although the quality of the area's ground water is rated as good to excellent, it is highly vulnerable to contamination due to the area's geological characteristics. Because of this, contaminants can be rapidly introduced into the aquifer system from a number of sources with minimal assimilation. This may include contamination from chemical spills, highway, urban and rural runoff, septic systems, leaking storage tanks, both above and underground, road salting operations, saltwater intrusion, and landfill leachate. Since more residents are dependent upon the aquifer for their drinking water, a serious contamination incident could pose a significant public health hazard to the service area's residents.

III. Description of the Head of the Neponset Aquifer Area, Aquifer Service Area, and Project Review Area

The HNA area covers over 30 square miles in eastern Massachusetts, south of Boston. It encompasses most of Walpole, and portions of Dover, Foxboro, Medfield, Norwood, Sharon, and Westwood. The area petitioned is the eastern portion of the Neponset River Watershed Basin. This area is the headwaters of the Neponset River; from here the river flows northward out of the basin and discharges into the Massachusetts Bay. The aquifer material consists of extensive deposits of stratified drift.

The designated area is defined as the surface area above the aquifer system and its recharge area. The northern, western, and southern boundaries of the area were delineated according to the USGS Hydrologic Investigations Atlas HA–484 (1973). The eastern boundary is based upon surface topography. This eastern boundary represents the surface water divide which separates those areas contributing to eastern portions of the Neponset Basin from those areas contributing to the western portion of the Basin. However, where the Neponset River flows out of the HNA area, the boundary was not based upon topography. Here the boundary was located at the border of the stratified drift and till deposits.

The project review area is defined as the area within which federal financially assisted projects can be reviewed by EPA. For the HNA, the boundary of the designated area coincides with the boundary of the project review area. This area includes the recharge area to the HNA. There is no separate streamflow source area.

The aquifer service area is the areal extent above the HNA and those lands where the entire population served by the aquifer live. For the HNA, this includes all of the towns of Foxboro, Medfield and Walpole, and portions of Dover, Norwood, Sharon and Westwood. Most residents of the service area depend on the ten public wells located in the HNA for their drinking water supply. There are also private wells located in the HNA. The population of the aquifer service area is 45,110 people. The petitioner determined that 68% of the drinking water for the aquifer service area is supplied by the HNA.

The petitioner also demonstrated that there were no reasonably available alternative sources of drinking water for the HNA area. Eight alternatives were investigated for this petition. Six of the alternatives were eliminated as possibilities for several reasons. The remaining alternative sources could potentially supply an amount that is significantly below the amount currently supplied by the HNA. There were no alternative sources that could completely replace the HNA.

IV. Information Utilized in Determination

The information utilized in this determination includes: The petition submitted to EPA Region I by the Town of Walpole; additional information requested from and supplied by the petitioner; written and verbal comments submitted by the public, and the technical papers and maps submitted with the petition. This information is available to the public and may be inspected at the address listed above.

V. Project Review

EPA Region I is working with the federal agencies most likely to provide financial assistance to projects in the project review area. Interagency procedures and Memoranda of Understanding have been developed through which EPA will be notified of proposed commitments by federal agencies to projects which could contaminate the HNA area. EPA will evaluate such projects and, where necessary, conduct an in-depth review, including soliciting public comments when appropriate. Should the Regional Administrator determine that a project may contaminate the aquifer through its recharge zone so as to create a significant hazard to public health, no commitment for federal financial assistance may be entered into. However, a commitment for federal financial assistance may, if authorized under another provision of law, be entered into to plan or design the project to ensure that it will not contaminate the aquifer. Included in the review of any federal financially assisted project will be the coordination with state and local agencies and the project's developers. Their comments will be given full consideration, and EPA's review will attempt to complement and support state and local ground water protection measures. Although the project review process cannot be delegated, EPA will rely to the maximum extent possible on any existing or future state or local control measures to protect the quality of ground water in the HNA area.

VI. Summary and Discussion of Public Comments

The maority of comments received from the public supported designation of the HNA as a sole source aquifer. Over twenty comments were received from the public. None of these comments expressed opposition to the designation. A few comments raised questions about the implications of the designation and the status of the petition review. These questions were all answered completely. Notable letters of support were received from federal and local governments, as well as from residents. Reasons given for support include the following: (1) The dependence of the residents on the HNA for their drinking water supply; (2) there are no reasonably available alternative sources that can replace the amount of drinking water supplied by the HNA; (3) the growth and development in the HNA area which threaten the continued purity of the resource; and (4) the hope that the HNA's designation as a sole source aquifer will heighten public awareness of the vulnerability of the resource, and encourage further protective efforts.

Date: November 30, 1988.

Michael R. Deland,

Regional Administrator.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-817-DR]

Amendment to Notice of a Major Disaster Declaration; Arkansas

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of Arkansas (FEMA-817-DR), dated November 23, 1988, and related determinations.

DATED: December 5, 1988.

FOR FURTHER INFORMATION CONTACT: Neva K. Elliott, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-3614.

Notice: Notice is hereby given that the incident period for this disaster is closed effective November 20, 1988.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Grant C. Peterson,

Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

[FR Doc. 88-28444 Filed 12-9-88; 8:45 am]

BILLING CODE 6718-02-M

[FEMA-818-DR]

Notice of Major Disaster and Related Determinations; North Carolina

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of North Carolina FEMA-818-Dr), dated December 2, 1988, and related determinations.

DATED: December 2, 1988.

FOR FURTHER INFORMATION CONTACT: Neva K. Elliott, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-3614.

Notice: Notice is hereby given that, in a letter dated December 2, 1988, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*, Pub. L. 93-288, as amended by Pub. L. 100-707), as follows:

I have determined that the damage in certain areas of the State of North Carolina resulting from tornadoes and severe storms on November 28, 1988, is of sufficient severity and magnitude to warrant a major disaster declaration under Pub. L. 93-288, as amended by Pub. L. 100-707. I, therefore, declare that such a major disaster exists in the State of North Carolina.

You are authorized to provide Individual Assistance in the affected areas. In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Paul E. Hall of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of North Carolina to have been affected adversely by this declared major disaster: Currituck, Dare, Franklin, Halifax, Hyde, Nash, Northampton, Pamlico, and Wake Counties for Individual Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Julius W. Becton, Jr.,

Director, Federal Emergency Management Agency.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed; North Carolina State Ports

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-200096-002

Title: North Carolina State Ports Authority Terminal Agreement.

Parties:

North Carolina State Ports Authority
Senator Linie.

Synopsis: The agreement adds a new paragraph (20) which clarifies that the term "Tariff Rate" whenever it appears in the agreement shall mean the tariff rate which was in effect at the beginning of any contract year as defined in paragraph 2 of the agreement.

By order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Dated: December 7, 1988.

FEDERAL RESERVE SYSTEM

Agency Forms under Review

December 6, 1988.

Background

On June 15, 1984, the Office of Management and Budget (OMB) delegated to the Board of Governors of the Federal Reserve System (Board) its approval authority under the Paperwork Reduction Act of 1980, as per 5 CFR 1320.9, "to approve of and assign OMB control numbers to collection of information requests and requirements conducted or sponsored by the Board under conditions set forth in 5 CFR 1320.9." Board-approved collections of information will be incorporated into the official OMB inventory of currently approved collections of information. A copy of the SF 83 and supporting statement and the approved collection of information instrument(s) will be placed into OMB's public docket files. The following forms, which are being handled under this delegated authority, have received initial Board approval and are hereby published for comment. At the end of the comment period, the proposed information collection, along with an analysis of comments and recommendations received, will be submitted to the Board for final approval under OMB delegated authority.

DATE: Comments must be received within ten calendar days of the date of publication in the **Federal Register**.

ADDRESS: Comments, which should refer to the OMB Docket number, should be addressed to Mr. William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets NW., Washington, DC 20551, or delivered to Room B–2223 between 8:45 a.m. and 5:15 p.m., Comments received may be inspected in Room B–1122 between 8:45 a.m. and 5:15 p.m., except as provided in § 261.6(a) of the Board's Rules Regarding Availability of Information, 12 CFR 261.6(a).

A copy of the comments may also be submitted to the OMB desk officer for the Board: Gary Waxman, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: A copy of the request for clearance (SF 83), supporting statement, and other documents that will be placed into OMB's public docket files once approved may be requested from the agency clearance officer, whose name appears below. Federal Reserve Board Clearance Officer—Martha Bethea—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202–452–3822).

Proposal to Approve Under OMB Delegated Authority the Extension With Revision of the Following Report

1. *Report title:* Pretest of the 1989 Survey of Consumer Finances

Agency form number: FR 3058

OMB Docket number: 7100–0238

Frequency: One-time

Reporters: Sample of households nationwide

Annual reporting hours: 63 hours

Estimated average hours per response: ¾ hour

Estimated number of respondents: 50

Small businesses are not affected.

General description of report:

This information collection is voluntary (12 U.S.C. 225a, 1828(c), 1842 and 1843). No problem of confidentiality arises since names and other characteristics that would permit personal identification of respondents will not be provided to survey sponsors.

This pretest would allow the testing of questions anticipated for the 1989 Survey of Consumer Finances to collect data on the assets, debts, income, work history, pension rights, use of financial services, and attitudes of a sample of U.S. households. The pretest will consist of inperson interviews from a sample of approximately 50 households.

Board of Governors of the Federal Reserve System, December 6, 1988.

William W. Wiles,

Secretary of the Board.

[FR Doc. 88-28441 Filed 12-9-88; 8:45 am]

BILLING CODE 6210-01-M

Brunswick Bancorp et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizng the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than Deecember 26, 1988.

A. **Federal Reserve Bank of New York** (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Brunswick Bancorp*, New Brunswick, New Jersey; to engage *de novo* in making, acquiring, and servicing commercial loans, including but not limited to, loans secured by real property pursuant to § 225.25(b)(1) of the Board's Regulation Y.

2. *Hudson Valley Holding Company*, Yonkers, New York; to engage *de novo* through its subsidiary, Hudson Valley Mortgage Corp., Valhalia, New York, and thereby engage in originating and making residential and mortgage loans for its own portfolio and sale in the secondary market and servicing loans originated and sold to other investors pursuant to § 225.25(b)(1) of Board's Regulation Y. Comments on this application must be received by December 22, 1988.

3. *KeyCorp*, Albany, New York; Key Atlantic Bancorp, Albany, New York; and Key Bancshares of New York, Inc., Albany, New York; to engage *de novo* through its subsidiary, Key Services Corporation, Albany, New York, in providing data processing and data transmission services, facilities, data bases, or access to such services, facilities data bases by any technological means where: the data to be processed or furnished are financial, or economic, and the services are provided pursuant to a written agreement so describing and limiting the services, the facilities are designed, marketed and operated for the processing and transmission of financial, banking, or economic data; and the hardware provided in connection therewith is offered only in conjunction with software designed and marketed for the processing and transmission of financial, banking, or economic data, and where the general purpose hardware does not constitute more than 30 percent of the cost of any packaged offering pursuant to § 225.25(b)(7) of the Board's Regulation Y. Comments on this application must be received by December 22, 1988.

B. **Federal Reserve Bank of Philadelphia** (Thomas K. Desch, Vice President) 100 North Sixth Street, Philadelphia, Pennsylvania 19105:

1. *Keystone Financial, Inc.*, Harrisburg, Pennsylvania; to engage *de novo* through its subsidiary, Keystone Brokerage, Inc., Williamsport, Pennsylvania, in the provision of brokerage services restricted to buying and selling securities solely as agent for the account of customers and the purchase and redemption of shares of mutual funds and unit investment trusts as agent for the account of customers pursuant to § 225.25(b)(15) of the Board's Regulation Y. These activities will be conducted in the State of Pennsylvania.

C. **Federal Reserve Bank of Cleveland** (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *First Commonwealth Financial Corporation*, Indiana, Pennsylvania, and S&T Bancorp, Inc., Indiana, Pennsylvania; to engage *de novo* through its subsidiary, Commonwealth Trust Credit Life Insurance Company, Phoenix, Arizona, in underwriting, as reinsurer, credit life and accident and health insurance directly related to extensions of credit by entities of the Applicants pursuant to § 225.25(b)(8) of the Board's Regulation Y. These activities will be conducted in Western and Central Pennsylvania.

D. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *First Maryland Bancorp*, Baltimore, Maryland, and Allied Irish Banks Limited, Dublin, Ireland; to engage *de novo* through its subsidiary, First National Mortgage Corporation, Baltimore, Maryland, in making, acquiring, or servicing loans or other extensions of credit for its own account or the account of others, secured by mortgages or deeds of trust on real property or condominiums; and participating in the secondary mortgage market in connection therewith pursuant to § 225.25(b)(1)(iii) of the Board's Regulation Y.

E. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *The Aurora First National Company*, Aurora, Nebraska; to engage *de novo* through its subsidiary, First National Agency, Aurora, Nebraska, in insurance activities pursuant to § 225.25(b)(8)(iii) of the Board's Regulation Y. These activities will be conducted within the city limits of Aurora, Nebraska.

Board of Governors of the Federal Reserve System, December 5, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

CB&T Bancshares, Inc.; Acquisition of Company Engaged in Nonbanking Activities

The organization listed in this notice has applied under § 225.23 (a) or (f) of the Board's Regulation Y (12 CFR 225.23 (a) or (f)) for the Board's approval under section 4(c)(8) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity. Unless otherwise

noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 29, 1988.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *CB&T Bancshares, Inc.*, Columbus, Georgia; to acquire Calumet Financial Associates, Inc., Columbus, Georgia, and thereby expand its activities to include discount brokerage activities pursuant to § 225.25(b)(15) and investment advisory activities pursuant to § 225.25(b)(4) of the Board's Regulation Y. Applicant proposes to offer the services on a combined basis to both retail and institutional customers and its affiliates.

Board of Governors of the Federal Reserve System, December 5, 1988.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 88-28438 Filed 12-9-88; 8:45 am]

BILLING CODE 6210-01-M

Fairfield County Bancorp, Inc.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than January 3, 1989.

A. **Federal Reserve Bank of New York** (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Fairfield County Bancorp, Inc.*, Stamford, Connecticut; to acquire 100 percent of the voting shares of Greenwich Trust Company, Cos Cob, Connecticut.

B. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Enterprise Bancorp, Inc.*, Raleigh, North Carolina; to become a bank holding company by acquring 100 percent of the voting shares of Enterprise Bank, National Association, Raleigh, North Carolina.

C. **Federal Reserve Bank of Chicago** (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *First National Bank of Blue Island Employee Stock Ownership Trust*, Blue Island, Illinois; to become a bank holding company by acquiring 39 percent of the voting shares of Great Lakes Financial Resources, Inc., Blue Island, Illinois, and thereby indirectly acquire First National Bank of Blue Island, Blue Island, Illinois, and Community Bank of Homewood-Flossmoor, Homewood, Illinois.

Board of Governors of the Federal Reserve System, December 6, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

PNC Financial Corp.; Formations of, Acquisitions by, and Mergers of Bank Holding Companies; and Acquisitions of Nonbanking Companies

The companies listed in this notice have applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed companies have also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The applications are available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 3, 1989.

A. **Federal Reserve Bank of Cleveland** (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *PNC Financial Corp.*, Pittsburgh, Pennsylvania; to acquire 100 percent of the voting shares of Bank of Delaware

Corporation, Wilmington, Delaware, and thereby indirectly acquire Bank of Delaware, Wilmington, Delaware.

In connection with this application, New Financial Corp, Wilmington, Delaware; has applied to become a bank holding company by acquiring 100 percent of the voting shares of Bank of Delaware Corporation, Wilmington, Delaware, and thereby indirectly acquire Bank of Delaware, Wilmington, Delaware.

In connection with these applications, Applicants have also applied to acquire two nonbank subsidiaries of Bank of Delaware Corporation, Wilmington, Delaware: Del Vest, Inc., Wilmington, Delaware—a Delaware Corporation which provides portfolio investment advisory services for institutional and individual customers pursuant to § 225.25(b)(4) of the Board's Regulation Y; and Christine Life Insurance Company, Wilmington, Delaware—an Arizona Corporation which underwrites, as reinsurer, credit life, disability, accident, and health insurance policies written in conjunction with loans made by Bank of Delaware pursuant to § 225.25(b)(8) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, December 6, 1988.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 88B–0357]

Recommendations for Chemistry Data for Indirect Food Additive Petitions; Availability

AGENCY: Food and Drug Administration.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of single copies of the "Recommendations for Chemistry Data for Indirect Food Additive Petitions." These recommendations replace the "FDA Guidelines for Chemistry and Technology Requirements of Indirect Food Additive Petitions" that are currently in use.

ADDRESS: Requests for single copies of the "Recommendations for Chemistry Data for Indirect Food Additive Petitions" to the Division of Food and Color Additives (HFF–330), Center for Food Safety and Applied Nutrition, Food and Drug Administration, 200 C Street SW., Washington, DC 20204.

FOR FURTHER INFORMATION CONTACT: Vir Anand, Center for Food Safety and Applied Nutrition (HFF–330), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: FDA is announcing the availability of single copies of the "Recommendations for Chemistry Data for Indirect Food Additive Petitions" from the Division of Food and Color Additives. These recommendations supersede the "FDA Guidelines for Chemistry and Technology Requirements of Indirect Food Additive Petitions" issued in March 1976. Single copies of the recommendations may be requested from the Division of Food and Color Additives (address above).

Dated: December 2, 1988.

Ronald G. Chesemore,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 88-28420 Filed 12-9-88; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 88N-0414]

Drug Export; ENLON® (Edrophonium Chloride Injection, USP)

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Anaquest has filed an application requesting approval for the export of the human drug ENLON® (edrophonium chloride injection, USP) to Canada and Switzerland.

ADDRESS: Relevant information on this application may be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Room 4-62, 5600 Fishers Lane, Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human drugs under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

FOR FURTHER INFORMATION CONTACT: Rudolf Apodaca, Division of Drug Labeling Compliance (HFD-310), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8063.

SUPPLEMENTARY INFORMATION: The Drug Export Amendments Act of 1986 (Pub. L. 99-660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of drugs that are not currently approved in the United States. The approval process is governed by section 802(b) of the act. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Anaquest, 100 Mountain Ave., Murray Hill, New Providence, NJ 07974, has filed an application requesting approval for the export of the drug ENLON® (edrophonium chloride injection, USP), to Canada and Switzerland. This drug is recommended as a reversal agent or antagonist of nondepolarizing muscle relaxants (neuromuscular blocking agents) such as tubocurarine, atracurium, vecuronium, metocurine, or pancuronium, and as adjunctive therapy in the treatment of respiratory depression caused by curare overdosage. The application was received and filed in the Center for Drug Evaluation and Research on November 15, 1988, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by December 22, 1988, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802, Pub. L. 99-660 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Drug Evaluation and Research (21 CFR 5.44).

Dated: December 2, 1988.

Daniel L. Michels,

Director, Office of Compliance, Center for Drug Evaluation and Research.

[FR Doc. 88-28478 Filed 12-9-88; 8:45 am]

BILLING CODE 4160-01-M

Advisory Committee; Vaccines and Related Biological Products Advisory Committee Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meetings and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

Meeting: The following advisory committee meeting is announced:

Vaccines and Related Biological Products Advisory Committee

Date, time, and place. December 19, 1988, 8:30 a.m., Lister Hill Auditorium, National Institutes of Health, Bldg. 38A, 8600 Rockville Pike, Bethesda, MD.

Type of Meeting and Contact Person

Open public hearing, 8:30 a.m. to 9:30 a.m., unless public participation does not last that long; open committee discussion, 9:30 a.m. to 3:30 p.m.; Jack Gertzog, Center for Drug Evaluation and Research (HFD-9), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5455.

General Function of the Committee

The committee reviews and evaluates available data on the safety and effectiveness of marketed and investigational human drugs for use in the diagnosis, prevention, or treatment of human diseases. The committee also reviews and evaluates the quality and relevance of FDA's research program which provides scientific support for the regulation of these products.

Agenda—Open Public Hearing

Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person as soon as possible.

Open Committee Discussion

The committee will review a pending investigational new drug for tumor-infiltrating lymphocyte cells into which a gene marker (neoR) has been inserted.

FDA is giving less than 15 days public notice of this Vaccines and Related Biological Products Advisory Committee meeting because it involves an expedited review of a biologic intended for a life-threatening illness, consistent with FDA's new initiative for expediting the review of such products. The next

regularly scheduled meeting of the committee is January 30 to February 1, 1989. FDA did not believe it appropriate to wait that long. The agency decided that it was in the public interest to hold this scientific review on December 19, 1988, even if there was not sufficient time for the customary 15-day public notice.

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (Subpart C of 21 CFR Part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR Part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

Details on the agenda, questions to be addressed by the committee, and a current list of committee members are available from the contact person before and after the meeting. Transcripts of the open portion of the meeting will be available from the Freedom of Information Office (FHI–35), Food and Drug Administration, Room 12A–16, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, at a cost of 10 cents per page. The transcript may be viewed at the Dockets Management Branch (HFA–305), Food and Drug Administration, Room 4–62, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, between the hours of 9 a.m. and 4 p.m., Monday through Friday. Summary minutes of the open portion of the meeting will be available from the Freedom of Information Office (address above) beginning approximately 90 days after the meeting.

This notice is issued under section 10(a)(1) and (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)), and FDA's regulations (21 CFR Part 14) on advisory committees.

Dated: December 7, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 88–28477 Filed 12–7–88; 3:11 pm]

BILLING CODE 4160–01–M

Health Resources and Services Administration

Final Funding Priorities for Grants for Faculty Development in Family Medicine

The Health Resources and Services Administration announces the final funding priorities for Fiscal Year 1989 for Grants for Faculty Development in Family Medicine authorized under section 786(a), Title VII of the Public Health Service Act, as amended by Pub. L. 100–607.

Section 786(a) of the Public Health Service Act authorizes the award of grants to public or nonprofit private hospitals, schools of medicine or osteopathy, or other public or private nonprofit entities to assist in meeting the cost of planning, developing and operating programs for the training of physicians who plan to teach in family medicine training programs. In addition, section 786(a) authorizes assistance in meeting the cost of supporting physicians who are trainees in such programs and who plan to teach in a family medicine training program.

To receive support, programs must meet the requirements of regulations as set forth in 42 CFR Part 57, Subpart Q.

Review Criteria

The review of applications will take into consideration the following criteria:

(1) The degree to which the proposed project provides for the project requirements;

(2) The administrative and management ability of the applicant to carry out the proposed project in a cost-effective manner; and

(3) The potential of the project to continue on a self-sustaining basis.

In addition, the following mechanisms may be applied in determining the funding of approved applications:

1. Funding Preferences

Funding of a specific category or group of approved applications ahead of other categories or groups of applications, such as competing continuations ahead of new projects.

2. Funding Priorities

Favorable adjustment of review scores when applications meet specified objective criteria.

3. Special Considerations

Enhancement of priority scores by merit reviewers based on the extent to which applications address special areas of concern.

Proposed funding priorities were published in the **Federal Register** of September 13, 1988 (FR 35385) under Grants for Faculty Development in Family Medicine. No comments were received during the 30-day comment period.

Therefore, the funding priorities as proposed are retained as follows.

Final Funding Priorities

In determining the order of funding of approved applications a funding priority will be given to the following:

(1) Projects which satisfactorily demonstrate a net increase in enrollment of underrepresented minorities in proportion or more to their numbers in the general population or can document extent to which applicant attracts, retains and assures program completion of underrepresented minorities (i.e. Black, Hispanic and American Indian/Alaskan Native Minority trainees).

(2) Applications proposing to develop, expand or implement curricula concerning ambulatory and inpatient case management of those with HIV infection-related diseases.

(3) Applications which are innovative in their educational approaches to quality assurance/risk management activities, monitoring and evaluation of health care services and utilization of peer-developed guidelines and standards.

(4) Applications designed to develop faculty competence for teaching geriatrics content and/or develop educational materials for teaching geriatric content to medical students, residents and practitioners.

This program is listed at 13.895 in the *Catalog of Federal Domestic Assistance.* It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR Part 100).

Dated: December 7, 1988.

John H. Kelso,

Acting Administrator.

BILLING CODE 4160-15-M

Final Funding Priorities for Grants for Residency Training in General Internal Medicine and General Pediatrics

The Health Resources and Services Administration announces the final funding priorities for Fiscal Year 1989 for Grants for Residency Training in General Internal Medicine and General Pediatrics authorized under section 784, Title VII of the Public Health Service Act, as amended by Pub. L. 100-607.

Section 784 authorizes the award of grants for planning, developing and operating approved residency training programs which emphasize the training of residents for the practice of general internal medicine or general pediatrics. In addition, section 784 authorizes assistance in meeting the cost of supporting residents who are participants in any such program, and who plan to specialize or work in the practice of general internal medicine or general pediatrics.

Eligible applicants are accredited schools of medicine and osteopathy, public and private nonprofit hospitals, or other public or private nonprofit entities.

To receive support, programs must meet the requirements of final regulations as specified in 42 CFR Part 74, Subpart FF.

Review Criteria

The review of applications will take into consideration the following criteria:

(1) The degree to which the proposed project adequately provides for the project requirements set forth in the regulations;

(2) The administrative and management capability of the applicant to carry out the proposed project in a cost-effective manner;

(3) The qualifications of the proposed staff and faculty; and

(4) The potential of the project to continue on a self-sustaining basis.

In addition, the following mechanisms may be applied in determining the funding of approved applications:

1. Funding preferences—funding of a specific category or group of approved applications ahead of other categories or groups of applications, such as competing continuations ahead of new projects.

2. Funding priorities—favorable adjustment of review scores when applications meet specified objective criteria.

3. Special consideration—enhancement of priority scores by merit reviewers based on the extent to which applications address special areas of concern.

Proposed funding priorities were published in the **Federal Register** of September 13, 1988 (53 FR 35385) for public comment under Grants for Residency Training in General Internal Medicine and General Pediatrics. No comments were received during the 30-day comment period.

Therefore, the funding priorities as proposed are retained as follows.

Final Funding Priorities

In determining the order of funding of approved applications a funding priority will be given to:

(1) Projects which satisfactorily demonstrate a net increase in enrollment of underrepresented minorities in proportion or more to their numbers in the general population or can document extent of demonstrated net increase of underrepresented minorities (i.e., Black, Hispanic and American Indian/Alaskan Native) over average enrollment of the past three years in postgraduate year (PGY) trainees.

(2) Projects in which substantial training experience is in a PHS 332 health manpower shortage area and/or PHS 329 migrant health center, PHS 330 community health center, PHS 781 funded Area Health Education Center, or State designated clinic/center serving an underserved population.

(3) Applications proposing to develop, expand or implement curricula concerning ambulatory and inpatient case management of those with HIV infection-related diseases.

(4) Applications which are innovative in their educational approaches to quality assurance/risk management activities monitoring and evaluation of health care services and utilization of peer-developed guidelines and standards.

This program is listed at 13.884 in the *Catalog of Federal Domestic Assistance.* It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs, (as implemented through 45 CFR Part 100).

Dated: December 7, 1988.

John H. Kelso,

Acting Administrator.

BILLING CODE 4160-15-M

Public Health Service

Office of the Assistant Secretary for Health; National Vaccine Injury Compensation Program; Delegation of Authority

Notice is hereby given that in furtherance of the delegation of authority of November 28, 1988, from the Secretary of Health and Human Services to the Assistant Secretary for Health, the Assistant Secretary for Health has redelegated the authorities delegated to him under Part A (42 U.S.C. 300aa-10 *et seq.*) and Part D (42 U.S.C. 300aa-31 *et seq.*), Subtitle 2 of Title XXI of the Public Health Service Act, as amended, to the Administrator, Health Resources and Services Administration.

Redelegation

This authority may be redelegated.

Effective Date: This delegation became effective on December 2, 1988. In addition, I have affirmed and ratified any actions taken by the Administrator, Health Resources and Services Administration and his subordinates, which involved the exercise of the authorities delegated herein prior to the effective date of delegation.

Date: December 2, 1988.

Robert E. Windom,

Assistant Secretary for Health.

[FR Doc. 88-28442 Filed 12-9-88; 8:45 am]

BILLING CODE 4160-15-M

Centers for Disease Control General Powers and Duties Under Title III of the Public Health Service Act, as Amended; Delegation of Authority

Notice is hereby given that in furtherance of the delegation of September 21, 1988 (53 FR 36644), by the Assistant Secretary for Health to the Director, Centers for Disease Control (CDC), the Director, CDC, has delegated to the Director, National Center for Health Statistics, CDC, with authority to redelegate, the following authorities under title III of the Public Health Service Act (42 U.S.C. 241 *et seq.*), as amended:

Section 304

General Authority Respecting Research, Evaluations, and Demonstrations in Health Statistics, Health Services, and Health Care Technology Assessment, excluding the authority under section 304(b)(4).

Section 306

National Center for Health Statistics, excluding the authorities under sections 306(j) and 306(k).

This delegation includes the authority to determine what assurances of confidentiality under section 308(d) are necessary.

Provision has been made for previous delegations and redelegations from the Director, National Center for Health Statistics, of authorities under sections 304 and 306 to remain in effect for no longer than 90 days from the effective date of this delegation, provided they are consistent with this delegation.

This delegation to the Director, National Center for Health Statistics, CDC, became effective on November 25, 1988.

Date: November 25, 1988.

James O. Mason,

Director, Centers for Disease Control.

BILLING CODE 4160-18-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Availability of Draft Environmental Impact Statement; National Wildlife Refuges Management

AGENCY: Fish and Wildlife Service, Department of the Interior.

ACTION: Notice of availability of a draft environmental impact statement for the management of the national wildlife refuges.

SUMMARY: The U.S. Fish and Wildlife Service has prepared, for public review, a Draft Environmental Impact Statement for the Management of the National Wildlife Refuges pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969. The Statement describes four alternatives for managing the national wildlife refuges and the environmental consequences of implementing each alternative.

DATES: During the public review period, public meetings will be held at various locations throughout the United States. Meetings have been scheduled as follows:

January 4, 1989, at 7:00 p.m. at the Fairview Community Center, 1121 East 10th Avenue, Anchorage, AK. USFWS Contact: Bill Knauer (907) 786–3399.

January 10, 1989, at 7:00 p.m. at the 7th Floor Conference Room, One Gateway Center, Newton Corner, MA. USFWS Contact: Curt Laffin (617) 965–5100 Ext. 222.

January 17, 1989, at 7:00 p.m. at the Sheraton Hotel and Conference Center, 360 Union Boulevard, Lakewood, CO. USFWS Contact: Jerry Nugent (303) 236–8150.

January 18, 1989, at 7:00 p.m. at the L. D. Strom Auditorium, Richard B. Russell Federal Building, 75 Spring St., SW., Atlanta, GA USFWS Contact: Ken Butts (404) 331–0834.

January 18, 1989, at 9:00 p.m. at the Large Buffet Room, Main Interior Building Cafeteria, 18th and C Streets, NW., Washington, DC. USFWS Contact: Sean Furniss (202) 343–4944.

January 19, 1989, at 7:00 p.m. at the Doublewood Ramada, Exit 36 and I–94, Bismark, ND. USFWS Contact: Jerry Nugent (303) 236–8150.

January 20, 1989, at 12:00 noon at 16th Floor Conference Room, 500 NE Multnomah St., Portland, OR. USFWS Contact: Ty Planz (503) 232–6171.

January 24, 1989, at 8:00 p.m. at the Continuing Education Conference Center, 1634 University Boulevard, Albuquerque, NM. USFWS Contact: Linda Hagen (505) 765–8044.

January 24, 1989, at 7:30 p.m. at the Thunderbird Motel, 2201 East 78th St., Bloomington, MN. USFWS Contact: Wayne Weier (612) 725–3306.

January 26, 1989, at 7:30 p.m. at the Stouffer Concourse Hotel, 9801 Natural Bridge Road, St. Louis, MO. USFWS Contact: Wayne Weier (612) 725–3306.

FOR FURTHER INFORMATION CONTACT: Sean Furniss, Division of Refuges, U.S. Fish and Wildlife Service, Washington, DC 20240: telephone (202) 343–4944.

SUPPLEMENTARY INFORMATION: A summary of the environmental impact statement has been prepared and will be sent to all persons and organizations who participated in any part of the review process, such as scoping meetings or in other types of communication with the planning team. Copies of the complete draft environmental impact statement will be sent to Federal and State agencies, local governments, and other organizations and individuals who have already requested copies. A limited number of copies of both documents are available upon request from the environmental impact statement coordinators listed below.

Written and oral comments will be accepted at the public meetings. To be considered in the preparation of the final environmental impact statement, all comments should be received by no later than March 13, 1989.

Copies of the Draft Environmental Impact Statement are available for public review at the offices listed below:

Refuges and Wildlife, Refuge EIS Coordinator, U.S. Fish and Wildlife Service, 500 NE. Multnomah Street, Suite 1692, Portland, OR 97232.

Refuges and Wildlife, Refuge EIS Coordinator, U.S. Fish and Wildlife Service, P.O. Box 1306, 500 Gold Avenue, SW., Room 1306, Albuquerque, NM 87103.

Bureau of Land Management

Meetings; Las Vegas District Advisory Council

ACTION: Las Vegas District Advisory Council Meeting, Clark County, Nevada.

Notice is hereby given in accordance with Pub. L. 92–463, that a meeting of the Bureau of Land Management Las Vegas District Advisory Council has been set for Thursday, December 22, 1988.

The meeting will be held in the Conference Room of the Bureau of Land Management Las Vegas District Office, 4765 W. Vegas Drive, Las Vegas, Nevada, beginning at 8:00 a.m.

The Meeting Agenda is as follows:

1. Agenda approval and review of last meeting's minutes.
2. Review of TRI-District Advisory Council Meeting.
3. Preview of the Las Vegas District Tortoise Management Plan.
4. Review of the nomination process for appointment to the advisory council.
5. Public Comments.

The meeting of the Las Vegas District Advisory Council is open to the public. Persons wishing to appear before the Council and give public comments may do during the Public Comment portion of the agenda. Those wishing to make comments should notify the BLM Las Vegas District Manager, 4765 West Vegas Drive, P.O. Box 26569, Las Vegas, Nevada, (702) 646–8800, during normal business hours (7:30 a.m. until 4:15 p.m. week days) prior to the meeting.

Summary minutes of the District Advisory Council meeting will be maintained at the BLM Las Vegas District Office.

Ben F. Collins,

District Manager.

Realty Action; Classification of Public Lands for Federal Land Policy Management Act Section 302 Lease

AGENCY: Anchorage District Office, Bureau of Land Management, Department of the Interior.

ACTION: Notice of Realty Action.

SUMMARY: The following described lands, located approximately 26 miles west of Haines, Alaska in the Haines Borough have been classified as suitable for lease pursuant to section 302 of the Federal Land Policy Management Act (FLPMA):

Section 18, T. 30 S., R. 55 E., Copper River Meridian, containing 1.0 acres.

Albert C. Gilliam, d.b.a. Alaska CrossCountry Guiding and Rafting has applied for a one (1) acre site on which to operate a commercial recreation guiding business. The lease is intended to legalize improvements in existence for several years. This lease is a non-competitive offering at fair market value to the existing holder of titled improvements. Fair market rental is estimated to be $100.00 per year.

The terms and conditions of the lease are as follows:

The lease authorizes only existing improvements. Additional construction must be approved in writing by the authorized officer. The term is initially 10 years. The lease is renewable at the discretion of the authorized officer and transferable only with BLM approval. As a condition of holding this lease, the applicant or holder will comply with the requirements for a Special Recreation Permit by June 30, 1989, specifically the requirements contained in 43 CFR 8370. If the applicant or holder fails to meet these requirements, the BLM will terminate the lease, require that the premises be vacated and treat the improvements an unauthorized occupancy and use of public lands according to regulations found in 43 CFGR 9230.

SUPPLEMENTARY INFORMATION: Detailed information concerning this action, including the Land Report and Environmental Assessment, is available for review at the Anchorage District Office, 6881 Abbott Loop Road, Anchorage, Alaska 99507 or call Robert Lloyd, Realty Specialist, at (907) 267–1254.

For a period of 45 days from the date of publication of this notice, interested parties may submit comments at the above address. Any adverse comments will be evaluated by the Anchorage District Manager who may cancel or modify this action and issue a final determination. In the absence of any adverse action by the Anchorage District Manager, this will become the final determination of the Department of the Interior.

Richard J. Vernimen,

Anchorage District Manager.

BILLING CODE 4310–JA–M

[AK–040–09–4210–12]

Classification Termination; Alaska

AGENCY: Anchorage District Office, Bureau of Land Management, Interior.

ACTION: Notice; classification termination, Alaska.

SUMMARY: This notice terminates the recreation and public purposes classification of November 12, 1963.

FOR FURTHER INFORMATION CONTACT: Richard J. Vernimen, District Manager, 6881 Abbott Loop Road, Anchorage, AK 99507 (907) 267–1248.

EFFECTIVE DATE: November 30, 1988.

SUPPLEMENTARY INFORMATION: Pursuant to 43 CFR 2091.7–1, the Bureau of Land Management hereby terminates the Recreation and Public Purposes Classification of November 12, 1963 which involves the following described lands:

Seward Meridian, Alaska

Partially Surveyed T. 16 N., R. 4 E., Sec. 34.

The area described contains 640 acres located within the Matanuska-Susitna Borough, Alaska.

In 1963 the Bureau of Land Management classified these lands as suitable for lease or sale under the Recreation and Public Purposes Act of June 14, 1926, (43 U.S.C. 869, 869–1 to 869–4), as amended, for public sanitation, protection and recreation, subject to application by a governmental body only. The classification provided for segregation of the lands against all forms of appropriation under the public land laws, including location under the mining laws, but not including the Recreation and Public Purposes Act or the mineral leasing laws. The state of Alaska wishes to receive conveyance of these lands for recreational purposes. The state is eligible to receive these lands under section 6(b) of the Alaska Statehood Act of July 7, 1958, (48 U.S.C. prec. 21), and section 906(e) of the Alaska National Interest Lands Conservation Act of December 2, 1980, (43 U.S.C. 1635(e)). It is BLM-Alaska's policy that state entitlements under the Alaska Statehood Act take priority over other disposals of public land. Therefore, the Recreation and Public Purposes classification and segregation is hereby terminated. The lands are not available for application or entry under the public land laws; they will be made available to the state of Alaska under the above authorities.

Richard J. Vernimen,

District Manager.

Arizona; Reconveyance and Classification of Public Land for Recreation and Public Purposes and State Indemnity Selection

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This action informs the public of the reconveyance of land by the State of Arizona and Lake Havasu City to the United States. The State of Arizona incorrectly selected a 1.38 acre parcel of land in sec. 20, T. 13 N., R. 20 W., under State Indemnity Selection Application A-8168(E). The parcel was transferred to the State of Arizona in Indemnity Selection List No. 591. The parcel the State of Arizona intended to select was transferred to Lake Havasu City under the Recreation and Public Purpose Act by Patent No. 02-87-0009. Lake Havasu City has agreed to accommodate the State of Arizona by reconveying their parcel to the United States for transfer to the State of Arizona. In return, the State of Arizona has reconveyed their parcel to the United States for transfer to Lake Havasu City.

FOR FURTHER INFORMATION CONTACT: Lisa Schaalman, BLM Arizona State Office, P.O. Box 16563, Phoenix, Arizona 85011 (602) 241-5534.

SUPPLEMENTARY INFORMATION: On November 7, 1986, the Bureau of Land Management issued Indemnity Selection List No. 591 under the Act of June 20, 1910 (36 Stat. 557), as authorized by Pub. L. 99-632 dated November 7, 1986. On September 12, 1988, the State of Arizona notified the Bureau of Land Management that they erroneously selected a 1.38 acre parcel of land in Mohave County. This parcel is reconveyed to the United States by Deed of Reconveyance 96-96098 and is described as:

Gila and Salt River Meridian

T. 13 N., R. 20 W.,
Sec. 20 metes and bounds parcel in lot 6.

Title to the above land was accepted December 1, 1988. The land has been found suitable for classification for convenyance to Lake Havasu City under the provisions of the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 *et seq.*). Lake Havasu City has filed an application to use the land for a fire station site.

The land is not needed for Federal purposes. Conveyance of this parcel to Lake Havasu City is consistent with current BLM land use planning and would be in the public interest.

The conveyance document, when issued, will be subject to the following terms, conditions, and reservations:

1. Provisions of the Recreation and Public Purposes Act and to all applicable regulations of the Secretary of the Interior.

2. A right-of-way for ditches and canals constructed by the authority of the United States.

3. All minerals shall be reserved to the United States.

4. Rights-of-way A-9075, A-9076, A-11637, A-18455 and A-21580.

5. Excepting and reserving to the United States ownership of all land below elevation 450 feet mean sea level with certain limitations. Title thereto shall remain in the United States as required by 43 U.S.C. 498.

Subject to all valid existing rights, the land is hereby segregated from appropriation under all other public land laws, including location under the mining laws. This segregation will terminate upon issuance of a patent, publication of a Notice of Termination, or 18 months from the date of this publication, whichever occurs first.

In return, Lake Havasu City reconveyed the following land to the United States:

Gila and Salt River Meridian

T. 13 N., R. 20 W.,
Sec. 21, lot 5.

The area described contains 1.38 acres in Mohave County.

Title to the above land was accepted December 1, 1988.

The Arizona State Land Department has filed a corrected application to acquire the land described above under the provisions of sections 2275 and 2276 of the Revised Statutes, as amended (43 U.S.C. 851, 852), in lieu of certain State Trust land taken by the Secretary of Interior, Bureau of Reclamation, for construction of the Central Arizona Project. This application has been assigned serial number A-8168 (E).

The land described above has been determined suitable to be classified for transfer. This classification is pursuant to Title 43 Code of Federal Regulations, Subpart 2400 and section 7 of the Act of June 28, 1934.

The land will be subject to the following reservations, terms and conditions:

1. A right-of-way thereon for ditches or canals constructed by the authority of the United States.

2. Rights-of-way A-9075, A-9076, A-1137, A-18455 and A-21580.

3. All valid existing rights.

The filing of the corrected application under the provisions of Subpart 2621 segregated the land described above from settlement, sale, location or entry under the public land laws, including the mining laws, but not the mineral leasing laws. This segregation will terminate upon issuance of a document of conveyance, publication of Notice of Termination, or the expiration of 2 years from the date of filing.

For a period of 60 days from the date of publication of this Notice in the **Federal Register**, all persons who wish to submit comments, suggestions, or objections in connection with the proposed classification, may present their views in writing to the State Director, Bureau of Land Management, P.O. Box 16563, Phoenix, Arizona 85011.

Any adverse comments will be evaluated by the State Director who will issue a notice of determination to proceed with, modify or cancel the action. In the absence of any action by the State Director, this classification will become the final determination of the Department of the Interior.

John T. Mezes,

Chief, Branch Lands and Minerals Operations.

[FR Doc. 88-28484 Filed 12-11-88; 8:45 am]

BILLING CODE 4310-22-M

[NV-930-09-4212-14; N-49532]

Realty Action; Direct Sale on Public Lands in Elko County, NV

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action; sale of the community landfill to the City of Carlin, Nevada.

SUMMARY: The following land has been found suitable for direct sale to the City of Carlin under section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750; 43 U.S.C. 1713) at the appraised fair market value of $3,100.00:

Mount Diablo Meridian, Nevada

T. 33 N., R. 52 E.,
Sec. 16, W½SE¼.
Containing approximately 80 acres.

This land is occupied in part by a landfill that was leased to the City of Carlin under the Recreation and Public Purposes Act. It is being offered by direct sale to the City of Carlin in support of BLM policy to divest itself of all management responsibilities of landfills that are located on public land. The proposal is in conformance with the Elko Resource Management Plan and would not conflict with any known state or local planning, ordinance or zoning.

An opening order for the subject land was published in the **Federal Register** on

July 14, 1988, opening the land to disposal under section 203 of the Federal Land Policy and Management Act. The land described remains segregated from appropriation under other public land laws, including the mining laws. The land will not be offered for sale until at least 60 days after publication of this notice in the **Federal Register.**

The land is not within any grazing allotment and contains no known mineral values except for oil and gas. Therefore, mineral interests, excluding oil and gas will be conveyed simultaneously with the sale of the land. Acceptance of the direct sale offer will constitute an application to purchase the mineral estate having no known mineral value. A nonrefundable fee of $50.00 will be required with the purchase money. Failure to submit the purchase money and the nonrefundable filing fee for the mineral estate within the timeframe specified by the authorized officer will result in cancellation of the sale.

The patent, when issued, will contain the following:

1. A reservation for ditches and canals by authority of the United States, Act of August 30, 1890 (26 Stat. 391; 43 U.S.C. 945).

2. A reservation for oil and gas to the United States.

Further information regarding this sale is available for review at the Elko District Office, Bureau of Land Management, 3900 East Idaho, Elko, Nevada 89801. For a period of 45 days from the date of publication of this notice in the **Federal Register,** interested parties may submit comments to the District Manager, Elko District at the above address. All objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of timely objections, this proposal shall become the final determination of the Department of the Interior.

Date: December 2, 1988.

Rodney Harris,

District Manager.

Sec. 20, All;
Sec. 22, W½NE¼, SE¼NE¼, W½, SE¼;
Sec. 28, All;
Sec. 30, All;
Sec. 32, All.

The areas described above aggregate 13,007.62 acres.

In exchange for these lands the United States would acquire the following described private lands from Lands of Sierra, Inc.:

Mount Diablo Meridian, Nevada

T. 41 N., R. 61 E.,
Sec. 1, Lots 1, 2, S½NE¼, SE¼;
Sec. 12, N½NE¼.
T. 40 N., R. 62 E.,
Sec. 1, S½N½, S½;
Sec. 2, W½SW¼, SE¼;
Sec. 3, All;
Sec. 4, Lots 1–8, inclusive, S½N½, N½SW¼, SE¼SW¼, SE¼.
T. 41 N., R. 62 E.,
Sec. 4, S½S½;
Sec. 5, NW¼SW¼, S½S½;
Sec. 6, All;
Sec. 7, All;
Sec. 8, NW¼NW¼, S½NW¼, S½;
Sec. 9, SW¼SW¼;
Sec. 16, W½E½, W½, SE¼SE¼;
Sec. 17, All;
Sec. 18, E½, E½NW¼, NE¼SW¼;
Sec. 20, E½, E½W½, NW¼NW¼;
Sec. 21, All;
Sec. 22, NE¼NE¼, SW¼NW¼, W½SW¼, SE¼SW¼;
Sec. 25, All;
Sec. 28, All;
Sec. 29, All;
Sec. 32, E½E½, NW¼NE¼;
Sec. 33, All.

The areas described above aggregate 10,579.38 acres.

The purpose of the exchange is to acquire non-federal lands in the Snake Mountain Range with demonstrated wildlife, riparian and recreational opportunities. The lands to be disposed of will be used in conjunction with private lands already owned by Lands of Sierra to construct eight, 250-megawatt, coal fired, steam-electric generating units, which after licensing and approvals, would be built one or two units at a time over a period of approximately 20 years. An Environmental Impact Statement (EIS) is being prepared to assess the regional effects resulting from the power plant and the exchange of public lands. A Notice of Intent to prepare an EIS and to conduct scoping for the proposed project was published in the **Federal Register** on June 16, 1988. Comments were accepted until July 27, 1988, with a public scoping meeting held in Wells, Nevada, on July 6, 1988.

Lands of Sierra does not own the mineral estate for the private offered lands, therefore no mineral estates would be exchanged. The exchange would not be consummated until completing of the EIS and a subsequent Notice of Realty Action is published in the **Federal Register.**

The above described lands will be subject to an appraisal to determine the fair market value of the lands to be exchanged. Some adjustments of acreage may be required to equalize values following the completion of the appraisal.

Publication of this notice in the **Federal Register** will segregate the subject lands from all appropriations under the public land laws, the mining laws, but not the mineral leasing laws. The segregation will terminate two years from the date of this notice or upon publication of a Termination of Segregation.

For a period of 45 days from the date of publication of this notice in the **Federal Register,** interested parties may submit comments to the District Manager, Elko District Office, Bureau of Land Management, 3900 E. Idaho Street, Elko, Nevada 89801.

Date: November 29, 1988.

Rodney Harris,

District Manager.

BILLING CODE 4310-HC-M

National Park Service

Concession Contract Negotiations; R and R Enterprises

AGENCY: National Park Service, Interior.

ACTION: Public notice.

SUMMARY: Public notice is hereby given that the National Park Service proposes to negotiate a concession contract with R and R Enterprises authorizing it to continue to provide lodging accommodations, groceries, gifts, restaurant and food service, trailer sites, and marina facilities and services for the public at Ross Lake National Recreation Area, in the state of Washington, for a period of ten (10) years from January 1, 1989, through December 31, 1998.

EFFECTIVE DATE: March 13, 1989.

ADDRESS: Interested parties should contact the Regional Director, Pacific Northwest Region, 83 South King Street, Suite 212, Seattle, Washington 98104, for information as to the requirements of the proposed contract.

SUPPLEMENTARY INFORMATION: This contract has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act and no environmental document will be prepared.

This proposed contract does not require a construction and improvement program.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expires by limitation of time on December 31, 1988, and therefore pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract as defined in 36 CFR 51.5.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand delivered on or before the ninetieth (90th) day following publication of this notice to be considered and evaluated.

Dated: November 18, 1988.

Rory D. Westberg,

Acting Regional Director, Pacific Northwest Region.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Public Information Collection Requirements Submitted to OMB for Review

The Agency for International Development (A.I.D.) submitted the following public information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Comments regarding these information collections should be addressed to the OMB reviewer listed at the end of the entry no later than ten days after publication. Comments may also be addressed to, and copies of the submissions obtained from the Reports Management Officer, John H. Elgin, (703) 875-1608, IRM/PE, Room 1100B, SA-14, Washington, DC 20523.

Date Submitted: December 1, 1988.
Submitting Agency: Agency for International Development.
OMB Number: None.
Type of Submission: New Collection.
Title: IAP-66A Usage Report.
Purpose: The IAP-66A Usage Report form is to establish a procedure to ensure accountability in the use of the IAP-66A forms. The IAP-66A forms are applications submitted to the Immigration and Naturalization Service for entry visas or extension of visas of A.I.D. participants who are being trained in the U.S. Collection of this information from AID field missions and participating contractors is used to improve accuracy in the accountability of IAP-66A forms being issued, voided, or lost. Respondents will have a submission burden of one submission per year which is estimated to average 65 minutes per response.
Reviewer: Francine Picoult (202) 395-7340, Office of Management and Budget, Room 3201, New Executive Office Building, Washington, DC 20503.

Dated: November 30, 1988.

Wayne H. Van Vechten,

Information Resources, Management, Planning and Evaluation Division.

BILLING CODE 6116-01-M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31320]

Indiana and Ohio Railway Co.; Construction and Operation; in Hamilton, Warren and Butler Counties, OH

AGENCY: Interstate Commerce Commission.

ACTION: Notice of intent to prepare an environmental impact statement and to hold a public scoping meeting.

SUMMARY: The Indiana and Ohio Railway Company will formally seek authorization, in the coming months, to construct and operate approximately 2.9 miles of railroad line. Due to the potential for significant environmental impacts, preparation of an environmental impact statement may be necessary. An informal public scoping meeting is planned on January 20 and 21, 1989. Therefore, a preliminary scope of study is proposed within this document.

DATES: The scoping meeting will take place in the general area of the proposed railroad construction. The times and location of the meeting will be decided in the near future. Requests to participate and written comments are due by January 13, 1989.

ADDRESS: Any interested persons wishing to file written comments should send them to: John O'Connell, Section of Energy and Environment, Interstate Commerce Commission, Washington, DC 20423, Tel. (202) 275-6842.

SUPPLEMENTARY INFORMATION: On September 30, 1988, the Indiana and Ohio Railway Company (I&O) notified the Commission that it intends to file an application seeking authorization to construct approximately 2.9 miles of railroad line located between Monroe and Mason, in Hamilton, Warren and Butler Counties, Ohio.[1] The purpose of the construction is to connect two other Indiana and Ohio line segments that currently terminate at Monroe and Mason. The connector line would provide the railroad with a less circuitous routing for some of I&O's traffic as well as providing its northern route, the Mason to Middletown Branch, with more convenient connections with other railroads at the McCullough Yard.[2]

[1] The application will be filed under the Commission's regulations pursuant to 49 U.S.C 10901.

[2] Railroads which connect to the McCullough Yard are CSX, NW, and Conrail.

BEST COPY AVAILABLE

The scope of study for the development of the environmental analysis will include the identification of impact-producing actions that could occur as a result of construction activity and rail service operations. Preliminary analysis by the Commission's Section of Energy and Environment (SEE) indicates that the rail line could adversely affect safety and noise quality in the communities surrounding the rail corridor. A discussion of these issues and others that may be of community concern will be addressed at the scoping meeting.

Construction activity can pose a threat to local communities when general construction activities such as cut and fill operations take place and in the building of rail track structures. During the scoping meeting, identificaton of all relevant Federal, State and local construction regulations and constaints will be discussed in relation to railroad construction.

On the operational aspects of safety concerns, we will address four major components: Grade crossing and pedestrian conflicts as well as possible train derailments and hazardous materials spills which may occur.

During the course of the environmental analysis any or all of these components of safety during construction and operation may eventually be found to present an adverse effect. If adverse effects are discovered, mitigation measures will be recommended in the draft EIS in order to partially or fully eliminate these adverse effects.

The scoping process will assist us in identifying the type and proximity of sensitive receptors, such as homes, school, hospitals, among others.

It has been the Commission's experience that a threshold of eight or more trains per day are required to exceed a noise level of 65 DBL,[3] a level which is normally unacceptable for housing environments. Available information indicates that rail service along the subject line will be comprised of only two trains daily. However, the environmental review process will consider the possibility that long-term traffic levels may exceed the eight trains a day threshold.

The scoping meeting will address the question of alternatives to the proposed rail line. Alternative rail alignments which will connect the existing end points at Monroe and Mason but deviate from the proposed right-of-way will be evaluated from an environmental standpoint. Additionally, other forms of railroad actions such as trackage rights, haulage rights and joint rates/competitive access agreements must be considered as courses of action which achieve, although indirectly, the overall objectives of the railroad, while protecting the local environment.

Although no preferred rail corridor exists, possible types of mitigating measures if needed will be discussed and evaluated. These measures may include: fencing, sound barriers, ditches, berms, and crossing signals which could be installed during the construction phase of the project. From an operational standpoint mitigation could result in limits on train speed and/or the times of day the trains may operate.

The SEE invites comments from interested individuals, organizations, and agencies to aid us in identifying additional items that should be addressed as part of the individual areas of investigation identified above or in additional areas that may be of environmental concern.

Any individual, organization, or agency who wishes to make a presentation at the informal public scoping meeting must call John O'Connell (202) 275–6842) by January 13, 1989 for scheduling purposes. It would be helpful if common concerns or interests were expressed by a single spokesperson. Written comments are also welcome and should be submitted on or before January 13, 1989. A final scope of study will be published in the **Federal Register** and served on all parties to the proceeding.

Anyone wishing to receive copies of the final scope, the draft environmental report and all other documentation served by the ICC on this proceeding (including decisions) should call the Office of the Secretary at (202) 275–7999 and request placement on the service list as an "advise of proceedings" party for docket number FD No. 31320. Those individuals who intend to participate more actively and wish, additionally, to receive all documentation as submitted by all parties to the proceeding must submit a written request to the same office for listing as a "party of record."

Date: December 6, 1988.

Decided by: John F. Hennigan, Jr., Director, Office of Transportation Analysis.

Noreta McGee,

Secretary.

BILLING CODE 7035–01–M

[3] DBL is a noise description that is used to derive sound levels in decibels.

[Docket No. AB–290 (Sub–No. 54X)]

Central of Georgia Railroad Co.; Abandonment Exemption; in Meriwether County, GA

Applicant has filed a notice of exemption under 49 CFR Part 1152 Subpart F—*Exempt Abandonments* to abandon its 1-mile line of railroad between milepost R–54.0 near Allie and milepost R–55.0 at Allie, in Meriwether County, GA.

Applicant has certified that: (1) No local or overhead traffic has moved over the line for at least 2 years; and (2) no formal complaint filed by a user of rail service on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected pursuant to *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on January 11, 1989, (unless stayed pending reconsideration). Petitions to stay that do not involve environmental issues [1] and formal expressions of intent of file an offer of financial assistance under 49 CFR 1152.27(c)(2) [2] must be filed by December 23, 1988. Petitions for reconsideration, including environmental, energy, and public use concerns, must be filed by January 3, 1989 with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Roger A.

[1] A stay will be routinely issued by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the Section of Energy and Environmental in its independent investigation) cannot be made prior to the effective date of the notice of exemption. *See Exemption of Out-of-Service Rail Line*, 4 I.C.C.2d 400 (1988).

[2] *See Exempt. of Rail Abandonment—Offers of Finan. Assist.*, 4 I.C.C.2d 164 (1987), and final rules published in the **Federal Register** on December 22, 1987 (52 FR 48440–48446).

Peterson, Solicitor, Norfolk Southern Corporation, One Commercial Place, Norfolk, VA 23510–2191.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio.*

Applicant has filed an environmental report which addresses environmental or energy impacts, if any, resulting from this abandonment.

The Section of Energy and Environment (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by December 17, 1988. Interested persons may obtain a copy of the EA from SEE by writing to it (Room 3115, Interstate Commerce Commission, Washington, DC 20423) or by calling Carl Bausch, Chief, SEE at (202) 275–7316.

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

Decided: December 6, 1988.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

[FR Doc. 88–28470 Filed 12–9–88; 8:45 am]

BILLING CODE 7035–01–M

[Docket No. AG–39 (Sub-No. 12)]

St. Louis Southwestern Railway Co.; Abandonment; In Smith and Cherokee Counties, TX; Findings

The Commission has found that the public convenience and necessity permit St. Louis Southwestern Railway Company (Cotton Belt) to abandon service over a 23.56-mile portion of the Lufkin Branch, between milepost 553.0, at or near Gresham, and milepost 576.56, at or near Jacksonville, in Smith and Cherokee Counties, TX.

A certificate will be issued authorizing abandonment unless within 15 days after this publication the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served on the applicant no later than 10 days from publication of this Notice. The following notation must be typed in bold face on the lower left-hand corner of the envelop: "**Rail Section, AB–OFA.**" Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

Decided: December 5, 1988.

By the Commission, Chairman Gradison, Vice Chairman Andre, Commissioners Simmons, Lamboley, and Phillips.

Noreta R. McGee,

Secretary.

DEPARTMENT OF JUSTICE

Antitrust Division

Competitive Impact Statement and Proposed Consent Judgement; United States v. TRW, Inc.; Correction

In notice document 88–27811 appearing on page 48735 in the issue of Friday, December 2, 1988, make the following additions:

1. Attached Stipulation;
2. Attached Final Judgment; and
3. Attached Competitive Impact Statement.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

UNITED STATES DISTRICT COURT FOR THE NORTHERN DISTRICT OF OHIO, EASTERN DIVISION

Stipulation

United States of America, Plaintiff, *v.* TRW Inc., Defendant., Civil No. C–88–4253, Judge John M. Manos.

Filed November 17, 1988.

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

(1) The parties consent that a Final Judgment in the form hereto attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. 16), and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on the defendant and by filing that notice with the Court.

(2) The parties shall abide by and comply with the provisions of the Final Judgment pending entry of the Final Judgment.

(3) In the event plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation will be of no effect whatever and the making of this Stipulation shall be without prejudice to any party in this or any other proceeding.

Dated: ——

For the Defendant TRW Inc.:
Jones, Day, Reavis & Pogue

By: William S. Swope

A Member of the Firm, 1450 G Street, NW., Washington, DC 20005. 202–879–3836.

Final Judgment

Whereas, plaintiff, United States of America, having filed its Complaint herein on November 15, 1988 and plaintiff and defendant, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law herein and without this Final Judgment constituting any evidence against or an admission by any party with respect to any such issue;

And whereas, the defendant has agreed to be bound by the provisions of this Final Judgment pending its approval by the Court;

And whereas, prompt and certain remedial action, to ensure that the defendant's acquisition of Chilton does not reduce the number of firms competing in the sale of consumer credit reports in overlap areas, or otherwise lessen competition in those markets, is the essence of this agreement; *And Whereas,* the defendant has represented to the plaintiff that the remedial action required below can be made and that defendant will later raise no claims of financial hardship or any other difficulty as grounds for asking the Court to modify any of the provisions contained below;

Now, therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law herein, and upon consent of the parties hereto, it is hereby

Ordered, adjudged and decreed as follows:

I

This Court has jurisdiction of the subject matter of this action and of each of the parties hereto. The Complaint states a claim upon which relief may be granted against defendant under section 7 of the Clayton Act, as amended (15 U.S.C. 18).

II

As used in this Final Judgment:

A. "TRW" means defendant TRW Inc., each subsidiary or division thereof, and each officer, director, employee, agent, or other person acting for or on behalf of any of them. TRW shall include the Chilton Corporation and any of its assets after such time as TRW acquires a majority of the voting stock of Chilton Corporation.

B. "Chilton" means Chilton Corporation, each subsidiary or division thereof, and each officer, director, employee, agent, or other person acting for or on behalf of any of them.

C. "Consumer credit report" means a compilation of consumer credit information supplied to a credit grantor or other person at their request.

D. "Consumer credit file" means an organized collection of consumer credit information records stored in and retrievable from a computer storage medium.

E. "Consumer credit information" means information relating to the credit worth, financial responsibility or paying habits of any consumer purchase or proposed consumer purchaser of goods or services on credit.

F. "Copy of consumer credit files" means an electronically reproduced complete copy, in machine readable format, of the compilation of credit information, concerning individuals having a current address within a particular overlap area, stored in and retrievable from either TRW Credit Data's or Chilton's electronic data processing system, immediately prior to the date the data transfer process is completed, no matter how or by whom such information was collected.

G. "Data transfer process" means the process of producing and transferring a complete copy of the consumer credit files for an overlap area, or the data to compile such consumer credit files, from the electronic data processing system of either TRW Credit Data or Chilton, as the case may be, to a purchaser. The data transfer process for an overlap area shall be considered completed when the designated copy of consumer credit files has been transferred to the purchaser in a form required by the purchase contract, or, in the event of a dispute between the defendant and purchaser, when plaintiff has been satisfied that the data transfer process has been completed.

H. "Network services" means the computerized storage, updating, and retrieval of consumer credit information and the provision of consumer credit information from such computerized storage base to credit bureaus.

I. "Overlap affiliates" means the entities listed below. Also set out below are the dates on which the current terms of their contracts for network service expire. Their marketing areas are set out in Attachment I.

Affiliate	Termination date
Credit Data of Hawaii, Inc., Honolulu, HI	4/30/89
Credit Data of Central Massachusetts, Inc., Framingham, MA	7/10/89
Credit Data of Rhode Island, Inc., Pawtucket, RI	5/22/89
Credit Bureau of Albuquerque, Inc., Albuquerque, NM	11/1/89
Credit Bureau of Santa Fe, Inc., Santa Fe, NM	11/1/89
Credit Bureau Services of New Hampshire, Inc., Manchester, NH	7/1/90
Rochester Credit Center, Inc., Rochester, NY	6/1/90

J. "Overlap area" means each of the geographic areas defined by U.S. Postal Service zip codes set forth in Attachments II and III.

K. "Person" means any natural person, corporation, association, firm, partnership or other legal entity.

III

A. The provisions of this Final Judgment shall apply to the defendant, to each of its successors and assigns, and to all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise.

B. Nothing herein contained shall suggest that any portion of this Final Judgment is or has been created for the benefit of any third party and nothing herein shall be construed to provide any rights to any third party.

IV

A. Unless such notice has already been provided, TRW is ordered and directed to provide written notice to overlap affiliates of its intent to terminate contracts relating to the sale of network services for the marketing areas set forth in Attachment I at the conclusion of such contracts' current term.

B. TRW is enjoined and restrained from renewing or extending any existing contract with an overlap affiliate relating to the sale of network services for any marketing area set forth in Attachment I, without the consent of plaintiff.

C. TRW is enjoined and restrained from entering into any new contract to provide network services to any overlap affiliate for any marketing area set forth in Attachment I for a period of five (5) years from the date of entry of this Final Judgment.

D. After the provision of notice required in Section IV. A., TRW is further enjoined and restrained from refusing to allow or acting materially to inhibit overlap affiliates from terminating their contractual obligations to TRW, or from entering into a new contract with any other person, with respect to the purchase of network services for any marketing area set forth in Attachment I. TRW may, however, assert contractual rights to preserve current relationships with Credit Data of Hawaii, Inc., Credit Data of Central Massachusetts, Inc., and Credit Data of Rhode Island, Inc. for a period of six (6) months from the date this Final Judgment is entered.

E. TRW is enjoined and restrained for a period of five (5) years from the date of entry of this Final Judgment from directly or indirectly acquiring any overlap affiliate without the consent of plaintiff.

V

A. (1) TRW, having entered into agreements to sell a copy of the consumer credit files maintained on TRW Credit Data's electronic data processing system for each of the geographic areas identified in Attachment II of this Final Judgment, is hereby ordered and directed to take all reasonable steps to consummate such agreements and to provide the purchasers such information, services, or assistance as are reasonably required to complete the data transfer process.

(2) TRW, having entered into an agreement to sell a copy of the consumer credit files maintained on Chilton's electronic data processing system for each of the geographic areas identified in Attachment III of this Final Judgment, is hereby ordered and directed to take all reasonable steps to consummate such agreement and to provide the purchaser such information, services, or assistance as are reasonably required to complete the data transfer process.

B. TRW shall take all reasonable steps to complete the data transfer process in accordance with the agreement it has with each purchaser no later than one hundred twenty (120)

days after the entry of this Final Judgment.

C. With the consent of plaintiff, the period in which the data transfer process is to be completed may be extended for up to sixty (60) days.

D. Copies of consumer credit files will be provided to the purchaser in a format that is agreeable to TRW and the purchaser.

E. Upon the request of a purchaser, TRW shall use all reasonable efforts to provide in an expedient manner such information as the purchaser may reasonably request, at any time up to sixty (60) days following the completion of the data transfer process, in connection with a purchase and transfer of a copy of consumer credit files in an overlap area, subject to reimbursement by the purchaser of TRW's reasonable expenses incurred in connection therewith.

F. TRW shall provide plaintiff notice when the data transfer process has been completed with respect to each overlap area.

G. If TRW is unable to complete a data transfer process for an overlap area to a person with whom it currently has a contract for sale of a copy of consumer credit files, TRW shall transfer a copy of the consumer credit files for that overlap area to a person as to whom plaintiff is satsified that: (i) The transfer is for the purpose of enabling the transferee to complete in the sale of consumer credit reports in the overlap area, (ii) the transferee currently has the managerial, operational, technical, and financial capability to compete in the sale of consumer credit reports, and (iii) the transfer will not adversely affect competition in any overlap area. TRW shall not finance all or any part of the purchase of a copy of the consumer credit files without the consent of plaintiff.

VI

Thirty (30) days from the date of entry of this Final Judgment and every thirty (30) days thereafter until the data transfers required by section V have been completed, TRW shall submit to the plaintiff a written report setting forth in detail the fact and manner of compliance with section V of this Final Judgment. TRW shall maintain full records of all efforts made to transfer copies of the consumer credit files in the overlap areas pursuant to section V.A. and to sell and transfer copies of the consumer credit files in the overlap areas pursuant to section V.G.

VII

A. For each overlap area, TRW shall maintain a complete copy of the consumer credit files to be sold and shall follow its usual business practices to ensure that the consumer credit information in the copy of the consumer credit files to be sold is current and up-to-date at the time of the data transfer process.

B. TRW shall not take any action that would materially jeopardize the sale or transfer of a copy any consumer credit file to be sold pursuant to the terms of this Final Judgment.

C. TRW shall not take any action that would materially jeopardize the operation of any overlap affiliate.

VIII

If the data transfer process for any overlap area has not been completed within one hundred twenty (120) days of entry of this Final Judgment (or such longer period if the period for completion of the data transfer process has been extended by Plaintiff pursuant to section V.C.), TRW shall file with the Court, within seven days of the date the data transfer process was to have been completed, a report setting forth its efforts to complete the data transfer process and explaining why the data transfer process has not been completed. TRW and Plaintiff may recommend to the Court any further orders to be entered. The Court shall enter such orders as it shall deem appropriate to accomplish the purpose of this Final Judgment, including appointment of an agent to sell copies of the consumer credit files in any overlap area for which the data transfer process has not been completed.

IX

For the purpose of determining or securing compliance with this Final Judgment, and subject to any legally recognized privilege, from time to time:

A. Duly authorized representatives of the Department of Justice shall, upon written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to defendant made to its principal offices, be permitted:

(1) Access during office hours of defendant to inspect and copy all books, ledgers, accounts, correspondence, memoranda and other records and documents in the possession or under the control of defendant, who may have counsel present, relating to any matters contained in this Final Judgment; and

(2) Subject to the reasonable convenience of defendant and without restraint or interference from it, to interview officers, directors, employees, agents, or other persons acting for or on behalf of defendant, who may have counsel present, regarding any such matters.

B. Upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division, made to defendant's principal office. defendant shall submit such written reports, under oath if requested, with respect to any of the matters contained in this Final Judgment as may be requested.

C. No information or documents obtained by the means provided in this section IX, shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party (including grand jury proceedings), or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

D. If at the time information or documents are furnished by defendeant to plaintiff, defendant represents and identifies in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and defendant marks each pertinent page of such material, "Subject to claim of privilege under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then ten (10) days notice shall be given by plaintiff to defendant prior to divulging such material in any legal proceedings (other than grand jury proceedings) to which defendant is not a party.

X

Jurisdiction is retained by this Court for the purpose of enabling plaintiff and the defendant to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction, implementation, or modification of any of the provisions of this Final Judgement, for the enforcement of compliance herewith, and for the punishment of any violations hereof.

XI

This Final Judgment will expire on the fifth anniversary of its entry by the Court.

XII

Entry of this Final Judgment is in the public interest.

United States District Judge

3. Zip codes 01000 through 01399, inclusive, except zip codes 01005, 01006, 01010, 01031, 01037, 01057, 01068, 01069, 01074, 01081, 01082, 01083, 01092, 01094, 01331, 01364, 01366, 01368, 01372, 01374, 01379, and 01380, in the state of Massachusetts.

4. Zip codes 48000 through 48399, inclusive, except zip codes 48003, 48029, 48116, 48137, 48139, 48143 and 48169 in the state of Michigan. In addition, zip codes 48442, 48462, 48667, and 49000 through 49299, inclusive, except 49021, 49060, 49076, 49096, 49251, 49264, 49285, 49010, 49035, 49046, 49050, 49058, 49070, 49078, and 49080 in the state of Michigan.

5. Zip codes 12010, 12025, 12032, 12078, 12095, 12108, 12117, 12134, 12139, 12164, 12190, 12589, 12812, 12842, 12847, 12864, 12922, 12926, 12927, 12938, 12940, 12949, 12965, 12967, 12973 and 12986. In addition, zip codes 13020 through 13999, inclusive, except 13053, 13062, 13068, 13073, 13732, 13734, 13736, 13743, 13811, 13812, 13827, 13835, 13840, 13845, 13864, 13065, 13143, 13146, 13148, 13154, and 13165, in the state of New York.

Competitive Impact Statement

The United States, pursuant to section 2(b) of the Antitrust Procedures and Penalties Act ("APPA"), 15 U.S.C. 16(b) through (h), files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

I

Nature and Purpose of the Proceeding.—On November 15, 1988, the United States filed a civil antitrust complaint under section 15 of the Clayton Act, 15 U.S.C. 25, alleging that the proposed acquisition of Chilton Corporation ("Chilton") by TRW Inc. ("TRW") would violate section 7 of the Clayton Act, 15 U.S.C. 18. The complaint names TRW as defendant.

The complaint alleges that the effect of the acquisition may be substantially to lessen competition in sales of consumer credit reports in sixteen (16) geographic markets. Both companies sell credit reports, either directly through credit bureau offices that they own (called "owned offices" herein) or indirectly through affiliated credit bureaus, in each of these markets. The complaint seeks, among other relief, to enjoin the transaction and thereby to prevent its anticompetitive effects and to maintain existing competitive conditions in the relevant markets.

On November 15, 1988, the United States and TRW filed a Stipulation by which they consented to the entry of a proposed Final Judgment designed to eliminate the anticompetitive effects of the acquisition. Under the proposed Final Judgment, as explained more fully below, TRW would be required to consummate contracts to sell copies of the consumer credit files in some markets and end affiliation agreements with independent credit bureaus in others. The United States and TRW

have stipulated that the proposed Final Judgment may be entered after compliance with the APPA, unless the government withdraws its consent. Entry of the proposed Final Judgment would terminate this action, except that the Court would retain jurisdiction to construe, modify, and enforce the proposed Final Judgment and to punish violations of the Judgment.

II

Events Giving Rise to the Alleged Violation. On March 20, 1988, TRW and Borg-Warner Corporation ("Borg-Warner") entered into a Stock Purchase agreement by which TRW would purchase all of the issued and outstanding stock of Chilton from Borg-Warner. TRW and its affiliates sell consumer credit reports to banks, finance companies, credit card companies, and other credit grantors under the trade name Credit Data. In many areas of the country, TRW competes with Chilton or its affiliates, which sell consumer credit reports under the trade name Credimatic.

Consumer credit reports are compilations of information on individual consumers that assist credit grantors in deciding whether or not to grant credit to particular consumers. Consumer credit reports normally include a consumer's age, marital status, number of dependents, social security number, current and most recent addresses, current and recent employers, and salary. Consumer credit reports also contain information obtained from the accounts receivable files of national, regional, and local credit grantors, including information on the current status of the account, the amount owed, any amount overdue and how long overdue, and any amount written off as uncollectable. In addition, consumer credit reports contain information compiled from public records, such as judgments, liens and bankruptcies. Consumer credit reports also disclose inquiry information that indicates each instance in which a credit grantor has purchased a credit report about an individual and reveals the extent to which the person has recently received or been denied credit.

The information in a credit report covers an extended period of time. The Fair Credit Reporting Act, 15 U.S.C. 1681 *et. seq.*, provides that a credit bureau may retain and report adverse credit information on an individual for up to seven years, except bankruptcy information which may be retained and reported for ten years. 15 U.S.C. 1681c. A company selling credit reports in a given area must possess information on the overwhelming majority of individuals residing in that area, for substantially that period of time, in order to be viewed by credit grantors as an adequate source of credit reports. A credit report that contains all the information desired by credit grantors and that covers a sufficient period of time is called a "full file."

Buyers purchase consumer credit reports primarily on the basis of the quality and quantity of information in the reports. A consumer credit report that does not contain all types of credit information or that does not contain information that covers a sufficient period of time is not a substitute for a full file consumer credit report.

The Complaint alleges that the provision of full file consumer credit reports is a relevant product market for antitrust purposes. There is no reasonable substitute to which a substantial number of customers would turn in response to a small, but significant and nontransitory, price increase for such reports.

Competition in the sale of credit reports occurs in local geographic markets, usually individual metropolitan areas. Credit grantors require credit information on a specific individual. For most areas there are only a small group of firms that compile information for and sell consumer credit reports on individuals that reside in that area.

Credit information is stored, updated and retrieved by computers. Only four companies, including TRW and Chilton, maintian data bases in which consumer credit information is stored. These companies sell credit reports primarily through their owned offices, but also through affiliated credit bureaus. Affiliated credit bureaus are independently owned and operated companies, or associations, that collect consumer credit information and store it in the centralized data bases of one of the four companies.

The owned offices and affiliated bureaus of each of the four companies make up a network for the provision of credit reporting services to credit grantors. Currently, each of the networks has particular regional strengths. Most of Chilton's offices and affiliated bureaus, for example, are in the southwest, midwest, and northeast. TRW is strongest on the east and west coasts. Although national coverage is an advantage for a network, TRW in many areas has not established an office. Rather, it has "Autofiles" which consist primarily of accounts receivable data gathered from national credit grantors, but does not include the accounts receivable data of local credit grantors. In other areas, it has opened local offices and collected some local accounts receivable and public record information, but for less than the three to five years necessary to establish a competitive file. Given the different reigonal strengths of TRW and Chilton, the acquisition will expedite TRW's entry into many markets and increase the geographic area in which it offers full files.

However, in a number of local markets, TRW and Chilton are direct competitors in the sale of credit reports. The Complaint identifies sixteen areas in which the transaction is likely to reduce competition substantially: The state of Arizona; Denver, Colorado; the state of Connecticut; the state of Hawaii; Boston, Massachusetts; Worcester, Massachusetts; Springfield, Massachusetts; Detroit, Michigan; the state of New Hampshire; the state of New Mexico; Syracuse, New York; Rochester, New York; Buffalo, New York; the state of Rhode Island; Dallas and Fort Worth, Texas; and Houston, Texas. Both companies have full files in these areas and significant market share. In no case is there more than two other competitors in the sale of consumer credit reports. The Complaint alleges that each of these markets is highly concentrated, that each would become substantially more concentrated as a result of TRW's proposed acquisition of Chilton, and that the transaction would cause the Herfindahl-Hirshman Index,[1] a measure of market concentration, to increase by at least 700 points to at least 3900.

Entry into the business of providing consumer credit reports is difficult, time consuming and expensive. Generally it takes three to five years to collect sufficient information to provide full file credit reports in a given market. Consequently, new entry by another party could not be accomplished rapidly enough in any relevant geographic area to prevent the anticompetitive results of this transaction.

[1] The Herfindahl-Hirshman Index ("HHI") is a measure of market concentration calculated by squaring the market share of each firm competing in the market and them summing the resulting numbers. For example, for a market consisting of four firms with shares of 30%, 30%, 20%, and 20%, the HHI is 2,600 ($30^2 + 30^2 + 20^2 + 20^2 = 900 + 900 + 400 + 400 = 2,600$). The HHI, which takes into account the relative size and distribution of the firms in a market, ranges from virtually zero to 10,000. The index approaches zero when a market is occupied by a large number of firms of relatively equal size and reaches 10,000 when a market is controlled by a single firm. The HHI increases both as the number of firms in the market decreases and as the disparity in size between the leading firms and the remaining firms increases.

III

Explanation of the Proposed Final Judgment. The United States brought this action because the effect of the acquisition may be substantially to lessen competition in the market for consumer credit reports in the relevant geographic markets in violation of section 7 of the Clayton Act. The risk to competition posed by this acquisition substantially would be eliminated by the relief provided in the proposed Final Judgment which will ensure that all of the relevant geographic markets will have as many competitors after the acquisition as they do currently.

Specifically, the proposed Final Judgment requires that TRW not renew agreements with affiliates located in Honolulu, Hawaii; Framingham, Massachusetts; Manchester, New Hampshire; Albuquerque and Santa Fe, New Mexico; Rochester, New York; and Pawtucket, Rhode Island. Agreements with these affiliates must be terminated at the end of their current term and TRW cannot enter into new affiliation agreements with those affiliates for at least five years. In addition, the proposed Final Judgment enjoins TRW from taking any action to prevent these affiliates from entering into new affiliation agreements with other vendors before their existing contracts with TRW expire. Termination of affiliation agreements will ensure that the acquisition will have no effect on competition in the relevant geographic markets where the affiliates operate because the affiliates will be free to enter into affiliation agreements with vendors other than TRW or Chilton. The terminated affiliates will have strong financial incentives to enter into new contractal relationships with a credit information data base service not fully represented in the local market. As a result, the number of competitors and their local market positions will remain substantially unchanged.

In order to eliminate the potential anticompetitive effects of the acquisition in the other relevant geographic markets, TRW has entered into agreements to sell a copy of either the file it now owns or a copy of the file it will acquire from Chilton for such markets to one of the other companies providing network services. Copies of these agreements are attached hereto (see Section VII below). The United States has reviewed the agreements and has determined to its satisfaction that the purchasers intend to use the data to compete with TRW in the sale of credit reports in the affected markets. The purchasers currently are not significant competitors in these markets. Thus, consummation of these agreements will preserve the current number of firms with full files in the affected markets. By requiring TRW to sell the credit information to a new competitor, the Final Judgment will preserve competitive options for credit grantors and thus eliminate the adverse effects on competition that would otherwise result from the acquisition.

The proposed Final Judgment affords TRW one hundred twenty (120) days from the date of entry of the Final Judgment to fulfill its contractual obligation to transfer a copy of the consumer credit files. This period may be extended for up to sixty (60) days with the consent of the Department of Justice. TRW shall take all reasonable steps necessary to accomplish the sales quickly and shall cooperate with purchasers of the consumer credit files in completing the data transfer process.

If TRW is unable to consummate a contract to sell copies of consumer credit files, the Final Judgment provides that TRW shall transfer a copy of the consumer credit files for that overlap area to some other person acceptable to the Department of Justice. Copies of the data must be sold to a purchaser or purchasers who can and will use it to compete in the specific relevant geographic market.

If TRW is unable to transfer a copy of the consumer credit files for an overlap area within the time provided for transfers in the proposed Final Judgment, TRW shall file with the Court, within seven days of the date the transfers were to have been completed, a report setting forth its efforts to consummate the contracts and transfer the consumer credit files and stating why the transfer process has not been completed. TRW and the Department of Justice may then recommend what further action should be taken and the Court shall enter such orders as it shall deem appropriate to accomplish the purpose of the Final Judgment.

The United States and TRW have stipulated that the proposed Final Judgment may be entered by the Court at any time after compliance with the APPA. The proposed Final Judgment constitutes no admission by any party as to any issue of fact or law. Under the provisions of section 2(e) of the APPA, entry of the proposed Final Judgment is conditioned upon a determination by the Court that the proposed Final Judgment is in the public interest.

IV

Remedies Available to Potential Private Litigants. Section 4 of the Clayton Act, 15 U.S.C. 15, provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in Federal court to recover three times the damages the person has suffered, as well as costs and reasonable attorneys fees. Entry of the proposed Final Judgment will neither impair nor assist the bringing of any private antitrust actions. Under the provisions of section 5(a) of the Clayton Act, 15 U.S.C. section 16(a), the proposed Final Judgment has no *prima facie* effect in any private lawsuit that may be brought against the defendants.

V

Procedures Available for Modification of the Proposed Final Judgment. The APPA provides a period of at least 60 days preceding the effective date of the proposed Final Judgment within which any person may submit to the United States written comments regarding the proposed Final Judgment. Any person who wishes to comment should do so within sixty days of the date of publication of this Competitive Impact Statement in the **Federal Register.** The United States will evaluate the comments, determine whether it should withdraw its consent, and respond to the comments. The comments and responses of the United States will be filed with the Court and published in the **Federal Register.**

Written comments should be submitted to Barry Grossman, Chief, Communications and Finance Section, Antitrust Division, U.S. Department of Justice, 555 4th Street, NW., Washington, DC 20001.

The proposed Final Judgment provides that the Court retains jurisdiction over this action and any party may apply to the Court for any order necessary or appropriate for its modification, interpretation or enforcement.

VI

Alternatives to the Proposed Final Judgment. For the markets in which TRW is required to consummate contracts to sell a copy of its or Chilton's consumer credit files, the United States considered requiring TRW to sell either the Chilton or TRW office along with the files. The United States rejected this alternative because it concluded that the most significant impediment to entry is acquisition of the data contained in consumer credit files. The United States concluded that other aspects of entry are not so substantial that a person with a copy of either the Chilton or TRW consumer credit files could not successfully enter a relevant geographic market within a reasonable time.

The United States also considered not allowing TRW to retain a copy of the consumer credit files that it must sell. The United States rejected this alternative because if TRW can retain a copy of both the Chilton and TRW consumer credit files it can provide consumers with a higher quality product.

As another alternative, the United States considered requiring TRW to sell copies of the combined TRW and Chilton consumer credit files that it will be retaining. This alternative was rejected because the United States believes that a copy of either firm's full file will be sufficient to enable the new firm to compete effectively in the relevant markets. The new firm will have all the credit information previously owned by one of the leading competitors in the market. That information will consist of full files, which means that it will cover most of the residents of the area for a substantial period of time.

As a final alternative to the proposed Final Judgment, the United States considered seeking a preliminary injunction to block TRW's acquisition of Chilton. The United States rejected that alternative because the sale of a copy of the consumer credit files or the termination of affiliates will establish viable independent competitors to TRW in all the relevant markets and will prevent the acquisition from having a significant anticompetitive effect in those markets. The United States is satisfied that the proposed Final Judgment provides substantially all the relief it would seek if it were to litigate the case in a full trial on the merits.

VII

Determinative Materials and Documents. The United States considers TRW's contracts with The Credit Bureau Inc. of Georgia and the Trans Union Credit Information Company to sell copies of consumer credit files in certain markets to be determinative documents. These contracts include the terms of the proposed divestiture and were determinative in formulating this proposed Final Judgment. Accordingly, they are being filed with this Competitive Impact Statement. However, insofar as the contracts contain confidential, commercially sensitive information relating to the price to be paid or the content of the files, that information has been redacted. The United States is prepared to file unredacted contracts with the Court, under seal, at its request.

Respectfully submitted,

George S. Baranko,

Richard L. Irvine,

Jonathan M. Rich,

Katherine M. Jones.

NATIONAL COMMUNICATIONS SYSTEM

Industry Executive Subcommittee of the National Security Telecommunications Advisory Committee; Meeting

A meeting of the Industry Executive Subcommittee of the National Security Telecommunications Advisory Committee will be held Wednesday, February 1, 1989. The meeting will be held at the MITRE Corporation, 7525 Colshire Drive, McLean, VA. Registration will begin at 8:30 a.m. and the meeting will start at 9 a.m. The agenda is as follows:

A. Opening remarks.

B. Administrative remarks.

C. Briefings on industry and Government activities.

Due to the requirement to discuss classified information, in conjunction with the issues listed above, the meeting will be closed to the public in the interest of National Defense. Any person desiring information about the meeting may telephone (202) 692-8274 or write the Manager, National Communications System, Washington, DC 20305-2010.

Edward R. Faison,

Master Sergeant, USAF.

Terrance N. Danner,

Captain, USN Assistant Manager, NCS Joint Secretariat.

Steven E. Elsen,

Major, USA.

Bruce G. Weiner,

Lieutenant Colonel, USAF.

BILLING CODE 3610-05-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-219]

GPU Nuclear Corp., et al.; Consideration of Issuance of Amendment to Provisional Operating License and Proposed No Significant Hazards; Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Provisional Operating License No. DPR-16, issued to GPU Nuclear Corporation, et al., (GPUN or the licensee) for operation of the Oyster Creek Nuclear Generating Station, located in Ocean County, New Jersey.

The proposed amendment requests two changes to the Oyster Creek Technical Specifications Table 3.1.1 in accordance with the licensee's application for amendment dated November 30, 1988. The first requested change deletes the requirement in Table 3.1.1.A.6 for a Low-Condenser Vacuum Scram when the Reactor Mode Switch is in the Refuel Position. The second requested change would revise Table 3.1.1.C.1 to add a reference to note "11" in the startup mode for the High Reactor Pressure Isolation Condenser initiation function. Note "11" states: This function not required to be operable with the reactor vessel head removed or unbolted."

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards considerations. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee's first proposed change deletes the requirement for Low Condenser Vacuum Scram when the Reactor Mode Switch is in the Refuel Position. This change would clarify the Technical Specifications to allow Rod Scram time testing to be performed while shutdown. The existing specifications are contradictory and would allow the surveillance to be performed following a refueling outage only after establishing a vacuum in the Main Condenser.

The Low Condenser Vacuum Scram provides overpressure protection for the Main Condenser, assuming that the Main Condenser initially had a vacuum, and was in the process of losing it. A loss of Condenser vacuum causes turbine steam stop valves to close, resulting in a turbine trip transient. The low condenser-vacuum trip anticipates this transient and scrams the reactor.

When the Reactor Mode Switch is in the refuel position, only one rod can be in any position other than fully inserted. With only one rod not fully inserted, the reactor cannot go critical and cannot produce sufficient steam to maintain a condenser vacuum.

As the function of the Low Condenser Vacuum Scram is to anticipate the loss of turbine transient, and neither a vacuum nor an on line turbine can be maintained while in the Refuel position, the Low Condenser Vacuum Scram serves no function in the Refuel position.

Therefore, the requested change has been determined to contain No Significant Hazards in that it does not:

1. Involve a significant increase in the probability or consequences of an accident previously analyzed.

As requested the change is only applicable during those times when the function is not required, no effect on probability or consequences is possible.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated.

As the requested change is only applicable to those conditions where the function is not required, no new kind of accident is created.

3. Involve a significant reduction in a margin of safety.

As the requested change is only applicable to those conditions when the function is not required, and would allow Rod Scram time testing to be performed while shutdown, the margin of safety is increased.

The licensee's second proposed change adds a reference to note "11" in the startup model for the High Reactor Pressure Isolation Condenser initiation function. Note "11" states:

> This function not required to be operable with the reactor vessel head removed or unbolted.

This change is necessary to install new analog pressure sensors during refueling outage 12R, presently in progress.

When reactor temperature is less than 212 °F and either the vessel head is removed or unbolted, there is no possibility of a major reactor pressure excursion. As a major excursion is not possible, the instrumentation required to initiate the Isolation Condenser in response to an excursion serves no purpose.

Therefore, the requested change has been determined to contain No Significant Hazards in that it does not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

The requested change is applicable only under those previously evaluated conditions where the function has been determined to be not required. Therefore, it does not increase the probability or consequences of any previously evaluated accident.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated.

As the requested change is only applicable to those conditions when the protective function has been determined to be not required, no new or different kind of accident is created.

3. Involve a significant reduction in a margin of safety.

As the applicability of the requested change has been limited to those times when the function is not required, no reduction in a margin of safety is possible.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of the **Federal Register** notice.

Written comments may also be delivered to Room P–216, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By January 11, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject provisional operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions that are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If the amendment is issued before the expiration of 30-days, the Commission will make a final determination on the issue of no significant hazards considerations. If a hearing is requested,

the final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards considerations, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves significant hazards considerations, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period, such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards considerations. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to John F. Stolz: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Ernest L. Blake, Jr. Esquire, Shaw, Pittman, Potts and Trowbridge, 200 N Street NW., Washignton, DC 20037, attorney for the licensee.

Nontimely filing of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i) through (v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated November 30, 1988, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the Local Public Document Room, Ocean County Library, 101 Washington Street, Toms River, New Jersey 08753.

Dated at Rockville, Maryland, this 7th day of December 1988.

For the Nuclear Regulatory Commission.

Alexander W. Dromerick,

Project Manager, Project Directorate I–4, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 88–28486 Filed 12–9–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–416]

Mississippi Power and Light Co., System Energy Resources, Inc., and South Mississippi Electric Power Association; Issuance of Amendment to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 51 to Facility Operating License No. NPF–29, issued to Mississippi Power and Light Company, System Energy Resources, Inc., and South Mississippi Electric Power Association to change the Operating License and the Technical Specifications to incorporate changes resulting from the May 26, 1987 revision to 10 CFR Part 55, "Operators' License," for the Grand Gulf Nuclear Station, Unit 1, located in Claiborne County, Mississippi. The amendment is effective as of the date of issuance.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings, as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on August 25, 1988 (53 FR 32485). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the Environmental Assessment, the Commission has concluded that the issuance of this amendment will not have a significant effect on the quality of the human environment.

For further details with respect to the action see: (1) The application for amendment dated December 16, 1987, as revised August 3, 1988, (2) Amendment No. —— to License No. NPF–29, and (3) the Commission's related Safety Evaluation and Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555 and at the Hinds Junior College, McLendon Library, Raymond, Mississippi 39154. A copy of items (2) and (3) may be obtained upon request, addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects I/II.

Dated at Rockville, Maryland this 5th day of December 1988.

For the Nuclear Regulatory Commission.

Elinor G. Adensam,

Director, Project Directorate II–1, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 88–28487 Filed 12–9–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–354]

Public Service Electric and Gas Co., Atlantic City Electric Co.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards; Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–57 issued to Public Service Electric and Gas Company and Atlantic City Electric Company (the licensees) for operation of the Hope Creek Generating Station, located in Salem County, New Jersey.

The proposed amendment would revise the spent fuel storage capacity limitation presently stated in the

Technical Specifications, Design Features Section 5.6.3 to read, "The spent fuel storage pool shall be limted to a storage capacity of no more than 1290 fuel assemblies," in accordance with the licensee's application for amendment dated October 26, 1988.

Technical Specification 5.6.3 presently limits spent fuel storage capacity to 1108 fuel assemblies. The licensee stated in this request:

> This limit was based on the installed storage capacity at the Hope Creek Generating Station (HCGS) at the time that the Operating License and Technical Specifications were issued and not on the design storage capacity of 4006 assemblies as described in FSAR section 9.1.2.2.2.2. The current restrictive limit on storage capacity effectively prohibits continued operation of HCGS by not providing core offload capability for fuel loaded beyond the second fuel cycle.
>
> The requested change, while not increasing storage capacity to the plant design limit, will permit the installation of an additional storage rack to accommodate the third fuel cycle. Fuel cycle design changes beyond the third cycle, currently under review regarding cycle length and fuel enrichments, may require a reanalysis and redesign of the storage racks. Any future modifications to the Technical Specifications brought about by a new fuel cycle strategy will be submitted, along with attendant fuel cycle design changes, for NRC approval.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration.

The Commission has provided guidance concerning the application of the criteria for determining whether a significant hazards consideration exists by providing certain examples of actions involving no significant hazards considerations and examples of actions involving significant hazards considerations (51 FR 7751). One of these examples of actions involving no significant hazards considerations is example (x):

> An expansion of the storage capacity of a spent fuel pool when all of the following are satisfied:
>
> (1) The storage expansion method consists of either replacing existing racks with a design which allows closer spacing between stored spent fuel assemblies or placing additional racks of the original design on the pool floor if space permits;
>
> (2) The storage expansion method does not involve rod consolidation or double tiering;
>
> (3) The Keff of the pool is maintained less than or equal to 0.95; and (4) No new technology or unproven technology is utilized in either the construction process or the analytical techniques necessary to justify the expansion.

The licensee stated in its request that the requested increase in allowed spent fuel storage capacity:

> a. Consists of placing an additional rack of the original design on the spent fuel pool floor;
>
> b. Does not involve rod consolidation or double tiering;
>
> c. Does not result in the Keff of the pool exceeding 0.95; and
>
> d. Will utilize no new or unproven technology in the construction process or analytical techniques necessary to justify the expansion.

Therefore, the proposed change falls within the scope of the example. Accordingly, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments should be addressed to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room P-216, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, 2120 L Street NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By January 11, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The

final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Att: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 2120 L Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–5000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Walter R. Bulter, Director, Project Directorate I–2, Division of Reactor Projects I/II; petitioner's name and telephone number; date petition was mailed; plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Conner and Wetterhahn, 1747 Pennsylvania Avenue NW., Washington, DC 20006, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1) (i) through (v) and 2.714(d).

The Commission hereby provides notice that this is a proceeding on an application for a license amendment falling within the scope of sectiosn 134 of the Nuclear Waste Policy Act of 1982 (NWPA), 42 U.S.C. 10154. Under section 134 of the NWPA, the Commission, at the request of any party to the proceeding, must use hybrid hearing procedures with respect to "any matter which the Commission determines to be in controversy among the parties." The hybrid procedures in section 134 provide for oral argument on matters in controversy, preceded by discovery under the Commission's rules, and the designation, following argument, of only those factual issues that involve a genuine and substantial dispute, together with any remaining questions of law, to be resolved in an adjudicatory hearing. Actual adjudicatory hearings are to be held on only those issues found to meet the criteria of section 134 and set for hearing after oral argument.

The Commission's rules implementing section 134 of the NWPA are found in 10 CFR Part 2, Subpart K, "Hybrid Hearing Procedures for Expansion of Spent Nuclear Fuel Storage Capacity at Civilian Nuclear Power Reactors" (published at 50 FR 41662, October 15, 1985) 10 CFR 2.1101 *et seq.* Under those rules, any party to the proceeding may invoke the hybrid hearing procedures by filing with the presiding officer a written request for oral argument under 10 CFR 2.1109. To be timely, the request must be filed within ten (10) days of an order granting a request for hearing or petition to intervene. (As outlined above, the Commission's rules in 10 CFR Part 2, Subpart G, and § 2.714 in particular, continue to govern the filing of requests for a hearing or petitions to intervene, as well as the admission of contentions). The presiding officer shall grant a timely request for oral argument. The presiding officer may grant an untimely request for oral argument only upon showing of good cause by the requesting party for the failure to file on time and after providing the other parties an opportunity to respond to the untimely request. If the presiding officer grants a request for oral argument, any hearing held on the application shall be conducted in accordance with the hybrid hearing procedures. In essence, those procedures limit the time available for discovery and require that an oral argument be held to determine whether any contentions must be resolved in an adjudicatory hearing. If no party to the proceeding requests oral argument, or if all untimely requests for oral argument are denied, then the usual procedures in 10 CFR Part 2, Subpart G apply.

For further details with respect to this action, see the application for amendment dated October 26, 1988, which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555, and at the Pennsville Public Library, 190 S. Broadway, Pennsville, New Jersey 08070.

Dated at Rockville, Maryland, this 5th day of December 1988.

For the Nuclear Regulatory Commission.

Walter R. Butler,

Director, Project Directorate I–2, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 88–28488 Filed 12–9–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No 50–298]

Nebraska Public Power District, Cooper Nuclear Station, Unit 1; Exemption

I

Nebraska Public Power District (the licensee) is the holder of Facility Operating License No. DPR–46 that authorizes operation of the Cooper Nuclear Station, 1 (the facility) at a steady state reactor power level not in excess of 2381 megawatts thermal. The facility is a boiling water reactor (BWR) located at the licensee's site in Nemaha County, Nebraska. The license provides, among other things, that the facility is subject to all rules, regulations and orders of the Commission now or hereafter in effect.

II

Section 50.54(w)(1) of 10 CFR Part 50 requires that licensees of nuclear power reactors maintain a minimum property insurance coverage for operating nuclear power plants in the sum of $1.06 billion.

By letter dated October 2, 1987, the licensee, by its attorney, requested a schedular exemption from the full requirements of 10 CFR 50.54(w)(1) until a satisfactory final order from a state or Federal court has been obtained and the licensee is able to obtain the necessary insurance policies from Nuclear Electric Insurance Limited (NEIL). Currently, the licensee maintains $750 million of property insurance obtained through

American Nuclear Insurers (ANI) and the Mutual Atomic Energy Reinsurance Pool (MAERP). The only source of additional insurance to comply with the Commission's new regulations is NEIL. However, NEIL is a mutual company and under the provisions of the Nebraska Constitution, as interpreted by the Nebraska Supreme Court, there is considerable doubt as to whether the licensee may lawfully purchase insurance from NEIL. In an effort to satisfy the limitations of Nebraska law, effective on March 29, 1985, NEIL amended its charter and by-laws, together with a proposal to issue appropriate policy endorsements. Based upon NEIL's actions, the licensee submitted an application to NEIL for decontamination and property insurance. By letter from NEIL dated June 28, 1985, the licensee was advised NEIL would not issue a policy to the licensee until the licensee had secured a declaratory judgment from the Nebraska Supreme Court that non-voting membership in NEIL and the issuance of policies with appropriate endorsements would not violate the Nebraska Constitution. On July 1, 1985, the licensee, jointly with the Omaha Public Power District (the Districts), commenced an action for a declaratory judgment in the District Court of Lancaster County, Nebraska. The District Court issued its decision on December 1, 1986 in which it declined to grant a declaratory judgment. The Districts appealed the ruling of the District Court to the Nebraska Supreme Court. On September 9, 1988, the Nebraska Supreme Court denied the District's request for a declaratory judgment that the Districts may, consistent with Nebraska law, purchase insurance from NEIL. The Districts assert they plan to appeal the Nebraska Supreme Court's ruling. If such appeal fails, they plan to commence an action for a declaratory judgment in the United States District Court in Nebraska and ask the Federal court to declare that the Commission's new regulations preempt any provisions of the Nebraska Constitution.

In this regard, the Districts estimate that if, as appears necessary, they must seek a declaratory judgment from the United States District Court, that process would likely require approximately 18 months. As a result, the Districts continue to be unable to comply with § 50.54(w)(1) and, by letter dated November 4, 1988, have requested renewal of their temporary exemption until a satisfactory order from a state or Federal court has been obtained and NEIL has issued the necessary policies.

III

The NRC staff has reviewed the licensee's request for renewal of a schedular exemption from the requirements of 10 CFR 50.54(w)(1). The licensee has reasserted, and the Commission has found, 52 FR 28966, that it is unable to provide equivalent protection in lieu of purchasing the NEIL coverage. NEIL coverage cannot be secured until a satisfactory final order from either a state or Federal court is obtained. For these reasons, the staff finds that the licensee has shown good cause for the requested renewal of the schedular exemption from the full requirements of 10 CFR 50.54(w)(1). However, the staff does not believe the exemption should be for an indefinite period. Accordingly, the requested schedular exemption is acceptable for a period of eighteen months from December 5, 1988. If an appropriate state or Federal court order has not been obtained by such date, the staff would give consideration to a new application for an exemption.

IV

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a)(1), this exemption is authorized by law, will not present an undue risk to the public health and safety and is consistent with the common defense and security. The Commission further determines that special circumstances, as provided in 10 CFR 50.12(a)(2)(v), are present justifying the exemption. The licensee has been making, and continues to make, a good faith effort to secure the necessary state or Federal court order. Upon securing the necessary court order, the licensee intends to purchase the insurance policy from NEIL which would put it in compliance with the requirements of 10 CFR 50.54(w)(1).

Accordingly, the Commission hereby grants an exemption, as described in Section III above, from § 50.54(w)(1) of 10 CFR Part 50 to extend the date for acquiring the full amount of property insurance required by the Commission's regulations to no later than eighteen months from December 5, 1988. The licensee is exempt from purchasing property insurance in excess of that available from ANI/MAERP.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will have no signficant impact on the environment (53 FR 48992).

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 5th day of December, 1988.

For the Nuclear Regulatory Commission.

Gary M. Holahan,

Acting Director, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 88-28489 Filed 12-9-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-285]

Omaha Public Power District, Fort Calhoun Station, Unit 1; Exemption

I

Omaha Public Power District (the licensee) is the holder of Facility Operating License No. DPR-40 that authorizes operation of the Fort Calhoun Station, Unit 1 (the facility) at a steady state reactor power level not in excess of 1420 megawatts thermal. The facility is a pressurized water reactor (PWR) located at the licensee's site in Washington County, Nebraska. The license provides, among other things, that the facility is subject to all rules, regulations and orders of the Commission now or hereafter in effect.

II

Section 50.54(w)(1) of 10 CFR Part 50 requires that licensees of nuclear power reactors maintain a minimum property insurance coverage for operating nuclear power plants in the sum of $1.06 billion.

By letter dated October 2, 1987, the licensee, by its attorney, requested a schedular exemption from the full requirements of 10 CFR 50.54(w)(1) until a satisfactory final order from a state or Federal court has been obtained and the licensee is able to obtain the necessary insurance policies from Nuclear Electric Insurance Limited (NEIL). Currently, the licensee maintains $750 million of property insurance obtained through American Nuclear Insurers (ANI) and the Mutual Atomic Energy Reinsurance Pool (MAERP). The only source of additional insurance to comply with the Commission's new regulations is NEIL. However, NEIL is a mutual company and under the provisions of the Nebraska Constitution, as interpreted by the Nebraska Supreme Court, there is considerable doubt as to whether the licensee may lawfully purchase

insurance from NEIL. In an effort to satisfy the limitations of Nebraska law, effective on March 29, 1985, NEIL amended its charter and by-laws, together with a proposal to issue appropriate policy endorsements. Based upon NEIL's actions, the licensee submitted an application to NEIL for decontamination and property insurance. By letter from NEIL dated June 28, 1985, the licensee was advised NEIL would not issue a policy to the licensee until the licensee had secured a declaratory judgment from the Nebraska Supreme Court that non-voting membership in NEIL and the issuance of policies with appropriate endorsements would not violate the Nebraska Constitution. On July 1, 1985, the licensee, jointly with the Nebraska Public Power District (the Districts), commenced an action for a declaratory judgment in the District Court of Lancaster County, Nebraska. The District Court issued its decision on December 1, 1986 in which it declined to grant a declaratory judgment. The Districts appealed the ruling of the District Court to the Nebraska Supreme Court. On September 9, 1988, the Nebraska Supreme Court denied the District's request for a declaratory judgment that the Districts may, consistent with Nebraska law, purchase insurance from NEIL. The Districts assert they plan to appeal the Nebraska Supreme Court's ruling. If such appeal fails, they plan to commence an action for a declaratory judgment in the United States District Court in Nebraska and ask the Federal court to declare that the Commission's new regulations preempt any provisions of the Nebraska Constitution.

In this regard, the Districts estimate that if, as appears necessary, they must seek a declaratory judgment from the United States District Court, that process would likely require approximately 18 months. As a result, the Districts continue to be unable to comply with § 50.54(w)(1) and, by letter dated November 4, 1988, have requested renewal of their temporary exemption until a satisfactory order from a state or Federal court has been obtained and NEIL has issued the necessary policies.

III

The NRC staff has reviewed the licensee's request for renewal of a schedular exemption from the requirements of 10 CFR 50.54(w)(1). The licensee has reasserted, and the Commission has found, 52 FR 28966, that it is unable to provide equivalent protection in lieu of purchasing the NEIL coverage. NEIL coverage cannot be secured until a satisfactory final order from either a state or Federal court is obtained. For these reasons, the staff finds that the licensee has shown good cause for the requested renewal of the schedular exemption from the full requirements of 10 CFR 50.54(w)(1). However, the staff does not believe the exemption should be for an indefinite period. Accordingly, the requested schedular exemption is acceptable for a period of eighteen months from December 5, 1988. If an appropriate state or Federal court order has not been obtained by such date, the staff would give consideration to a new application for an exemption.

IV

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a)(1), this exemption is authorized by law, will not present an undue risk to the public health and safety and is consistent with the common defense and security. The Commission further determines that special circumstances, as provided in 10 CFR 50.12(a)(2)(v), are present justifying the exemption. The licensee has been making, and continues to make, a good faith effort to secure the necessary state or Federal court order. Upon securing the necessary court order, the licensee intends to purchase the insurance policy from NEIL which would put it in compliance with the requirements of 10 CFR 50.54(w)(1).

Accordingly, the Commission hereby grants an exemption, as described in Section III above, from § 50.54(w)(1) of 10 CFR Part 50 to extend the date for acquiring the full amount of property insurance required by the Commission's regulations to no later than eighteen months from December 5, 1988. The licensee is exempt from purchasing property insurance in excess of that avaialble from ANI/MAERP.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this Exemption will have no significant impact on the environment (53 FR 48993).

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 5th day of December, 1988.

For the Nuclear Regulatory Commission.

Gary M. Holahan,

Acting Director, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 34-26342; File No. SR-NYSE-88-36]

Self-Regulatory Organization; Proposed Rule Change By New York Stock Exchange, Inc. Relating to Its New Rule 130 Regarding Overnight Comparison of Exchange Transactions

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 25 U.S.C. 78s(b)(1), notice is hereby given that on November 10, 1988, the New York Stock Exchange, Inc. ("NYSE") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of new NYSE Rule 130 which generally would require comparison of transactions effected on the Exchange by the close of business on the NYSE on the business day following the trade date.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in sections (A), (B), (C), and (D) below.

A. Purpose

The purpose of the proposed rule change is to require that transactions effected on the Exchange be compared or otherwise closed out within one business day from the date of trade. This new procedure will require the adoption of a new Overnight Comparison System which is set forth in proposed new NYSE Rule 130 (see Exhibit A). The proposed rule does not affect the settlement of transactions, the majority of which are currently compared and settled within five business days from the date of trade.

In order that transactions can be compared by the end of the next business day, the proposed rule requires that members and member organizations submit trade data for the

VOL 53 ISS 238 DE 12 1988 UMI

purpose of comparison by a specified time to be determined by the Exchange. The Exchange, of course, would determine a reasonable deadline for submission to the comparison process, in order that overnight comparison be operationally feasible.

The Exchange believes that the Overnight Comparison System will substantially increase the efficiency of the post trade comparison process. Additionally, it will reduce—by four entire business days—the length of time members and member organizations are exposed to the risk of loss due to market fluctuations on uncompared or "questioned" trades. The Exchange expects to implement the Overnight Comparison System within 18 months subsequent to Commission approval of this rule. This delayed effectiveness is expected to enable the Exchange and the Exchange community to work out the details of additional rules and procedures that will be necessary to implement the Overnight Comparison System and to become operationally ready when the proposed new rule becomes effective. The Exchange has endeavored to explain the new system and has sought comment on the proposed rule and will continue to work with the membership to facilitate the introduction of the Overnight Comparison System.

B. Statutory Basis for the Proposed Rule Change

By ensuring that transactions are compared or otherwise closed out on the business day following trade date, the proposed rule change will increase the efficiency of the post trade comparison process and reduce the length of time that investors, members and member organizations are exposed to the risk of market fluctuations on uncompared trades, and this, in turn, will protect investors and the public interest, as called for in section 6(b)(5) of the Act.

The proposed rule change meets other requirements of section 6(b)(5), in that it will: (i) Help prevent fraudulent and manipulative acts and practices; (ii) promote just and equitable principles of trade; and (iii) foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities. It also meets requirements of section 17A(a)(1) in that it will enhance the prompt and accurate clearance and settlement of securities transactions.

C. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe the proposed rule change will impose any burden on competition not in furtherance of the purposes of the Act.

D. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

In a Special Membership Bulletin dated May 27, 1988, the Exchange notified its membership that its Board of Directors had approved the circulation, for comment, of a proposed new rule requiring that transactions effected on the Exchange be compared or otherwise closed out within one business day from the date of trade. Due to the many responses received and the importance of this subject, the Exchange issued a second Special Membership Bulletin dated July 15, 1988, which extended the comment period.

The Exchange has received a total of 36 letters in regard to the Overnight Comparison System from: (i) 33 non-public and public clearing and introducing member firms, (ii) one non-member correspondent firm, (iii) the Organization of Two Dollar Brokers, and (iv) the Data Management Division of Wall Street of the Securities Industry Association. The concept of overnight comparison was generally strongly endorsed by the respondents, the majority of whom emphasized the importance of reducing the time period during which uncompared trades are exposed to the risk of the market.

Two commentators expressed opposition to the proposed system, basically on operational grounds, while another ten commentators, which were in favor of the system, had some operation questions and/or reservations. The Exchange believes that the concerns raised by these respondents have been largely addressed by the August 19, 1988, Membership Notice, which provided considerable operational information, and by thorough discussions with the Exchange staff. The Exchange recognizes that, as several of the respondents have noted, the new system will require some additional expenditures on the part of member firms, but the Exchange believes that such expenditures will be more than offset by the reduction by four full days of the risk of market exposure from uncompared trades.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to File No. SR–NYSE–88–36 and should be submitted by January 3, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: December 6, 1988.

Jonathan G. Katz,

Secretary.

Exhibit A—Next Day Comparison of Exchange Transactions

Rule 130. (a) Notwithstanding any other rule to the contrary, on and after (intentional blank) each transaction effected on the Exchange shall be compared or otherwise closed out by the close of business on the Exchange on the business day following the day of the contract.

(b) The provisions of paragraph (a) above shall apply regardless of whether the transaction has been submitted to a "Qualified Clearing Agency" for comparison or settlement, but such provisions shall apply only to contracts for "regular way" settlement in stocks, rights and warrants unless (i) the Exchange determines to apply the provisions to contracts in other securities or contracts for other

settlement terms or (ii) the terms of the contract (for example, "next day settlement") require comparison to be effected on or before the business day following the day of the contract.

(c) To facilitate next day comparison of transactions effected on the Exchange as provided for in paragraph (a) above, by such time following any such transaction as the Exchange may prescribe, each member or member organization which is a party to the contract shall submit, or cause to be submitted, such trade data as may be required by the Exchange or the Qualified Clearing Agency it selects, in such form as the Exchange or the Qualified Clearing Agency shall prescribe, to:

(i) The Qualified Clearing Agency it selects; or

(ii) Such facility as the Exchange may develop and implement to facilitate comparison of transactions effected on the Exchange; and,

(iii) In the case where a Qualified Clearing Agency will not be used to compare or settle the transaction, to the party or parties on the other side of the trade.

(d) Members and member organizations shall comply with such other rules and procedures as may be adopted by the Exchange or the Qualified Clearing Agency they select, for the comparison or settlement of transactions, for the resolution of uncompared or questioned trades, and for the collection and submission of audit trail data.

* * * Supplementary Material:

.10 For purposes of paragraph (b) of this Rule 130, the term "Qualified Clearing Agency" shall have the same meaning as set forth in paragraph .10 of Rule 132, provided further that a clearing agency shall be deemed a "Qualified Clearing Agency" only if it has established rules and procedures to facilitate next day comparison of transactions as provided for in paragraph (a) of this Rule 130.

BILLING CODE 8010-01-M

[Rel. No. 34-26343; File No. SR-SCCP 88-01]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change By the Stock Clearing Corp. of Philadelphia Relating to fees for Clearance and Settlement of Market Basket Trades

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on November 17, 1988, the Stock Clearing Corporation of Philadelphia ("SCCP") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

SCCP proposes as a rule change pilot fees for the clearance and settlement of basket trades.

II. Self-Regulatory Organization's Statement Regarding the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and statutory basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements:

(A) Self-Regulatory Organization's Statement of Purpose of, and Statutory Basis for, the Proposed Rule Change

With the emergence of stock index related instruments and the development of fast and efficient stock execution mechanisms, the 1980s have given rise to "Basket trading" whereby relatively risk-free, locked-in rates of return are achieved through the purchase or sale of stock index futures or options with the simultaneous and off-setting sale or purchase of baskets of stocks replicating those index positions.[1] SCCP's fee schedule traditionally has recognized the costs and appropriate fees associated with various types of trades. For example, SCCP's current schedule of charges establishes separate trade recording charges and value charges for regular trades, PACE trades, municipal bond trades and trades between two accounts. In this regard, SCCP believes that Basket trades represent a distinct type of trade with correspondingly different clearing implications. First, the stock execution portion of a Basket trade is one generally in highly capitalized listed stocks, *e.g.*, S&P 500 stocks. Moreover, because of the generally large dollar amount of the executed stock portion of a Basket trade, imposition of a clearing value charge could make basket trading prohibitively expensive. Accordingly, SCCP, desirous of attracting the business of participants whom engage in Basket trading to clear the stock execution side of those trades, has revised its fee schedule on a six-month pilot basis to accommodate this type of business. The pilot fees, which will not be added to the published SCCP Schedule of Charges until they become permanent, are as follows:

Trade Recording Charge

Basket Trades:

$0.60 per side for participants with 1 to 2,000 Basket trades per month.
$0.54 per side for participants with 2,001 to 6,000 Basket trades per month.
$0.48 per side for participants with 6,001 to 10,000 Basket trades per month.
$0.40 per side for participants with over 10,000 sides per month.

Value Charge: None.

Additionally, PHILADEP discounts are not applicable.

Before authorizing any participant to utilize the pilot fees, SCCP will determine that such participant is engaged in bona fide Basket trading and have assurance that only that segment of the participant's business is availed of the pilot fees. In this regard, SCCP will coordinate with the organization that clears the participant's index futures/options leg of its Basket trades to assure that the stock side of the trade is properly offset. While the Participants Fund contribution will be established and revised based on the quantity and type of Basket trading in which it engages, SCCP will also enhance its internal risk management department and will review daily, via a mark-to-maket report, potential exposure, and specifics relating to trading activity of the Basket trading participant.

The proposed rule change is consistent with section 17A(b)(3)(D) of the Exchange Act is providing for equitable allocations of reasonable dues, fees and other charges among participants. In this regard, SCCP has the computer and systems capacity to process the clearance and settlement of Basket trades. Because of the computer effeciency of handling the high trade volumes attendant to Basket trading and in order to attract this type of business to the clearing corporation, SCCP believes that the substantial clearing fee

---

[1] SCCP's definition of "Basket trading" corresponds to the Commission's Division of Market Regulation's definitions of "portfolio insurance" and "index arbitrage" as delineated in *The October 1987 Market Break A Report by the Divison of Market Regulation U.S. Securities and Exchange Commision*, dated February 1988 at pp. 1-2, 1-3.

discounts entailed by the new fees are appropriate under the Act.

(B) Self-Regulatory Organization's Statement on Burden on Competition

SCCP does not perceive any burdens on competition as a result of the proposed rule change, which is intended to provide a pilot specialized fee schedule for clearance and settlement of a particular type of trade.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No comments have been solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at SCCP. All submissions should refer to File No. SR–SCCP–88–01 and should be submitted by January 3, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: December 6, 1988.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–16678; 812–7181]

Banco Espanol Central de Credito, S.A.; Application December 6, 1988

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 ("1940").

APPLICANT: Banco Expanol Central de Credito, S.A. (to be formed).

RELEVANT 1940 ACT SECTION: Exemption requested under section 6(c) from all provisions.

SUMMARY OF APPLICATION: Applicant seeks an order to permit the issuance and sale of its equity securities in the United States.

FILING DATE: The application was filed on November 21, 1988.

HEARING OR NOTIFICATION OF HEARING: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 30, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of services by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549. Applicant, c/o Richard L. Russell, Esq., Baer Marks and Upham, 805 Third Avenue, New York, NY 10022.

FOR FURTHER INFORMATION CONTACT: Victor R. Siclari, Staff Attorney, at (202) 272–3026 or Stephanie M. Monaco, Branch Chief, at (202) 272–3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copies who can contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. The Applicant is a new bank which will be incorporated in Spain in 1989 after all required governmental consents and approvals have been obtained. The application is made on behalf of Applicant by Banco Central, S.A. ("BC") and Banco Espanol de Credito, S.A. ("BE"), but under Spanish law is deemed to have been made by Applicant on its incorporation, with all undertakings, consents and conditions in the application by operation of Spanish law being binding upon and fully assumed by Applicant on the date of its incorporation and thereafter. Upon incorporation, Applicant will acquire all of the assets and assume all of the liabilities of each of BC and BE. At the same time, the shares of each of BC and BE will be converted into and become exchangeable for shares of the Applicant and BC and BE will be dissolved. BC has previously received orders exempting it from all of the provisions of the 1940 Act in connection with the issuance and sale of its commercial paper notes and other debt securities and its equity securities in the United States. *See Banco Central, S.A.*, Investment Company Act of 1940 Release No. IC–15015 (March 26, 1986); *Banco Central, S.A.*, Investment Company Act of 1940 Release No. IC–15471 (December 10, 1986).

2. Upon acquiring all of the assets and assuming all of the liabilities of BC and BE, the Applicant will be a full-service commercial bank with 10 Spanish bank subsidiaries. On a combined pro forma basis at June 30, 1988, Applicant was the largest Spanish banking group in terms of total consolidated loans and advances (US $24 billion) and total consolidated assets (US $58.1 billion). Applicant and its Spanish bank subsidiaries will provide services to the public through approximately 5,399 branches in Spain and through 170 branch and representative offices in 28 other countries and territories. Applicant's principal business will be the taking of deposits and the making of loans. Together with the banking and financial subsidiaries, Applicant will conduct a commercial banking business and be subject to banking regulation in each of these countries and territories, and various members of Applicant's group will be subject to reserve requirements and regulatory controls imposed by the central banks and other authorities in most of these countries.

3. Governmental regulation of the Spanish banking industry is administered by its central bank, the Bank of Spain. Spanish banks are

subject to continuing central bank supervision of their activities and operations and to periodic inspection and regular reporting requirements designed to insure compliance with various rules, regulations and formulas governing capital, assets and liabilities. Applicant will be subject to the very same regulation and administrative supervision as BE and BC.

4. Applicant will conduct its banking activities in the United States through a branch in New York, agencies in Miami and San Francisco, a subsidiary commercial bank and a subsidiary state-chartered bank in New York, and a subsidiary commercial bank in Puerto Rico. Those banking activities subject the Applicant to the supervisory authority of the Board of Governors of the Federal Reserve System (the "FRB"), the Federal Deposit Insurance Corporation (the "FDIC"), the banking departments of the States of New York, Florida and California, and the Commissioner of Financial Institutions of the Government of Puerto Rico. In addition, Banco Central Corp. (a Puerto Rican licensed bank of the BC group) is a reporting company under the Securities Exchange Act of 1934 ("1934 Act") and upon listing of Applicant's shares in the form of American depository shares ("ADSs") on the New York Stock Exchange ("NYSE"), Applicant will be subject to compliance with the provisions of the Securities Act of 1933 (the "1933 Act"), the periodic reporting and filing requirements of the 1934 Act, and the rules and regulation of the NYSE. Applicant will be a registered foreign bank holding company, subject to all provisions of the Bank Holding Company Act of 1956, including the reporting and examination provisions. In addition, the Applicant is subject to the provisions of the International Banking Act of 1978 (the "IBA") as a foreign banking organization engaged in the business of banking in the United States. Under the IBA, Applicant's branch and agencies are subject to interstate banking restriction, direct examination by and reporting to the FRB and the maintenance of reserves with the local Federal Reserve Banks.

5. Applicant's New York branch and subsidiary state-chartered bank had total assets of approximately $1.5 billion on a combined pro forma basis at June 30, 1988. The branch and the subsidiary will be subject to regular supervision and examination by the New York State Banking Department. Applicant's New York subsidiary commercial bank had total assets of $416 million at June 30, 1988 and will be regulated by both the New York State Banking Department and the FDIC. Applicant's agencies in Florida and California, although smaller in terms of assets than the New York branch, will be supervised by the Florida and California banking authorities in a manner essentially similar to that in New York. Applicant's subsidiary bank in Puerto Rico had total assets of $1.28 billion at June 30, 1988, will be regulated by the Government of Puerto Rico and subject to examination by and reporting to both the Commissioner of Financial Institutions and the FDIC and will continue to be subject to such examination and reporting.

6. Applicant proposes to list its shares on the NYSE in the form of ADSs and to issue and sell equity securities in the future in the United States. Applicant would issue and sell its equity securities either directly or in the form of ADSs evidenced by American Depositary Receipts.

Applicant's Legal Analysis

1. Applicant states that the proposed exemption is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act. The exemption will advance the policies underlying the IBA of nondiscriminatory treatment of foreign banks in the United States. Applicant states that access to the United States investment market will provide United States investors with an ability to achieve greater diversification and lower risk by investing in its equity securities subject to the protection afforded by the 1933 Act and 1934 Act. Applicant submits that the section 3(c)(3) exception for domestic banks from the 1940 Act's definition of investment company was provided because comprehensive regulation and supervision of banks obviated the need for regulation under the 1940 Act. Applicant contends that these reasons also apply to Applicant because its operations will be controlled and overseen by Spanish banking authorities and its United States operations are subject to United States banking laws and various state banking laws. Hence, Applicant concludes that it is unnecessary and inappropriate to subject it to regulation under the 1940 Act.

Applicant's Conditions

If the requested order is granted, Applicant agrees to the following conditions:

1. Applicant undertakes that it will not make an offering of equity securities in the United States requiring registration under the 1933 Act unless (a) the offering of such securities is registered under the 1933 Act or (b) in the opinion of United States counsel for the Applicant an exemption from registration under the 1933 Act is available with respect to such offer and sale or (c) the staff of the SEC states that it would not recommend that the SEC take any action under the 1933 Act if such securities are not registered. No such securities shall be offered or sold unless, at the time, the Applicant is supervised and examined by governmental authorities in Spain having supervision over banks in that country and by State or Federal authorities in the United States having supervision over banks in this country.

2. Applicant undertakes that any offering of its equity securities in the United States will be made on the basis of disclosure documents which are appropriate and customary for such offering, whether made pursuant to a registration statement under the 1933 Act or an exemption therefrom.

3. Applicant undertakes that in connection with any offering by the Applicant of its equity securities in the United States, Applicant will appoint an agent to accept service of process in any suit, action or proceeding with respect to Applicant's offer and sale of such securities and instituted in any State or Federal court in New York City by the holder of any such securities and will expressly submit to the jurisdiction of any such court for the purpose of any such suit, action or proceeding.

4. Applicant represents that it has no present intention to curtail its banking operations in either the United States or Spain so that it would cease to be regulated as a bank in both the United States and Spain. If, however, such operations in the future are curtailed with the result that the Applicant is no longer regulated as a bank in the United States, Applicant agrees that it will continue to comply with its undertakings concerning the Applicant's appointment of an agent in New York City and the Applicant's submission to jurisdiction until such time as there shall be no holders in the United States of equity securities of the Applicant issued in reliance upon any SEC order made pursuant to this application.

5. Applicant further consents to the requested order being expressly conditioned on its compliance with the undertakings and representations summarized above and more fully set forth in the application.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 88-28497 Filed 12-9-88; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No. IC-16679; File No. 812-7126]

Keystone Provident Life Insurance Co. et al.

December 6, 1988.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of filing of application foir an order under the Investment Company Act of 1940 ("1940 Act").

APPLICANTS: Keystone Provident Life Insurance Company ("Keystone"); KMA Variable Account; Keystone Provident Variable Account I; Keystone Provident Variable Account II; Keystone Custodian Funds, Inc. (as Trustee); Keystone Custodian Funds, Inc.; Keystone Provident Financial Services Corp.; certain registered management investment companies: Cash Income Trust ("CIT"), Government Guaranteed Securities Trust ("GGST"), Government Securities Zero Coupon Trust ("ZCT"), Mortgage Securities Income Trust, Managed Growth Stock Trust, Investment Grade Bond Trust, High Yield Bond Trust ("HYBT"), Managed Assets Trust ("MAT"), and Aggressive Stock Trust ("AST") (the "Current Eligible Funds"), Money Market/Options Investments, Inc. ("MMOI"), Keystone Liquid Trust ("KLT"), Keystone Custodian Fund, Series B-1, Keystone Custodian Fund, Series B-2, Keystone Custodian Fund, Series B-4, Keystone Custodian Fund, Series S-1, Keystone Custodian Fund, Series S-3, and Keystone Custodian Fund, Series S-4 (the "Public Mutual Funds"); SteinRoe Variable Investment Trust ("SteinRoe Trust") and Stein Roe & Farnham Incorporated.

RELEVANT 1940 ACT SECTIONS: Applicants request an order pursuant to sections 6(c), 17(b), and 26(b) of the Investment Company Act of 1940 (the "1940 Act") and Rule 17d-1 thereunder.

SUMMARY OF APPLICATION: Applicants seek an order approving the redemption in-kind of shares of the Current Eligible Funds, the redemption for cash of certain shares of the Public Mutual Funds, and the purchase with the redemption proceeds of shares of the portfolios of the SteinRoe Trust ("Substitution"), which will thereafter serve as the funding vehicles for certain variable annuity contracts ("Contracts") offered by the KMA Variable Account, and certain variable life insurance policies ("Policies") offered by the Keystone Provident Variable Account I and Keystone Provident Variable Account II (collectively referred to with the KMA Variable Account as the "Accounts").

FILING DATE: The application was filed on September 19, 1988 and an amendment was filed on November 29, 1988.

HEARING OR NOTIFICATION OF HEARING: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 28, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the Commission, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the Commission.

ADDRESSES: Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Applicants, c/o Robert R. Baird, Esq., Keystone Provident Life Insurance Company, 99 High Street, Boston, Massachusetts 02110. Copies to Joan E. Boros, Esq., Freedman, Levy, Kroll and Simonds, 1050 Connecticut Avenue, NW., Suite 825, Washington, DC 20036, and John Benning, Esq., Senior Vice President, SteinRoe Variable Investment Trust, 800 Atlantic Avenue, Boston, Massachusetts 02210.

FOR FURTHER INFORMATION CONTACT: Jeffrey M. Ulness, Attorney, at (202) 272-2026 or Clifford E. Kirsch, Special Counsel, at (202) 272-2061 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the Public Reference Branch in person or the Commission's commercial copier which may be contacted at (800) 231-3282 (in Maryland (301) 253-4300).

Applicants' Representations

1. Keystone is a stock life insurance company, and is currently a wholly-owned subsidiary of The Travelers Insurance Company of Hartford, Connecticut ("Travelers"). Travelers has entered into a definitive Sales Agreement ("Agreement") with Liberty Mutual Insurance Company ("Liberty Mutual") to sell all of the capital stock of Keystone to Liberty Mutual. Among Liberty Mutual's indirect subsidiaries is the investment advisory firm of Stein Roe & Farnham Incorporated ("Stein Roe"). The sales transaction is subject to approval of the Commissioner of Insurance of the State of Rhode Island, the domiciliary state of Keystone. Keystone and Liberty Mutual have scheduled the closing of the sales transaction ("Closing") to occur on or before December 30, 1988. Keystone has scheduled the Substitution to occur on December 31, 1988 for accounting, tax and other reasons, including anticipated benefits to owners of the Contracts ("Contract Owners") and owners of the Policies ("Policy Owners").

2. The KMA Variable Account, registered as a unit investment trust under the 1940 Act, serves as the funding medium for Contracts issued and administered by Keystone, including individual deferred variable annuity contracts designed for use in connection with retirement plans defined as qualified plans or receiving special income tax treatment under sections 401, 403, 408, 457 or any similar provisions of the Internal Revenue Code of 1986, as amended ("Code") ("Qualified Contracts"), and for use with plans not qualifying for special income tax treatment under such provision of the Code ("Non-Qualified Contracts"). Retirement plans under section 457 of the Code are not defined as qualified plans by the Code, although they enjoy certain tax benefits under the Code. Keystone Provident Financial Services Corp. ("KPFSC") serves and will continue to serve as principal underwriter for the Contracts following the Closing and Substitution.

3. Purchase payments under the Contracts are currently allocated by Contract Owners among one or more KMA Subaccounts for investment in the Current Eligible Funds, except for GGST and ZCT. Each Current Eligible Fund is a separate, diversified, open-end management investment company registered under the 1940 Act. Shares of each of these Current Eligible Funds may be sold only to Keystone for the KMA Variable Account and other insurance company separate accounts. For each Current Eligible Fund there is a corresponding KMA Sub-account. Keystone Custodian Funds, Inc. ("KCF") is the investment adviser to the Current Eligible Funds, the Public Mutual Funds and also serves as Trustee to the Public Mutual Funds other than MMOI and KLT.

4. Prior to September 25, 1981, purchase payments from both Qualified

and Non-Qualified Contracts could be invested in one or more KMA Sub-accounts investing in the Public Mutual Funds, shares of which are also offered and sold to members of the general public without the purchase of a Contract, except for MMOI as explained below.

5. On September 25, 1981, the Internal Revenue Service ("IRS") issued Revenue Ruling 81-225. In response to Revenue Ruling 81-225 and Revenue Ruling 82-55, which was issued to clarify Ruling 81-225, Contracts are funded by different underlying Funds, as follows: Qualified and Non-Qualified Contracts issued prior to September 25, 1981 and Contracts issued pursuant to section 457 of the Code ("Section 457 Contracts") issued after September 25, 1981 and prior to May 1, 1986 are funded by the Public Mutual Funds. The Public Mutual Funds, as well as Keystone Custodian Fund, Series K-2 serve as the investment medium for a separate account that is not registered under the 1940 Act, pursuant to section 3(c)(11) and the contracts are not registered under the 1933 Act pursuant to section 3(a)(2). All other Contracts issued after September 25, 1981 and prior to July 1, 1986 are funded by the Current Eligible Funds and MMOI. Current KMA Sub-accounts now invest purchase payments from the Qualified and Non-Qualified Contracts in the available Current Eligible Funds, except for ZCT and for GGST. Non-Qualified Contracts purchased between April 9, 1981 and September 25, 1981 may not make any additional purchase payments ("Affected Contracts").

6. Keystone Provident Variable Account I and Keystone Provident Variable Account II ("VLI Accounts") are segregated investment accounts registered under the 1940 Act as unit investment trusts. The VLI Accounts were established to fund the Policies which are Individual Single Premium Variable Life Insurance Policies. Each VLI account is divided into sub-accounts that correspond to the Current Eligible Funds, including GGST and Government Securities Zero Coupon Trust ("ZCT"). KPFSC serves and will continue to serve as principal underwriter for the Policies following the Closing and Substitution.

7. The SteinRoe Trust is a series company with nine types of investment portfolios, called Funds, that have investment objectives, policies and restrictions that are similar, if not identical, to the investment objectives, policies and restrictions of the Current Eligible Funds. The fees for advisory and management services to be paid by the SteinRoe Trust will not be greater than the corresponding fees paid by the Current Eligible Funds.

8. The SteinRoe Trust has the following Funds that will be substituted for the Current Eligible Funds and the Public Mutual Funds ("Keystone Funds") and will be offered under the Contracts and Policies immediately following the Substitution: Cash Income Fund, Government Guaranteed Securities Fund, Mortgage Securities Income Fund, Investment Grade Bond Fund, High Yield Bond Fund, Managed Assets Fund, Managed Growth Stock Fund, Aggressive Stock Fund and Government Securities Zero Coupon Fund (referred to collectively as the "Funds"). Following the Substitution, interests under Qualified Contracts may be invested in the Government Guaranteed Securities Fund of the SteinRoe Trust.

9. Keystone on its own behalf and on behalf of the Accounts proposes to effect a substitution of all shares of the Keystone Funds, except as noted below in 10, for shares of the appropriate Funds of the SteinRose Trust, which is currently scheduled to occur on December 31, 1988. Within five days after the Substitution, the Contract Owners and Policy Owners (collectively referred to as "Owners") will receive written notice of the Substitution ("Notice") that identifies the shares that have been eliminated and substituted. Included in the mailing will be the Prospectus for the SteinRoe Trust and the supplements to the prospectuses of the Accounts that describe the purchase of Keystone by Liberty Mutual and the related Substitution. Owners will be advised in the Notice that for a period of thirty days from the mailing of the Notice, Owners may transfer all assets, as substituted, to any other available KMA or VLI Sub-account as appropriate.[1] Any such transfer will not be counted toward the current limitations on transfers under the Contracts or Policies. Following the Substitution, Owners will be afforded the same contract rights with regard to amounts invested under the Contracts and Policies at they currently have.

10. Contract Owners who purchased the Affected Contracts are required to include in their gross income earnings and gains from the ownership of Public Mutual Fund shares. Some uncertainty exists as to whether proceeds from the redemption of shares of the Public Mutual Funds relating to the Affected Contracts may be invested in the SteinRoe Trust in compliance with Treasury Regulation § 1.817-5(T) ("Diversification Regulations"). A similar uncertainty exists with regard to investing proceeds from the redemption of shares of the Public Mutual Funds relating to the section 457 Contracts. To avoid any uncertainty and further the SteinRoe Trust's compliance with the Diversification Regulations, Keystone proposes to retain investments under such Contracts in the Public Mutual Funds. Keystone will proceed with the Substitution with respect to all other Contracts invested in the Public Mutual Funds, including MMOI. The investment of proceeds from the redemption of interests in MMOI in the Funds of the SteinRoe Trust is permitted by the Diversification Regulations.

11. Keystone will redeem all shares of the Current Eligible Funds it currently holds on its own behalf, on behalf of certain unregistered separate accounts and on behalf of the Accounts on December 31, 1988. The Current Eligible Funds propose to effect the redemptions in-kind, e.g., to deliver, in return for its shares, the portfolio securities held by each Current Eligible Fund. In most cases, Keystone will receive all of the assets of the Current Eligible Fund, however, with regard to CIT, HYBT, MAT and AST, in which The Travelers Funds U for Variable Annuities and The Travelers Fund UL for variable life insurance have investments, an equitable division of the portfolio assets will be made between Keystone and its separate accounts and Travelers' two separate accounts, under directives of the Boards of Trustees of such funds. The directives will require the division of each portfolio holding to be on a basis proportionate to each Company's separate accounts' investments in the applicable Current Eligible Fund, to the extent possible. Keystone believes that the Current Eligible Funds' decisions to effect the redemptions in-kind will minimize transaction costs and maximize the full investment of the corresponding Funds of the SteinRoe Trust. Travelers and KCF have advised Keystone that registration statements of each Current Eligible Fund will be maintained pending their availability for investment under programs to be developed by Travelers and/or KCF.

12. The custodian, State Street Bank and Trust Company ("State Street"), will record all portfolio assets received from the Current Eligible Funds on its records for the corresponding Funds of the SteinRoe Trust upon issuance of shares of the Funds to the Accounts. The portfolio assets received from the Current Eligible Funds will be used to simultaneously purchase shares of

[1] Applicants will provide in the Notice of Substitution that the Owners will be given sixty days, instead of thirty days, to make such transfers.

BEST COPY AVAILABLE

corresponding Funds of the SteinRoe Trust. As a result, at all times, monies attributable to Owners currently invested in the Current Eligible Funds will be fully invested.

13. Keystone will redeem all shares of the Public Mutual Funds it currently holds on its own behalf, on behalf of any unregistered separate accounts and on behalf of the KMA Variable Account on December 31, 1988, except as discussed above in 12. Such redemption proceeds shall be in cash and simultaneously applied to purchase shares of certain Funds of the SteinRoe Trust. The investment objectives, policies and restrictions of the Public Mutual Funds do not in all cases directly correspond to the proposed investment objectives, policies and restrictions of the Funds of the SteinRoe Trust. In all cases, however, there is a Fund whose objective approximates the objective of the Public Mutual Fund. Keystone has reviewed the respective investment objectives, policies and restrictions and has determined which Fund of the SteinRoe Trust most closely corresponds to the Public Mutual Fund for purposes of the Substitution.

14. State Street will record the receipt of cash and subsequent investments on the books and records of the SteinRos Trust.

15. Applicants represent that the transactions effecting transfer of the portfolio assets of the Current Eligible Funds in return for shares of the SteinRoe Trust and the redemption of shares of the Public Mutual Funds for cash and the purchase of shares of the Funds of the SteinRoe Trust will be effected in conformity with section 22(c) of the 1940 Act and Rule 22c–1 thereunder. Owner interests, in practical economic terms, will be the same in any measurable way after the Substitution as such interests immediately prior to the Substitition. In each case, the consideration to be received and paid is, therefore, reasonable and fair.

16. The purposes, terms and conditions of the Substitution are consistent with the principles and purposes of section 26(b) and do not entail any of the abuses it is designed to prevent. Of primary significance is that the Substitution is occasioned by a compelling corporate purpose. Travelers' sale of Keystone and the acquisition by Liberty Mutual presents a situation giving rise to the need for the Substitution. The Agreement contemplates that Liberty Mutual is purchasing a company with substantial assests attributable to variable life insurance products and that future management of such assets will be by an affiliate of Liberty Mutual, SteinRoe.

17. The Substitution will not result in the type of costly forced redemption that section 26(b) was intended to guard against and is consistent with the protection of investors and the purposes fairly intended by the 1940 Act for the following reasons: (1) The Substitution is of shares of Funds of the SteinRoe Trust whose objectives, policies and restrictions are identical or similar to the Keystone Funds in all material respects so as to continue fulfilling the Owner's objectives and expectations; (2) Owners have thirty days [2] to reconsider the Substitution and reallocate the assets for investment in an Owner-selected Fund; (3) the Substitution will be at net asset value of the respective shares, without the imposition of any transfer or similar charge; (4) the Substitution will not be counted against the number of permissible transfers; (5) the Substitution in no way will alter the insurance benefits to Owners or the contractual obligations of Keystone and Owners will continue to look to Keystone with regard to their rights under the contracts and Policies; (6) Owners may choose to withdraw amounts credited to them following the Substitution; (7) the Substitution is expected to confer other economic benefits to Owners; (8) the Substitution is fair to all interests, including the interests of Owners of the Affected Contracts, Section 457 Contracts, owners of Travelers' contracts and the public shareholders investing in the Public Mutual Funds; (9) the voting rights of Owners will be the same before and after the Substitution; (10) the fees and charges paid by the Owners of Contracts and Policies will be no greater after the Substitution than before the Substitution as a result of the Substitution; (11) operating expenses of the SteinRoe Trust will be no greater than the operating expenses of the Current Eligible Funds as a result of the Substitution; (12) with respect to those Public Mutual Funds that experience expense ratios greater than the Current Eligible Funds, Keystone believes that it is reasonable to anticipate that the Owners may benefit from the expense ratios of the SteinRoe Trust that may be significantly lower than the expense ratios of the Public Mutual funds; and (13) the costs of the Substitution, including the costs of establishing the SteinRoe Trust, will not be borne by Owners.

18. The Substitution will produce various benefits to Owners and Keystone. There are seventeen Keystone Funds, and only nine Funds in the SteinRoe Trust. The Substitution constitutes a consolidation of assets among nine investment alternatives (ten series as defined under the 1940 Act) of a single investment company as opposed to the dispersion between seventeen separate funds. The consolidation may result in economies of scale and reduced administrative costs. The elimination of duplicative administrative expenses may be expected to result in some reduction of the expenses associated with the operations of the SteinRoe Trust. Keystone anticipates future benefits to Owners as a result of investment in a series form of investment company. The feasibility of adding additional investment alternatives is enhanced by the series form of the SteinRoe Trust. The Substitution may also provide benefits to Keystone by reducing certain of the administrative burden on and costs to Keystone. Moreover, the Substitution is occasioned by the compelling corporate purpose arising from the sale of Keystone to Liberty Mutual.

19. Section 17(d) of the 1940 Act and Rule 17d–1(a) thereunder prohibits any affiliated person or any affiliated person of such affiliated person, of a registered investment company, acting as principal, from participating or effecting any transaction in connection with any joint enterprise or other joint arrangement or profit-sharing plan in which any such registered investment company or a company controlled by such registered company, is a participant unless the Commission has entered an order approving the plan. Each Applicant may be deemed to be an affiliated person of certain or each other Applicant under section 2(a)(3) of the 1940 Act, and the Substitution may be deemed to be the type of transaction prohibited under section 17(d) of the 1940 Act and Rule 17d–1 thereunder. The Substitution anticipates simultaneous purchase and sale transactions involving a number of registered investment companies, and each such purchase and sale transaction is dependent on the other. Each purchase and sale transaction is, thus, an essential aspect of a more comprehensive plan. In this sense, each transaction may be deemed to be in connection with a joint arrangement within the contemplation of section 17(d) of the 1940 Act and Rule 17d–1 thereunder. Without necessarily agreeing to the applicability of section 17(d), Applicants are requesting an order of the Commission.

[2] *See infra* note 1.

Applicants' Legal Conclusion

Applicants submit, for all of the reasons stated herein, that their exemptive requests meet the standards set out in sections 6(c), 17(b) and 26(b) of the 1940 Act and Rule 17d–1 thereunder and that an order should, therefore, be granted.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Approval of Noise Compatibility Program 14 CFR Part 150, Anchorage International Airport, Anchorage, AK

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by the State of Alaska for Anchorage International Airport under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96–193) and 14 CFR Part 150. These findings are made in recognition of the description of federal and non-federal responsibilities in Senate Report No. 96–52 (1980). On January 22, 1987, the FAA determined that the noise exposure maps submitted by the State of Alaska under Part 150 were in compliance with applicable requirements. On October 11, 1988, the Administrator approved the Anchorage International Airport noise compatibility program except aviation noise abatement measures 3, 4, and 5. Measure 3 (limitation of the number of aircraft in the Lake Hood traffic patterns by holding incoming traffic at Pt. MacKenzie) relates to flight procedures under provisions of 104(b) for which no action is requires at this time, since it does not identify a demonstrative noise benefit, and can only be predicated on completion of an FAR Part 93 airspace review requested by the State of Alaska. Measure 4 (displacement of the east and threshold of the east/west waterlane) relates to flight procedures under provisions of 104(b) for which no action is required at this time, since Measure 4 is predicated on Measure 3 and does not indicate any demonstrative noise benefit. Measure 5 (restriction of touch-and-go training operations at the Lake Hood complex) is disapproved from an FAR Part 150 viewpoint due to lack of identified, specified noise benefits above the 65 Ldn contour.

EFFECTIVE DATE: The effective date of the FAA's approval of the Anchorage International Airport noise compatibility program is October 11, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. James S. Perham, Civil Engineer, Planning and Programming Branch, Airports Division, Federal Aviation Administration, 701 C Street, Box 14, Anchorage, Alaska 99513, telephone (907) 271–5448. Documents reflecting this FAA action may be obtained from the same individual.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program for Anchorage International Airport, effective October 11, 1988.

Under section 104(a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel. Each airport noise compatibility program developed in accordance with Federal Aviation Administration Regulations (FAR) Part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR Part 150 program recommendations is measured according to the standards expressed in Part 150 and the Act and is limited to the following determinations:

a. The noise compatibility program was developed in accordance with the provisions and procedures of FAR Part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

c. Program measures would not create an undue burden or interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in FAR Part 150, § 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program eligible for grant-in-aid funding from the FAA. Where federal funding is sought, requests for project grants must be submitted to the FAA Airports Regional Office in Anchorage, Alaska.

The State of Alaska submitted to the FAA on October 24, 1986, the noise exposure maps, descriptions, and other documentation produced during the noise compatibility planning study conducted from September 5, 1985, through December 31, 1987. The Anchorage International Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on January 22, 1987. Notice of this determination was published in the **Federal Register** on February 13, 1987.

The Anchorage International Airport study contains a proposed noise implementation by airport management and adjacent jurisdictions from date of study completion beyond the year 1991. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in section 104(b) of the Act. The FAA began its review of the program on April 14, 1988, and was required by a provision of the Act to approve or disapprove the program within 180 days. Failure to approve or disapproval such program within the 180-day period shall be deemed to be an approval of such program.

The submitted program contained 16 proposed actions on and off the airport for noise mitigation. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR Part 150 have been satisfied. The overall program, therefore, was approved by the Administrator effective October 11, 1988.

Approval was granted for all of the specific program elements. Summarized approved elements include:

a. Airport

Maximizing the existing preferential runway system; adoption of AC–91–53 and NBAA's close in departure procedures; and after the Lake Hood segment development, establishment of preferential runway use in segment barriers and construction of noise barrier.

b. Off Airport

Land use management techniques including compatible use zoning, mobile home and camper park restrictions, soundproofing, easements, noise levels identified on plats, comprehensive planning, adoption of noise compatibility planning criteria, and public land development criteria.

These determinations are set forth in detail in a Record of Approval endorsed by the Administrator on October 11, 1988. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices of the State of Alaska, Anchorage International Airport.

Issued in Anchorage, Alaska, November 18, 1988.

Russel S. Hathaway,

Manager, Airports Division, Alaskan Region.

[FR Doc. 88–28433 Filed 12–9–88; 8:45 am]

BILLING CODE 4910–13–M

Approval of Noise Compatibility Program; Missoula County Airport, Missoula, MT

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by the Manager of the Missoula County Airport under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96–193) and 14 CFR Part 150. These findings are made in recognition of the description of Federal and non-Federal responsibilities in Senate Report No. 96–52 (1980).

On May 25, 1988, the FAA determined that the noise exposure maps submitted by the Airport Manager under Part 150 were in compliance with applicable requirements. On November 4, 1988, the Associate Administrator for Airports approved the Missoula County Airport noise compatibility program. Most of the program elements were approved.

EFFECTIVE DATE: The effective date of the FAA's approval of the Missoula County Airport noise compatibility program is November 4, 1988.

FOR FURTHER INFORMATION CONTACT: Dennis G. Ossenkop; Federal Aviation Administration; Northwest Mountain Region; Airports Division, ANM–611; 17900 Pacific Highway South; C–68966; Seattle, Washington 98168. Documents reflecting this FAA action may be reviewed at this same location.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program for Missoula County Airport, effective November 4, 1988. Under section 104(a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the noise exposure maps. The Act requires such a program to be developed in consultation with interested and affected parties including the state, local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Federal Aviation Regulation (FAR) Part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR Part 150 program recommendations is measured according to the standards expressed in Part 150 and the Act and is limited to the following determinations:

a. The noise compatibility program was developed in accordance with the provisions and procedures of FAR Part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types of classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in FAR Part 150, § 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where Federal funding is sought, requests for project grants must be submitted to the FAA Airports District Office in Helena, Montana.

Missoula County submitted to the FAA the noise exposure maps, descriptions, and other documentation produced during the noise compatibility planning study conducted at Missoula County Airport. The Missoula County Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on May 25, 1988. Notice of this determination was published in the **Federal Register** on June 23, 1988.

The Missoula County Airport noise compatibility program contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion to the year 1991. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in section 104(b) of the Act. The FAA began its review of the

program on May 25, 1988, and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program.

The submitted program contained 9 proposed actions for noise mitigation on and off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR 150 have been satisfied. The overall program, therefore, was approved by the Associate Administrator for Airports effective November 4, 1988.

Outright approval was granted for 7 specific program elements. Program Element A.1 was disapproved because local conditions are such that a formal preferential runway use procedure is not practical. Program Element B.1 was disapproved pending submission of additional analysis regarding the zoning of land proposed for acquisition.

These determinations are set forth in detail in a Record of Approval endorsed by the Associate Administrator for Airports on November 4, 1988. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices of Missoula County Airport.

Issued in Seattle Washington on November 18, 1988.

Edward G. Tatum,

Manager, Airports Division, Northwest Mountain Region.

BILLING CODE 4910-13-M

Federal Railroad Administration

[Docket No. LI-88-4]

Petition for Waiver of Compliance; Canadian Pacific Ltd.

In accordance with 49 CFR 211.9 and 211.41, notice is hereby given that the Federal Railroad Administration (FRA) has received a request for a waiver of compliance with a requirement of its locomotive safety standards. The individual petition is described below, including the party seeking relief, the regulatory provision involved, and the nature of the relief being requested.

Canadian Pacific Limited

[Waiver Petition Docket Number LI-88-4]

The Canadian Pacific Limited (CP Rail) requests a waiver of compliance with certain provisions of the railroad locomotive safety standards (49 CFR Part 229). CP Rail seeks a temporary waiver of compliance with § 229.29, which stipulates that all brake valves, with the exception of 26 L Type, must be cleaned, tested and inspected every 736 calendar days. The 26 L type air brake equipment must be cleaned, inspected and tested every 1104 calendar days. The extended cleaning time period for 26 L type air brake equipment resulted from test data derived from a safe service test program started in 1981 and expanded in 1985 (see **Federal Register** Notices of June 29, 1981 (46 FR 33401) and January 29, 1985 (50 FR 3910) for details. CP Rail and the Canadian National Railways (CN Rail), in conjunction with the Canadian government's National Transportation Agency, will test and evaluate the condition of 26 L type locomotive air brake valves after 48 months of service instead of 36 months (approximately 1104 days). There will be 60 locomotives in the test program, 30 from each railroad. CP Rail has included the following ten locomotives, which are in international service:

DE1816, DE4234, DE4550, DE4733, DE5509, DE4211, DE4501, DE4708, DE5508 and DE8035.

The test commenced on February 15, 1988. The extended test period for each locomotive will commence at the expiration of its normal 36-month service period. This arrangement staggers both the beginning and ending period for the 60 locomotives under test. The National Transportation Agency states that the test locomotives will be operated over the entire system of both railroads under variable conditions, such as weather, temperature and geographical locations. The locomotives will be closely monitored, and brake valves will be disassembled throughout the test program to determine their condition.

Based on CP Rail's representations, FRA has conditionally approved CP Rail's petition and granted an interim conditional waiver permitting the carrier to operate the ten locomotives in the United States while its petition is being announced for public comments, considered by FRA, and finally resolved. FRA has granted this interim waiver in order to preserve the integrity of the test.

The following conditions apply to each of the ten locomotives in international service:

(1) That each locomotive included in this waiver have a notice prominently displayed in the control compartment with the information:

Air Brake Equipment Under Test with FRA Waiver Approval;

(2) That the specific equipment under test be identified in some manner or be listed on the Inspection and Repair Report on display in the control compartment;

(3) That the results of the test be provided to the FRA when the program is completed; and

(4) That the FRA Office of Safety RRS-10, 400 Seventh Street, SW., Washington, DC 20590, be notified as soon as practicable if any incident occurs that is attributable to the air brake on a locomotive covered by this waiver.

Interested parties are invited to participate in this proceeding by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with this proceeding since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (here, Waiver Petition Docket Number LI-88-4) and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590. Communications received before January 26, 1989, will be considered by FRA before final decision is made. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m. to 5 p.m.) in Room 8201, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

Issued in Washington, DC, on December 6, 1988.

J.W. Walsh,

Associate Administrator for Safety.

[FR Doc. 88-28504 Filed 12-9-88; 8:45 am]

BILLING CODE 4910-06-M

Federal Highway Administration

Environmental Impact Statement; City of Raleigh and Wake County, NC

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an

environmental impact statement will be prepared for a proposed highway project within the City of Raleigh and Wake County, North Carolina.

FOR FURTHER INFORMATION CONTACT: Mr. Roy C. Shelton, District Engineer, Federal Highway Administration, 310 New Bern Avenue, P.O. Box 26806, Raleigh, North Carolina 27611, Telephone (919) 790–2856.

SUPPLEMENTARY INFORMATION: The FHWA, in connection with the North Carolina Department of Transportation (NCDOT), will prepare an environmental impact statement (EIS) on Duraleigh Road between I–40 and US 70 in Raleigh and Wake County. The proposed action includes the construction of a multilane partially controlled access highway on new location between I–40 and SR 1664 near Crabtree Creek and widening to a multilane facility along the existing alignment from near Crabtree Creek to US 70. The proposed action is a part of the 1986 Greater Raleigh Urban Area Thoroughfare Plan.

Alternatives under consideration include:

(1) Construction of a multi-lane facility along one of several alignments on the new location portion of the project

(2) The "no build" alternative

Letters describing the proposed action and soliciting comments are being sent to appropriate Federal, State, regional and local agencies. A public meeting and meetings with local officials and neighborhood groups will be held in the study area. A public hearing will also be held. Information on the time and place of the public hearing will be provided to the local news media. The draft EIS will be available for public and agency review and comment at the time of the hearing. No formal scoping meeting is planned at this time.

To ensure that the full range of issues related to the proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments and questions concerning the proposed action should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Roy C. Shelton,

District Engineer.

BILLING CODE 4910–22–M

Maritime Administration

[Docket S–842]

American President Lines, Ltd.; Application for a Waiver of Section 804(a) of the Merchant Marine Act, 1936, as Amended, To Permit Certain Foreign-Flag Operations

American President Lines, Ltd. (APL), by application dated November 7, 1988, as amended, requests waiver of the provisions of section 804(a) of the Merchant Marine Act, 1936, as amended (Act), for foreign-flag feeder operations to the People's Republic of China (PRC).

APL's Existing Services

APL now performs four subsidized containership services. Its two transpacific services cover the range of former Trade Route (TR) 29 to/from California on up to 108 annual sailings (Line A) and to/from Oregon-Washington on up to 80 annual sailings (Line B). Former TR 29 includes ports in the Far East on the continent of Asia from the U.S.S.R. to Thailand, inclusive, Japan, Taiwan, and the Philippines. APL's two extension services add authority to serve the ports of Southeast and South Asia and the Persian Gulf on up to 28 sailings to/from California (Line A Extension) and up to 80 sailings to/from Oregon-Washington (Line B Extension) annually. APL is permitted by its contract to provide any part of the service by transfer or relay of cargo between subsidized vessels at any foreign port on the authorized services.

APL performs its Line A and Line B services primarily with line-haul vessels making direct calls at most major foreign TR 29 ports, including Yokohama, Kobe, and Okinawa, Japan; Kaoshiung and Chi-lung, Taiwan; and Hong Kong. Korea and the Philippines are served by APL subsidized feeder vessels.

APL Extension services are currently performed by a feeder network that includes two subsidized U.S.-flag APL owned vessels providing service on a relay basis to Singapore and Colombo via Kaohsiung, and to Fujayrah, Masqat, and Karachi via Colombo. The remaining feeder services have been foreign-flag common carriers. However, on June 3, 1988, APL was granted an 804 waiver to substitute 10 APL-owned or chartered foreign-flag vessels for 10 vessels in six of its feeder services in southern and southwestern Asia. This waiver is for five years, until June 3, 1993.

In April 1988, The Maritime Administration extended, for a second period of two years, until May 22, 1990, its waiver of the provisions of section 804 originally granted to APL in May 1986. This waiver allowed APL to own/charter and operate three foreign-flag vessels of 350 FEU capacity each for feeder service between APL's Line A or Line B ports, including Singapore, and Manila and Thailand.

The Requested Waiver

A mainland China waiver authority originally granted in May 1986 along with the above-mentioned Thailand service, was never used by APL, therefore the April 1988 two year extension did not include—and was not requested by APL—any mainland China waiver authority. Thus APL's November 7, 1988, request for "renewal of the 1986 permission" for two foreign-flag vessels of approximately 200 FEU capacity to be operated between a foreign port on Line A or Line B as described in APL's ODSA, including Singapore, and a port of ports in the People's Republic of China, is being considered a new 804 waiver application.

APL hopes that an apparent PRC restriction against supplying export cargo to foreign lines' feeder services may be removed, by diplomatic or commercial negotiation. APL states that such negotiations may be aided if APL is in a position to make prompt implementation of any agreement which may be reached. Thus the application for waiver for the PRC feeder is requested now.

This application may be inspected in the Office of the Secretary, Maritime Administration. Any person, firm, or corporation having any interest in such request within the meaning of section 804 of the Act and desiring to submit comments concerning the application must file written comments in triplicate with the Secretary, Maritime Administration, Room 7300, Nassif Building, 400 Seventh Street SW., Washington, DC 20590. Comments must be received no later than 5:00 p.m. on January 6, 1988. This notice is published as a matter of discretion and publication should in no way be considered a favorable or unfavorable decision on the application, as filed or as may be amended. The Maritime Administrator will consider any comments submitted and take such action with respect thereto as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No. 20.804 (Operating-Differential Subsidies))

By Order of the Maritime Administrator.

Date: December 7, 1988.

James E. Saari,

Secretary, Maritime Administration.

[FR Doc. 88-28501 Filed 12-9-88; 8:45 am]

BILLING CODE 4910-81-M

[Docket S-841]

Chestnut Shipping Co. and Margate Shipping Co.; Application for a Waiver of Section 804 of the Merchant Marine Act, 1936, as Amended To Permit the Acquisition of an Interest in or Charter of Foreign-Flag Vessels

By application of November 23, 1988, Margate Shipping Company (Margate), with respect to Operating-Differential Subsidy Agreement (ODSA), Contract MA/MSB-134, and Chestnut Shipping Company (Chestnut), with respect to ODSA, Contract MA/MSB-299, request a waiver of the provisions of section 804(a) of the Merchant Marine Act, 1936, as amended (Act), until December 23, 1993, and November 11, 1996, the termination dates of the respective ODSAs, under special circumstances and for good cause shown pursuant to section 804(b) of the Merchant Marine Act, 1936, as amended (Act), so as to permit their affiliate Keystone Shipping Co. (Keystone) to acquire an interest in or charter nine foreign-flag crude and product tankers of 40,000 to 130,000 deadweight capacity. According to Keystone and Margate, they request nothing more than the Maritime Administrator (Administrator) granted Mormac Marine Group, Inc. (Mormac) in Docket S-831.

In response to Margate and Chestnut's original application of March 31, 1988, the Administrator by action of August 5, 1988, granted limited waivers under section 804(a) of the Act for their affiliate Keystone to charter in and charter out foreign-flag liquid bulk vessels ranging from 50,000 to 150,000 deadweight tons (DWT) for a limited period of six months from the date of its first foreign-flag charter. The first charter commenced on October 23, 1988, and thus the waivers will expire on April 22, 1989.

The applicants state that the essential facts, policy, law and arguments governing the Mormac application are indistinguishable from the instant application. For the special circumstances and good cause shown in support of this application, they respectively refer the Administrator to their original application for a section 804(a) waiver submitted on March 31, 1988; the support for such a waiver contained in Mormac's section 804(a) application of May 20, 1988; the findings of fact and determinations made by the Administrator in Docket S-826, dated August 5, 1988, and September 28, 1988, with respect to the waivers granted Margate and Chestnut and Docket S-831 dated November 1, 1988, with respect to the waiver granted Mormac.

This application may be inspected in the Office of the Secretary, Maritime Administration. Any person, firm, or corporation having any interest in such application within the meaning of section 804 of the Act and desiring to submit comments concerning the application must file written comments in triplicate with the Secretary, Maritime Administration, Room 7300, Nassif Building, 400 Seventh Street SW., Washington, DC 20590. Comments must be received no later than 5:00 p.m. on January 6, 1989. This notice is published as a matter of discretion. The Maritime Administrator will consider any comments submitted and take such action with respect thereto as may be deemed appropriate.

BILLING CODE 4910-81-M

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: December 6, 1988.

The Department of Treasury has made revisions and resubmitted the following public information collection requirements(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

Internal Revenue Service

OMB No. 1545-0895.

Form No. IRS Form 3800.

Type of Review: Resubmission.

Title: General Business Credit.

Description: Internal Revenue Code section 38 permits taxpayers to reduce their income tax liability by the amount of their general business credit, which is an aggregation of their investment credit, jobs credit, alcohol fuel credit, research credit, low-income housing credit, and employee stock ownership (ESOP) credit carryforward. Form 3800 is used to figure the correct credit.

Respondents: Farms, Businesses or other for-profit, Small businesses or organizations.

Estimated Number of Respondents: 200,000.

Estimated Burden Hours Per Response:

Recordkeeping—10 hours, 2 minutes
Learning about the law or the form—7 hours, 24 minutes
Preparing the form: 25 hours, 34 minutes
Copying, assembling, and sending the form to IRS—5 hours, 5 minutes

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 9,620,000 hours.

Clearance Office: Garrick Shear, (202) 535-4297, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf, (202) 395-6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

Date: December 6, 1988.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

Departmental Offices

OMB No. 1505-0091.

Form No. TD F 90-22.27 (TFAC 31; TD F 90-22.28 (TFAC 32).

Type of Review: Revision.

Title: South African Transactions Regulations.

Description: Submisssions will provide the U.S. Government information to be used in administering and enforcing sanctions against South Africa.

Respondents: Individuals or households, Businesses and other for-profit.

Estimated Number of Respondents: 560.

Estimated Burden Hours Per Response: 2 hours.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 1,120 hours.

Clearance Officer: Dale A. Morgan, (202) 343–0263, Departmental Offices, Room 2224, Main Treasury Building, 15th and Pennsylvania Avenue, NW., Washington, DC 20220.

OMB Reviewer: Milo Sunderhauf, (202) 395–6880, Office of Management and Budget, Room 3001, New Executive Office Building, Washington, DC 20503.

BILLING CODE 4810–25–M

Public Information collection Requirements Submitted to OMB for Review

Date: December 6, 1988.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB review listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

Alcohol, Tobacco and Firearms

OMB Number: 1512–0092.

Form Number: ATF F 5100.31 (1648) (1649) (1650).

Type of Review: Extension.

Title: Application for Certification/ Exemption of Label/Bottle Approval Under the Federal Alcohol Administration Act.

Description: The Federal Alcohol Administration Act regulates the labeling of alcoholic beverages and designates the Treasury Department to oversee compliance with regulations. This form is completed by the regulated industry and submitted to Treasury as an application to label their products. Treasury oversees label applications to prevent consumer deception and to determine falsification of unfair advertising practices on alcoholic beverages.

Respondents: Businesses and other for-profit, Small businesses or organizations.

Estimated Number of Respondents: 6,060.

Estimated Burden Hours Per Response: 30 minutes.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 27,300 hours.

OMB Number: 1512–0204.

Form Number: ATF F 5110.38.

Type of Review: Extension.

Title: Formula for Distilled Spirits Under the Federal Alcohol Administration Act (Supplemental).

Description: ATF F 5110.38 is used to determine the classification of distilled spirits for labeling and for consumer protection. The form describes the person filing, type of product to be made, and restrictions to the labeling and manufacture. The form is used by ATF to ensure that a product is made and labeled properly and to audit distilled spirits operations.

Respondents: Businesses and other for-profit, Small businesses or organizations.

Estimated Number of Respondents: 200.

Estimated Burden Hours Per Response: 1 hour.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 4,000 hours.

OMB Number: 1512–0482.

Form Number: 5100/1.

Type of Review: Extension.

Title: Labeling and Advertising Requirements Under the Federal Alcohol Administration Act.

Description: Under the Federal Alcohol Administration Act, bottlers and importers of alcohol beverages are required to display certain information for consumers on labels and in advertisements. Other optional statements are also required.

Respondents: Businesses or other for-profit, Small businesses or organizations.

Estimated Number of Respondents: 6,060.

Estimated Burden Hours Per Response: 1 hour.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 1 hour.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 1:00 p.m. on Tuesday, December 6, 1988, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider matters relating to: (1) The possible closing of certain insured banks; (2) the Corporation's assistance agreement with an insured bank; and (3) an assistance agreement pursuant to section 13(c) of the Federal Deposit Insurance Act.

In calling the meeting, the Board determined, on motion of Chairman L. William Seidman, seconded by Director C. C. Hope, Jr. (Appointive), concurred in by Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(6), (c)(8), (c)(9)(A)(i), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), (c)(9)(A)(i), (c)(9)(A)(ii), and c(9)(B)).

Dated: December 7, 1988.
Federal Deposit Insurance Corporation.
Robert E. Feldman,
Deputy Executive Secretary.

Corrections

Federal Register
Vol. 53, No. 238
Monday, December 12, 1988

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1002

[Docket No. A0-71-A76; DA-88-107]

Milk in the New York-New Jersey Marketing Area; Order Amending Order

Correction

In rule document 88-27727 beginning on page 48515 in the issue of Thursday, December 1, 1988, make the following correction:

§ 1002.90 [Corrected]

On page 48516, in the 1st column, in § 1002.90 introductory text, in the 15th line, "and" should read "the".

Toxic and Hazardous Substances; Certain Chemicals Premanufacture Notices

Correction

In notice document 88-25938 beginning on page 45547 in the issue of Thursday, November 10, 1988, make the following corrections:

1. On page 45548, in the third column, under **P 88-2113**, in the fifth line, "etheylethylbenzene" should read "ethenylethylbenzene".

2. On page 45550, in the second column, under **P 88-2159**, in the first line, "chemical" should read "Chemical".

3. On page 45551, in the first column, under **P 88-2168**, the seventh line should read "methyltris(ethylmethylketoxime)silane, trimethoxy(3-".

4. On the same page, in the second column, under **P 88-2175**, the seventh line should read "LD50 > 5,000 mg/kg species (Rat)."

5. On the same page, in the same column, under **P 88-2176**, in the fourth line, "*Use*" was misspelled.

6. On the same page, in the same column, under **P 88-2177**, in the fifth line, "*Use*" was misspelled.

7. On the same page, in the third column, under **P 88-2185**, in the sixth line, "*Use*" was misspelled.

8. On page 45552, in the second column, under **P 88-2204**, in the fourth line, "*Use/Imports*" should read "*Use/Import*".

9. On the same page, in the same column, under **P 88-2207**, in the second line, "acids" was misspelled.

10. On the same page, at the end of the third column, insert the following text:

Use/Production. (G) Additive in cleaning formulation. Prod. range: Confidential.

P 88-2217

Manufacture. Confidential.

Chemical. (G) Alkyl disulfonate, disodium salt.

11. On page 45554, in the first column, under **P 88-2249**, in the third line, "polyacrylkate" should read "polyacrylate"; and in the fifth line, "polyacrylated" should read "polyacrylate".

12. On the same page, in the third column, under **P 88-2267**, in the second line, "Saturated" was misspelled.

13. On page 45556, in the first column, under **P 88-2295**, in the fifth line, "eiocosenes" should read "eicosenes".

14. On the same page, in the second column, under **P 88-2305**, the ninth line should read "ethanediyl)bis(omega-hydroxy-,".

15. On the same page, in the third column, under **P 88-2312**, in the eighth line, "(omega-hdroxy-," should read "(omega-hydroxy-,".

16. On page 45557, in the second column, under **P 88-2322**, in the third line, "resin" was misspelled.

Toxic and Hazardous Substances; Certain Chemicals Premanufacture Notices

Correction

In notice document 88-25939 beginning on page 45557 in the issue of Thursday, November 10, 1988, make the following corrections:

1. On page 45557, in the 3rd column, under **DATES**, in the 12th and 13th lines, after "88-1970," remove "88-1968,".

2. On page 45560, in the first column, under **P 88-1966**, in the fifth line, "textiles" was misspelled.

3. On the same page, in the second column, under **P 88-1980**, in the fourth line, "reacted" was misspelled.

4. On page 45561, in the third column, under **P 88-2008**, in the second line, "easter" should read "ester".

5. On page 45562, in the first and second columns, each time "Substituted-substituted-substituted-benezene" appears, it should read "Substituted-substituted-substituted-benzene".

6. On the same page, in the third column, under **P 88-2028**, in the third line, "*Use/Production*" should read "*Use/Import*".

7. On the same page, in the same column, under **P 88-2030**, in the eighth line, "*Toxicity Date*" should read "*Toxicity Data*".

8. On the same page, in the same column, under **P 88-2032**, in the seventh line, "*Toxicity Date*" should read "*Toxicity Data*".

9. On page 45563, in the third column, under **P 88-2060**, in the second line, after "aliphatic" insert "aromatic".

10. On page 45564, in the first column, under **P 88-2065**, in the second line, "oligoner" should read "oligomer".

11. On the same page, in the same column, under **P 88-2067**, in the sixth line, "modifier" was misspelled.

12. On the same page, in the second column, under **P 88-2079**, in the second line, "Blocking" should read "Blocked".

Toxic and Hazardous Substances; Certain Chemicals Premanufacture Notices

Correction

In notice document 88-25940 beginning on page 45565 in the issue of Thursday, November 10, 1988, make the following corrections:

1. On page 45566, in the 2nd column, in the 12th line, after "2508," insert "88-2509,".

2. On page 45567, in the second column, under **P 88-2347**, in the sixth line, "Power" should read "Powder".

3. On the same page, in the same column, under **P 88-2348**, in the sixth line, "Power" should read "Powder".

4. On page 45569, in the second column, under **P 88-2403**, the third line should read "*Chemical.* (S) 4,4'-(2,2,2-trifluoro-1-".

5. On page 45571, in the first column, after the entry for **P 88-2442**, insert the following entry:

Importer. Atlantic Industries, Inc.

Chemical. (G) Substituted aromatic azo compound.

Use/Import. (S) Reactive dye for textile. Import range: Confidential.

6. On page 45571, in the third column, under **P 88-2459**, in the first line, "Ciga-Geigy", should read "Ciba-Geigy".

7. On page 45574, in the first column, under **P 88-2516**, in the third line, "susbstitutedethylene" should read "substituted-ethylene".

8. On the same page, in the same column, under **P 88-2522**, in the second line, "Chemicals" should read "Chemical".

9. On page 45577, in the 3rd column, under **P 88-2607**, the 11th line should be removed and inserted as the 1st line below **P 88-2608**.

10. On the same page, in the same column, under **P 88-2611**, in the third line, "potassium" was misspelled.

11. On page 45578, in the first column, under **P 88-2620**, in the sixth line, "or" should read "of".

12. On the same page, in the third column, under **P 88-2632**, in the second line, "Alken" should read "Alkene"; and in the third line, "2,5-furandion" should read "2,5-furandione".

13. On page 45579, in the first column, under **P 88-2639**, in the second line, "acid dibasic" should read "dibasic acid".

14. On the same page, in the same column, under **P 88-2640**, in the third line, "dibasic" should be removed.

15. On the same page, in the same column, under **P 88-2641**, in the third line, "dibasic" should be removed.

16. On the same page, in the same column, under **P 88-2642**, the first line should read "*Manufacturer.* Confidential."; and in the third line, "dibasic" should be removed.

17. On the same page, in the second column, under **P 89-3**, in the eighth line, "3.66g/Kg" should read "3.66 g/kg"; and in the ninth line, "89/kg" should read "8 g/kg".

18. On the same page, in the same column, under **P 89-4**, in the eighth line, "3.88g/kg" should read "3.88 g/kg".

19. On the same page, in the third column, in the first line, "8g/kg" should read "8 g/kg".

20. On page 45580, in the third column, under **P 89-33**, in the third line, "*Use/PImport*" should read "*Use/Import*".

21. On the same page, in the same column, under **P 89-36**, in the first line, "Chemicals" should read "Chemical".

22. On page 45581, in the first column, under **P 89-37**, in the first line, "Chemicals" should read "Chemical"; and in the ninth line, "moderate" should read "strong".

23. On the same page, in the third column, under **P 89-61**, in the seventh line, "LD50 > mg/kg" should read "LD50 > 5,000".

LIST OF PUBLIC LAWS

Note: The list of public laws enacted during the second session of the 100th Congress has been completed.

Last List November 30, 1988

The list will be resumed when bills are enacted into public law during the first session of the 101st Congress, which convenes on January 3, 1989. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523-6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.l15New units issued during the week are announced on the back cover of the daily **Federal Register** as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $595.00 domestic, $148.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, DC 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec. 31, 1987. The CFR volume issued January 1, 1987, should be retained.

[3] No amendments to this volume were promulgated during the period Apr. 1, 1980 to March 31, 1988. The CFR volume issued as of Apr. 1, 1980, should be retained.

[4] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[5] No amendments to this volume were promulgated during the period July 1, 1986 to June 30, 1988. The CFR volume issued as of July 1, 1986, should be retained.

[6] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

Public Laws

are now available for the 100th Congress, 2nd Session, 1988

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 100th Congress, 2nd Session, 1988.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws and prices).

Briefings on How To Use the Federal Register—
For information on briefings in Washington, DC, and Los Angeles, CA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

VOL 53 ISS 239 DE 13 1988 UMI

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: January 26, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC
RESERVATIONS: 202-523-5240

LOS ANGELES, CA

WHEN: January 12, at 9:00 a.m.
WHERE: Room 8544, Federal Building, 300 N. Los Angeles St., Los Angeles, CA
RESERVATIONS: Call the Federal Information Center, Los Angeles 213-894-3800

The President

Proclamation 5921 of December 8, 1988

Human Rights Day, Bill of Rights Day, and Human Rights Week, 1988

By the President of the United States of America

A Proclamation

The second week in December commemorates two important dates. December 10 marks the 40th anniversary of the signing of the Universal Declaration of Human Rights, and December 15 marks the date almost 200 years ago when, in 1791, the first 10 amendments to the United States Constitution—our Bill of Rights—were ratified.

The human rights we regard today as inherent and unalienable were by no means universally accepted 2 centuries ago. Such rights as freedom of worship, speech, assembly, and the press were just beginning to be asserted by popular movements that would sweep Europe and elsewhere in the next century. The United States thus foreshadowed and fostered a powerful drive to improve the lot of mankind everywhere. During the drafting of our Constitution, Thomas Jefferson wrote that "a Bill of Rights is what people are entitled to against every government on earth."

Now, 200 years later, the Universal Declaration, enshrining many of the principles of our Founders, has become that worldwide Bill of Rights. Elaborating such a list of basic rights was one of the first tasks undertaken by the new United Nations Organization; the Chair of the drafting committee was Eleanor Roosevelt, who was later nominated for a Nobel Peace Prize for this work. Urging adoption of the Universal Declaration, then-Secretary of State George C. Marshall told the United Nations that "denials of basic human rights lie at the root of most of our troubles. . . . Governments which systematically disregard the rights of their own people," he said, "are not likely to respect the rights of other nations and other people." He called for adoption of the Universal Declaration as "a standard of conduct for us all."

The Universal Declaration, like our own Bill of Rights, starts from the premises that civil liberties and political freedom are the birthright of all mankind and that all of us are equal in the eyes of the law. Like our own Declaration of Independence, it also makes the inescapable connection between freedom, human rights, and government by the consent of the governed.

We are proud that the truths expressed by our Founding Fathers—America's source of strength, stability, and authority for more than 2 centuries—have also provided a standard for liberty and the rule of law emulated in dozens of other countries as well.

Nevertheless, many individuals and nations do not enjoy the rights enumerated in our Constitution and in the Universal Declaration. Some governments voice ringing guarantees but fall far short in practice. Some, such as Communist regimes, wrongly subordinate fundamental rights to other goals. These goals are often defined by political groups or parties that claim to know what is best for the individual and for peoples subject to their control. Fundamental goals—free elections and due process—are concepts not welcomed by dictators of any ideological or political stripe.

Despite this entrenched resistance of tyrants to practical guarantees of liberty, the Universal Declaration has done much to promote observance of human rights around the world. Over the past decade in particular we have seen great strides.

As we move toward the final decade of this century, we can truly say that the heroism, prayers, and sacrifices of countless heroes and heroines who have braved threats and persecution in the long struggle for human rights have produced noteworthy results. But we still have far to go. We must and will dedicate ourselves as a Nation to continue this effort, and to stand in solidarity with those who resist, until the blessings of democracy, freedom, and respect for human dignity are assured throughout the world.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim December 10, 1988, as Human Rights Day, and December 15, 1988, as Bill of Rights Day, and I call upon all Americans to observe the week beginning December 10, 1988, as Human Rights Week.

IN WITNESS WHEREOF, I have hereunto set my hand this 8th day of December, in the year of our Lord nineteen hundred and eighty-eight, and of the Independence of the United States of America the two hundred and thirteenth.

Ronald Reagan

Proclamation 5922 of December 8, 1988

National Burn Awareness Week, 1989

By the President of the United States of America

A Proclamation

At least 2 million people in the United States receive burn injuries each year. Seventy thousand of them require some hospitalization, and more than 12,000 die from their injuries. Children, the elderly, and people with disabilities are often burn victims.

The risk of burn injury exists in our homes, cars, and workplaces. The key to reduction of death and suffering from burn injury is available to everyone; awareness is the action word. Burn awareness is how people can prevent injury to themselves, their families, and their neighbors. The use of fire/smoke detectors and safety containers for flammables, the safe use of electric power, and development of good safety habits can reduce the number of injuries.

In recent years, medical research has made major advances through improved treatments that shorten hospitalization and save lives. New products are available for fire detection, safer fabrics, and personal protection. There are organized safety programs in the office and workplace. There is more assistance to ease the psychological impact on those who suffer burn injury.

Much more can be done to make ourselves safe from burn injury. We can all cooperate with the dedicated professionals who are working to prevent burns and care for the injured. And we can practice and promote fire safety.

The Congress, by House Joint Resolution 604, has designated February 5 through February 11, 1989, as "National Burn Awareness Week" and authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim February 5 through February 11, 1989, as National Burn Awareness Week. I call upon all government agencies, health organizations, public safety organizations, the communications media, and the people of the United States to observe this week with ceremonies, activities, and personal participation to make our country safer and to assist in the reduction of death and suffering associated with burn injury.

IN WITNESS WHEREOF, I have hereunto set my hand this eighth day of December, in the year of our Lord nineteen hundred and eighty-eight, and of the Independence of the United States of America the two hundred and thirteenth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 53, No. 239
Tuesday, December 13, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 88-185]

7 CFR Part 301

Gypsy Moth Regulated Areas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: We are affirming without change an interim rule that amended the Gypsy Moth Quarantine and Regulations by (1) removing all regulated areas in Illinois, Indiana, Minnesota, Washington, and Wisconsin from the list of regulated areas and removing these states from quarantined status; (2) removing regulated areas in Ohio from the list of gypsy moth low-risk areas and correcting an earlier omission by adding Ohio to the list of states quarantined because of gypsy moth; (3) removing a portion of a previously regulated gypsy moth high-risk area in Oregon and redesignating the remaining portion of the regulated area as a gypsy moth low-risk area; (4) designating previously nonregulated areas in Maine, Maryland, Michigan, and Ohio as gypsy moth low-risk areas; and (5) designating previously nonregulated areas in Virginia and West Virginia as gypsy moth high-risk areas and redesignating areas in Michigan, New York, Pennsylvania, and Virginia from gypsy moth low-risk areas to gypsy moth high-risk areas. The regulations restrict the interstate movement of certain articles from gypsy moth high-risk and low-risk areas. The rule is necessary to prevent the spread of gypsy moth and to remove unnecessary restrictions on the interstate movement of certain articles.

EFFECTIVE DATE: January 12, 1989.

FOR FURTHER INFORMATION CONTACT: Sidney Cousins, Senior Operations Officer, Domestic and Emergency Operations, PPQ, APHIS, USDA, Room 661, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-6365.

SUPPLEMENTARY INFORMATION:

Background

In an interim rule published in the **Federal Register** and effective September 2, 1988 (53 FR 34014-34020, Docket Number 88-094), we amended the Gypsy Moth Quarantine and Regulations by (1) removing all regulated areas in Illinois, Indiana, Minnesota, Washington, and Wisconsin from the list of regulated areas and removing these states from quarantined status; (2) removing regulated areas in Ohio from the list of gypsy moth low-risk areas and correcting an earlier omission by adding Ohio to the list of states quarantined because of gypsy moth; (3) removing a portion of a previously regulated gypsy moth high-risk area in Oregon and redesignating the remaining portion of the regulated area as a gypsy moth low-risk area; (4) designating previously nonregulated areas in Maine, Maryland, Michigan, and Ohio as gypsy moth low-risk areas; and (5) designating previously nonregulated areas in Virginia and West Virginia as gypsy moth high-risk areas and redesignating areas in Michigan, New York, Pennsylvania, and Virginia from gypsy moth low-risk areas to gypsy moth high-risk areas.

Comments on the interim rule were required to be postmarked or received on or before November 1, 1988. We did not receive any comments. The facts presented in the interim rule still provide a basis for this rule.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers; individuals, industries, Federal, State, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

This action affects the interstate movement of regulated articles from gypsy moth regulated areas in Illinois, Indiana, Maine, Maryland, Michigan, Minnesota, New York; Ohio, Oregon, Pennsylvania, Virginia, Washington, West Virginia, and Wisconsin. For areas designated as high-risk areas, individual and commercial movers moving outdoor household articles to areas outside the quarantined areas must determine that their articles are free of gypsy moth. Mobile home haulers, loggers, nurserymen, and firewood haulers are required to obtain certification or a limited permit from an inspector. These documents indicate that their articles are free of gypsy moth. For areas designated as low-risk areas, the same conditions apply for movement of regulated articles when it is determined by an inspector that the movement of an article presents a hazard of spreading the gypsy moth. For areas determined to be free of gypsy moth and deregulated, no restrictions are imposed for movement of regulated articles.

All regulated articles are inspected and certified without charge to the business. A business not requesting this service in advance of shipment may be delayed in moving the product until service can be provided. A homeowner moving outdoor household articles from a high-risk area to an uninfested area may pay a qualified certified applicator (QCA) to inspect his goods. These charges average between $50-100. In some instances the company moving that person reimburses the mover for their expense. Most QCA's are small businesses. By declaring an area as a high-risk area the regulations may increase business for the QCA's located in high-risk areas. These businesses will average $50 to $150 per month in additional income per business. Approximately 90 new businesses will be trained to inspect outdoor household articles and will offer this service to the general public. Based on information compiled by the U.S. Department of

Agriculture it has been determined that there are many hundreds of small entities that move regulated articles interstate from gypsy moth regulated areas and many thousands of small entities that move regulated articles interstate from other states. However, based on such information, it has been determined that approximately 759 small entities move regulated articles interstate from the specified areas affected by this action.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372 which requires intergovernmental consultation with State and local officials. (See 7 CFR Part 3015, Subpart V.)

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 7 CFR Part 301

Agricultural commodities, Plant pests, Plants (Agriculture), Quarantine, Transportation, Gypsy moth.

PART 301—DOMESTIC QUARANTINE NOTICES

Accordingly, we are adopting as a final rule, without change, the interim rule amending 7 CFR Part 301 that was published at 53 FR 34014–34020 on September 2, 1988.

Authority: 7 U.S.C. 150bb, 150dd, 150ee, 150ff, 161, 162 and 164–167; 7 CFR 2.17, 2.51, and 371.2(c).

Done in Washington, DC, on this 8th day of December 1988.

Larry B. Slagle,

Acting Adminstrator, Animal and Plant Health Inspection Service.

7 CFR Part 330

9 CFR Part 94

[Docket No. 87–072]

Garbage

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations that apply to garbage that can spread diseases or pests of livestock, poultry, or plants. The regulations expand the definition of garbage, exempt some garbage from certain regulation, and clarify which garbage is to be considered, for purposes of regulation, as "arriving" in a jurisdiction. This action is necessary to protect against the spread of diseases and pests without unnecessarily regulating garbage that does not present these risks.

EFFECTIVE DATE: January 12, 1989.

FOR FURTHER INFORMATION CONTACT: Dr. Ronald B. Caffey, Assistant to the Deputy Administrator, PPQ, APHIS, USDA, Room 656, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–7633.

SUPPLEMENTARY INFORMATION:

Background

The garbage regulations concerning plant pests in 7 CFR 330.400 and garbage regulations concerning livestock and poultry diseases in 9 CFR 94.5 regulate garbage arriving in the United States, and its territories and possessions, in order to prevent the spread of plant pests and animal diseases.

On April 20, 1987, we published in the **Federal Register** (52 FR 12917–12921, Docket Number 85–345), a document proposing to expand the definition of garbage, free some garbage from regulation, and clarify which garbage is to be considered, for purposes of regulation, as "arriving" in a jurisdiction.

Our proposal invited the submission of written comments on or before May 20, 1987. We received five comments. One comment supported the proposed rule. The second comment was received from the California Department of Food and Agriculture. It suggested that in the **"SUPPLEMENTARY INFORMATION"** section, under the heading "Regulated Garbage," the second sentence of the last paragraph should read:

> A means of conveyance, for example, that has *not* (emphasis added) been out of the United States and Canada during the previous two years is highly unlikely to be carrying potentially harmful garbage even if it has been to a foreign port sometime in its history.

This suggestion has been implemented. When the proposed rule was published, the **Federal Register** inadvertently omitted the word "not" from the sentence. On April 30, 1987, the **Federal Register** (52 FR 15802, Docket Number 85–345), corrected the error by inserting the word "not".

A third commenter, the American Veterinary Medical Association, is concerned with the risk of transmitting pests or disease organisms through garbage items from the continental United States to Hawaii and other territories and possessions. We are making no changes based on this comment. Aside from citrus canker, for which the affected areas have been quarantined, there has been no recent occurrence of an exotic plant or animal disease in the continental United States. The only exotic plant pests that have occurred recently in the continental United States—the Oriental fruit fly and the Mediterranean fruit fly—are already found in Hawaii, and APHIS has quarantined the infested areas in the continental United States to control pest spread. If an exotic plant or animal disease or pest outbreak does occur, certain regulations and policies that are currently in effect prohibit both the interstate movement and export movement of regulated items. If it were determined that these policies and regulations were ineffective, APHIS would then amend the regulations. Consequently, APHIS has determined that items moved from the continental United States to Hawaii and other territories and possessions pose very little risk of spreading new pests or diseases.

The California Department of Food and Agriculture, Division of Animal Industry, commented that California has a number of international ports and airports. Consequently, they are concerned with APHIS's ability to effectively enforce the regulations to ensure that means of conveyance have not been to foreign ports since cleaning and disinfecting or removal of stores. We are making no changes based on this comment. APHIS has had no problem documenting where a means of conveyance has traveled from when arriving in the United States. Standard industry documentation—e.g., ships' logs and documentation at airline representatives' offices—is available to APHIS and enables the agency to determine where a means of conveyance has been before arriving in the United States.

Also, the Division of Animal Industry feels that the phrases, "has not visited" and "has not moved to non-Canadian foreign ports", as they appeared in proposed 9 CFR 94.5(b)(1)(ii), are vague. They suggest that both phrases be amended to read "has not been in" to preclude the interpretation that the inspection or removal of garbage and

stores could be accomplished in a non-Canadian foreign port. We are making the suggested change.

The California Department of Food and Agriculture, Division of Plant Industry, expressed concern about applying different restrictions to garbage and stores arriving on ships and planes from non-Canadian foreign ports and to garbage and stores arriving from Canadian ports. The Division of Plant Industry suggests that we amend the regulations to apply identical restrictions in both cases, stating that employees of the State's Department of Food and Agriculture have visited the United States-Canadian border and found that many items that are regulated in the United States are freely available in Canada. Further, the Division of Plant Industry states that the United States Department of Agriculture has intercepted these regulated items in Canadian origin aircraft stores.

We are making no changes based on this comment. The current regulations already exempt garbage derived from stores obtained in the continental United States or Canada, on vessels or aircraft that move "solely" between the continental United States and Canada. Our proposed rule would not regulate garbage on vessels or aircraft from Canada if the conveyances have not been to a foreign port (other than in Canada) in the 2 years before arriving in the United States. Vessels or aircraft from Canada that have been to a foreign port during that 2-year period would be subject to the garbage regulations. We consider any vessel or aircraft that has moved only between Canada and the United States for 2 years to be one that moves "solely" between those two countries. Because stores are not kept on conveyances for more than 2 years, a vessel or aircraft exempted under the "2-year" provision would be carrying only stores obtained in the United States or Canada. Therefore, with regard to vessels or aircraft from Canada, our proposed rule included no changes to the current regulations. Although we are making no change in this final rule regarding vessels and aircraft from Canada, we believe it is appropriate to respond to the Division of Plant Industry's observation concerning our interception of Canadian origin aircraft stores. Our monitoring of Canadian origin flights has very rarely revealed any prohibited items, and we therefore have determined that those flights pose no significant risk of spreading exotic plant or animal pests or diseases in the United States.

In this final rule, we are clarifying our implicit intent regarding certain provisions of this rule. According to this rule, garbage will be regulated if it is on or removed from a means of conveyance that has been to specified locations within specified periods of time. However, the garbage will not be regulated if certain conditions are met regarding the means of conveyance the garbage is on or removed from. In some cases, these conditions require, among other things, removal of all garbage and other specified items previously on board, followed by cleaning and disinfection of the means of conveyance. In other cases, all garbage and other specified items previously on board must be removed, but no cleaning and disinfection is required. The clarification we are making in this final rule concerns the removal and disposal of the other specified items. Although the proposed rule included no explicit direction as to the disposal of these items, it was implicit that the items be disposed of in the same manner as that prescribed for the disposal of regulated garbage. We are including language in this final rule to clearly specify that intent.

Additionally, we are adding a definition of "shelf-stable" to clarify its meaning as used in the regulations. The definition, which is substantially the same as a definition already included in USDA regulations at 9 CFR 318.300 concerning meat inspection, and which is commonly accepted in the industry, specifies "shelf-stable" as meaning the condition achieved in a product, by application of heat, alone or in combination with other ingredients and/or other treatments, of being rendered free of microorganisms capable of growing in the product at nonrefrigerated conditions (over 50° F or 10° C). If a shelf-stable product is opened, contaminated, handled or treated in a manner which could introduce microorganisms capable of growing in the product under nonrefrigerated conditions, it is no longer considered shelf-stable.

We are also removing the definition of "garbage" at redesignated § 94.5(h)(1). The proposed rule included a new description of "garbage" at § 94.5(a), superseding the old definition at redesignated § 94.5(h)(1), which was inadvertently retained in the proposed rule.

Based on the rationale set forth in the proposal, and except for the nonsubstantive changes indicated above, we are amending the regulations as proposed.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than 100 million dollars; will not cause a major increase in costs or prices for consumers, individual industries, Federal, state or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Although this document makes changes that are significant for helping to prevent the dissemination of plant pests and livestock and poultry diseases, in almost all cases this rule will not require persons to change their current practices. In those cases where persons may have to change their current practices, we believe that the change required would not have a significant economic impact.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR 3015, Subpart V).

List of Subjects in 7 CFR Part 330

Customs duties and inspection, Garbage, Imports, Plant diseases, Plant pests, Plants (Agriculture), Quarantine, Transportation.

List of Subjects in 9 CFR Part 94

Animal diseases, Garbage, Imports, Livestock and livestock products, Meat and meat products, Milk, Poultry and poultry products.

PART 330—FEDERAL PLANT PEST REGULATIONS, GENERAL; PLANT PESTS; SOIL, STONE, AND QUARRY PRODUCTS; GARBAGE

Accordingly, 7 CFR Part 330 is amended as follows:

1. The authority citation for Part 330 is revised to read as follows:

Authority: 7 U.S.C. 147a, 150bb, 150dd–150ff, 161, 162, 164a, 450, 2260; 19 U.S.C. 1306; 21 U.S.C. 111, 114a; 31 U.S.C. 9701; 42 U.S.C. 4331, 4332; 7 CFR 2.17, 2.51, and 371.2(c).

2. In § 330.100, the definitions of "garbage" and "territories or possessions" are revised and new definitions of "regulated garbage" and "shelf-stable" are added, to read as follows:

§ 330.100 Definitions.

* * * * *

Garbage. That material designated as "garbage" in § 330.400(b).

* * * * *

Regulated garbage. That material designated as "regulated garbage" in § 330.400(c) and § 330.400(d).

* * * * *

Shelf-stable. The condition achieved in a product, by application of heat, alone or in combination with other ingredients and/or other treatments, of being rendered free of microorganisms capable of growing in the product at nonrefrigerated conditions (over 50° F. or 10° C.).

* * * * *

Territories or possessions. Guam, the Northern Mariana Islands, Puerto Rico, and the Virgin Islands of the United States.

* * * * *

3. In § 330.400, the heading is revised; paragraph (a) is revised; paragraphs (b), (c), and (d) are redesignated as paragraphs (g), (h), and (i) respectively; and new paragraphs (b), (c), (d), (e) and (f) are added, as follows:

§ 330.400 Regulation of certain garbage.

(a) Hawaii, Puerto Rico, the Virgin Islands of the United States, Guam, and all other Insular Possessions of the United States are hereby quarantined, and the movement therefrom to other parts of the United States of garbage is hereby regulated as provided in this section to prevent the spread of dangerous plant diseases and insect pests specified in §§ 318.13, 318.58, and 318.82 or other plant pests which exist in these areas. Also, to prevent the dissemination of plant pests and livestock and poultry diseases, garbage is regulated as otherwise provided in this part because of international movements of means of conveyance.

(b) *Garbage.* For purposes of this part, garbage means all waste material derived in whole or in part from fruits, vegetables, meats, or other plant or animal (including poultry) material, and other refuse of any character whatsoever that has been associated with any such material on board any means of conveyance, and including food scraps, table refuse, galley refuse, food wrappers or packaging materials, and other waste material from stores, food preparation areas, passengers' or crews' quarters, dining rooms, or any other areas on means of conveyance. For purposes of this part, garbage also means meals and other food that were available for consumption by passengers and crew on an aircraft but were not consumed.

Note.—Not all garbage is regulated for the purposes of this part. Garbage regulated for the purposes of this part is defined as "regulated garbage" in paragraphs (c) and (d) of this section.

(c) *Garbage regulated because of movements outside the United States or Canada.* For purposes of this part, garbage on or removed from a means of conveyance is regulated garbage, if, when the garbage is on or removed from the means of conveyance, the means of conveyance has been in any port outside the United States and Canada within the previous 2-year period. There are, however, two exceptions to this provision. These exceptions are as follows:

(1) *Exception 1.* Garbage on or removed in the United States from a means of conveyance other than an aircraft is exempt from requirements under paragraph (c) of this section, if the following conditions are met when the garbage is on or removed from the means of conveyance:

(i) The means of conveyance is accompanied by a certificate from an inspector stating the following:

(A) That the means of conveyance had previously been cleared of all garbage and of all meats and meat products, whatever the country of origin, except meats that are shelf-stable; all fresh and condensed milk and cream from countries designated in 9 CFR 94.1 as those in which foot-and-mouth disease exists; all fresh fruits and vegetables; and all eggs; and the items cleared from the means of conveyance as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraph (g)(1) of this section.

(B) That the means of conveyance had then been cleaned and disinfected in the presence of the inspector; and

(ii) Since being cleaned and disinfected, the means of conveyance has not been in a non-Canadian foreign port.

(2) *Exception 2.* Garbage on or removed from an aircraft is exempt from requirements under paragraph (c) of this section if the following conditions are met when the garbage is on or removed from the aircraft:

(i) The aircraft had been cleared of all garbage and all stores; and the items cleared from the aircraft as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraph (g)(1) of this section.

(ii) After the garbage and stores referred to in paragraph (c)(2)(i) of this section were removed, the aircraft has not been in a non-Canadian foreign port.

(d) *Garbage regulated because of certain movements to or from Hawaii, territories, or possessions.* For purposes of this part, garbage on or removed from a means of conveyance is regulated garbage, if at the time the garbage is on or removed from the means of conveyance, the means of conveyance has moved during the previous one-year period, either directly or indirectly, to the continental United States from any territory or possession or from Hawaii; to any territory or possession from any other territory or possession or from Hawaii, or to Hawaii from any territory or possession. There are, however, two exceptions to this provision. These exceptions are as follows:

(1) *Exception 1.* Garbage on or removed from a means of conveyance other than an aircraft is exempt from requirements under paragraph (d) of this section if the following two conditions are met when the garbage is on or removed from the means of conveyance:

(i) The means of conveyance is accompanied by certificate from an inspector, saying that the means of conveyance had been cleared of all garbage and all fresh fruits and vegetables; and the items cleared from the means of conveyance as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraph (g)(1) of this section.

(ii) After being cleared of the garbage and stores referred to in paragraph (d)(1)(i) of this section, the means of conveyance has not moved to the continental United States from any territory or possession or from Hawaii; to any territory or possession from any other territory or possession or from Hawaii; or to Hawaii from any territory or possession.

(2) *Exception 2.* Garbage on or removed from an aircraft is exempt from requirements under paragraph (d) of this section if the following two conditions are met when the garbage is on or removed from the aircraft:

(i) The aircraft had been previously cleared of all garbage and all fresh fruits and vegetables; and the items cleared from the aircraft as prescribed by this paragraph have been disposed of according to the procedures for

disposing of regulated garbage, as specified in paragraph (g)(1) of this section.

(ii) After the garbage and stores referred to in paragraph (d)(2)(i) of this section were removed, the aircraft has not moved to the continental United States from any territory or possession or from Hawaii; to any territory or possession from any other territory or possession or from Hawaii; or to Hawaii from any territory or possession.

(e) Garbage that is commingled with regulated garbage is also regulated garbage.

(f) *Restrictions on regulated garbage.* (1) Regulated garbage shall not be on or removed from a means of conveyance, or be disposed of, unless in accordance with the provisions of this part. (2) Regulated garbage is subject to general surveillance for compliance with this section by Animal and Plant Health Inspection Service inspectors and to such disposal measures as authorized by section 105 of the Federal Plant Pest Act (7 U.S.C. 150dd), section 10 of the Plant Quarantine Act of 1912, as amended (7 U.S.C. 164a), section 2 of the Act of February 2, 1903, as amended (21 U.S.C. 111), and section 306 of the Act of July 17, 1930, as amended (19 U.S.C. 1306), to prevent the dissemination of plant pests and livestock or poultry diseases.

* * * * *

4. In § 330.400, all references to "garbage" in redesignated paragraphs (g)(1), (h), and (i)(1) and (i)(2) are changed to "regulated garbage"; and the first sentence in redesignated paragraph (g)(1) is revised and made into two sentences to read as follows:

§ 330.400 Regulation of certain garbage.

* * * * *

(g)(1) All regulated garbage must be contained in tight, leak-proof covered receptacles during storage on board a means of conveyance while in the territorial waters, or while otherwise within the territory of the United States. All such receptacles shall be contained inside the guard rail if on a watercraft.

* * *

* * * * *

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), NEWCASTLE DISEASE (AVIAN PNEUMOENCEPHALITIS), AFRICAN SWINE FEVER, AND HOG CHOLERA: PROHIBITED AND RESTRICTED IMPORTATIONS

Accordingly, 9 CFR Part 94 is amended as follows:

1. The authority citation for Part 94 continues to read as follows:

Authority: 7 U.S.C. 147a, 150ee, 161, 162, 450; 19 U.S.C. 1306; 21 U.S.C. 111, 114a, 134a, 134b, 134c, and 134f; 42 U.S.C. 4331, 4332; 7 CFR 2.17, 2.51, and 371.2(d).

2. In § 94.5, the heading is revised; paragraph (a) is revised; paragraphs (b), (c), and (d) are redesignated as paragraphs (f), (g), and (h), respectively; and new paragraphs (b), (c), (d), and (e) are added, as follows:

§ 94.5 Regulation of certain garbage.

(a) *Garbage.* For purposes of this part, garbage means all waste material derived in whole or in part from fruits, vegetables, meats, or other plant or animal (including poultry) material, and other refuse of any character whatsoever that has been associated with any such material on board any means of conveyance, and including food scraps, table refuse, galley refuse, food wrappers or packaging materials, and other waste material from stores, food preparation areas, passengers' or crews' quarters, dining rooms, or any other areas on means of conveyance. For purposes of this subpart, garbage also means meals and other food that were available for consumption by passengers and crew on an aircraft but were not consumed.

Note: Not all garbage is regulated for the purposes of this part. Garbage regulated for the purposes of this part is defined as "regulated garbage" in paragraphs (b) and (c) of this section.

(b) *Garbage regulated because of movements outside the United States or Canada.* For purposes of this part, garbage on or removed from a means of conveyance is regulated garbage, if, when the garbage is on or removed from the means of conveyance, the means of conveyance has been in any port outside the United States and Canada within the previous 2-year period. There are, however, two exceptions to this provision. These exceptions are as follows:

(1) *Exception 1.* Garbage on or removed from a means of conveyance other than an aircraft is exempt from requirements under paragraph (b) of this section if the following conditions are met when the garbage is on or removed from the means of conveyance:

(i) The means of conveyance is accompanied by a certificate from an inspector stating the following:

(A) That the means of conveyance had first been cleared of all garbage and of the following: All meats and meat products, whatever the country of origin, except meats that are shelf-stable; all fresh and condensed milk and cream from countries designated in 9 CFR 94.1 as those in which foot-and-mouth disease exists; all fresh fruits and vegetables; and all eggs; and the items cleared from the means of conveyance as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraph (f)(1) of this section.

(B) That the means of conveyance had been cleaned and disinfected in the presence of the inspector; and

(ii) Since being cleaned and disinfected, the means of conveyance has not been in a non-Canadian foreign port.

(2) *Exception 2.* Garbage on or removed from an aircraft is exempt from requirements under paragraph (b) of this section if the following two conditions are met:

(i) The aircraft had been cleared of all garbage and all stores; and the items cleared from the aircraft as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraph (f)(1) of this section.

(ii) After the garbage and stores referred to in paragraph (b)(2)(i) of this section were removed, the aircraft has not been in a non-Canadian foreign port.

(c) *Garbage regulated because of certain movements to or from Hawaii, territories, or possessions.* For purposes of this part, garbage on or removed from a means of conveyance is regulated garbage, if the means of conveyance has moved during the previous one-year period, either directly or indirectly, to the continental United States from any territory or possession or from Hawaii; to any territory or possession from any other territory or possession or from Hawaii; or to Hawaii from any territory or possession. There are, however, two exceptions to this provision. These exceptions are as follows:

(1) *Exception 1.* Garbage on or removed from a means of conveyance other than an aircraft is exempt from requirements under paragraph (c) of this section if the following two conditions are met when the garbage is on or removed from the means of conveyance:

(i) The means of conveyance is accompanied by a certificate from an inspector, stating that the means of conveyance has been cleared of all garbage and all fresh fruits and vegetables; and the items cleared from the means of conveyance as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraph (f)(1) of this section.

(ii) After being cleared of the garbage and stores referred to in paragraph

VOL 53 ISS 239 DE 13 1988 UMI

(c)(1)(i) of this section, the means of conveyance has not moved to the continental United States from any territory or possession or from Hawaii; to any territory or possession from any other territory or possession or from Hawaii; or to Hawaii from any territory or possession.

(2) *Exception 2.* Garbage on or removed from an aircraft is exempt from requirements under paragraph (c) of this section if the following two conditions are met when the garbage is on or removed from the means of conveyance:

(i) The aircraft had been cleared of all garbage and all fresh fruits and vegetables; and the items cleared from the aircraft as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraph (f)(1) of this section.

(ii) After being cleared of the garbage and stores referred to in paragraph (c)(2)(i) of this section were removed, the aircraft has not moved to the continental United States from any territory or possession or from Hawaii; to any territory or possession from any other territory or possession or from Hawaii; or to Hawaii from any territory or possession.

(d) Garbage that is commingled with regulated garbage is also regulated garbage.

(e) *Restrictions on regulated garbage.* (1) Regulated garbage shall not be on or removed from a means of conveyance, or be disposed of, unless in accordance with the provisions of this part. (2) Regulated garbage is subject to general surveillance for compliance with this section by Animal and Plant Health Inspection Service inspectors and to such disposal measures as authorized by section 105 of the Federal Plant Pest Act (7 U.S.C. 150dd), section 10 of the Plant Quarantine Act of 1912, as amended (7 U.S.C. 164a), section 2 of the Act of February 2, 1903, as amended (21 U.S.C. 111), and section 306 of the Act of July 17, 1930, as amended (19 U.S.C. 1306), to prevent the dissemination of plant pests and livestock or poultry diseases.

* * * * *

3. In § 94.5, all references to "garbage" in redesignated paragraphs (f)(1), (g) and (h)(2) and (h)(3) are changed to "regulated garbage"; the first sentence in redesignated paragraph (f)(1) is revised and made into two sentences; and redesignated paragraph (h)(1) is removed and a new paragraph (h)(1) is added, to read as follows:

§ 94.5 Regulation of certain garbage.

* * * * *

(f)(1) All regulated garbage must be contained in tight, leak-proof covered receptables during storage on board a means of conveyance while in the territorial waters, or while otherwise within the territory of the United States. All such receptacles shall be contained inside the guard rail if on a watercraft. * * *

* * * * *

(h)(1) "Shelf-stable" means the condition achieved in a product, by application of heat, alone or in combination with other ingredients and/or other treatments, of being rendered free of microorganisms capable of growing in the product under nonrefrigerated conditions (over 50° F or 10° C).

BILLING CODE 3410-34-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 88-NM-157-AD; Amdt. 39-6088]

Airworthiness Directives; Boeing Model 737-300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises an existing airworthiness directive (AD), applicable to certain Boeing Model 737-300 series airplanes, which currently requires a revision to the Limitations Section of the FAA-approved Airplane Flight Manual (AFM). This action clarifies the AFM wording and requires the installation of a placard on the instrument panel to reduce the risk of engine flameout in adverse weather conditions. This action is prompted by a recent single engine flameout that occurred during descent through thunderstorm activity.

EFFECTIVE DATE: December 30, 1988.

ADDRESSES: The applicable service information may be obtained from the Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen S. Bray, Propulsion Branch, ANM-140S; telephone (206) 431-1969. Mailing Address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: On October 6, 1988, the FAA issued AD 88-13-51, Amendment 93-6046 (53 FR 41151; October 20, 1988) which requires operational limitations when flying in moderate to heavy precipitation to prevent potential engine flameouts. That AD was prompted by two recent dual engine flameouts during descent through thunderstorm activity. This condition, if not corrected could lead to dual engine flameouts.

Since issuance of AD 88-13-51 an additional incident occurred where one engine flamed out during descent in heavy rain.

Based on the investigations of this incident, the FAA has determined that the AFM revisions required by the existing AD are insufficient to ensure that the flight crew is adequately apprised of the operational limitations, and that the installation of a placard is also necessary.

In addition, the FAA has received a comment requesting clarification of the types of precipitation that may cause engine flameout. Flight through clouds, fog, drizzle or snow will have minimal or no effect on engine operation, assuming current procedures for these conditions are observed. However, flight through moderate to heavy rain, hail, or sleet can cause engine spool down or flameout if thrust settings are below 45% N_1. To clarify weather conditions of concern, the commenter proposed changing the operational procedure headline in paragraph A. of the AD to "Operation In Rain, Hail, Or Sleet," because it is difficult for the flight crew to determine different levels of (moderate to heavy) precipitation.

The FAA agrees with the need for additional clarification as to those types of conditions which may cause engine flameout; however, the FAA considers that the flight crew's capability in determining different levels of precipitation has not been relevant in the above noted incidents. A more general confusion has existed regarding proper crew procedure, which is intended to be addressed by installation of a placard in the cockpit.

Since this condition is likely to exist or develop on other airplanes of the

same type design, the FAA has determined that AD 88–13–51 must be revised to require a placard on the instrument panel to alert the flightcrew of the required operational limitations for flight in moderate to heavy rain, hail, or sleet, and to clarify the wording in the Airplane Flight Manual revision.

This is considered interim action. Experimental engine design solution(s) are currently under evaluation. Pending the results of these engineering evaluations and flight tests, the FAA may consider further rulemaking to require incorporation of a final engine design change into the existing Boeing Model 737–300 fleet.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required).

List of Subjects in 14 CFR Part 39

Aviation Safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By revising AD 88–13–51, Amendment 39–6046 (53 FR 41151; October 20, 1988) to read as follows:

Boeing: Applies to Model 737–300 series airplanes, equipped with CFM International CFM56–3 series engines, certificated in any category. Compliance required within 10 days of the effective date of this AD, unless previously accomplished.

To reduce the risk of engine flameout in adverse weather conditions, accomplish the following:

A. Revise the Limitation's Section of the FAA-approved Airplane Flight Manual (AFM) by adding the following instructions. This may be accomplished by inserting a copy of this AD into the AFM. (Where appropriate, remove the previous inserted copy of AD 88–13–51 from the AFM).

Operation in Moderate to Heavy Rain, Hail, or Sleet

When operating in or in the vicinity of (near) moderate to heavy rain, hail, or sleet, accomplish the following:

1. Engine start switches—FLIGHT
2. Minimum Engine N_1—45%.
3. Auto-throttle—OFF

Note: Operation in or in the vicinity of (near) moderate to heavy rain, hail, or sleet is to be assumed if indicated by any of the following sources: weather radar, reports, or observations.

Operating in Thunderstorm Activity

Cautionary Note

Flight operation should be conducted so that operation within five miles of thunderstorm activity is avoided.

B. For operations in known or forecast rain, hail, or sleet, notwithstanding the Minimum Equipment List (MEL), the following items must be operable for dispatch:

1. Weather radar.
2. Engine Ignition System—both left and right engine ignitors.

C. Install a placard (red base, white lettering) on the instrument panel in clear view of the flightcrew and in close proximity of the engines' N_1 indication gauges, that reads as follows:

"Maintain At Least 45% N_1 When Operating In Or Near Moderate To Heavy Rain, Hail Or Sleet."

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Operations Inspector (POI), who may add any comments and then send it to the Manager, Seattle Aircraft Certification Office.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

This amendment becomes effective December 30, 1988.

Issued in Seattle, Washington, on December 1, 1988.

Leroy A. Keith,

Manager, Transport Airplane Directorate Aircraft Certification Service.

BILLING CODE 4910–13–M

DEPARTMENT OF STATE

Bureau of Consular Affairs

22 CFR Part 43

[SD–108–878]

Visas; Documentation of Immigrants

AGENCY: Bureau of Consular Affairs, State Department.

ACTION: Final rule.

SUMMARY: This final rule makes those amendments to 22 CFR Part 43 necessitated by the enactment of Pub. L. 100–658, Immigration Amendments of 1988. 22 CFR Part 43 was promulgated to implement section 314 of Pub. L. 99–603, the "NP–5" program. Section 2 of Pub. L. 100–658 extends the "NP–5" program for two additional fiscal years, 1989 and 1990, and increases the annual

numerical limitation from 5,000 to 15,000 for each of those years. This rule favorably affects a certain class of aliens who will benefit from the continuation of the separate annual numerical limitation program established by Pub. L. 99–603 and extended by Pub. L. 100–658.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Cornelius D. Scully, Director, Office of Legislation, Regulations, and Advisory Assistance, Visa Office, Department of State, Washington, DC 20520, (202) 663–1184.

SUPPLEMENTARY INFORMATION: Section 314 of Pub. L. 99–603 established a separate annual numerical limitation of 5,000 each for Fiscal Years 1987 and 1988 available to natives of countries "adversely affected" by the enactment of Pub. L. 89–236. The Department's implementation of that provision is set forth in 22 CFR Part 43. The Department promulgated an Interim Rule on January 14, 1987, 52 FR 1447, and a Final Rule on May 13, 1987, 52 FR 17944. The supplementary information in those publications contains an extensive discussion of the Department's rationale for its method of implementation and detailed information concerning the outcome of its implementation.

Section 2 of Pub. L. 100–658 amends section 314 to provide that 15,000 visas shall be made available under that provision annually during Fiscal Years 1989 and 1990. Section 2 also requires that, in making the additional visas available, the Department use the list of applicants established in connection with the original version of section 314 and authorizes, but does not require, the Department to administer the extension under the regulations previously promulgated.

As described in the Final Rule, 52 FR 17944, at pp. 17947–9, the Department received about 1,000,000 pieces of mail during the registration period in January 1987. The mail was marked to indicate the chronological order of its receipt from the United States Postal System (USPS). A private contractor was hired to open mail and to enter the names of the applicants, together with other necessary identifying information, into a computer. As pointed out in the Final Rule, only the first 25,000 applicants were processed in this manner. All additional mail has been retained, unopened, in the chronological order of its receipt from USPS.

Initially, as pointed out in the Final Rule, the Department had contemplated destroying the additional mail after a short period of time, because of storage costs. Legal challenges to the Department's regulations implementing section 314 required retention of the mail, against the possibility of an adverse decision. Although the Department's regulations were upheld in both cases—*Fakheri-Rad* v. *Shultz*, No. 87–0393 (C.D. CA, March 25, 1987) and *Mulligan* v. *Shultz*, 848 F.2d 655 (5th Cir. 1988)—the decision in *Mulligan* is so recent that no action has been taken to dispose of any of the unopened mail. As a result, the Department is in a position to implement the requirement of section 2(b) of Pub. L. 100–658 that the additional 30,000 visas be made available to applicants in the original "NP–5" registration.

Section 2(b) also authorizes, but does not require, the Department to carry out the extension under the regulations previously published. The Department has carefully considered whether any changes to the previously published regulations are desirable or necessary. Section 2 of Pub. L. 100–658 makes no substantive changes in section 314. The initial registration period in January 1987 produced a quantity of applicants more than sufficient to permit the issuance of the additional 30,000 visas authorized by section 2. The fact that all mail received during the initial registration period has been retained in chronological order of receipt allows for resumption of processing under the original regulations. The existing regulations have been held to be appropriate in two separate court actions. The first of the two additional fiscal years has already begun and the formulation and implementation of a revised plan of implementation would impose unacceptable delays on the program, as well as add significantly to the cost of implementation. For all of the foregoing reasons, the Department will make no changes in section 43.1, 43.2, 43.3, or 43.5 and will implement the two-year extension of the "NP–5" program in the same manner as the first two years.

Because of the addition of the two further fiscal years and the increase in annual authorized visas for those years from 5,000 to 15,000, it is necessary to amend section 43.4 to conform with those two changes. Section 43.4 provides for control of the numerical limitations under section 314 and establishes both a monthly limitation on overall visa issuance and an annual limitation on visa issuance to natives of any single adversely affected country. All of these provisions were based upon the 5,000 overall annual limitation established by section 314, as originally enacted. All must be amended to take into account the tripling of the annual overall limitation for fiscal years 1989 and 1990.

This rule is not considered to be a major rule for purposes of E.O. 12291 nor is it expected to have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

In addition, compliance with the provisions of the Administrative Procedure Act, 5 U.S.C. 553, relative to notice of proposed rulemaking and delayed effective date is unnecessary in this instance because this rule extends an established benefit upon certain classes of intending immigrants in accordance with Pub. L. 100–658 which provides for extension of two additional fiscal years of a program established in 1987 (Pub. L. 99–603) and which increases the annual numerical limitation for those two years.

List of Subjects in 22 CFR Part 43

Aliens, Nonpreference immigrants, Visas.

PART 43—[AMENDED]

In view of the foregoing, 22 CFR Part 43 is amended to read as follows:

1. The authority citation for Part 43 is revised to read as follows:

Authority: Sec. 104, 66 Stat. 174, 8 U.S.C. 1104; Sec. 109(b)(1), 91 Stat. 847; Sec. 314, 100 Stat. 3359, 8 U.S.C. 1153 Note; Sec. 2, 102 Stat. 3359.

2. In section 43.4 paragraphs (a) and (b) are revised as follows:

§ 43.4 Control of numerical limitation.

(a) *Centralized control.* Centralized control of the numerical limitation specified in section 314(a) of Pub. L. 99–603, as amended, is established in the Department. In order to effect this control the Department shall limit the number of immigrant visas and the number of adjustments of status that may be granted to aliens applying under section 314 of Pub. L. 99–603, as amended, to (1) a number not to exceed 5,000 each in fiscal years 1987 and 1988 and not to exceed, in any month of either such fiscal year, 500 plus any balance remaining from authorizations for preceding months in the same fiscal year; and (2) a number not to exceed 15,000 each in fiscal years 1989 and 1990 and not to exceed, in any month of either such fiscal year, 1,500 plus any balance remaining from authorizations for preceding months in the same fiscal year.

(b) *Limitation for individual adversely affected country.* Within the limitations specified in subsection (a) of this section, there shall be a numerical limitation on the issuance of immigrant visas and the granting of adjustment of

status to natives of any individual adversely affected country. For fiscal years 1987 and 1988 the numerical limitation for any individual adversely affected country shall be the difference between its average annual rate of immigration during the period from July 1, 1953, to June 30, 1965, and its average annual rate of immigration during the period from July 1, 1966, to September 30, 1985, or 5,000, whichever is the lesser. For fiscal years 1989 and 1990 the numerical limitation for any individual adversely affected country shall be three times the difference between its average annual rate of immigration during the period from July 1, 1953, to June 30, 1965, and its average annual rate of immigration during the period from July 1, 1966, to September 30, 1985, or 15,000, whichever is the lesser.

* * * * *

Date: December 7, 1988.

Joan M. Clark,

Assistant Secretary for Consular Affairs.

BILLING CODE 4710-06-M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1910

Access to Employee Exposure and Medical Records; Effective Date and Approval of Information Collection Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice of effective date of final rule; approval of information collection requirements.

SUMMARY: On September 29, 1988, the Occupational Safety and Health Administration (OSHA) published a final amendment (53 FR 38140) to the standard on Access to Employee Exposure and Medical Records (Access) (29 CFR 1910.20, 45 FR 35212). This amendment was transmitted to the Office of Management and Budget (OMB) for review and clearance of the information collection requirements contained in the final rule, in accordance with the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* and 5 CFR Part 1320. At the same time, extension of clearance for information collection requirements found in the existing standard was also requested in the event that clearance for the revised standard was not received prior to expiration of clearance for the existing standard.

All information requirements contained in § 1910.20 in paragraphs (d), (e), (f)(2), (f)(8), (f)(12), and (h), have now received OMB paperwork clearance under OMB clearance number 1218-0065. The OMB clearance expires in November 1989.

The above mentioned paragraphs in the amended Access rule are effective as of December 13, 1988.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. James Foster, Occupational Safety and Health Information, Office of Public Affairs, Room N-3649, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210, Telephone (202) 523-8151.

SUPPLEMENTARY INFORMATION: OSHA published a proposed amendment to the rule on Access on July 13, 1982 (47 FR 30420) and adopted the final amendments on September 29, 1988 (53 FR 38140). The final amendment contained the following paragraphs which were determined by OMB to constitute information collection requirements under the Paperwork Reduction Act: (d), Preservation of records; (e), Access to records; (f)(8) and (f)(12), Trade secrets; and (h), Transfer of records. The final amendment provided for an effective date of November 28, 1988.

As noted in the final rule at 53 FR 38140, the information collection provisions associated with adoption of the final rule had not been cleared by OMB at that time. Accordingly, the effective dates for those requirements in the final amendment have remained in abeyance pending OMB paperwork clearance. OMB has now cleared the information collection requirements contained in § 1910.20, as amended, under clearance number 1218-0065, through November 1989. (Clearance number 1218-0065, which covered the Access standard prior to new rulemaking, now covers the amended standard as well. A reference to that clearance already is included at the end of § 1910.20 in the Code of Federal Regulations and no change in that reference is necessary). In accordance with that clearance, OSHA is hereby providing notice that paragraphs § 1910.20 (d), (e), (f)(2), (f)(8), (f)(12), and (h) of the revised Access rule will become effective on December 13, 1988. The Agency finds good cause pursuant to the Administrative Procedure Act, to have those sections become immediately effective. This will prevent a lapse in coverage which could lead to harm to the health of affected employees. In addition, similar predecessor provisions have been in effect since 1980.

Authority and Signature

This document was prepared under the direction of John A. Pendergrass, Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Avenue NW., Washington, DC 20210.

This action is taken pursuant to sections 4(b), 6(b) and 8(c) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657), section 4 of the Administrative Procedures Act, 9 U.S.C. 553(d)(3), Secretary of Labor's Order No. 9-83 (48 FR 3576) and 29 CFR Part 1911.

Signed at Washington, DC, this 8th day of December 1988.

John A. Pendergrass,

Assistant Secretary, Occupational Safety and Health.

Coast Guard

33 CFR Part 117

[CGD5-88-39]

Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, Surf City, NC

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the North Carolina Department of Transportation and the Mayor of the Town of Surf City, North Carolina, the Coast Guard is changing the regulations governing the operation of the drawbridge across the Atlantic Intracoastal Waterway at mile 260.7, in Surf City, North Carolina, by restricting bridge openings to pleasure craft year-round. This action will alleviate vehicular traffic congestion caused by excessive bridge openings, while still providing for the reasonable needs of navigation.

EFFECTIVE DATE: These regulations become effective on January 12, 1989.

FOR FURTHER INFORMATION CONTACT: Ann B. Deaton, Bridge Administrator, at (804) 398-6222.

SUPPLEMENTARY INFORMATION: On June 27, 1988, the Coast Guard published a notice of proposed rulemaking in the **Federal Register** (53 FR 24102) concerning the bridge at Surf City, North Carolina. The Commander, Fifth Coast Guard District, also published the proposal as a Public Notice dated July 12, 1988. In both the notice of proposed rulemaking and the public notice, interested persons were given until August 11, 1988, to submit comments.

Drafting Information

The drafters of these regulations are Linda L. Gilliam, Project Officer, and LCDR Robin K. Kutz, Project Attorney.

Discussion of Comments

The North Carolina Department of Transportation and the Mayor of the Town of Surf City, North Carolina, requested on March 10, 1988, that the NC 50 (S.R. 50) drawbridge over the Atlantic Intracoastal Waterway be regulated to open on the hour, daily, between 7:00 a.m. and 7:00 p.m., year-round, or from March 15 through November 15 if the year-round request was denied. This request was made as a result of the steady increase of pleasure craft traffic on the AICWW since 1985, resulting in excessive draw openings, which are causing vehicular traffic congestion on NC 50.

A proposed rule restricting openings year-round was published in the **Federal Register** (53 FR 24102) on June 27, 1988, and the proposal was announced in a Public Notice dated July 12, 1988. Comments were solicited through August 11, 1988, and five comments were received. One commenter totally supported the proposed rule. Three comment were from private citizens, all boat owners, objecting to further restrictions of the Surf City drawbridge. Of these, one commenter suggested opening the draw every 20 minutes for the passage of boaters, and another suggested openings every 30 minutes from 7:00 a.m. to 7:00 p.m. and in between if highway traffic conditions warranted it. The third individual was totally opposed to further restrictions. The comments of the three opponents to the rule have been considered, and it is felt that the year-round regulation on the drawbridge should inconvenience boaters very little. Once the schedule is known, boaters may plan their transits accordingly, thus avoiding lengthy delays at the bridge. The only commercial response received was from S.C. Loveland, Co., who requested that a provision allowing commercial traffic to pass through the bridge at any time be retained. This provision, Section 117.821(a), was not affected by the proposed regulation and it remains untouched by the final rule.

With the exception of minor editorial changes to the title of the section, the final rule is adopted as originally proposed.

Federalism Assessment

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the final rule does not raise sufficient federalism implications to warrant the preparation of a Federalism Assessment. Although the rule does impact both the Town of Surf City and the State of North Carolina, specifically the Department of Transportation, which operates the bridge, the effect on state and local operations is minimal and entirely positive. The rule actually decreases the burden on both entities by reducing the number of bridge openings that will be required during the boating season. In fact, this rule was originally requested by the State Department of Transportation and the Mayor of the Town of Surf City.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. This conclusion is based on the fact that these regulations are not expected to have any effect on commercial navigation or on any businesses that depend on waterborne transportation for successful operations. Since the economic impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

Regulation

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations, is amended as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05-1(g).

2. In section 117.821, paragraph (b)(4) is revised as follows:

§ 117.821 Atlantic Intracoastal Waterway, Albemarle Sound to Sunset Beach

* * * * *

(b) * * *

(4) S.R. 50 bridge, mile 260.7, at Surf City, NC, between 7:00 a.m. and 7:00 p.m., must open if signaled on the hour.

* * * * *

Dated: November 23, 1988.

A.D. Breed,

Rear Admiral, U.S. Coast Guard Commander, Fifth Coast Guard District.

POSTAL SERVICE

39 CFR Part 265

Amendments to Release of Information Regulations

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The purpose of this final rule is to publish minor changes to the Postal Service's release of information regulations governing disclosure of names and addresses of customers. The changes are clarifying in nature and reflect no change in agency policy.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Betty E. Sheriff, Records Office, (202) 268–5158.

SUPPLEMENTARY INFORMATION: On March 14, 1986 (51 FR 8824), the Postal Service issued a final rule modifying its regulations government disclosure of customer names and addresses. These regulations are amended to clarify the circumstances under which the fee is waived for providing change of address information and to provide guidance to requesters seeking information needed to serve legal process, including a suggested format for submission of such requests.

List of Subjects in 39 CFR Part 265

Release of Information, Postal Service.

The Postal Service amends Part 265 of 39 CFR as follows:

PART 265—RELEASE OF INFORMATION

1. The authority citation for Part 265 continues to read as follows:

Authority: 39 U.S.C. 401; 5 U.S.C. 552.

§ 265.6 [Amended]

2. Section 265.6(d)(1), is amended by adding "or handwritten order" after "Form 3575" in the first sentence; and by removing "these later circumstances" in the next to last sentence and inserting in lieu thereof "the circumstances at paragraph (d)(6) of this section."

3. Section 265.6(d)(2) is amended by deleting "Information" in the first sentence and inserting in lieu thereof "Address Information"; by removing "Copies of the change of address order" in the second sentence and inserting in lieu thereof "Other information on the temporary change of address form or copies of the"; and by removing "these latter circumstances" in the next to last sentence and inserting in lieu thereof "the circumstances at paragraph (d)(6) of this section".

4. Section 265.6(d)(4) is amended by adding at the end thereof: "The fee is waived for providing information under the circumstances at paragraph (d)(6) of this section. See paragraph (g)(5) of § 265.8."

5. Section 265.6(d)(5), the heading, "Fee" is corrected to read "Post".

6. Section 265.6(d)(6)(ii)(B) is amended by removing "if pertinent" and inserting in lieu thereof "if the requester is other than the attorney for a party in whose behalf service will be made, or a party who is acting *pro se*"; and by adding at the end of the paragraph before the "Note": "The Postal Service suggests use of the standard format appearing at the end of this section when requesting boxholder information under this paragraph. If the request lacks any of the required information or a proper signature, the postmaster will return it to the requester specifying the deficiency."

7. Section 265.6(d)(8) is amended by removing "following format" in the fourth sentence and inserting in lieu thereof "format appearing at the end of this section"; and by removing format.

8. At the end of § 265.6, add the formats shown below and referenced at § 265.6 (d)(6)(ii) and (d)(8), respectively.

§ 265.8 [Amended]

9. Section 265.8(g)(5) concluding text, last sentence, is amended by correcting "122.5" to read "945".

Fred Eggleston,

Assistant General Counsel, Legislative Division.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 3480

[AA-660-09-4120-02; Circular No. 2615]

Coal Exploration and Mining Operations Rules; Diligence Requirements

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking sets forth the regulations of the Department of the Interior for the administration of section 7(a) and section 39 of the Mineral Leasing Act (30 U.S.C. 207(a) and 30 U.S.C. 209 (1982)). It amends the existing regulations at 43 CFR 3483.3 to provide that, if suspension of operations and production of a coal lease has been approved or directed under section 39 of MLA, the 10-year production period set in section 7(a) of MLA will be extended by an amount of time equal to the duration of the suspension of operations and production.

EFFECTIVE DATE: January 12, 1989.

ADDRESS: Inquiries or suggestions should be sent to: Director (660), Bureau of Land Management, Room 3411, Main Interior Building, 1800 C Street NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT:
Paul W. Politzer (202) 343-7722,
or
Allen B. Agnew (202) 343-7753.

SUPPLEMENTARY INFORMATION: A proposed rulemaking containing revisions to two paragraphs of 43 CFR 3483.3 was published in the **Federal Register** on August 26, 1988 (53 FR 32631), with a 30-day comment period. During that comment period, comments were received from seven sources, with 2 coming from businesses, 3 from associations, 1 from an attorney, and 1 from a Federal Agency. All of the comments were given full consideration during the preparation of this final rulemaking. The Supplementary Information preamble to that proposed rulemaking is incorporated herein in its entirety, to the extent not modified by this Supplementary Information.

This final rulemaking provides that, upon approval of a suspension of operations and production under section 39 of the Mineral Leasing Act, the regulatory 10-year diligent development period shall be extended for a period of time equal to the suspension.

In general, all comments received were favorable to the changes proposed in the rulemaking. None of the comments suggested changes in the provisions amended in the proposed rulemaking, and the proposed rulemaking is adopted without amendment in this final rulemaking.

One comment concerned the adequacy of the Solicitor's conclusion that the Department of the Interior has defined the diligent-development requirement of section 7(b) of the Mineral Leasing Act to equate to the requirement in section 7(a) that the lease be producing at the end of 10 years. The comment stated that the definition of diligent development period should "clearly specify that it is the same 10-year period as referred to in section 7(a)." This suggested amendment is unnecessary at this time. The 10-year diligent development period and the 10-year production period of section 7(a) for new Federal coal leases have been equated since the Department of the Interior first proposed regulations to implement the Federal Coal Leasing Amendments Act of 1976 (41 FR 45571, October 15, 1976). In the 1982 amendments to the regulations, this concept was extended to pre-Federal Coal Leasing Amendments Act Federal coal leases as they became subject to that Act. The Bureau of Land Management is currently reviewing the coal exploration and mining operations regulations, and related portions of 43 CFR Group 3400. This comment will be considered during that review.

The comment continued that a second area of concern related to whether the effects on the 10-year diligent development period of a *force majeure* suspension pursuant to section 7(b) of MLA and a suspension of operations and production pursuant to section 39 of MLA are identical. *Force majeure* suspensions are not the subject of this final rulemaking. However, this question will be considered during the review of the 43 CFR Group 3400 regulations mentioned above.

One comment related to the issue of whether or not a lessee must have been in operation in order to qualify for a Section 39 suspension of operations and production, stating: "In reviewing the decisions in the cases of *Copper Valley Machine Works, Inc.* v. *Andrus*, 653 F.2d 595 (D.C. Cir. 1981) and *Getty Oil Co.* v. *Clark*, 614 F. Supp. 904 (D.C. Wyo. 1985), it appears that there is a distinction in the authority of the Secretary depending upon whether or not actual operations are being conducted on a lease prior to the Section 39 suspension. It would appear, under these decisions, that if no development exists then the Secretary must 'direct' a suspension [of operations and production] in the interest of conservation in order for the Section 39 suspension to apply. On the other hand, if operations have commenced, then it would appear that the lessee can apply for and obtain approval of a suspension and the suspension will serve to suspend all other terms and conditions of the Federal coal lease."

Section 39 of MLA is silent as to when a suspension of operations and production may be granted or directed. In the cases cited in the comment, no operations were occurring on the Federal coal leases. In the *Copper Valley* case, the court construed a stipulation, placed by the Bureau of Land Management on the permit to drill an oil well, as a directed suspension. In the *Getty* case, the lessee requested a suspension of operations and production while the Bureau of Land Management prepared an environmental impact statement on an application for a permit to drill an oil well. Thus, the timing of the suspension of operations and production in relation to commencement of operations has no bearing on the manner in which a Federal coal lease is suspended. *Copper Valley*, supra, at 600.

One comment stated that "the proposed rulemaking appears to be effecting a change in the regulations * * * that should have no impact on the scope or the result of the suspension of operation [sic] and production for conservation purposes." The comment continued that the Solicitor's Opinion (M-36958, July 14, 1988) "could be construed to allow leases to be suspended for 'conservation purposes' prior to the initiation of production * * * and potentially would pave the way for a huge loophole in the diligent development requirements * * *. This situation would be contrary to the intent of Congress * * [*." The comment concluded that the final regulation "must clarify that the suspension of operations [and production] for conservation purposes only applies to

producing mines." The Department has consistently declined to allow Section 39 suspensions of operation and production for speculative purposes to be directed or approved. *Mountain States Resources Corp.*, 84 IBLA 616, June 12, 1986. The intent of Congress is to discourage speculation on Federal coal leases. In general, a Section 39 suspension of operations and production is only warranted where operations have commenced and production has occurred. However, there will be situations where a Federal coal lease qualifies for a suspension of operations and production even though operations have not commenced, similar to the Federal oil and gas lease suspension of operations and production described in the *Getty* case.

The Department, with judicial approval, has construed the term "conservation" to include not only maximizing recovery and avoiding or minimizing waste or loss of the leased mineral resource, but also avoiding or minimizing damage to other natural resources, such as wildlife, water quality, air quality, and other minerals. An example would be where the development of an existing Federal coal lease is totally dependent upon the issuance, or lack thereof, of an adjacent Federal coal lease and the issuance decision on the adjacent Federal coal lease is dependent on preparation of an environmental impact statement. The environmental impact statement would be prepared to ensure that, if the adjacent lease is issued, the impacts of any operations on both leases will be mitigated. A section 39 suspension of operations and production, in the interest of conservation of other resources, would be warranted for the duration of the preparation of the environmental impact statement.

One comment stated that under existing regulations, "as diligent development dates for these leases come up * * * there will be no alternative in the present market to their forfeiture. If one lease in a larger reserve is forfeited, the potential for development of other leases in that reserve will be even further reduced. The United States, however, will in no way be benefited by having that lease back, since no one else will want it or be able to develop it with economic feasibility." Another comment stated that: "It is virtually impossible in the current regulatory environment, particularly with existing coal markets, to meet the ten year production requirements." Agencies in the Department of the Interior have addressed speculative holding of Federal coal leases many times, and disagree with the presumption that economics or markets are included in the term "in the interest of conservation of natural resources." This issue was addressed in Solicitor's Opinion M-36951 (92 I.D. 537, 540 (1985)). In enacting the Federal Coal Leasing Amendments Act of 1976, Congress sought to eliminate speculative holding of Federal coal leases. When the Act was enacted, only about 60 of the 533 outstanding Federal coal leases were in production. Although the total number of Federal coal leases approached 640 in the early 1980's, during fiscal year 1987 only 120 of the remaining 536 Federal coal leases were producing. Congress identified several reasons for this situation. First, the Secretary of the Interior had failed to enforce strictly the statutory coal lease conditions of diligent development and continued operation. Second, the availability of Federal coal leases on a noncompetitive basis under the prospecting permit/preference-right leasing system had enabled energy resource speculators to enter the market for Federal coal in large numbers and at little cost.

Three provisions of the Federal Coal Leasing Amendments Act of 1976 were designed to discourage speculation in nonproducing Federal coal leases. First, subject to valid existing rights, the noncompetitive leasing system was terminated. Second, Section 6 of the Act amended Section 7 of the Mineral Leasing Act to require the termination of new leases (and old leases readjusted or otherwise made subject to the 1976 Amendments) not producing coal in commercial quantities in 10 years. Third, in Section 3 of the 1976 Amendments, Congress added section 2(a)(2)(A) to the Mineral Leasing Act to prohibit lessees that hold Federal coal leases for 10 years after 1976 and are not then producing coal in commercial quantities from acquiring a lease or leases under the Mineral Leasing Act. The intent of Congress cannot be circumvented by allowing across-the-board suspensions for lessees that cannot find an economic market, as the comment implies. As discussed earlier, there may indeed be specific situations which may warrant a Section 39 suspension of operations and production for a nonproducing lease. However, "economic feasibility" and "market" are not within the meaning of the phrase "in the interest of conservation." The phrase "in the interest of conservation" refers to natural resources, as described in the *Copper Valley* decision, and the test is required to be satisfied on a case-by-case basis.

This final rulemaking makes it clear that, when warranted and either directed or approved, the 10-year diligent development period will be extended by a period of time equal to the duration of a Section 39 suspension of operations and production.

The principal author of this final rulemaking is Allen B. Agnew, Branch of Technical Support, Division of Solid Mineral Operations, assisted by other Washington Office staff, staff of the Division of Legislation and Regulatory Management, all of the Bureau of Land Management, and staff of the Office of the Solicitor, Department of the Interior.

It is hereby determined that this rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291, that it will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*), and that it will not have a substantial direct effect on the States, the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government under Executive Order 12612.

The economic impacts of this final rulemaking will not exceed the economic threshold of Executive Order 12291 and the rulemaking will affect all Federal coal lessees equally, regardless of their size.

This final rulemaking contains no information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 43 CFR Part 3480

Coal, Government contracts, Intergovernmental relations, Mines, Public lands—mineral resources, Reporting and recordkeeping requirements.

Under the authorities cited below, Part 3480, Group 3400, Subchapter C, Chapter II of Title 43 of the Code of Federal Regulations is amended as set forth below:

PART 3480—[AMENDED]

1. The authority citation for Part 3480 continues to read:

Authority: The Mineral Leasing Act, as amended (30 U.S.C. 181 *et seq.*); the Mineral

Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351–359); the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201, *et seq.*); the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470, *et seq.*); the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*); the Act of March 3, 1909, as amended (25 U.S.C. 396); the Act of May 11, 1938, as amended (25 U.S.C. 396a–396g); the Act of February 28, 1891, as amended (25 U.S.C. 397); the Act of May 29, 1924 (25 U.S.C. 398); the Act of March 3, 1927 (25 U.S.C. 398a–398e); the Act of June 30, 1919, as amended (25 U.S.C. 399); R.S. 441, as amended (43 U.S.C. 1457); the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 471, *et seq.*); the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321, *et seq.*); and the Freedom of Information Act (5 U.S.C. 552).

§ 3483.3 [Amended]

2. Section 3483.3(b)(1) is amended by removing from where it appears in the second sentence the phrase ", except the diligent development period,".

3. Section 3483.3(b)(3) is amended by inserting the phrase ", including the diligent development period," between the words "term" and "of" in the first line of the paragraph.

James R. Cason,

Deputy Assistant Secretary of the Interior.

November 4, 1988.

BILLING CODE 4310–84–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 43

[CC Docket No. 87–134; FCC 88–357]

Communications Common Carriers; Reporting and Recordkeeping Requirements

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Federal Communications Commission amends §§ 43.42 and 43.43 of its Rules so as to reduce the number of communications common carriers who must file with the Commission the reports specified in those sections.

EFFECTIVE DATE: January 9, 1989.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Herbert H. Wilson, Jr., Accounting and Audits Division, Common Carrier Bureau, Federal Communications Commission, Washington, DC 20554, (202) 632–7500.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Report and Order* (CC Docket No. 87–134), FCC 88–357, adopted November 3, 1988 and released December 2, 1988. The full text of the Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Services, Inc., (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

The Notice of Proposed Rulemaking in this proceeding, 2 FCC Rcd 3878, was published in the **Federal Register** at 52 FR 26,704, June 30, 1987.

SUMMARY OF THE REPORT AND ORDER: Section 43.42 of the Commission's Rules previously required that all communications common carriers which had operating revenues for the proceeding year in excess of $1,000,000 to file specified reports on their employee pension and benefit plans. The Commission amends Subsection 43.42(a) to require the filing of these reports only by carriers which the Commission determines to be "dominant" carriers and which have operating revenues for the preceding year in excess of $100,000,000.

Section 43.43 previously required all carriers which had operating revenues for the preceding year in excess of $1,000,000 to file reports as specified in that section before making any changes in the depreciation rates applicable to their operated plants. Carriers for which the Commission has previously prescribed depreciation rates may not make changes in such rates unless the charges are also prescribed by the Commission. The Commission amends § 43.43(a) so as to apply these requirements only to carriers which the Commission determines to be "dominant" carriers and which have operating revenues for the previous year in excess of $100,000,000.

All comments received favored the increase in the threshold filing level. The rule changes only address the designation of which carriers must file the reports specified in §§ 43.42 and 43.43. No changes are made in the contents of the reports themselves. The Commission rejected a proposal that the threshold for filing reports be tied to the definition of "Class A" carrier in 47 U.S.C. Part 32, because the reasons underlying the accounting classification in Part 32 do not provide a basis for treating benefit and depreciation reports differently from other reports required by Part 43. The filing of benefit and depreciation reports involves far less effort and planning than a change in accounting systems under Part 32.

The Commission certifies that the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, (1982) is not applicable to the rule changes which it adopted in this proceeding. In accordance with the provisions of Section 605 of that Act, a copy of this certification was sent to the Chief Counsel for Advocacy of the Small Business Administration at the time of publication of the Notice of Proposed Rulemaking in this proceeding in the **Federal Register**. As part of the Commission's analysis of the proposal described in this Order, however, the Commission has considered the impact of the proposal on small telephone companies, *i.e.*, those serving 50,000 or fewer access lines. Because of the nature of local exchange and access service, the Commission has concluded that small telephone companies are dominant in their fields of operation and therefore are not small entities as defined by the Regulatory Flexibility Act. *See MTS and WATS Market Structure*, 93 FCC 2d 241, 338–39 (1983). The Commission is therefore not required by the terms of that Act to apply the formal procedures set forth therein. However, the Commission is committed to reducing the regulatory burdens on small telephone companies whenever possible consistent with its other public interest responsibilities. Accordingly, it has chosen to utilize, on an informal basis, appropriate Regulatory Flexibility Act procedures to analyze the effect of the proposed regulations on small telephone companies. The Commission concluded that the proposed amendments to Part 43 will have a beneficial economic impact on many smaller local exchange companies and other carriers since the amendments will eliminate recordkeeping and reporting requirements applicable to such companies under the prior rules.

ORDERING CLAUSE: Accordingly, it is ordered, that pursuant to sections 4(i), 4(j), 201–205, 219(b), 220(b), and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 201–205, 219(b), 220(b), and 403, Part 43 of the Commission's Rules and Regulations IS REVISED as set forth at the end of this document, effective January 9, 1989.

Communications common carriers, Reporting and recordkeeping requirements.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

Part 43 of the Commission's Rules and Regulations, 47 C.F.R. Part 43, is amended as follows:

PART 43—[AMENDED]

1. The authority citation for Part 43 continues to read as follows:

Authority: Sec. 4, 48 Stat. 1066, as amended; 47 U.S.C. 154, unless otherwise noted. Interpret or apply secs. 211, 219, 220, 48 Stat. 1073, 1077, as amended; 47 U.S.C. 211, 219, 220.

2. The introductory text of § 43.42(a) is revised to read:

§ 43.42 Reports on pensions and benefits.

(a) Each communication common carrier with annual operating revenues of $100 million or more and which has been found by this Commission to be a dominant carrier with respect to any communications service shall, within thirty (30) days after the adoption of a plan (or within thirty (30) days of first becoming subject to this section, if such carrier has adopted a plan), furnish the Commission with the following information (see, however, § 43.01):

* * * * *

3. Section 43.43(a) is revised to read:

§ 43.43 Reports of proposed changes in depreciation rates.

(a) Each communication common carrier with annual operating revenues of $100 million or more and which has been found by this Commission to be a dominant carrier with respect to any communications service shall, before making any change in the depreciation rates applicable to its operated plant, file with the Commission a report furnishing the data described in the subsequent paragraphs of this section, and also comply with the other requirements thereof.

47 CFR Part 73

[MM Docket No. 87-419; RM-5800]

Radio Broadcasting Services; Burlington, KS

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots Channel 237A to Burlington, Kansas, as that community's first FM broadcast service, in response to a petition filed by Douglas R. Lawrence. There is a site restriction 6.0 kilometers (3.7 miles) east of the community. The coordinates for Channel 237A at Burlington are 38-11-02 and 95-40-21. With this action, this proceeding is terminated.

DATES: Effective January 17, 1989; The window period for filing applications will be open on January 18, 1989 and close on February 17, 1989.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 87-419, adopted November 1, 1988, and released November 30, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

[MM Docket No. 87-299; RM-5789 and RM-6253]

Radio Broadcasting Services; Rozel and Ness City, KS

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots FM Channel 254A to Rozel, Kansas, in response to a petition filed by Lee E. Scott. The coordinates for Channel 254A at Rozel are 38-11-42 and 99-24-24. In response to a counterproposal filed by Dennis Franz in this proceeding we shall also allot FM Channel 285A to Ness City, Kansas. The coordinates for Channel 285A at Ness City are 38-27-06 and 99-53-36. The Class A channels will provide first local service to each community. With this action, this proceeding is terminated.

DATES: Effective January 17, 1989. The window period for filing applications for Channel 254A at Rozel, Kansas and Channel 285A at Ness City, Kansas will open on January 18, 1989, and close on February 17, 1989.

47 CFR Part 73

[MM Docket No. 87-242; RM-5604]

Radio Broadcasting Services; Bastrop, LA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 230C2 in lieu of Channel 232A at Bastrop, Louisiana, and modifies the

license of Station KTRY-FM to specify operation on the higher class channel, as requested by North Delta Broadcasting, Inc. This action could provide Bastrop with its first wide coverage area FM station. The substitution can be made in compliance with the Commission's minimum distance separation requirements at the reference coordinates, which are 32-46-48 and 91-54-48. With this action, this proceeding is terminated.

EFFECTIVE DATE: January 17, 1989.

FOR FURTHER INFORMATION CONTACT: Patricia Rawlings, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 87-242, adopted November 1, 1988, and released November 30, 1988. Radio Broadcasting Services; Cordova, Demopolis, Evergreen, Hartselle, Linden, Marion, Sheffield, Trinity and Tuscaloosa, AL and Columbus, MS

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots a Channel 291A to Hartselle, AL, as that community's first local FM service and grants eight proposals to modify existing facilities at Cordova, Demopolis, Evergreen, Linden, Marion, Sheffield, and Tuscaloosa, AL, as well as Columbus, MS, as set forth *infra* (see Supplementary Information). With this action, this proceeding is terminated.

EFFECTIVE DATE: January 13, 1989. The window period for filing applications on Channel 291A at Hartselle, AL, will open on January 17, 1989, and close on February 17, 1989.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 87-451, adopted November 1, 1988, and released November 29, 1988. The Commission, at the request of Radio Hartselle, allots Channel 291A to Hartselle, AL, as that community's first local FM service, at a restricted site 2.8 kilometers southeast of the community. Reference coordinates for Channel 291A are 34-25-52 and 86-54-26. Additionally, at the request of Radio South, Inc., Channel 225C2 is substituted for Channel 224A at Tuscaloosa, AL, and the license of Station WTUG(FM) modified to specify operation on the higher powered channel. Channel 225C2 is allotted at the preferred site for Station WTUG(FM), 24.3 kilometers east of Tuscaloosa. Reference coordinates for Channel 225C2 are 33-09-08 and 87-18-48. In order to accommodate the Tuscaloosa modification, Channel 237A is substituted for Channel 225A at Cordova, AL, and the license of Station WFFN(FM) modified to specify operation on Channel 237A. Channel 237A is allotted with a site restriction 9.4 kilometers north, at reference coordinates 33-50-33 and 87-11-40. As a result of the Cordova substitution, it is not necessary to disturb the current allotment of Channel 223A at Trinity, AL, as contemplated in the *Notice*. Channel 253C2 is substituted for Channel 296A at Linden, AL, as requested by Marengo County Broadcasting, Inc., and the license for Station WDAL(FM) modified accordingly. Channel 253C2 is allotted to Linden with a site restriction 13.6 kilometers (8.5 miles) east of the community at reference coordinates 32-20-50 and 87-39-43. Channel 248A is substituted for Channel 280A at Marion, AL, and the permit held by Marion Radio, Inc. for Station WJAM-FM is modified to specify Channel 248A. This allotment requires a site restriction 1.7 kilometers north of Marion at reference coordinates 32-38-38 and 87-19-29. Channel 227C2 is substituted for Channel 228A at Evergreen, AL, at the request of Wolff Broadcasting Corporation, and the license for Station

WIJK–FM modified to specify operation on the higher powered channel. Channel 227C2 is allotted to Evergreen at the present site of Station WIJK–FM, at reference coordinates 31–26–29 and 86–56–08. Channel 293C2 is substituted for Channel 292A at Demopolis, as requested by Southstar Communications, Inc., and the license for Station WZNJ(FM) modified accordingly. Channel 293C2 is allotted to Demopolis with a site restriction 26 kilometers southeast of the community, at reference coordinates 32–20–25 and 87–38–55. Channel 292C2 is substituted for Channel 292A at Sheffield, AL, as requested by Paul Slatton and Associates Broadcasters, and the license for Station WBTG–FM modified to specify operation on the higher powered channel. Channel 292C2 is allotted to Sheffield with a site restriction 26.3 kilometers northwest of the community at reference coordinates 34–55–12 and 87–53–18. Channel 280C2 is substituted for Channel 280A at Columbus, Mississippi, at the request of T&W Communications Corporation, and the license for Station WACR–FM modified accordingly. Channel 280C2 requires a site restriction 23.2 kilometers northeast of the community, at reference coordinates 33–37–45 and 88–13–19.

The complete text of this decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

[MM Docket No. 88–15; RM–6104, RM–6333 and RM–6334]

Radio Broadcasting Services; Poplar Bluff, Campbell, and Ellington, MO

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots FM Channel 278C2 to Poplar Bluff, Missouri, in response to a petition filed by James M. Hunt. There is a site restriction 10.9 kilometers (6.8 miles) northeast of the community. The coordinates for Channel 278C2 are 36–49–50 and 90–18–54. In response to a counterproposal filed by Richard DeAnglis, we shall allot Channel 298A to Campbell, Missouri, with a site restriction 7.3 kilometers (4.5 miles) northeast at coordinates 36–32–45 and 90–01–35. In response to a second counterproposal filed by Saul Waksman, we shall allot Channel 280A to Ellington, Missouri, without a site restriction. The coordinates for Channel 280A at Ellington are 37–14–24 and 90–58–06. With this action, this proceeding is terminated.

DATES: Effective January 17, 1989; The window period for filing applications for Channel 278C2 at Poplar Bluff, Missouri, Channel 298A at Campbell, Missouri, and Channel 280A at Ellington, Missouri, will open on January 18, 1989, and close on February 17, 1989.

BILLING CODE 6712–01–M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 73–20; Notice 12]

Federal Motor Vehicle Safety Standards; Fuel System Integrity; Correction

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Technical correction.

SUMMARY: This notice corrects a typographical error in 49 CFR 571.301, *Fuel System Integrity*, concerning the application of the standard to large school buses. This standard limits the amount of fuel spillage that can occur from vehicle fuel systems during and after specified front, rear, and lateral barrier impact tests.

DATE: This correction is effective December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Dr. William J.J. Liu, NRM–12, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh St., SW., Washington, DC 20590. Telephone: (202) 366–4923.

SUPPLEMENTARY INFORMATION: The agency has become aware of a typographical error in paragraph S3,

Application, of Federal Motor Vehicle Safety Standard No. 301, *Fuel System Integrity* (Title 49 of the Code of Federal Regulations (CFR), § 571.301). Standard No. 301 limits the amount of fuel spillage that can occur from fuel systems of vehicles subject to the standard during and after specified front, rear, and lateral barrier impact tests.

Paragraph S3 should state: "This standard applies to passenger cars, and to multipurpose passenger vehicles, trucks, and buses that have a GVWR of 10,000 pounds or less and use fuel with a boiling point above 32° F. and to school buses that have a GVWR greater than 10,000 pounds and use fuel with a boiling point *above* 32° F." (Emphasis added.) However, as published in the CFR, the latter portion of S3 states: "* * * and to schoolbuses that have a GVWR greater than 10,000 pounds and use fuel with a boiling point *about* 32° F."

The change in wording occurred between the issuance and publication of the final rule establishing Standard No. 301. On October 8, 1975, NHTSA issued for publication in the **Federal Register** the final rule which established the application of Standard No. 301 to school buses over 10,000 pounds GVWR, and amended paragraph S3 to reflect that application. As issued, the wording in question in paragraph S3 read "above 32° F." This was in accord with the preamble to the final rule, which stated that: "This notice extends the proposed exclusion for vehicles that use fuel with a boiling point below 32° F. to school buses having a GVWR greater than 10,000 pounds." 40 FR 48352; October 15, 1975. However, as published, the final rule used the word "about" instead of "above" with respect to those more heavily rated school buses. This notice corrects that error.

This technical correction to Part 571 imposes no new duties or obligations on any party, nor alters any existing ones. Making this amendment ensures that the public will have a correct copy of the requirements in Part 571. For the preceding reasons, NHTSA finds that notice and comment on this correction notice are unnecessary, and that there is good cause for making the amendments effective in less than 30 days.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

PART 571—[AMENDED]

1. The authority citation for Part 571 continues to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.301 Standard No. 301; Fuel System Integrity.

2. Paragraph S3 is revised to read as follows:

S3. *Application.* This standard applies to passenger cars, and to multipurpose passenger vehicles, trucks and buses that have a GVWR of 10,000 pounds or less and use fuel with a boiling point above 32° F. and to school buses that have a GVWR greater than 10,000 pounds and use fuel with a boiling point above 32° F.

Issued on December 7, 1988.

Diane K. Steed,

Administrator.

[FR Doc. 88-28543 Filed 12-12-88; 8:45 am]

BILLING CODE 4910-59-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1140

[Ex Parte No. 402]

Reasonably Expected Costs; Implementation of the Railroad Accounting Principles Board Findings

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: The Commission is adopting surcharge rule changes in 49 CFR Part 1140 to implement the recent findings of the Railroad Accounting Principles Board. The proposed rules were published in the **Federal Register** on May 16, 1988 at 53 FR 17234. For purposes of computing reasonably expected costs, the Commission will: (1) Determine return on investment using the nominal cost of capital rate; (2) include as a reduction (or increase) of return on investment any projected holding gains (or losses) that would accrue to the carrier from retention of the line's assets for a one-year period; and (3) emphasize that reasonably expected costs should be calculated on the basis of those costs anticipated during the 12-month period beginning on the effective date of the surcharge. Also, we have decided against making a deferred tax adjustment in surcharge proceedings.

EFFECTIVE DATE: The rules are effective January 12, 1989.

FOR FURTHER INFORMATION CONTACT: Ward L. Ginn, Jr., (202) 275-7489 [TDD for hearing impaired: (202) 275-1721].

SUPPLEMENTARY INFORMATION:

The revised rules are set forth below.

Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pickup in person from: Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289-4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 275-1721.]

The rule modifications will not have a significant economic impact on a substantial number of small entities. Nor will this action significantly affect either the quality of the human environment or energy conservation.

List of Subjects in 49 CFR Part 1140

Administrative practice and procurement, Railroads, Reporting and recordkeeping requirements, Uniform system of accounts, Abandonment and discontinuances, Investigations, Public use conditions, Environmental protection, National trail system, National resources, Recreation and recreation areas.

Decided: December 2, 1988.

By the Commission, Chairman Gradison, Vice Chairman Andre, Commissioners Simmons, Lamboley, and Phillips. Commissioners Lamboley and Phillips concurred with separate expressions. Commissioner Simmons did not participate in the disposition of this proceeding.

Noreta R. McGee,

Secretary.

Title 49, Subtitle B, Chapter X, Part 1140 of the Code of Federal Regulations is amended as follows:

PART 1140—REASONABLY EXPECTED COSTS UNDER 49 U.S.C. 10705a

1. The authority citation for 49 CFR Part 1140 continues to read as follows:

Authority: 49 U.S.C. 10321, 11161, 11162, 11163, and 10705a; and 5 U.S.C. 559.

§ 1140.2 [Amended]

2. Section 1140.2 is amended by revising paragraphs (b)(7)(i), (7)(ii) introductory text, (7)(ii)(B)-(F), (7)(iii), (12)(ii) introductory text, (12)(ii)(B)-(E), and (12)(iii) to read as follows:

§ 1140.2 Reasonably expected costs.

* * * * *

(b) * * *

(7) * * *

(i) The current replacement cost for each type of locomotive used to serve the line at the beginning of the surcharge period shall be based on the most recent purchase of that particular type and size locomotive by the carrier indexed to the midpoint of the year or an amount quoted by the manufacturer. This unit cost shall be multiplied by 1 minus the

ratio of total accumulated depreciation to original total cost of that type of equipment owned by the railroad, as shown by company records. If the carrier anticipates that additions and retirements within its locomotive fleet will occur during the surcharge period, the carrier may adjust the ratio of total accumulated depreciation to original cost to reflect this change. The adjustment shall be determined by the carrier so long as the method employed is reasonable, rational and fully explained.

(ii) The current nominal cost of capital used in the calculation of return on investment for locomotives shall be the current before-tax cost of capital, weighted to the capital structure, and adjusted for the effects of the combined statutory Federal and State income tax rates. The current cost of capital, expressed as a percent, shall be calculated as follows:

* * * * *

(B) The current nominal cost of debt shall be the current rate quoted to the railroad for debt instruments normally used by the railroad in financing new equipment purchases, such as bonds, equipment trust certificates, et cetera. Because this is a before-tax rate there is no adjustment for income taxes.

(C) The current nominal after-tax cost of equity shall be an amount equal to that which a prudent investor would expect to earn through investments in the financial marketplace. This current nominal cost of equity shall be divided by 1 minus the combined Federal and State income tax rates. This will yield the before tax current nominal cost of equity capital.

(D) The current before-tax nominal cost of debt is multiplied by the current percentage of debt to total capital to obtain a weighted nominal before-tax cost of current debt.

(E) The current before-tax nominal cost of equity is multiplied by the current percentage of equity to total capital to obtain a weighted current before-tax cost of equity capital.

(F) The results of paragraphs (b)(7)(ii)(D) and (E) of this section are added together to calculate the current nominal cost of capital used in the calculation of the return on investment for equipment.

(iii) The annual return on investment for each type of locomotive shall be calculated as follows:

(A) The annual nominal return on investment shall be calculated by multiplying the average replacement cost developed in paragraph (b)(7)(i) of this section by the current nominal cost of capital determined in paragraph (b)(7)(ii) of this seciton.

(B) The carrier shall determine the holding gain (loss) which is projected to occur during the surcharge period.

(C) The results of paragraph (b)(7)(iii)(B) of this section is deducted from paragraph (b)(7)(iii)(A) of this section to determine the annual return on investment.

* * * * *

(12) * * *

(i) *Valuation of rail properties.* The carrier shall determine the investment base to which the return element is applied. The investment base shall be the sum of:

(A) The net liquidation value, at the beginning of the surcharge period, of the rail properties that have no further value for railroad proposes and the market value, at the beginning of the surcharge period, for those materials that have remaining value for railroad purposes. The net liquidation value shall be deemed as their highest and best use for nonrail purposes. This amount shall be determined by computing the estimated appraised value of such properties, less all costs (dismantling and disposition of improvements) necessary to make the remaining properties available for their highest and best use and complying with applicable zoning, land use, and environmental regulations. The market value shall be the estimated sales value of the assets based on their remaining useful life less all cost of dismantling. No amounts shall be included that are the results of investments of state DOT's, shippers or parties other than the surcharging railroad. In addition, properties to which the railroad does not have title, such as those with reversionary rights, shall also be excluded. If the carrier anticipates that additions and retirements in the investment base of the line will occur during the surcharge period, the carrier may adjust the investment base to reflect this change. The adjustment shall be determined by the carrier so long as the method employed is reasonable, rational and fully explained.

(B) The allowable working capital computed at 15 days cash costs (on-branch costs less depreciation).

(C) The amount of current income tax benefits the carrier would realize were it to abandon the line which would have been applicable to the period of the surcharge. (Conversely, if the railroad would incur an income tax liability from abandonment, the liability should be deducted from the investment base.)

(ii) *Rate of return.* The railroad's cost of capital shall be the current before-tax cost of capital, weighted to the capital structure, and adjusted by the effects of the combined statutory Federal and State income tax rates. This rate of return, expressed as a percent, shall be calculated as follows:

* * * * *

(B) The current nominal cost of debt shall be determined by taking the average of all debt instruments (including bonds, equipment trust certificates, financial lease arrangements, et cetera) issued by the carrier in the most recent 12-month period. The debt cost calculated by this procedure is a before-tax rate and is not adjusted for income taxes.

(C) The current nominal after-tax cost of equity shall be an amount equal to that which a prudent investor would expect to earn through investments in the financial market place. The current after-tax nominal cost of equity is divided by 1 minus the combined statutory Federal and State income tax rates. This will develop the current nominal cost of equity on a before-tax basis.

(D) The current nominal before-tax cost of debt is multipled by the current percentage of debt to total capital to obtain a weighted current nominal before-tax cost of debt.

(E) The current nominal before-tax cost of equity is multipled by the current percentage of equity to total capital to obtain a weighted current nominal before-tax cost of equity.

* * * * *

(iii) *Return on value.* The return on value that shall be included in the cost of sustaining service is calculated as follows:

(A) The current return on value is calculated by multiplying the value of the properties at the beginning of the surcharge period, as determined in paragraph (b)(12)(i) of this section, by the current cost of capital determined in paragraph (b)(12)(ii) of this section.

(B) The carrier shall determine the holding gain (loss) which is projected to occur, during the surcharge period, in the carrier's property investment in the line.

(C) The result of paragraph (b)(12)(iii)(B) of this section is deducted from paragraph (b)(12)(iii)(A) of this section to determine the annual return on investment.

* * * * *

§ 1140.2 [Amended]

3. In § 1140.2 *Notes*, Note 15 is amended by revising paragraphs (2)(C)(i) and (2)(C)(ii) to read as follows:

* * * * *

Note 15 * * *

(2) * * *

(C) * * *

(i) The current value for each type of car shall be calculated by first arriving at the current cost per car at the beginning of the surcharge period using the most recent purchase of this type of car by the railroad indexed to the midpoint of the year or an amount quoted by the manufacturer. This cost per car shall be multiplied by the number of cars of that type in the carrier's car fleet at the beginning of the surcharge period as shown by company records, to determine the investment in this type of equipment. The investment in this type of car shall be multipled by the composite depreciation rate for that type of car as shown in the latest annual report filed with the Commission or company records.

(ii) Add the return on investment which shall be determined as follows:

(A) Multiply the current value of each type of car, developed in subparagraph (i) of this note, by one minus the ratio of accumulated depreciation to the total original cost investment of that type of car owned by the railroad. If the carrier anticipates that additions and retirements of this particular type of car will occur during the surcharge period, the carrier may adjust the investment to reflect this change. The adjustment shall be determined by the carrier so long as the method employed is reasonable, rational and fully explained. The return on investment is determined by multiplying the net current value by the rate of return calculated for locomotives in § 1140.2(b)(7).

(B) The carrier shall determine the holding gain (loss) which is projected to occur, during the surcharge period, in the carrier's property investment in the line.

(C) The result of subparagraph (B) of this note is deducted from subparagraph (A) of this note to determine the return on investment.

National Oceanic and Atmospheric Administration

50 CFR Part 658

[Docket No. 80993-8222]

Shrimp Fishery of the Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Partial approval of an amendment to a fishery management plan.

SUMMARY: NOAA announces the partial approval of Amendment 4 to the Fishery Management Plan for the Shrimp Fishery of the Gulf of Mexico (FMP). Approved portions of Amendment 4: (1) Update problems in the fishery and revise the FMP's objectives accordingly, (2) simplify the annual review processes for the Tortugas shrimp sanctuary and the Texas closure, (3) recommend a program to assist in the recovery of endangered and threatened sea turtles, (4) broaden the FMP's measure relating to obstructions to shrimp trawling, and (5) update the FMP's habitat information. The disapproved portion of Amendment 4 proposed that the minimum-size landing and possession limits of the State where landed apply to white shrimp taken in the exclusive economic zone (EEZ). The approved portions of Amendment 4 are intended to clarify the FMP and simplify its administration.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Michael E. Justen, 813-893-3722.

SUPPLEMENTARY INFORMATION:

Background

The shrimp fishery is managed under the FMP and its implementing regulations at 50 CFR Part 658 under the authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act). Amendment 4 was submitted by the Gulf of Mexico Fishery Management Council (Council) in December 1987. It was preliminarily disapproved on January 4, 1988 because it did not contain enough information to justify the proposed management measure for white shrimp, and because the economic analyses regarding the catch of small white shrimp taken in association with the directed fishery for seabobs and the directed fishery for white shrimp in the EEZ were not adequate (53 FR 266, January 6, 1988). Amendment 4 was resubmitted by the Council on August 21, 1988, with limited additional information. A proposed rule to implement Amendment 4 was published on September 21, 1988 (53 FR 36609).

Approved Measures

Amendment 4 identifies additional problems which have developed in the fishery and revises the objectives of the FMP accordingly. The annual review process for the Tortugas sanctuary is simplified, and the period for annual review of the Texas closure is extended to February 1. An educational program and an expansion of the sea turtle headstart and research programs to assist in the recovery of endangered and threatened species of sea turtles is recommended. A previously approved measure for addressing obstructions to shrimp trawling is broadened to reflect consideration of underwater and surface obstructions as hazards to trawling and navigation. Amendment 4 also updates the habitat information in the FMP by including readily available information regarding habitat significant to the fishery and the effects changes in the habitat may have upon the fishery. These measures in Amendment 4 are approved.

Disapproved Measure

Amendment 4 proposed that white shrimp taken in the EEZ conform to the minimum-size landing and possession limits of the State where landed. According to the Council, this action would provide consistency between State and Federal regulations, facilitate enforcement, and enhance yield in volume and value from this fishery by deferring harvest of small shrimp, thus allowing growth and promoting efficient use of the resource. Because of the existence of a seasonal fishery for seabobs off Louisiana in which small white shrimp often occur as an unavoidable bycatch, this measure would not have been implemented until Louisiana provided for an allowable bycatch of white shrimp which would reduce or avoid disruption of its seabob fishery.

Reasons for Disapproval

NOAA disapproved this measure because (1) it was not justified by adequate economic rationale; (2) the use of size counts as a management tool for shrimp is inconsistent with the FMP; and (3) the measure included an open-ended deferral to changes in State count laws for white shrimp that would not be reviewable for conformance with the FMP prior to becoming applicable to white shrimp harvested from the EEZ. Upon the record developed, NOAA cannot conclude that this measure meets the requirements of the Magnuson Act, E.O. 12291, Regulatory Flexibility Act (RFA), and other applicable law.

The economic analysis within the amendment was deficient in two areas. First, the analysis did not review the range of impacts on the seabob fishery that might result from potential levels of white shrimp bycatch. During the periods of seasonal mixing of small white shrimp with seabobs, a 100-count law with no allowable white shrimp bycatch for the seabob fishery would necessitate intensive culling of small white shrimp and would therefore have a significant adverse economic impact unless some relief is provided. Pursuant to the amendment, this measure was not to be implemented until Louisiana provided for a bycatch of undersize white shrimp in the seabob fishery. The Louisiana Department of Wildlife and Fisheries (LDWF) indicates that

provision for such a bycatch allowance will be considered by the State legislature when it convenes in April 1989. Until Louisiana provides for an allowable white shrimp bycatch, analysis cannot analytically demonstrate compliance with the RFA and E.O. 12291.

Second, the economic analysis did not address the potential impacts on fishermen that might result from uncertain future actions by Louisiana or the other Gulf States. Information is not available to indicate effects of the proposed rule on fishermen attempting to land in Louisiana white shrimp taken from the EEZ that do not comply with Louisiana's minimum-size count laws. Furthermore, Louisiana may change its minimum-size count laws and the other Gulf States may choose to apply their minimum-size count regulations to shrimp taken in the EEZ. Therefore, no basis exists for determining compliance with E.O. 12291 and the RFA unless an analysis of the potential changes is completed.

Although this measure was intended to assist Louisiana with enforcement of its management program for white shrimp, the choice of size counts as a management tool for shrimp is inconsistent with the FMP. The FMP reviewed use of size-counts as a management option for shrimp and concluded that they are unnecessary, result in increased biological waste of the resources, and generally have a negative cost/benefit ratio. This apparent conflict with the FMP is adequately addressed with reference to Louisiana's 100-count size limit for white shrimp. However, the amendment does not address the effects of future count laws that Louisiana or the other Gulf States might adopt if this measure were approved, nor what level of bycatch the Louisiana legislature might allow in the seabob fishery. Furthermore, the amendment does not contain sufficient supporting data to change previous cost/benefit conclusions, or to establish that the behavior of fishermen has changed since development of the FMP. Thus, little additional information exists to rebut the record supporting decisions in the original FMP which established that count laws, in general, are not cost beneficial.

Under this measure, regulatory changes by the States would become immediately applicable for white shrimp harvested in the EEZ. Absent identified standards or a process for evaluating subsequent State actions, future alterations of specific minimum-size and possession regulations by the States may affect the catch and revenue of vessels fishing for white shrimp in the EEZ, and the consistency of such action with the FMP's objective to prevent waste in ways that cannot presently be analyzed. Such an open-ended deferral offers NMFS and the Council no recourse but to amend the FMP in the event a State adopts a minimum count-size that negatively alters the cost/benefit ratio of causes waste. Thus, this measure fails to satisfy the requirements of the Magnuson Act, the Administrative Procedure Act, E.O. 12291, and the RFA.

Comments and Responses

Eight written responses were received commenting on Amendment 4 and the proposed rule. The issues raised by commenters are summarized by category.

1. General Comments

Comments were received from seven different entities on three topics. Each topic follows:

Approval of Amendment 4

The U.S. Coast Guard did not object to Amendment 4. The U.S. Department of Interior, Fish and Wildlife Service (USFWS); Florida Marine Fisheries Commission (FMFC); LDWF; the American Shrimp Processing Association (ASPA), a professional trade association from Louisiana; and the Texas Shrimp Association (TSA), a commercial shrimping association, supported implementation of Amendment 4 in its entirety. The Gulf Council urged approval of Amendment 4, since it contained all available scientific information from NMFS and Louisiana. NOAA agrees and approved Amendment 4, except for the measure requiring that white shrimp taken in the EEZ conform to the minimum-size landings and possession limit of the State where landed. Reasons for rejecting this measure are stated above under "Reasons for Disapproval." This measure is severable because its omission does not alter the effectiveness of the remaining measures in the Amendment.

Enforcement of Minimum Size Limits

The U.S. Coast Guard concluded that due to the difficulty of determining where the shrimp would be landed, enforcement of minimum size limits at sea would be difficult, at best. Enforcement of this measure would be conducted ashore. NOAA agrees.

Headstart Program for Sea Turtles

USFWS urged NOAA to reject the Council's recommendation on enhancing a headstart program for sea turtles as not scientifically supportable. NOAA will receive the Council's recommendation for the headstart program and will consider it along with other measures designed to restore the depleted species of sea turtles.

2. Comments on Management Options for White Shrimp

The Secretary of Commerce (Secretary) was concerned whether the proposed white shrimp management measure is the most cost effective and beneficial way to achieve the objectives of the FMP and Amendment 4. Therefore, the Secretary requested comments on the following options for effective management of the white shrimp fishery.

Application of Minimum-Size Landing and Possession Limits of the State Where Landed to White Shrimp Harvested in the EEZ

The Council commented that this is the preferred option to make the proposed rule more compatible with State regulations. FMFC supported this concept for the present, but felt that Louisiana should consider additional measures that would raise the yield per recruit of shrimp in the future. Meanwhile, enforcement of the 100-count law would increase landings from State waters and the EEZ off Louisiana. LDWF supported use of the 100-count law because it would provide a mechanism to better enforce the State count law for white shrimp. ASPA recommends this measure because the fishery should be managed throughout its range. TSA supported this measure, but felt that a concurrent closure of a limited portion of the EEZ in conjunction with a closure of State waters by Louisiana would be a more progressive management step.

Minimum Size Count in the EEZ

The Council stated that originally the preferred measure in Amendment 4 was a 100-count size limitation for white shrimp taken from the EEZ. Based on advice from NMFS, this was revised to provide that white shrimp taken in the EEZ and transported into a State shall be in accordance with that State's landing and possession laws with respect to size. The premise for the change was that this procedure would make the proposed rule more compatible with the regulations of all Gulf States. FMFC opposed the concept of an EEZ-wide minimum count because this may undermine Florida's rules for State waters. LDWF supported this concept. TSA opposed this concept because of the waste involved.

VOL 53 ISS 239 DEC 13 1988 UMI

Revision of State Regulations to Expand State Powers

The Council stated that the FMP made this recommendation years ago. Some States, including Louisiana, have not accepted this recommendation. FMFC stated that the Florida Legislature has not given the Commission the authority to regulate fisheries outside State waters. TSA said that States are best suited to establish rules, either autonomously or in concert with the Council via a management plan, to deal with the problems expressed in the proposed rule.

Removal of White Shrimp From the Management Unit of the FMP

The Council stated that at one time it considered removing white shrimp from the FMP, an action that would leave white shrimp management wholly to the States. The Council indicated it rejected this option primarily because statistics provided by the Southeast Fisheries Center, NMFS, showed that approximately 45 percent of the 55 million pound annual Gulf white shrimp catch came from the EEZ. FMFC, ASPA, and TSA did not support removal of white shrimp from the FMP. The Coastal Concern Association, a commercial shrimping organization from Louisiana, supported the removal of white shrimp and seabobs from the FMP only if Louisiana adopted an allowable bycatch level of 20–25 percent of undersized (over 100-count) white shrimp in the directed fishery for seabobs.

Other Matters

The only measure in Amendment 4 that would have necessitated a regulatory change was the disapproved measure concerning white shrimp. Accordingly, the proposed regulatory change published at 53 FR 36609 (September 21, 1988) is not adopted.

Because the approved portions of Amendment 4 have no implementing regulations, a final regulatory impact review/regulatory flexibility analysis normally required by E.O. 12291 and the RFA, was not prepared. The Paperwork Reduction Act does not apply since neither a collection-of-information nor a record-keeping requirement is included in Amendment 4.

The Council determined that Amendment 4 is consistent to the maximum extent practicable with the approved coastal zone management programs of Florida, Alabama, Mississippi, and Louisiana. Those States agreed with this determination. Texas does not have an approved coastal zone management program.

The Council prepared an environmental assessment (EA) that discusses the impact on the environment that would result from approval of Amendment 4. Based on the EA, the Assistant Administrator for Fisheries, NOAA, determined that the approved portions of Amendment 4 would not significantly affect the quality of the human environment, as defined under the National Environmental Policy Act.

The Secretary partially approved Amendment 4 on October 19, 1988. The Secretary determined that the approved portions of this Amendment are necessary for the conservation and management of the shrimp fishery of the Gulf of Mexico and that they are consistent with the national standards, other provisions of the Magnuson Act, and other applicable law. Therefore, NOAA issues this notice announcing partial approval of Amendment 4 to the FMP.

List of Subjects in 50 CFR Part 658

Fisheries, Fishing.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 6, 1988.

James W. Brennan,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

50 CFR Part 675

[Docket No. 80859–8251]

Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule; closure modification.

SUMMARY: NOAA modifies a closure notice that will allow U.S. vessels to conduct a directed fishery for yellowfin sole and "other flatfish" in the Bering Sea subarea south of 58°00′ N. latitude and east of 165°00′ W. longitude (Zone 1) under specified conditions intended to limit the incidental or bycatch of Pacific halibut, *Chionoecetes bairdi* Tanner crabs, and red king crabs. Directed fishing for yellowfin sole and "other flatfish" in Zone 1 was prohibited on March 8, 1988 due to attainment of the prohibited species catch (PSC) limit for *C. bairdi* Tanner crabs. Subsequent reassessment of data on bycatches of crabs in the directed fisheries for yellowfin sole and "other flatfishes" indicate that the risk of biological harm to Tanner crabs and other prohibited species from reopening Zone 1 is not significant. Therefore, the previous closure notice is modified to allow directed fishing for yellowfin sole and "other flatfishes" by U.S. vessels in Zone 1 under specified conditions. The intended effect is to relax a restriction on domestic fishermen while maintaining protective measures for prohibited species.

DATE: Effective December 8, 1988, through December 31, 1988.

ADDRESS: Copies of documents supporting this action may be obtained from James W. Brooks, Acting Director, Alaska Region, National Marine Fisheries Service, 709 West 9th Street, P.O. Box 21668, Juneau, AK 99802–1668.

FOR FURTHER INFORMATION CONTACT: Jay J.C. Ginter, Fishery Management Biologist, NMFS, 907–586–7229.

SUPPLEMENTARY INFORMATION: The domestic and foreign groundfish fisheries in the exclusive economic zone (EEZ) of the Bering Sea and Aleutian Islands (BSAI) area are managed under the Fishery Management Plan for the Groundfish Fishery in the Bering Sea and Aleutian Islands Area (FMP). The FMP was developed by the North Pacific Fishery Management Council (Council) and approved by the Secretary of Commerce (Secretary) in 1981. Federal regulations implementing the FMP and governing domestic fisheries in the BSAI area appear under 50 CFR Part 675.

A description of the problem addressed by this action is given in the notice of proposed closure modification and request for comments published in the **Federal Register** on August 25, 1988 (53 FR 32415). In summary, NOAA is responding to a request from representatives of the domestic annual processing (DAP) sector of the U.S. groundfish industry. This sector includes U.S. vessels that process their catch onboard or deliver it to U.S. processors. The other component of the domestic annual harvest (DAH) is the joint venture processing (JVP) sector, which includes U.S. fishing vessels working in joint ventures with foreign processing vessels authorized to receive U.S. catches in the EEZ.

NOAA closed Zone 1 on March 8, 1988 to DAP and JVP directed fishing for yellowfin sole and "other flatfish" due to the attainment of the PSC limit for *C. bairdi* Tanner crabs (53 FR 7941, March 11, 1988) . Representatives of DAP fishing interests requested the Director, Alaska Region, NMFS (Regional Director) to reopen Zone 1 to DAP fishing to allow a harvest of up to 25,000 mt of yellowfin sole. The Council reviewed this issue on request of the Regional Director at its April 13–15, 1988

meeting and supported, in principle, the reopening of Zone 1 to directed fishing for yellowfin sole by DAP vessels under authority of § 675.21(d).

In authorizing and conditioning fishing in an otherwise closed zone, the Secretary is required to take into account five determinations by the Regional Director regarding the probable effects of allowing continued or resumed fishing. The Regional Director made these determinations on June 17, 1988 and they were made available for public review and comment by notice of proposed closure modification in the **Federal Register** on August 25, 1988 (53 FR 32415). In summary, the Regional Director determined that the expected additional fishing mortality resulting from reopening Zone 1 to a harvest of 25,000 mt yellowfin sole would be no more than 60,200 halibut, 50,000 *C. bairdi* Tanner crabs, and 21,500 red king crabs. The Regional Director determined further that these additional amounts of fishing mortality are not likely to have a measurable effect on the respective populations of these species and that the added risk of overfishing these species due to reopening Zone 1 according to the above conditions is insignificant.

Difference Between Proposed and Final Action

The proposed action would have reopened Zone 1 to directed fishing for yellowfin sole and "other flatfish" by DAP fishing vessels exclusively. This final action, however, will reopen Zone 1 to such fishing by all domestic (i.e. DAP and JVP) fishing vessels. The reason for this change is that JVP directed fishing for yellowfin sole was prohibited when the proposed action was published, but currently, this fishery is not prohibited. Directed fishing for yellowfin sole was prohibited to JVP fishermen on June 3, 1988 (53 FR 21454). This prohibition was anticipated to remain in effect through the remainder of the fishing year, which would have made reopening Zone 1 to JVP fisheries an academic exercise.

In September and in October, however, the Regional Director found that there would be amounts of yellowfin sole surplus to DAP harvesting and processing needs for 1988. In August 1988, NMFS projected the DAP harvest of yellowfin sole for the final 6 months of 1988 to be 20,050 mt. Subsequent survey of the DAP industry indicated that DAP harvest of yellowfin sole during this period is more likely to be 10,910 mt. Hence, in two separate actions, the Secretary: (1) Reapportioned 2,000 mt of yellowfin sole from DAP to JVP and 4,000 mt of yellowfin sole from reserve to JVP (53 FR 35081), and (2) reapportioned 8,650 mt of yellowfin sole from DAP to JVP (53 FR 40894). Therefore, directed fishing for yellowfin sole by JVP fishermen resumed in the BSAI on September 6, 1988, although Zone 1 remained closed.

The original PSC limit for *C. bairdi* Tanner crabs in Zone 1 does not distinguish between DAP and JVP fisheries. Although incidental catches of crabs while fishing for yellowfin sole in the reopened Zone 1 are likely to be greater with both fisheries operating than with only one, prevention of overfishing the crab population will be assured by prohibiting fishing in excess of the supplemental PSC limit. From an economic perspective, the closure of Zone 1 has been equally burdensome on DAP and JVP fisheries as they have had to explore other areas of the BSAI for commercial quantities of yellowfin sole.

Public Comments Received

Four letters of comment were received before the comment period ended. One comment was in favor and three were opposed to reopening Zone 1. The favorable and opposed comments are summarized and responded to below under comments one and two respectively.

Comment 1: Zone 1 is important to the yellowfin sole fishery as it contains the largest concentrations of this species and fishing outside Zone 1 results in greater catches of other flounder species which have lower or no economic value. In addition, fishing outside Zone 1 requires a minimum of 25 percent more running time than fishing inside the zone. Hence, fishing for yellowfin sole inside Zone 1 reduces fuel costs and increases production. The current Tanner crab biomass is 4.5 times that when the PSC limit was established. The additional Tanner crab PSC limit proposed is completely justified. Full observer coverage on DAP vessels, as proposed, imposes an unjustified cost on the DAP industry. The level of observer coverage could be reduced to 33 percent and still provide a representative sample of what is being caught. The time taken to respond to the original request to reopen Zone 1 is unnecessarily long. This zone will be urgently needed by the DAP yellowfin sole fishery if Zone 2 is closed due the attainment of its PSC limit before the end of this year. Finally, the Magnuson Fishery Conservation and Management Act of 1976 (Magnuson Act) clearly gives DAP fishermen preference over JVP fishermen for available fish. This preference should extend to the prohibited species bycatch required to take those fish.

Response: NOAA agrees that there is an economic burden imposed on fishermen by closing Zone 1. Avoiding this burden was the intended incentive for fishermen to minimize their incidental catches of prohibited species while fishing for yellowfin sole and "other flatfish." NOAA agrees also that the apparent population of *C. bairdi* Tanner crabs has increased significantly since the implementation of the Zone 1 PSC limit for this species. This is partly the reason why the Regional Director determined that an additional bycatch of 50,000 *C. bairdi* Tanner crabs would not be likely to lead to overfishing of this species. This additional bycatch was determined by the Regional Director to be less than 0.01 percent of the estimated biomass of this species.

Full or 100 percent observer coverage is intended to mean at least one observer on every catching or receiving fishing vessel. This does not imply that 100 percent of all catches are required to be sampled by the observer. Total groundfish catch, its species composition, the bycatch of all prohibited species, and other biological information will be extrapolated from the samples taken by the observer of catches brought onboard while the observer is on duty. As a condition of fishing in Zone 1, full observer coverage is essential to the accurate monitoring of prohibited species catches and the collection of biological information. Any level of coverage less than 100 percent would require an assumption that the harvests of un-observed vessels is not statistically different from harvests of vessels carrying observers. The experience of NMFS after 11 years of monitoring foreign and JVP fisheries through on-board observers suggests that this assumption cannot be made.

In addition, Zone 1 was established specifically because it contains large concentrations of the Tanner and red king crab populations which are important to crab fisheries. Groundfish fisheries using trawl gear must be conducted carefully in this and adjacent crab-sensitive areas to minimize crab bycatches. NMFS and the groundfish fishing industry should apply extra effort to assure that this care is exercised on all vessels. The biological data derived from full observer coverage also will contribute to understanding crab population dynamics and DAP groundfish fishery/crab interaction in Zone 1 late in the fishing year. Currently, there are few data on these subjects.

The original request to reopen Zone 1 was made in February, 1988. The Regional Director sought the advice of

VOL
53
ISS
239
DE
13
1988
UMI

the Council on this issue at its next meeting in April, 1988. After receiving affirmative advice from the Council, the Regional Director decided to postpone action until after the majority of crabs in Zone 1 had completed their molting and mating cycle in mid-June, 1988, to reduce bycatch mortality. Certain administrative and legal requirements then necessitated publication of the proposed action (in August) and opportunity for public comment (ending September 21, 1988). Although this process has been lengthy, it was not designed to inhibit DAP fishing operations but to protect the interests of all persons concerned with marine fishery resources. This process could have been shorter if the specific circumstances and conditions leading to the request for this reopening were anticipated in implementing the original Zone 1 rule. Public comment on the potential reopening of Zone 1 at that time would have obviated the need for it now.

The processor preference amendments to the Magnuson Act provide U.S. fish processors priority access to U.S. harvested fish. Foreign processing vessels' access to U.S. harvested fish is restricted by decisions to apportion amounts of fish to JVP or DAP. Prohibited species are not part of the groundfish fishery as defined in the FMP, and may not be processed by U.S. or foreign processors. While fishing for a species of groundfish may be predicated on the availability of uncaught PSC limits, this FMP does not express the Council's intent that certain U.S. harvesters be given priority access to PSC species.

Comment 2: Too many crabs and juvenile halibut are being taken out of Zone 1 as bycatch in the trawl fisheries. Yellowfin sole can be harvested in adjacent areas (north and west) of Zone 1 without as much potential impact on the longline fishery for halibut. Bering Sea populations of red king and (*C. bairdi*) Tanner crabs have been characterized by the State of Alaska Department of Fish and Game as depressed. The conservation of crabs and halibut should prevail over the desires of groundfish fisheries in Zone 1.

Response: Estimates of the numbers of crabs and halibut taken as bycatch in the Bering Sea groundfish fisheries are high. The critical issue here, however, is whether the incremental bycatch that will occur by reopening Zone 1 will significantly add to the risk of overfishing these prohibited species. The Regional Director has determined that the additional bycatch mortality of *C. bairdi* Tanner crabs, and Pacific halibut, up to the supplemental PSC limits prescribed below, is not likely to overfish the species. Red king crab bycatches in a reopened Zone 1 are not expected to attain the existing PSC limit for this species. These determinations did take into consideration the relatively low population levels of mature red king and *C. bairdi* Tanner crabs. Although commercial harvests of yellowfin sole and "other flatfish" have occurred outside of Zone 1, the allowance of fishing for these species within the zone balances the economic interests of groundfish fishermen with the conservation interests of crab fishermen.

Closure Modification and Conditions

Directed fishing for yellowfin sole and "other flatfish" by DAH fishing vessels will be allowed to resume on the effective date in Zone 1 providing that those vessels comply with the following conditions:

1. Any DAP fishing vessel on which trawl-caught groundfish are brought onboard must carry an observer approved by the Regional Director.

2. Directed fishing for yellowfin sole and "other flatfish" will cease by notice in the **Federal Register** when any of the following occurs:

(a) The total number of red king crabs taken by JVP and DAP vessels while directed fishing for yellowfin sole and "other flatfish" in Zone 1 since the beginning of the 1988 fishing year equals the PSC limit of 135,000 animals:

(b) The total number of *C. bairdi* Tanner crabs taken by JVP and DAP vessels while directed fishing for yellowfin sole and "other flatfish" in Zone 1 after this notice became effective equals the supplemental PSC limit of 50,000 animals;

(c) The total number of Pacific halibut taken by JVP and DAP vessels while directed fishing for yellowfin sole and "other flatfish" in Zone 1 after this notice became effective equals the supplemental PSC limit of 60,200 animals.

Classification

This action is taken under authority of § 675.21(d). For the reasons stated above, the Under Secretary for Oceans and Atmosphere, NOAA, (Under Secretary) has determined that this action is necessary and consistent with the Magnuson Act. In addition, based on the above discussion and the Regional Director's determinations, the Assistant Administrator for Fisheries, NOAA, (Assistant Administrator) has determined that this action: (1) Qualifies for a categorical exclusion from the requirement to prepare an environmental assessment under the National Environmental Policy Act, (2) is not a major rule requiring regulatory impact analysis under Executive Order 12291, (3) will have no significant effects on small entities under the Regulatory Flexibility Act, and (4) contains no collection of information requirement subject to the Paperwork Reduction Act. However, the Under Secretary finds that the Regional Director's determinations substantially satisfy the environmental and economic documentation requirements of these laws.

The reopening of Zone 1 to directed fishing for yellowfin sole and "other flatfishes" by U.S. vessels relieves a restriction and is not subject to the delayed effectiveness period required by the Administrative Procedures Act (APA). However, for operation purposes, the effective date of this action is delayed to ensure a fair start.

Proposed Rules

Federal Register
Vol. 53, No. 239
Tuesday, December 13, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Public Meeting on Notice of Proposed Rulemaking on Maintenance of Nuclear Power Plants

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of meeting.

SUMMARY: On November 28, 1988 (53 FR 47822), the Commission published a notice of proposed rulemaking on maintenance of nuclear power plants. This meeting is scheduled as a result of a request from Nuclear Management and Resources Council (NUMARC). The agenda for the meeting will mainly include time for NRC staff responses to questions from NUMARC on the notice of proposed rulemaking including the Commission's solicitation of proposals for the development of a maintenance standard.

DATE: 1:00 p.m., December 14, 1988.

ADDRESS: Room 4B11, One White Flint North, 11155 Rockville Pike, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Moni Dey, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone (301) 492–3730.

Dated in Rockville, Maryland this 6th day of December, 1988.

For the Nuclear Regulatory Commission.

Moni Dey,

Task Manager, Advanced Reactors & Generic Issues Branch, Division of Regulatory Applications, Office of Nuclear Regulatory Research.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 229, 240, 249, 270, and 274

[Rel. Nos. 34–26333; 35–24768; IC–16669; File No. S7–26–88]

Ownership Reports and Trading by Officers, Directors and Principal Stockholders

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules.

SUMMARY: The Commission today is publishing for comment proposed revisions to its rules and forms regarding the filing of ownership reports by corporate officers, directors, and principal shareholders, and the exemption of certain transactions by those persons from the short-swing profit recovery provisions of the Securities Exchange Act of 1934 and related provisions of the Investment Company Act of 1940 and the Public Utility Holding Company Act of 1935. The Commission proposes to revise these rules to achieve greater clarity, enhance consistency with the statutory purposes, rescind unnecessary requirements, streamline mandated procedures, and enhance compliance with the reporting provisions of the rules.

DATE: Comments should be received on or before March 13, 1989.

ADDRESS: Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comment letters should refer to File No. S7–26–88.

All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: Brian J. Lane, Elizabeth M. Murphy, or Mark W. Green, Office of Disclosure Policy, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549 (202) 272–2589.

SUPPLEMENTARY INFORMATION: The Commission is publishing for comment a comprehensive revision of its rules promulgated under section 16 [1] of the Securities Exchange Act of 1934 ("Exchange Act").[2] Every rule under section 16 would be amended, deleted, or reorganized except for Rule 16c–1 [3] and Rule 16e–1.[4] Further, Exchange Act Rule 12h–2 [5] would be deleted and Rule 30f–1 [6] under the Investment Company Act of 1940 ("Investment Company Act")[7] would be amended.

In addition, the Commission is proposing changes to Regulation S–K,[8] Schedule 14A,[9] and Forms 10–K,[10] 3, 4,[11] and N–SAR.[12] The Commission also is proposing a new Form 5.

I. Executive Summary

Section 16(a) of the Exchange Act [13] requires that the officers, directors, and principal shareholders of an issuer with equity securities registered under section 12 [14] disclose the extent of, and changes in, their ownership of equity securities of that issuer. Under section 16(b),[15] the issuer may recover trading profits realized by those persons incident to short-swing transactions in the issuer's *equity* securities.

The amendments proposed today reflects the first comprehensive review of the regulatory scheme under section 16 since the adoption of the Exchange Act. There currently are two forms and 25 rules in place, of which only five rules have been revisited within the past 18 years. These regulations have been the subject of frequent and continous requests for interpretive advice. A fresh look at the rules also is warranted in light of changes in the nature of securities. Trading has mushroomed in both old and new derivative securities,[16] and employee benefit plans have become more widespread, complex, and diverse. Fitting these developments into the existing regulatory framework has resulted in interpretive uncertainty, substantial litigation, and, in some instances, unnecessary regulatory burdens. Further, in light of the widespread deliquency of corporate insiders in meeting their reporting responsibilities under section 16(a), the regulatory scheme under section 16 should be amended to improve compliance and detection of deliquent filers.

Major substantive changes proposed in the regulatory scheme include: (1) Specific definitions of the terms "beneficial owner," "equity security of such issuer," and "officer;" (2) a definition of the term "owner of any equity security of the issuer" that would address the criteria for standing in private suits under section 16(b); (3) use of a new Form 5 for the annual reporting of transactions that are exempted from short-swing profit recovery and transactions that are required to be reported, but were not; (4) a provision requiring insiders to provide the issuer with copies of their Forms 3, 4, and 5; (5) deletion of the shareholder approval provision of the employee benefit plan rule, Rule 16b-3, and inclusion of a more stringent disinterested administration requirement; (6) a change in the reporting date for derivative securities to the date of acquisition, rather than the date the securities become exercisable; (7) exemption of most exercises and conversions of derivative securities from short-swing profit recovery; (8) inclusion of derivative securities in the same class of securities as the underlying securities; (9) alternative profit calculation measures for short-swing transactions involving derivative securities; (10) imposition of reporting status on trusts when the trustee is a reporting person; (11) an exemption from section 16(c) for a short derivative securities position that hedges an underlying securities position; (12) amendment of the proxy rules to require issuers to disclose late reporting by their insiders in the annual proxy statement and annual report on Form 10-K; and (13) a provision that a section 16(a) report be deemed timely filed with the Commission if the filing person shows that the report was mailed to the Commission by the due date. Apart from substantive changes, the rules under section 16 are proposed to be reorganized to provide greater clarity.

II. Background

Section 16 of the Exchange Act was designed both to provide the public with information on securities transactions and holdings of corporate officers, directors, and principal shareholders, and to deter those individuals from profiting on short-term trading in the securities of their corporations while in possession of material, non-public information. It applies to every person who is directly or indirectly the beneficial owner of more than ten percent of any class of equity security that is registered pursuant to section 12 of the Exchange Act ("ten percent holders"), and to every director and officer of such issuer (collectively referred to as "insiders").

The legislative history of the Exchange Act describes in detail instances where insiders with advance knowledge of facts that could produce a rise or fall in the market value of their companies' securities bought and sold such securities to their personal advantage.[17] In some cases, insiders manipulated the market price of their stock and caused the company to follow financial policies calculated to produce sudden changes in market prices. To combat these abuses, Congress enacted section 16 to require reports of securities transactions by insiders and to provide for the recovery of any short-swing profits.[18]

[13] 15 U.S.C. 78p(a) (1982).
[14] 15 U.S.C. 78/ (1982).
[15] 15 U.S.C. 78p(b) (1982).

[16] The term "derivative securities" refers to convertible securities, options, warrants, and similar rights.

[17] *See generally* Stock Exchange Practices: Hearings on S. Res. 84 and S. Res. 56 and S. Res. 97 Before the Senate Comm. on Banking and Currency, 73d Cong., 1st Sess. 55 (1934) [hereinafter "Stock Exchange Practices"].

[18] Substantially identical provisions appear as sections 17(a) and 17(b) of the Public Utility Holding Company Act of 1935 [15 U.S.C. 79q(a), (b) (1982)], and the reporting requirements of section 16 are adapted in section 30(f) of the Investment Company Act [15 U.S.C. 80a-29(f) (1982)]. The exemptive rules under section 16 also are applicable to these parallel statutory provisions.

"For the purpose of preventing the unfair use of information which may have been obtained by [an insider] by reason of his relationship to the issuer," [19] Congress enacted section 16(b), which provides for automatic recovery of any profits made by an insider on securities purchased and sold within a six month period. Unlike other provisions applicable to insider trading, *i.e.*, sections 10(b), 14(e), and 21(d)(2) of the Exchange Act,[20] section 16 is a strict liability provision under which an insider's short-swing profits can be recovered regardless of whether that insider actually was in possession of material, non-public information.[21] Congress used this "automatic recovery provision [to] cut [ ] through the formidable difficulties on proving intent and actual misuse of inside information that serve to hinder the effectiveness of traditional remedies against insider speculation." [22] The Commission was given specific rulemaking authority to exempt transactions as not comprehended within the purpose of the subsection.

Believing prompt publicity to be a potent weapon in the effort to curb the abuse of inside information, Congress also adopted section 16(a), which requires insiders to file public reports with respect to transactions in the equity securities of their corporations. In mandating reporting by insiders, Congress intended not only to discourage abuse of inside information and encourage voluntary maintenance of proper fiduciary standards by those in control of corporations, but also to give public investors information concerning purchases and sales by insiders, which might in turn indicate such insiders' private opinions of the company's prospects.[23] Reflecting this additional informational purpose, the exemptive rules from section 16(b) short-swing profit liability do not exempt an insider from reporting under section 16(a), while a reporting exemption carriers with it an exemption from section 16(b).[24]

Section 16(c) [25] prohibits the sale of any equity security of the issuer if the selling insider either (1) does not own the security, or (2) does not deliver it within 20 days after sale or mail it within five days. However, Congress provided an exception for persons who, acting in good faith, were unable to deliver in time or were able to prove that timely delivery would have caused undue inconvenience or expense.

When Congress added section 12(g) [26] to the Exchange Act to extend Exchange Act registration requirements to securities traded in the over-the-counter market in 1964, section 16(d) [27] was added to provide an exemption from section 16 (b) and (c) for over-the-counter marketmakers. Only trades executed in the ordinary course of market making activities are exempt; trading involving a marketmaker's investment account is not. This provision also gives the Commission rulemaking authority to define and prescribe conditions regarding investment accounts and market maintenance.

Section 16(e) [28] provides an exemption for "foreign and domestic arbitrage transactions unless made in contravention of such rules and regulations as the Commission may adopt in order to carry out the purposes of this section." Unlike section 16(d), this exemption explicitly provides relief from section 16(a) as well as from sections 16 (b) and (c).

The current regulatory scheme requires insiders to file a Form 3, Initial Statement of Beneficial Ownership of Securities, with the Commission when a company first registers an equity security pursuant to section 12, or when an insider otherwise becomes subject to the reporting requirements of section 16(a).[29] A copy of the report also must be forwarded to each national securities exchange on which the registered security is listed.[30]

Subsequently, an insider must file a Form 4, Statement of Changes in Beneficial Ownership of Securities, for any month in which there has been a change in the beneficial ownership last reported on a Form 3 or Form 4, except for changes resulting from transactions exempted from the reporting requirements. The Form 4 must be filed within ten days of the end of the month in which the change in beneficial ownership occurs.[31]

In light of the importance of the information provided by Form 4 filings to investors, many major newspapers [32] routinely publish information gleaned from the reports filed by insiders of selected companies, such as those of local interest. Moreover, there are a number of private newsletters and services that analyze or report trades by reporting persons.[33] Analysts and investors routinely monitor insider trades to detect early warning signs of trouble or positive trends among companies.[34]

The staff of the Division of Corporation Finance receives more requests for interpretative and no-action advice concerning the section 16 rules than any other area.[35] This is due, in

[35] Since 1971, the staff has issued over 2000 no-action letters that have addressed section 16. About 190 section 16 letters were issued in 1987 and 200 letters in the first ten months of 1988.

large part, to the complexity of the rules and continual changes in the market, including the increasing number of types of unorthodox transactions and constantly evolving employee benefit plan arrangements. In the last five years, there have been repeated requests from the corporate community,[36] the securities industry,[37] and the securities bar [38] that the Commission revisit the section 16 regulatory scheme.

Furthermore, the Commission is concerned that the rate of delinquency in Form 3 and 4 filings has become very high in the past several years.[39] A number of enforcement actions to enforce filing requirements have been and continue to be brought.[40] To address the reporting problem, the Commission is proposing a four-part response: (1) Simplifying the reporting provisions to focus on timely reporting of those securities transactions that are more discretionary in nature and have greater potential for abuse;[41] (2) providing for annual reporting by insiders of their securities ownership and previously unreported transactions; (3) requiring annual disclosure by companies of those insiders who have failed to comply with the filing requirements within the past year; and (4) supporting legislation to provide for fines for late filings.[42]

[38] Letter to John J. Huber, Director, Division of Corporation Finance, from Donald W. Glazer, Co-Chairman, Simon M. Lorne, Co-Chairman, and Timothy Tomlinson, Secretary, American Bar Association Subcommittee on Employee Benefits and Executive Compensation (Nov. 9, 1983).

[39] A study conducted by the Commission's staff has revealed a delinquency rate in excess of 40 percent for the years 1986, 1987, and 1988. *See* Section VII.A. *infra*.

[40] *See, e.g., SEC v. Beall*, Litigation Release No. 11328 (Jan. 6, 1987); *SEC v. Lee*, Litigation Release No. 11191 (Aug. 11, 1986).

[41] As part of the effort to make the rules less complex, minor language changes to some of the current rules would be proposed. *See* proposed Rules 16a–5(b), 16a–6, 16a–7, 16b–7, and 16b–8.

[42] The Commission has proposed legislation, the "Securities Law Enforcement Remedies Act of 1988," to amend section 15(c)(4) of the Exchange Act [15 U.S.C. 78o(c)(4) (Supp. III 1985)] to include authority for section 16(a) non-compliance, which would, as a result, provide fining authority for section 16(a). This legislative proposal was forwarded to Congress on September 28, 1988.

III. Section 16(a) Reporting

A. Who Must Report

The proposed rules would clarify the meaning of the terms "officer" and "ten percent beneficial owner."

1. Officer

Proposed Rule 16a–1(g) would define "officer" for section 16 purposes in the same manner as "executive officer" is defined in Rule 3b–7.[43]

In applying the definition of "officer" currently applicable to section 16, which is currently contained in Rule 3b–2,[44] courts have construed the term to encompass only those officers who have access to non-public information,[45] excluding officers who hold only an honorary title or who have no significant executive duties and do not participate in management decisions.[46] If applied literally, the Rule 3b–2 definition of "officer" can be too broad in the context of section 16; of particular concern is the inclusion of all vice presidents in the definition.[47] Many businesses give the title of vice president to employees who do not have significant managerial or policymaking duties and are not privy to inside information.

The reporting and short-swing profit recovery provisions of section 16 were intended to apply to those officers who have routine access to material non-public information, not those with particular titles. The Commission, therefore, proposes to amend the definition of officer to parallel the Exchange Act definition of the term executive officer. Those exercising a policy-making function, by the very nature of that responsibility, have routine access to material non-public information. Officers without policy-making responsibility are not as likely to have such access and, therefore, should not be subject to the reporting and automatic liability provisions of Section 16. Should these officers in fact come into possession of material non-public information, the Exchange Act antifraud provisions will prohibit their abuse of the information and impose liability for profits made or losses avoided.[48] The Commission does, however, solicit comment on whether "officer" should instead be defined to include all officers with routine access to inside information, whether or not they are executive officers.

The proposed definition, like Rule 3b–7, specifically addresses officers of the issuer's subsidiary, but not officers of a parent. Comment is solicited as to whether the rule also should make it clear, consistent with current interpretation, that an officer of the issuer's parent company who performs policy-making functions for the issuer is deemed an officer of the issuer.

2. Director

No definition for the term "director" is proposed because there appears to be little confusion about the definition of that term in section 3(a)(7) of the Exchange Act.[49] Comment is solicited, however, as to whether a definition specific to section 16 is necessary.

The Commission does not propose to codify case law relating to deputization. Under that theory, a corporation, partnership, trust or other person can be deemed a director for purposes of section 16 where it has expressly or impliedly "deputized" an individual to serve as its representative on a company's board of directors. In determining whether a person has been deputized for purposes of section 16, the courts have looked at a variety of factors, focusing primarily on the alleged deputy's position of control within the deputizing entity and the deputy's independent qualifications to serve on the board of the issuing corporation.[50] This fact-intensive analysis appears best left to a case-by-case determination. Nonetheless, comment is

[43] 17 CFR 240.3b–7.

[44] "The term 'officer' means a president, vice president, secretary, treasurer or principal financial officer, comptroller or principal accounting officer, and any person routinely performing corresponding functions with respect to any organization whether incorporated or unincorporated." 17 CFR 240.3b–2.

[45] *See, e.g., C.R.A. Realty Corp. v. Crotty*, 663 F. Supp. 444 (S.D.NY 1987).

[47] *Report of the Task Force on Regulation of Insider Trading Part II: Reform of Section 16*, 42 Bus. Law. 1067 (1987) (American Bar Association report). A recent survey by the American Society of Corporate Secretaries reveals that approximately 30 percent of the members responding used the Rule 3b–7 definition to determine which officers are subject to section 16. American Society of Corporate Secretaries, "Section 16 Survey Report" (Nov. 1988).

[48] *See* Exchange Act sections 10(b), 14(e), 21(d)(2)(A).

[49] 15 U.S.C. 78c(a)(7) (1982).

[50] *See Blau v. Lehman*, 368 U.S. 403 (1962); *Feder v. Martin Marietta*, 406 F. 2d 260 (2d Cir. 1969); *Lowey v. Howmet Corp.*, 424 F. Supp. 461 (S.D.NY 1977); *Lewis v. The Dekcraft Corp.*, [1973–1974 Transfer Binder] Fed. Sec. L. Rep. (CCH) ¶94,620 (S.D.NY 1974). Although most of the cases involving deputization have not addressed specifically whether deputizing entities are subject to the reporting requirements of section 16(a), the court stated in *Sterling v. Chemical Bank*, 382 F. Supp. 1146 (S.D.NY), *aff'd*, 516 F. 2d 1398 (2d Cir. 1975), that the concept of deputization has never been extended to that section. The Commission, however, stated in Release 34–18114, Q.3, that a person who designates another to be a director should be deemed a director for purposes of section 16(a).

requested as to whether further guidance is needed either by codification of current judicial interpretation or otherwise.

In making a determination as to whether a particular advisory, emeritus, or honorary director should be treated as a director for puposes of section 16, the focus should be on such person's underlying responsibilities or privileges with respect to the issuer and access to inside information. The person's formal title does not govern that determination. In general, honorary directors need not be treated as directors for purposes of section 16, because they usually do not take part in formulating and deciding policy issues concerning the issuer, and do not have general access to material, non-public information.[51] On the other hand, advisory and emeritus directors generally should be treated as directors for such purposes.[52] They commonly are invited to attend board meetings of the issuer to assist in policy formation and, therefore, do have access to material, non-public information.

3. Transactions While not an Officer or Director

Rule 16a–1(d) [53] currently requires an officer or director (but not a ten percent holder) [54] to disclose all trades conducted six months before becoming an insider. This requirement would be retained in proposed Rule 16a–2(a), because, once becoming an officer or director and gaining access to inside information, a person would have the opportunity to take advantage of that information to offset transactions made shortly before attaining insider status.

Comment is requested as to whether it is useful to require disclosure of trades made by insiders prior to attaining insider status. If so, should the transaction effected prior to becoming an insider nonetheless be exempted from section 16(b) profit recapture because the insider may not have known at the time of that transaction that the initial transaction could be subject to profit recovery?

Proposed rule 16a–2(b) would continue to require that an officer or director disclose all trades executed six months after termination of insider status or termination of section 12 registration for the class of securities. An insider's leaving office does not diminish the ability to develop a plan to purchase and sell or sell and purchase while in possession of inside information.

4. Beneficial Owners

The third class of reporting persons is ten percent beneficial owners. The term beneficial ownership under section 16 has evolved under case law and is not specifically defined in the Exchange Act or the Commission's rules. Uncertainty as to the status of indirect interests in securities of the issuer, such as ownership of derivative securities and holdings of the immediate family, trusts, corporations, and partnerships, has raised requests for a definition.

Congress, in applying Section 16 to ten percent holders, intended to reach those persons who could be presumed to have access to inside information because of their interest in the issuer's securities. Thus, in determining beneficial ownership for purposes of ascertaining who is a ten percent holder, the analysis properly should turn on the person's potential for control. The proposed rules would rely on section 13(d) definitions for determining who is a ten percent holder.[55] The identification of ten percent holders by the issuer will be facilitated by use of schedule 13D reports.[56]

The determination of which securities transactions should be subject to section 16(a) reporting and section 16(b) profit recovery, on the other hand, should focus only on those transactions from which the insider may realize a profit. Rule 16a–1(a)(2), therefore, would define beneficial ownership for purposes of section 16(a) reports and section 16(b) profit recovery in terms of pecuniary interest, thereby codifying case law.[57] Inclusion of a specific definition of beneficial ownership for reporting and profit recovery purposes, particularly those provisions of the definition that address specific situations such as family and trust ownership, will provide for greater certainty. It will, however, substantially reduce the flexibility of the courts to take into account the facts and circumstances of a specific case that might militate against a finding of beneficial ownership. For example, one court found beneficial ownership for reporting purposes and not recovery purposes.[58] Under the proposed definition that would no longer be possible. The Commission requests comment on the advisability of defining beneficial ownership for reporting and profit recovery purposes; would it be preferable to continue to allow the courts to proceed on a more flexible facts and circumstances analysis?

a. *Proposed Definitions*—(i) *Ten Percent Holder.* Proposed Rule 16a–1(a)(1) would state that a person would be deemed a ten percent holder for purposes of Section 16 if that person is deemed a ten percent beneficial owner under section 13(d) of the Exchange Act and the rules thereunder. All aspects of the section 13(d) analysis, such as the exclusion of non-voting securities [59] and counting only those derivative securities exercisable within 60 days,[60] would be imported into the ten percent holder determination for section 16 purposes.[61]

Proposed Rule 16a–2(c) would state that the transaction resulting in a person becoming a ten percent holder need not be reported,[62] although the existence of the holding would be required to be disclosed on the Form 3.[63]

(ii) *Pecuniary Interest.* The proposed definition of the term beneficial owner for reporting and profit recovery purposes in Rule 16a–1(a)(2) would include "any person who, directly or indirectly, through any contract, arrangement, understanding, relationship, or otherwise has or shares a pecuniary interest in the subject securities." It thus would codify the courts' emphasis on pecuniary interests and deem that indirect pecuniary interests are sufficient to establish a reporting obligation and the potential for short-swing profit recovery with respect to those securities.[64] Use of voting

[53] 17 CFR 240.16a–1(d).

[54] The rule was adopted in response to court decisions permitting short-swing profit recovery for transactions made prior to becoming an officer and director. *See* Exchange Act Release No. 8697 (Sept. 18, 1969) [34 FR 15246]; *Adler v. Klawans*, 267 F. 2d 840 (2d Cir. 1959); *Blau v. Allen*, 163 F. Supp. 702 (S.D.N.Y. 1958). Section 16(b) expressly precludes short-swing profit recovery from ten percent holders unless they had that status at the time of both transactions. *See* proposed Rule 16a–2(c).

[55] *See* Proposed Rule 16a–1(a)(1); 15 U.S.C. 78m(d) (1982); 17 CFR 240.13d–1 *et seq.*

[56] 17 CFR 240.13d–101.

[57] *See, e.g., Whitaker* v. *Whitaker Corp.*, 639 F.2d 516 (9th Cir.), *cert. denied*, 454 U.S. 1031 (1981); *Whiting* v. *Dow Chemical Co.*, 523 F.2d 680 (2d Cir. 1975). The proposed definition, however, would go beyond most of the judicial decisions and state that an indirect pecuniary interest is sufficient to convey beneficial ownership.

[58] *See Colan* v. *Monumental Corp.*, 830 F.2d 818 (7th Cir. 1983) (derivative securities).

[59] 17 CFR 240.13d–1(d).

[60] 17 CFR 240.13d–3(d)(1).

[61] For example, just as with section 13(d), insiders could not purchase put options or write call options for the purpose of affecting ten percent holder status.

[62] The rule is in accord with the holding in *Foremost-McKesson v. Provident Securities Co.*, 423 U.S. 232 (1976) that such transactions would not be subject to section 16(b).

[63] There is less of a need for reporting such transactions on Form 4 since these trades would be reported on a Form 13D.

[64] Proposed Rule 16a–1(a)(2) would address specifically three forms of indirect pecuniary interests: Derivative securities, family holdings, and general partnership holdings.

BEST COPY AVAILABLE

power or investment power to make money for the user or immediate family members would satisfy the pecuniary standard of the proposed rule. Comment is solicited as to whether the right to receive dividends, without any other interest, should be sufficient to satisfy the standard.

b. *Derivative securities.* Under proposed Rule 16a–1(a)(2)(i), derivative securities, whether or not presently exercisable, would be deemed to carry a pecuniary interest in, and thus beneficial ownership of, the underlying securities for purposes of section 16. Insiders holding derivative securities are affected by the performance of the underlying securities and, therefore, have a pecuniary interest in those securities, even if the derivative securities are not presently exercisable.[65] The proposed rule expands current Rule 16a–6(b),[66] which attributes beneficial ownership in the underlying securities only to presently exercisable derivative securities.

c. *Family holdings.* The status of family holdings and transactions under section 16 has been the subject of many requests for interpretive advice and much litigation. The Commission has expressed the view that family holdings presumptively should be attributed to the insider. Enrichment of a family member living in the same household can benefit the insider by reducing the need or the potential need of the insider to lend or contribute funds to support the family member, or by increasing the family members' contributions to the support of the insider and the household.[67] The judicial decisions are mixed, but, in contrast to the Commission's position taken in releases, most hold that beneficial ownership need not be attributed to the insider where the financial independence of the family member can be shown.[68]

Proposed Rule 16a–1(a)(2)(ii) would codify the Commission's historic position, deeming an insider to be the beneficial owner of securities held by a member of the immediate family sharing the same residence.[69] The Commission recognizes the increasing prevalence of multi-career, multi-income families in which members of the family may have independent financial status. Nonetheless, the potential for abuse of family holdings calls for aggregation. The proposed definition focuses on family members in the same residence, who reasonably may be assumed to act in one degree or another as an economic unit, and who may benefit from each other's enrichment.

The definition would, however, deviate from the Commission's historic position in one respect in order to provide greater certainty. Instead of a persumption of attribution, the rule would uniformally and automatically attribute beneficial ownership for holdings of the immediate family. Comment, however, is solicited on whether the rule should provide that the attribution is a rebuttable presumption only.

The Commission also recognizes that in many circumstances people who are not family members may live together and form an economic unit. As an alternative to the proposed definition, the Commission is considering adopting a definition whereby insiders are deemed to be the beneficial owners of all holding held by "any person sharing the same residence, except for employees or tenants." Comment is solicited as to which alternative is preferable.

d. *Partnership holdings.* The holdings of a general partnership consistently have been attributed to the general partners, in proportion to their partnership interests, because they have a direct pecuniary interest in the holdings of their partnership.[70]

Proposed Rule 16a–1(a)(2)(iii) would codify the present interpretation of general partnership holdings.

In contrast, the general or limited partners of a limited partnership have only a limited indirect pecuniary interest in the holdings of the limited partnership and, by virtue of the operation of partnership law, limited partners have no right to control the partnership. General partners of a limited partnership have a measure of control over the limited partnership that is similar to that of a corporate director.[71] Under current interpretation and consistent with the treatment of the holdings of a corporate director, absent other circumstances, neither limited nor general partners of a limited partnership are treated as beneficial owners of the securities held by the entity. This interpretation would be retained. Comment is solicited as to whether a rule relating to limited partnership holdings, codifying or modifying present interpretation, is necessary. Additionally, comment is solicited as to whether a general partner of a limited partnership should be treated the same as a general partner in a general partnership. Commenters should provide reasons supporting their conclusion.

The Commission has determined not to propose a rule specifically addressing corporate holdings, to permit courts flexibility in applying the proposed pecuniary interest standard. Comment is solicited as to whether a rule is necessary and whether the determination as to attribution should be based upon the number of shareholders, or the percentage of voting stock they own.

e. *Dual ownership.* Where beneficial ownership is attributed to more than one person (*e.g.* family members, trusts, and beneficiaries), each beneficial owner may be required to report a securities transaction. This will arise, for example, where two members of the immediate family are insiders in their own right. Proposed Rule 16a–1(a)(3) would specify that both beneficial owners would report holdings and transactions. It would also state that the issuer could recover short-swing profits only once. The courts would decide how to apportion liability.

f. *Disclaiming Beneficial Ownership.* Proposed Rule 16a–1(a)(4) is similar to current Rule 16a–3,[72] which permits a

[67] "Absent countervailing facts, it is expected that securities held by a spouse, minor children and other relatives who share the same home as the insider will be reported as being beneficially owned by the insider since such relationships ordinarily result in the insider obtaining benefits substantially equivalent to ownership." Release 34–18114 Q.4.

[68] *See CBI Industries v. Horton*, 682 F.2d 643 (7th Cir. 1982) (no attribution for insider who was co-trustee for his adult sons, since he had no duty to support); *Whittaker v. Whittaker Corp., supra* (invalid mother's holdings were attributed to insider because he had power of attorney, was her sole heir, and used her money for his benefit); *Whiting v. Dow Chemical Co.*, 523 F.2d 680 (2d Cir. 1975) (spouse's holdings were attributed because couple shared a joint investment plan); *Schur v. Salzman*, 365 F. Supp. 725, 732 (S.D.NY. 1975) (spouse's purchase was attributed because money came from joint account and there were no "special circumstances" to support claim that insider was not beneficial owner); *Blau v. Potter*, [1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) ¶ 94,115 (S.D.NY. 1973) (no attribution where spouse was financially independent, had separate accounts, and there was no control or input by insider); *but see Altamil Corp. v. Pryor*, 405 F.Supp. 1222 (S.D. Ind. 1975) (the only court to find that an indirect benefit of enriching spouse was sufficient; however, holding was questioned in *CBI Industries*).

[69] "Immediate family" would be defined in proposed Rule 16a–1(b).

[70] *See, e.g., Blau* v. *Lehman, supra;* Exchange Act Release No. 1985 (Dec. 21, 1938) [11 FR 10971]. In contrast, holdings generally have not been attributed to the individual shareholders of a corporate shareholder, except in situations involving closely held corporations. Release 34–18114 Q.8.

[71] *See Integrated Resources American Insured Mortgage Investors—Series 85* (March 25, 1986).

[72] This would not affect the ability of a person to disclaim beneficial ownership for purposes of section 13(d). *See* 17 CFR 240.13d–4.

person to declare that filing a statement does not equate to an admission that the person is the beneficial owner of the securities reported. Given the addition of the beneficial ownership definition, the proposed rule, unlike the current rule, would limit the ability to disclaim beneficial ownership to situations where beneficial ownership is not specified by rule.[73] Thus, for example, an insider could not disclaim beneficial ownership of securities held by a member of the immediate family.

5. Trusts and Trustees

a. *Trustees.* A trust may become a ten percent holder of a class of equity securities, and therefore become an insider subject to section 16. The trustee generally makes the trust's investment decisions and administers the trust. Thus, when a trust becomes a ten percent holder, the trustee is required to file Forms 3 and 4 to report holdings and transactions on behalf of the trust. In addition, because the trust is a ten percent holder, the statute presumes that the trust, and therefore the trustee through whom the trust acts, has access to inside information. Trustees thus are treated as insiders in their own right and are required to report their personal transactions under current Rule 16a–8(c).[74]

No changes are proposed. The trust and the trustee would have separate reporting obligations for their respective transactions, so there is no duplicative reporting or liability. Thus, a trustee reports the transactions of the trust as agent of the trust and would not be personally responsible for short-swing profit derived by the trust. Trustees would be personally responsible only for profits realized with respect to securities deemed to be beneficially owned by them for reporting and profit recovery purposes.

The proposed rules would expand the current scheme to address situations where the trustee is an insider and the trust is not a ten percent beneficial owner.[75] If a trustee has access to inside information, this access should be attributed to the trust because of the substantial potential for the trust to benefit from the trustee's insider status. Thus, if an officer or director is selected to be a trustee of a friend's trust, that trust would be treated as an insider because it has access to inside information through the trustee. Separate reporting responsibilities would result, as would separate liabilities. The trust would remain an insider until a non-insider trustee was appointed or the trustee ceased to be an insider.

Comment is requested as to whether trustees should become insiders if they administer more than one trust that collectively, but not individually, hold over ten percent. Under the proposed rule, the trustee, assuming the trustee exercises voting power or investment control, would be deemed to have beneficial ownership for purposes of section 13(d), and therefore the trustee would be a ten percent holder. Comment is requested as to whether this is an appropriate result in the case of professional trust companies such as banks. Do such institutions exercise their voting or disposition authority on a company-wide basis or is there a different voting policy applicable for each trust? Would exemptions from section 16(a) and/or (b) be appropriate for professional trust companies (such as banks), which administer numerous trusts in the ordinary course of business?

b. *Beneficiaries.* Beneficiaries of trusts rarely exercise voting or investment conrol over the securities held in trust. Therefore, trust beneficiaries have not been presumed to have access to material non-public information and have not historically been deemed insiders merely because the trust or the trustee is an insider. The revised rules would preserve this approach.

Where a trust's beneficiaries are insiders, they, as beneficial owners of the turst corpus, would be required to report trust transactions that are executed at their direction or with their approval as their own, in proportion to their beneficial interest, because they have a pecuniary interest in the trust holdings. Proposed Rule 16a–5(a)(4) continues this approach.[76] Thus, under certain circumstances, trust transactions on behalf of insider beneficiaries could be matched with other transactions inside or outside the trust to yield a short-swing profit.[77]

c. *Beneficial owners.* Where a settlor or trustee has a pecuniary interest in the trust holdings, beneficial ownership would be attributed to the settlor or trustee, just as to each other person with a pecuniary interest. Such situations are listed in proposed Rule 16a–5(a)(3) and current rule 16a–8(a).[78] There may be other situations where a settlor or trustee would have a pecuniary interest therefore, the proposed rule is not intended to be exclusive.

d. *Remote interests.* In contrast to the situations mentioned above, where additional persons are deemed beneficial owners of the trust holdings, there are situations where a beneficiary's pecuniary interest in a portfolio of securities held by a trust is so remote that attribution of beneficial ownership to the beneficiary is inappropriate. Proposed Rule 16a–5(d) would retain the exemptions for remote interests contained in current Rule 16a–8(g),[79] with one exception. The Commission proposes to delete the exemption for a business trust with over 25 beneficiaries because these entities operate similarly to a corporation and different treatment appears inappropriate.[80]

The proposed rule would exempt remainder interests in trusts as being too remote to convey beneficial ownership. This would be accomplished by redesignating and simplifying Rule 16a–8(f).[81] Whereas the current rule addresses only beneficial ownership for purposes of ten percent holder analysis, the proposed rule would expand the exemption for all purposes. The proposal would not exempt acquisitions of securities by a holder of a remainder interest upon the death of the prior beneficiary. However, comment is solicited as to whether such an exemption is appropriate and whether acquisitions upon the termination of trusts should be exempted under other specified circumstances when not predictable by or under the control of the remainder holder.

e. *Intra-trust exemption.* Current Rule 16a–8(b) provides a dual exemption for intra-trust transactions.[82] First, an exemption is provided for settlors or beneficiaries of a trust if less than 20 percent of the market value of the trust (as determined at the end of the preceding fiscal year) consists of the issuer's equity securities. Additionally, an exemption is provided for

---

[73] 17 CFR 240.16a–3. The language of the proposal is identical to the current rule, except that the last clause was added.

[74] 17 CFR 240.16a–8(c). The Rule would be renumbered Rule 16a–5(a)(1), and the language would be amended to conform to the statutory standard of more than ten percent beneficial ownership.

[75] *See* Proposed Rule 16a–5(a)(2).

[76] This is in accord with current practice. *See* Rule 16a–8(a)(2) [17 CFR 240.16a–8(a)(2)]. *See also* proposed Rule 16a–8; Section III.A.5.e., *infra.*

[77] For example, if a beneficiary directs the trustee to buy 1,000 shares of stock, the beneficiary would report (and be responsible for any short-swing profits derived from) his share of the securities purchased.

[78] 17 CFR 240.16a–8(a).

[79] 17 CFR 240.16a–8(g).

[80] *See* 17 CFR 240.16a–8(g)(4).

[81] 17 CFR 240.16a–8(f).

[82] 17 CFR 240.16a–8(b).

transactions made without prior approval of the insider.

Proposed Rule 16a–8 would eliminate the Rule 16a–8(b) exemption for trusts with less than 20 percent of their market value in securities of the registrant. The 20 percent ceiling is not consistent with the purposes underlying section 16, because it permits settlors and beneficiaries total discretion. In recent years there has been an increase in the number of plans in trust form that provide insiders with a choice of investment vehicles (such as company stock, government securities, and mutual funds) within the same plan. The company stock portion of the plan may account for less than 20 percent of the value securities in the trust, but the determination to move funds into or out of company stock is an investment decision that could be made while in possession of material non-public information and result in significant profits.

Unlike the 20 percent of market value exemption, the Commission would retain the Rule 16a–8(b) exemption for intra-trust transactions made without the prior approval of the insider. Where an insider does not direct or approve a transaction, there is a commensurate lack of opportunity to abuse inside information. To clarify the intended result, the proposed Rule would add the words "or direction" after the words "prior approval." Comment is solicited as to whether the proposed exemption should be further conditioned upon a beneficiary's lack of consultation with the trustee concerning the transaction.

B. How and When To Report

Proposed Rule 16a–3 would combine all current rules that state how, what, when, and where to file. As discussed below, there are three significant changes from the current rules: (1) Insiders would be required to forward a copy of each filing to the issuer; (2) reporting of exempt transactions would be deferred; and (3) a new annual filing requirement would be added.

1. Copies to Issuer

Proposed Rule 16a–3(e) would require insiders to forward copies of Forms 3, 4 and 5 to the issuer's corporate secretary or other person designated to receive such reports at the same time that a report is forwarded to the Commission for filing.[83] This new requirement would be added to encourage compliance with the reporting requirements of section 16(a). It would enable issuers to monitor filings more effectively and to assist insiders in meeting their reporting obligations. Comment is solicited on whether the rule should specify the method of furnishing this copy (*e.g.*, by delivery at the issuer's offices, by registered or certified mail, or by first class mail) or require that the copy be furnished by a means reasonably calculated to reach the issuer by the date on which the Form 3, 4 or 5 is due at the Commission.

2. Reporting Exclusions

Under the current rules, some transactions (such as intra-trust transactions) are exempted from reporting, by virtue of a rule pursuant to section 16(a), and thus from the short-swing profit recovery provisions of section 16(b). In contrast, other types of transactions (such as employee benefit plan awards) are exempted from section 16(b) short-swing profit recovery but must be reported at the same time as is required for a non-exempt transaction. The proposed rules would change the current dichotomy between reportable and non-reportable transactions to a three-part classification: transactions exempt from section 16, transactions required to be reported on a current basis, and transactions required to be reported in an annual filing.

Certain transactions are beyond the control of the insider or are part of the ordinary course of a legitimate business. Where the disclosure of such transactions would not further the purposes of section 16(a)—to provide shareholders with a mechanism to monitor insider transactions for possible short-swing profit recovery, and to provide investors with a possible indication of the insider's view concerning the prospects of the company—it is appropriate to exclude them from section 16(a) reporting. The proposed rules would contain five such exclusions: (1) A temporary 12 month exclusion for fiduciaries that are liquidating estates;[84] (2) transactions involving remote and indirect interests, such as remainder interests in trusts, indirect interests in a portfolio of securities held by designated companies or pension plans;[85] (3) transactions by an underwriter relating to a distribution of securities;[86] (4) intra-trust transactions conducted without the prior approval of the insider;[87] and (5) odd-lot trades by odd-lot dealers.[88]

The first exclusion relates to fiduciaries such as executors and trustees in bankruptcy. Trades by these persons, where conducted to liquidate an estate holding ten percent of a class of equity securities, will in effect end insider status. They perform a useful service for purposes of probate. Generally, requiring reports of such trades would serve no section 16 purpose.

The same is true for remote interests. For example, disclosure of the fact that an insider owns shares in a mutual fund that holds some stock of the insider's company serves no section 16 purpose because the transactions do not reflect the insider's view of the company's prospects and are not likely to involve abuse of inside information. It is not the insider who makes the investment decision. The same is true for contingent interests and holdings in retirement plans.

Distributions by underwriters and selling group dealers would be excluded for reasons similar to those supporting exclusion of transactions by liquidating agents. Underwriters and selling group dealers are conduits for securities in a distribution and their ownership is generally brief. Although they may have access to inside information in some cases, their market activity generally is constrained by other rules.[89] As long as they act in those capacities, rather than as investors, there is no need for a report.

Insiders that are beneficiaries of a trust sometimes have little or no control over transactions conducted by the trustee, but could be subjected to short-swing profit recovery because of the trustee's trading decisions. Where the insider has no prior opportunity to approve or direct the transactions, reporting is not necessary, and no liability is appropriate. As with the current rule, the exemption would apply

[83] Such a filing requirement is similar to other Exchange Act rules requiring copies of forms to be sent to the registrant. *E.g.*, Rules 13d–1(a), 13d–2(a), and 14d–3(a)(2) [17 CFR 240.13d–1(a); 17 CFR 240.13d–2(a); 17 CFR 240.14d–3(a)(2)].

[84] Proposed Rule 16a–5(b) would retain, with minor language changes, the exemption contained in current Rule 16a–4 [17 CFR 240.16a–4].

[85] Proposed Rule 16a–5(d) would retain the beneficial ownership exclusions of current Rule 16a–8 (f) and (g). *See* Section III.A.5.d., *supra*.

[86] Proposed Rule 16a–7 would retain the exemption of current Rule 16b–2 [17 CFR 240.16b–2], but would delete the requirement that insider underwriters participate equally with non-insider underwriters.

[87] Proposed Rule 16a–8 would retain part of the exemption contained in current Rule 16a–8(b). *See* Section III.A.5.e., *supra*.

[88] Proposed Rule 16a–9 would retain current Rule 16a–5 [17 CFR 240.16a–5] without change. An "odd-lot" is generally a quantity of stock less than 100 shares.

[89] *See, e.g.*, Rule 10b–6 [17 CFR 240.10b–6]. Note that the term "distribution" has different meanings under sections 10 and 16.

to only intra-trust transactions and not to distributions from a trust.

Finally, the reporting exclusion for odd-lot dealers would be retained, because odd-lot prices are tied to the market price of round lot transactions,[90] and odd-lot dealers may engage in hundreds of trades in one day. Disclosure would be both time-consuming and unnecessary for shareholders and investors.

Current Rule 16a–11[91] provides a reporting exclusion for Dividend Reinvestment and Interest Plans ("DRIPs"). The provisions dealing with DRIPs would be moved to proposed Rule 16b–9 and the reporting exclusion would no longer be provided. While DRIPs generally are unlikely vehicles for abuse, shareholders and investors have an interest in monitoring insiders' total holdings. Reporting on an annual basis, as proposed, would not be unduly burdensome.

3. Reported Transactions

Under the present reporting scheme, virtually all transactions not exempted under section 16(a) must be reported in a current manner, regardless of whether the trades are exempt from short-swing profit recovery under section 16(b). The only exception is deferred reporting relating to small acquisitions.[92] Reporting of such acquisitions is deferred until the purchases exceed $10,000 or the next regular Form 4 is required to be filed, whichever occurs first.

The Commission proposes to amend the rules to permit annual reporting of transactions exempt from section 16(b) liability, including those involving stock splits, dividends, gifts, and specified small acquisitions. The current report on Form 4 will be reserved for the acquisitions and dispositions that have greater potential either for revealing the insider's assessment of the company or for abuse of inside information.

Proposed Rule 16a–3(f) would require that transactions entitled to annual reporting be reported on a new Form 5, which would be required to be filed on or before the thirtieth day after the end of the issuer's fiscal year. Reporting persons also would be required to disclose on Form 5 all transactions during the fiscal year that should have been, but were not, reported at an earlier time on Form 4, and their total beneficial holdings of equity securities of the issuer as of year end. If there were no reportable transactions during the fiscal year, the form would be submitted with such a notation. In addition to filing the Form 5 with the Commission, the insider would have to provide the report to the designated exchange as well as the issuer.

The small acquisition reporting deferral would be modified to reflect the addition of the annual Form 5 filing. Under that proposal, reporting would be deferred until the earliest of the filing of the next Form 4, the filing of the next Form 5, or the cumulative acquisition in excess of $10,000.

Form 5 would enable interested parties to compare the year-end holdings of reporting persons with their Form 4 reports filed during the year, and to identify and explain discrepancies. The Form would provide a mechanism for reporting events such as gifts and dividends.[93] The annual reporting requirement, as opposed to a reporting exemption, also would provide interested parties with the opportunity to challenge reporting persons' claims to exemptions.

The requirement to file an annual report on holdings on Form 5, regardless of whether the reporting person had traded during the year, should aid compliance with section 16(a) by compelling insiders to review their transactions annually. In addition, the Form 5 filing requirement would enhance the Commission's ability to identify non-reporting insiders.[94]

The proposed filing period, 30 days following the end of the registrant's fiscal year, is intended to provide the issuer with a copy of the report to use in the preparation of its Form 10–K annual report and annual proxy statement. As discussed in section VIII of this Release, the Commission is proposing to require annual disclosure by issuers of those insiders who have been delinquent in compliance with the reporting requirements under section 16(a). The registrant would be entitled to rely upon the disclosures made in Forms 3, 4, and 5 filings. The Commission requests comment on the practicality of the 30 day period to file the Form 5; should it be shorter (*e.g.*, 15 days) or longer (*e.g.*, 45 or 60 days)? If the period were extended, would the issuers still be able to use the forms as the basis for determining insider reporting delinquencies that must be disclosed in the Form 10–K or proxy statement? If not, commenters should address what other obligation of inquiry could be placed on the issuer to document the disclosure required as to delinquent filers.

Several minor changes are also proposed. Paragraphs (a) and (b) of proposed Rule 16a–3 would be almost identical to current paragraphs (a) and (b) of Rule 16a–1. Current Rule 16a–1(a) requires that initial statements of ownership be filed on Form 3 and subsequent changes in beneficial ownership be filed on Form 4. As proposed, new paragraph (a) also would require that an annual statement be filed on Form 5. Current Rule 16a–1(b) states that another Form 3 is not required when a class of equity securities is registered if another class of the issuer's securities already is registered under section 12, or if an insider assumes an additional relationship with the issuer. This rule would be retained.

Proposed Rule 16a–3(c) would be similar to current 16a–1(c). Section 16(a) requires all reports pursuant to the Section to be filed not only with the Commission, but also with any exchange on which the registrant's securities are traded. The current rule permits issuers that are listed on more than one exchange to designate one exchange as the sole exchange to receive copies of its insiders' Forms 3 and 4. No changes are proposed, but the requirement to file reports with exchanges would be extended to Form 5 as well.

Proposed Rule 16a–3(d) would be identical to current Rule 16a–7[95] which requires only a single filing for compliance with sections 16(a), 17(a) of the Public Utility Holding Company Act, and 30(f) of the Investment Company Act.

4. Date of Filing

A new Rule 16a–3(g) is proposed, which would state that, as is currently the case, the date of filing is the date on which a Form 3, 4 or 5 is received at the Commission,[96] but add a proviso that would in some cases permit reliance on having transmitted the filing to the Commission. The proviso would deem a Form timely filed, even if not received by the due date, if the filer established that the Form was transmitted on or before the due date by first class mail or equally prompt means. The burden of proof would be on the filer. This change

[90] A round lot is generally 100 shares of stock.

[91] 17 CFR 240.16a–11.

[92] As modified, the reporting deferral for small acquisitions in current Rule 16a–9 [17 CFR 240.16a–9] would be retained as proposed Rule 16a–6. This rule is not an exemption from Section 16(b) liability; thus, it is more appropriate to place the rule under section 16(a).

[93] Stock splits and stock dividends are not generally viewed as purchases in that there is no change in the percentage of ownership. Nonetheless, the increase in the number of shares needs to be explained.

[94] *See* Section VIII, *infra*, for a discussion of section 16(a) compliance.

[95] 17 CFR 240.16a–7.

[96] *See* Exchange Act Rule 0–3 [17 CFR 240.0–3].

would make it less likely that insiders be in non-compliance with the reporting requirements as a result of delays in the mail. It also would provide a small amount of additional time for insiders to prepare their filings, as the mailing could take place on the due date. Comment is solicited on this approach.

IV. Derivative Securities

Much of the current treatment of derivative securities under section 16 has been left to court interpretation, and the results have been inconsistent. The proposed rules are intended to provide a comprehensive framework for the treatment of derivative securities and specifically address a number of common interpretive issues. Under the proposal, the Commission would treat derivative securities as indirect ownership of the underlying equity securities.

Derivative securities would be defined in proposed Rule 16a–1(c) to include options,[97] warrants, stock appreciation rights ("SARs"), convertible securities, and similar rights related to an equity security. As proposed, the definition of derivative securities excludes securities issued pursuant to an employee benefit plan qualifying under Rule 16b–3 that must be settled in cash ("cash-only"), all broad-based index options, and broadbased index futures. Transactions involving such instruments thus would not be subject to section 16(a) or (b).

Cash-only derivative securities that are not standardized and are awarded as part of an employee benefit plan are similar to cash bonuses, rather than equity securities. The Commission solicits comment on whether derivative securities that provide a choice between cash or stock should likewise be excluded from section 16, if the insider does not in fact choose which form of compensation to receive.

Broad-based index options and index futures are not susceptible to the types of abuses addressed by section 16.[98] Such options and futures relate to a large number of component securities. As a result, the interest in any one component security is so small that the holder of the option or future should not be deemed the beneficial owner of the component securities for Section 16 purposes. The exemption, however, would not extend to options on narrow-based indices where one issuer may account for a substantial amount of the index weighing and, therefore, a movement in the price of a component stock would result in a similar move in the index.[99]

In addition to a proposed definition of derivative security, the Commission proposes to define the terms "call equivalent position" and "put equivalent position." Proposed Rule 16a-1(d) would define call equivalent position to mean a derivative security position that increases in value as the underlying equity security increases in value (*e.g.* long call options, long warrants, long convertible securities, and short put options). Proposed Rule 16a-1(e) would define put equivalent position to mean a derivative security position that increases in value as the underlying equity security decreases in value (*e.g.* long put options and short call options).

A. Reporting

1. Acquisitions

The current rules require that an insider file a Form 4 to report an acquisition of securities when derivative securities held by that person become exercisable.[100] Proposed Rule 16a-4(a) would change the current reporting scheme by requiring that derivative securities be reported upon their grant or acquisition, regardless of when they are exercisable. Only the derivative security would be reported, rather than the underlying security to which it relates. Thus, the purchase for purposes of section 16 would occur at grant or acquisition.[101]

The Commission is proposing this change for three reasons. First, the investment is made when the derivative securities are acquired, and it is possible to realize a profit from derivative securities that are transferable even if not yet exercisable.[102] The insiders is at risk of price fluctuation from the time of acquisition, even before the derivative security becomes exercisable. If the value of the underlying stock increases, the value of a call equivalent position increases and that of a put equivalent position decreases, notwithstanding the fact that the derivative security may not yet be exercisable. Under the current rules, an insider could both purchase and sell a derivative security that is not yet exercisable, realize a short-swing profit, and yet never have to report the transactions (nor be responsible for short-swing profits pursuant to section 16(b)).

Second, under the current scheme, profit recovery can include long-term appreciation from holding non-exercisable derivative securities. By calculating the holding period as beginning on the date of acquisition or disposition, rather than the date of exercise, this will no longer be the case.[103]

The third benefit of changing the period is that it is more likely that reporting persons will remember to report the transaction at acquisition, while they may forget to do so when a derivative security becomes exercisable days, months, or years later. Thus, the proposed change should aid section 16(a) compliance by decreasing the number of reporting delinquencies due to oversight.

2. Exercises and Conversions

Presently, all exercises and conversions of derivative securities must be reported on a current basis on Form 4, as they are viewed as dispositions of the derivative securities and acquisitions of the underlying securities. Under proposed rule 16a-4(b), an exercise or conversion of or against a call equivalent position would continue to be treated by the person who had held that position as a closing of the derivative security and an acquisition of the underlying security for reporting purposes. An exercise of or against a put equivalent position would be treated by the person who had held that position as a closing of the derivative security and a disposition of the underlying security. Any exercise or conversion exempted from short-swing profit liability by operation of proposed rule 16b-6,[104] however, could be reported on an annual basis pursuant to proposed Rule 16a-3(f). This is consistent with the proposed approach of permitting exemption transactions to be reported annually. Any exercise or conversion not exempted from section 16(b) would be required to be reported currently on Form 4. Comment is solicited as to

---

[97] Both standardized and non-standardized options would be included.

[98] The Commission determines whether an index is broad or narrow-based when it approves the option for trading. *See, e.g.*, Exchange Act Release No. 21032 (June 8, 1984) [49 FR 24964].

[99] Under the Commodities Exchange Act section 2(a)(1)(B) [7 U.S.C. 2a(ii) (1982)], futures on such narrow-based indices are effectively precluded. *See* Exchange Act Release No. 20578 (Jan. 18, 1984) [49 FR 2884].

[100] *See* 17 CFR 240.16a–6(a).

[101] This would be true for all options, including employer granted options. No court has deemed an employer grant the equivalent of a purchase. Most employer granted options, however, would be exempt acquisitions, if granted pursuant to a plan meeting the conditions of rule 16b-3.

[102] For example, some warrants may not be exercisable for a year after issue, yet independent markets may develop for trading these warrants.

[103] For example, under the current rules, a person may receive an option that is not exercisable for five years. During that five years, the value of the option may increase significantly, yet currently it will not be deemed to be purchased until it becomes exercisable. As a result, another six month holding period is required before sale of the securities to avoid short-swing profit recovery.

[104] *See* discussion in Section IV.B.2, *infra*.

whether an exercise or conversion of a derivative security should be reported currently on a Form 4, even though the acquisition or disposition of underlying stock may be exempt from section 16(b).

3. Dispositions

Currently, dispositions of derivative securities through sale, exercise, conversion, expiration, surrender, or cancellation are considered reportable events.[105] The writing of an option constitutes a sale. Under proposed Rule 16a-4(a), dispositions of derivative securities that involve sales would continue to be reported on a current basis on Form 4. Dispositions not involving sales (*e.g.*, exercises, conversions, gifts, and expirations of long derivative securities positions) would be exempted from section 16(b)[106] and would be eligible for annual reporting on Form 5. Expirations of long derivative securities positions cannot result in a short-swing profit and so are impliedly exempt from section 16(b); thus, they are reported on Form 5. Expirations of short derivative securities positions, however, may result in short-swing profit and should be reported on Form 4.

4. Put Options

Unlike the current rules under section 16, the proposed rules specifically address the treatment of put options. The acquisition of a put option would be reported on Form 4 as the acquisition of a derivative security. For purposes of sections 16(b) and (c), however, it would also be treated as the sale of the underlying security. When the exercise of a put option is exempt from section 16(b) under proposed Rule 16b-6(b), the transaction would be reported on the annual Form 5; otherwise, it would be reported currently on Form 4. The cancellation of expiration of a long put option would be reported in a manner similar to the cancellation or expiration of a long call option.[107] The writing of a put option would be treated as a call equivalent position (just as the writing of a call option would be treated as a put equivalent position).

B. Short-Swing Profit Recovery

The current rules under section 16 do not address the issue of section 16(b) liability for transactions in derivative securities. When the Commission adopted current Rule 16a-2(b), it specifically declined to decide whether transactions in derivative securities could give rise to an action for short-swing profit recovery. It chose instead to leave the decision to the courts.[108] The courts, however, have not provided definitive guidance in the area. Some cases have found that an option does not confer beneficial ownership of the underlying security for purposes of section 16(b) until exercised, unless the down payment is so large that an exercise is compelled economically,[109] or unless the option conveys significant rights of ownership (such as voting power).[110] In contrast, other cases have stated that derivative securities do convey beneficial ownership of the underlying security.[111]

1. Acquisitions

The proposed rules would treat the acquisition or disposition of a derivative security as a transaction in the underlying security for section 16(b) purposes. Thus, for example, a purchase of a call option could be matched with a sale of convertible preferred stock, if they both shared the same class of underlying equity security. In general, the acquisition or disposition of the underlying security through exercise would be viewed as an exempt transaction, as discussed below.

The determination as to whether a transaction should be subject to short-swing profit recovery is based upon profit potential and the opportunity for abuse of inside information. Derivative securities clearly provide such opportunity for abuse and have figured largely in a number of the Commission's insider trading cases.[112] Indeed, the opportunity for profit is usually magnified through the use of derivative securities because the leverage involved allows a substantially greater profit opportunity.

There is little economic difference between the potential for abuse of inside information by the combined trading of underlying securities and derivative securities, as opposed to trading just one type of security, and the distinction drawn in some cases does not further the purposes of section 16.[113] For example, an insider might purchase a call option, instead of stock, to take advantage of favorable inside information. If the insider were to sell stock within six months, a short-swing profit would be realized. Under the current rules, it is uncertain that a court would order recovery of such profit.

2. Exercises and Conversions

Currently, exercises and conversions of derivative securities are treated differently, for purposes of section 16(b), even though they are substantially similar in effect. In the case of call equivalent positions, both exercises and conversations entail a closing of a derivative security and a simultaneous acquisition of the underlying security. Exercises of put equivalent positions entail a disposition of a derivative security and a simultaneous disposition of the underlying security. An exercise generally is accompanied by a payment of cash equal to the strike price, whereas a conversion usually does not involve a cash payment. While current case law exempts the disposition of the derivative security from section 16(b) for both exercises and conversions,[114] the acquisition of the underlying security has been treated differently. Apparently because there generally is no cash paid in a conversion, the courts have treated the acquisition of the underlying security through a conversion as an exempt transaction, while exercise of an option is treated as a non-exempt acquisition.[115]

The current rules encourage insiders to change the form, rather than the substance, of transactions to avoid short-swing profit liability. A few examples illustrate the problem:

(1) Insider A is granted a stock option pursuant to an employee benefit plan of the registrant, while Insider B is granted stock (rather than an option) pursuant to another benefit plan of the registrant. Five years later, both insiders decide it is time to sell their stock for personal

[111] *See Gund v. First Florida Banks, Inc.*, 726 F.2d 682 (11th Cir. 1984) (sale of convertible debentures may be matched with purchase of underlying stock); *Seinfeld v. Hospital Corp. of America*, 685 F.Supp. 1057 (N.D. Ill. 1988) (acquisition of option should be matched with sale of underlying stock).

[112] A number of cases brought by the Commission for insider trading have involved derivative securities. *See, e.g., SEC v. Tome*, 833 F.2d 1086 (2d Cir. 1987); *SEC v. Collier*, Litigation Release No. 11817 (July 26, 1988); *SEC v. Certain Unknown Purchasers, et al.*, Litigation Release No. 11012 (Feb. 26, 1986).

[113] *See, e.g., Morales v. Mapco, Inc.*, 541 F.2d 233 (10th Cir. 1976); *Silverman v. Landa*, 306 F.2d 422 (2d Cir. 1962). These judicial decisions did not match a transaction in a derivative security with a transaction in the underlying security.

[114] *See, e.g., Blau v. Lamb*, 363 F.2d 507 (2d Cir. 1966), *cert. denied*, 385 U.S. 1002 (1967) (conversions); *Blau v. Ogsbury*, 210 F.2d 426 (2d Cir. 1954) (exercises).

[115] *E.g., Blau v. Lamb, supra; Ferraiolo v. Newman*, 259 F.2d 342 (6th Cir. 1958), *cert. denied*, 359 U.S. 927 (1959). Current Rule 16b–9 [17 CFR 240.16b–9] exempts only conversions where 15 percent or less of the market value of the securities acquired is paid as part of the exercise of the derivative security.

reasons. Insider A exercises the option and sells the stock received from the plan. Insider A is subject to short-swing profit recovery [116] and may be compelled to disgorge much of the profit derived from the five year accretion in value of the underlying stock. Insider B, absent a separate purchase of stock, is not subject to shortswing profit recovery and may keep the resulting profit.

(2) An insider owns 1000 shares of stock and decides to purchase a call option that is exercisable into 100 shares of stock. Two months later, the insider sells 200 shares of stock. One month after the sale, the insider decides to exercise the call option as it is about to expire. The insider exercises the option and keeps the 100 shares received. This insider might be found responsible for two short-swing trades of 100 shares each, even though the insider actually purchased only 100 shares of stock.[117] Thus, the insider might be subjected to double recovery because the current rules would find two purchases of an equity security from one derivative security.[118]

(3) Two insiders purchase warrants and seven months later want to realize the profit. The insider who exercises the warrant and sells the underlying stock that is received, is subject to short-swing profit recovery. The insider who sells the warrant to someone else (for the same amount of profit) is not subject to short-swing profit recovery.[119]

The Commission proposes a significant departure from most of the current case law concerning exercises and conversions. Proposed Rule 16b–6(b) would treat exercises and conversions identically, since they operate in a like manner.[120] Both exercises and conversions of in-the-money [121] derivative securities would be deemed purchases of the underlying securities exempt from section 16(b), because they merely change from indirect to direct the nature of the beneficial ownership in the underlying stock, without causing any change in the potential for profit. Exempting the conversion and exercise also appears appropriate since any profit is realized at the time the underlying securities are sold for cash or its equivalent.[122]

The proposed rules would resolve each of the problems illustrated above. Although there would be two purchases (a purchase at acquisition or grant of the derivative security and a purchase at exercise) for reporting purposes, the purchase incident to an exercise of an in-the-money derivative security would be exempt from the short-swing profit recovery provisions of section 16(b).[123] An insider could purchase a call option, exercise it at any time, and sell the underlying stock without being subject to recovery, if the sale occurred at least six months after the initial purchase of the call option.

Current Rule 16b–6 was intended to limit the profit recoverable from the exercise of a long-term option. It provides that a price not lower than the lowest stock price within six months (before or after) the date of sale shall be deemed the purchase price. Thus, an insider exercising an option held over six months would have the purchase price equal to either the strike price or the lowest stock price within six months of the sale, whichever resulted in the least profit. The proposed exemption for exercises renders current Rule 16b–6 unnecessary. Accordingly, current Rule 16b–6 is proposed to be rescinded.

As drafted, proposed Rule 16b–6(b) would not exempt exercises of out-of-the-money derivative securities. There appear to be few, if any, legitimate reasons for such exercises. Convertible securities, however, would not be subject to this limitation because most convertible securities trade at a premium over the underlying securities and otherwise would be viewed as being out-of-the-money.

The Commission requests comment on the appropriateness of extending the exemption to include out-of-the-money derivative securities. Those favoring such an extension should address specifically those instances where such exercises could be legitimately expected. The Commission requests comment on any additional limitations on the exemption that would be appropriate.

3. Dispositions

a. *Background.* As discussed above, acquisitions of derivative securities would be deemed to convey beneficial ownership in the underlying securities. A decrease in or liquidation of a call equivalent position could be matched with either an acquisition of the underlying security or an increased put equivalent position exercisable for the same underlying equity security.[124]

There are several different types of dispositions of derivative securities: sales, exercises or conversions, expirations, and cancellations. As proposed, if an insider sells a derivative security such as a call option, warrant, or convertible security, that transaction could be matched with a purchase of another derivative or the underlying security for short-swing liability. If a derivative security were disposed of through an exercise or conversion, the disposition of the derivative security generally would be exempt from short-swing profit recovery by operation of proposed Rule 16b–6(b). In most cases, expirations of a long position in a derivative instrument cannot result in short-swing profits. However, in the case of an expiration of a short option position, the expiration would be treated as the purchase of the option because there is short-swing profit potential in such a case.[125] Cancellations generally would not be considered sales where the option issuer paid no compensation to the holder. The issuer's replacement of the cancelled security with a comparable derivative security would be viewed as a redemption of the old

---

[116] The exercise of the option would be deemed a purchase of the underlying stock, followed by an immediate sale of that same stock.

[117] The purchase of the option might be matched with the sale of the first 100 shares (*see Gund v. First Florida Banks, Inc.*, 726 F.2d 682 (11th Cir. 1984)), and the exercise of the option would be deemed another purchase, but of the underlying stock that could be matched with the other 100 shares sold.

[118] While a court has yet to address the double recovery issue, it is doubtful that such a recovery would be permitted. The example, however, illustrates the problem with the current scheme.

[119] *See Portnoy v. Seligman & Latz, Inc.*, 516 F. Supp. 1188 (S.D.NY 1981)

[120] *See Seinfeld v. Hospital Corp. of America, supra*, where the court stated: "The courts have strayed because they have viewed the intervening event—the exercise of the option for stock—as an independent purchase. This is incorrect. Because the option holder already owns the right to purchase the stock at a fixed price, his decision to actually exercise the option does not provide him the ability to earn insider profits and thus does not constitute a section (b) 'purchase'." 685 F. Supp. at 1066.

[121] When the exercise price for a derivative security is less attractive than the market price (higher in the case of call options or lower in the case of put options), the option is considered out-of-the-money. If the exercise price and market price are the same, the option would be considered at-the-money and if the exercise price is more attractive than the market price, the option would be considered in-the-money.

[122] The Internal Revenue Service, in certain cases, considers an exercise as a taxable event (*see* IRC §§ 83(b), 421–425 (1986)); however, the purposes of section 16 are different from the purposes of the tax code. *See Greene v. Dietz*, 247 F.2d 669, 694 upon securities transactions is irrelevant to the Commission's determination to exempt a type of transaction).

[123] Two purchases, one of the option and one of the underlying security, would be reported so that shareholders could monitor the insider's actual holdings, even if the reporting was deferred to the annual Form 5.

[124] This would include derivative securities that are exercisable or convertible into other derivative securities that are, in turn, exercisable for the same underlying security.

[125] For example, an insider writes—that is, sells—a standardized call option for $2 per share. Three months later it expires worthless and the insider profits the full $2 per share.

security and issuance of a new security and would not be exempt, unless satisfying the exemption for redemptions in proposed Rule 16b–4.[126] An extension of a derivative security that is about to expire would be viewed similarly. Comment is solicited on whether the proposed treatment of extensions of derivative instruments would affect the considerations under which such extensions commonly are made.

A grant of an option may be viewed as a sale of the derivative security by the writer of the option, if consideration is received for the option. The courts have stated generally that writing an option is not a sale unless an exercise of the option is compelled economically through a sufficiently large downpayment.[127] However, that analysis has evolved in the context of viewing the exercise of options as an acquisition or disposition subject to section 16(b) liability. Given the theory underlying the proposed rules, that transactions in the derivative securities generally should be viewed for Section 16 purposes as proxies for transactions in the underlying securities, the proposed rules would treat the writing of a put or call option as an acquisition or disposition of the underlying security subject to section 16(b).

b. *Determination of profit.* As a result of the proposed treatment of derivative securities, there will be short-swing purchases and sales involving both derivative securities and underlying securities or two different types of derivative securities. For ease of administration, the Commission is proposing alternative rules to assist courts in calculating short-swing profits in such cases.

The Commission recognizes that the measurement of short-swing profits in transactions involving derivative securities can be a source of substantial confusion and complexity in actions brought pursuant to section 16(b). The difficulty in assessing short-swing profits in transactions involving derivative securities arises from two distinct sources.

First, section 16(b) of the Act specifically provides for recovery of short-swing profits "realized" by an insider "from any purchase or sale, or sale and purchase, of any equity security of such issuer." Thus, if an insider realizes profits from a transaction involving derivative securities, but that profit is not attributable to changes in the price of the underlying equity, then it can be argued that those short-swing profits should not be subject to recovery under section 16(b).

For example, suppose an insider purchases a convertible instrument on January 1 when the price of the underlying security is $50 per share. The price of the underlying equity remains at $50 for all of January. By February 1, however, interest rates decline sharply and the insider sells the convertible at a profit. The profit realized by the insider in this transaction appears to be attributable to changes in interest rates, and not to changes in equity prices that could be related to the sort of insider abuse that Congress intended to prevent through the adoption of section 16(b). Accordingly, it could be argued that profit recovery techniques applied in transactions involving derivative securities should ideally separate profits attributable to changes in the price of the underlying equity from profits attributable to changes in interest rates or other factors.

The second source of difficulty in calculating damages in short-swing transactions involving derivative securities arises from the inherent complexity of these instruments. For example, the value of a call option depends on the price of the underlying stock, the exercise price of the option, prevailing interest rates, the option's time to expiration, and the volatility of the underlying equity.[128] Even if there is no change in the price or volatility of the underlying equity, the value of the option will change simply because the time to expiration changes or because interest rates change. Instruments that are more complex than a straightforward call option will be correspondingly more difficult to value. For example, the value of convertible bonds and convertible preferred stocks contains a fixed income component that is priced like a bond and a warrant or option on the underlying equity.[129] It could be argued that a short-swing profit rule should focus on the profits earned from the warrant or optionlike component of such an instrument and separate out profits attributable to changes in the value of the bond-like component.

Substantial progress has been made in the valuaiton of options and derivative instruments, and techniques such as the Black-Scholes option valuation formula and its progeny are now widely used by traders in the marketplace.[130] Indeed, many traders who rely on these rather intricate mathematical formulas are not mathematically sophisticated and "are not for the most part trained in the formula's mathematical derivation; they just use a specially programmed calculator or set of tables to find the value of [an] option."[131]

The Commission recognizes, however, that the interests of precision must be balanced against the costs of computation. The interests of justice and Congress' purpose in adopting section 16(b) will not be served by turning every case involving derivative instruments into a battle of experts over competing models of option valuation. Accordingly, the Commission seeks to provide certain benchmarks or rules of thumb to be applied in short-swing transactions involving derivative securities. These benchmarks, or rules of thumb, are not meant to preclude reliance on more detailed evaluation techniques when circumstances warrant.

Under Alternative A, proposed Rule 16b–6(d)(1) would provide a benchmark measure of recovery in relatively simple transactions involving purchases and sales of the same derivative instrument (*e.g.*, the purchase and sale of call options with identical strike prices and expiration dates—the opening and closing of a call option position—or the purchase and sale of the same series of convertible debentures). Under these circumstances, the actual prices realized are likely to provide reasonable benchmarks for a seciton 16(b) short-swing profits calculation. Changes in valuation due to change sin interest rates, the passage of time, or other factors are likely to be dominated by changes in valuation due to changes in the price or volatility of the underlying equity—factors that Congress intended to address through adoption of section 16(b). In circumstances where this benchmark is likely to misstate the short-swing profits attributable to changes in the price or volatility of the underlying equity, proposed Rule 16b–6(d)(2) would provide for the application of more precise measurement techniques. The Commission requests comment on the appropriateness of this

---

[126] In many cases, this type of stock swap will not result in a short-swing profit because the purchase and sale will take place at the same time. Further, if the swap was made pursuant to an employee benefit plan satisfying Rule 16b-3, the acquisition of the new security would be exempt.

proposed benchmark and suggestions regarding other suitable approaches.

Proposed Rule 16b–6(d)(2) of Alternative A would address more complicated situations involving purchases and sales of derivative securities that do not have identical financial characteristics, as well as combined purchases and sales of derivative securities and underlying securities. For example, an insider may but call options and then sell convertible debentures, or buy put options and then buy the underlying equity. Rule 16b–6(d)(2) sets the difference in price of the underlying security on the relevant trade dates as the maximum potential recovery. For example, if on January 1 an insider buys call options covering 1,000 shares when the underlying equity is trading at $50 per share and on February 1 sells debentures convertible into 500 shares when the underlying equity is trading at $60 per share, the maximum recovery in this situation would be $5,000 (the $10 per share change in valuation of the underlying equity between January 1 and February 1 multiplied by the 500 share equivalents purchased and then sold in the derivative securitites transactions).

This measure of maximum recovery is most likely to approximate actual short swing profits in situations in which the purchases and sales involve derivative instruments that are deep in the money. This maximum recovery measure is likely to overstate short swing profits when at least one of the instruments purchased or sold was out of the money at the time of the transaction. This measure of maximum recovery does, however, provide a reasonable ceiling on profit recovery because, absent sharp changes in the volatility of the underlying security, the value of the option component of a derivative security will increase or decrease by no more than $1 for every $1 change in the value of the underlying equity.

Proposed Rule 16b–6(d)(2) also provides a rule of thumb for approximating short-swing profits in situations involving short-swing purchases or sales of dissimilar derivative securities. This rule of thumb would approximate short-swing profits by calculating the profits that would have been realized had the transaction involved only the security that was actually purchased or only the security that was actually sold. Thus, consider the previous example of a purchase of a call option covering 1,000 shares followed by the sale of debentures convertible into 500 shares. The short-swing profits realized in this transaction could be approximated either by (1) calculating the price that would have been received on February 1 had the insider sold call options covering 500 shares at the same strike price as the options bought on January 1, and matching those proceeds against the January 1 purchase, or (2) calculating the price that would have been paid on January 1 had the insider purchased convertible debentures covering 500 shares and matching that acquisition cost against the February 1 sale. In effect, this rule of thumb translates the transaction that actually occurred into matched transactions in identical derivative securities. The rule of thumb then applies the valuation method proposed in Rule 16b–(d)(1) to the reconstructed transaction.

The Commission requests comment on the appropriateness of the benchmarks and rules of thumb contained in proposed Rule 16b–6(d)(2) of Alternative A and specifically seeks discussion of situations in which these guidelines may be inappropriate or should be modified, as well as suggestions for further clarification that should be provided by the rule. The Commission also requests comment providing suggestions for other benchmarks or rules of thumb that can usefully be employed in situations involving purchases and sales of derivative instruments with dissimilar characteristics, or combined transactions involving both derivative securities and underlying securities.

The Commission recognizes, however, that benchmarks and rules of thumb are not appropriate in all situations. Accordingly, proposed Rule 16b–6(d)(3) of Alternative A would provide that, to the extent practical and necessary in order to provide an equitable measure of recovery, short-swing profits may be calculated through the application of more advanced valuation techniques, including the Black-Scholes model and its progeny, that specifically adjust the valuation of derivative securities for changes in a wide variety of factors. The Commission requests comment on the application of these valuation techniques in actions arising under section 16(b), whether more precise guidance regarding the application of these techniques can or should be provided, and any other matters relating to the method of calculating recoveries under section 16(b) for transactions involving derivative instruments.

As an alterative to the above measure of recovery, the Commission proposes a simple measure of recovery to cover all types of deriviate securities, which is to be used in situations involving two different types of securities. Alternative B would define profits based upon the price movement in the underlying security during the short-swing period in question.

The time of day of the transaction is important in determining profit because the price could fluctuate significantly during the day. Thus, if the convertible preferred was purchased in the morning, it is important to ascertain the value of the underlying stock at the same time.[132] If, for example, the underlying stock was always valued at the end of the day, the price could change enough to defeat the purpose of a standarized measure.[133]

While a more complex rule, such as Alternative A, might result in a more precise measure of profit, Alternative B would provide a simple measure of short-swing profit while leaving litigants free to propose and the courts free to adopt alternative measures of recovery.

Commenters should address which alternative rule is preferable. In addition, commenters are requested to address whether the calculation of profit is best left to the evolution of case law before the courts.

4. Put Options

For purposes of section 16(b), a put option would be the mirror image of a call option. Acquisitions of put options would be considered sales of the underlying securities. Thus, a purchase of stock and a purchase of a put option, within six months, would be considered a short-swing transaction, subject to section 16(b). The exercise of a put option would be deemed an exempt disposition of the put option (if the option was in-the-money) and an exempt sale of the underlying securities. Thus, in-the-money put options would be eligible for the exercise exemption of proposed Rule 16b–6(b) and out-of-the-money puts would not. The rationale for the exemption would be the same as for call options, discussed above. Finally, the writing of a put option would be deemed a purchase of the underlying securities, as establishing a call equivalent position.

C. Short Sales

There has been uncertainty concerning the application of the short

[132] This could be done by contacting the exchange or quotation dissemination service. Most securities underlying derivative securities are publicly traded and subject to last sale reporting. *See, e.g.*, 17 CFR 240.9b–1 (standardized options).

[133] For example, an insider could buy stock at $10 per share in the morning, but by the end of the day bad news might send the price down to $7. If the insider were to sell an option one month later when the stock was at $9, a proposed measure based upon closing prices would yield a two dollar short-swing profit, when the insider actually lost one dollar.

sale prohibitions of section 16(c) to derivative securities.[134] In the absence of a rule, there has been only one judicial decision addressing the issue.[135] In that case the court found that the sale of a call option and a put option did not violate Section 16(c) for three reasons: (1) The writing of the option was not viewed as a rule of the underlying stock; (2) the writer of an option cannot control when an option is exercised, which enables the seller to qualify for the good faith "undue inconvenience" exemption of the provision; and (3) the Commission had failed to regulate trading in options. In the 26 years since the case was decided, much has changed. In particular, derivative securities have become more widespread and options are now traded on exchanges in accord with Commission regulations.

The proposed treatment of derivative securities is intended to subject derivative securities to the short sale prohbitions of section 16(c). The potential for abuse is not less when insiders establish put equivalent positions, rather than selling short underlying securities. Indeed, options were instrumental to insiders in the notorious "bear raids" of the early 1930's.[136] A reading of the legislative history indicates the Congress did not want insiders, with access to inside information, speculating in their company's stock by acquiring short positions. Further, Congress did not want insiders to take short positions in conflict with their fiduciary duties, because insiders could use short positions to manipulate a stock price or to profit by a fall in the price of their company's stock. Derivative securities can be used to establish a short position, even where the insider has large stock holdings. The proposed rule thus would ensure that an insider does not have an economic interest in the poor performance of the issuer's stock.

Under the proposal, insiders could establish put equivalent positions as a hedge [137] against underlying stock positions. Proposed Rule 16c–4(a) would permit an insider to conduct these transactions, as long as the securities underlying those derivative securities do not exceed the underlying securities otherwise owned by the insider.[138]

This permits insiders flexibility in trading derivative securities. The exemption would be lost if the insider later sold enough underlying securities that the securities underlying the put equivalent positions exceeded the number of underlying securities otherwise owned.[139]

The proposed rule would permit trading derivative securities against a long underlying security position, but would not permit selling underlying securities short against derivative securities. The prior position is a legitimate conservative hedging strategy, whereas the latter position is more akin to true short selling.

The most abusive investment pools of the early 1930's (that involved short selling) involved short selling of the stock while holding options to protect against a price increase. In each pool mentioned in the legislative history, Congress was quite concerned that the pool insiders would not exercise the option but would instead repurchase the stock in the open market. This practice was viewed as unethical.[140] Based on this Congressional concern, no relief is proposed for short selling against derivative securities. Comment is requested, however, as to whether it is appropriate to differentiate between short selling against derivative securities and trading derivative securities against stock.

V. Employee Benefit Plans

Section 16 can present an obstacle to corporate compensation plans that distribute or confer rights in employer securities. Distributions from such a plan or transactions within the plan are generally deemed to be purchases or sales within the meaning of section 16. However, the Commission, aware that some benefit or retirement plan transactions do not afford an opportunity for abuse of inside information, adopted current Rules 16a-8(b),[141] 16a-8(g)(3), and 16b-3[142] to exempt specified transactions. The first two rules provide an exemption from both reporting and short-swing profit recovery for designated intratrust or intra-plan transactions. In contrast, Rule 16b-3 applies to distributions from a benefit plan and is an exemption from short-swing profit recovery only.

A. Current Rules

Current Rule 16a-8(g)(3) provides an exemption for intra-trust transactions in indirect interests in portfolio securities held by "a pension or retirement plan holding securities of an issuer whose employees generally are the beneficiaries of the plan." The Commission has defined the term "pension or retirement plan" to mean a plan "in which participants generally are not entitled to receive a distribution until their death, retirement or other termination of employment." [143] The exemption is not available to plans with withdrawal provisions unless significant penalties are imposed upon withdrawal.[144] The exemption would be retained under proposed Rule 16a-5(d)(2)(iii).[145] Comment, however, is solicited on whether the exemption should be available only for transactions made without the prior approval or direction of the insider, paralleling proposed Rule 16a-8.

Current Rule 16b-3 provides an exemption for distributions of employer securities from plans that have been approved by shareholders and are administered by disinterested persons. It also permits participants to tender shares of stock to the employer to exercise an option and to cash-out SARs under specified circumstances.

B. Proposed Rules

1. General Scheme

The proposed amendments would effect three major changes to current Rule 16b-3: (1) Deletion of the shareholder approval requirement; (2) increased disinterested administration requirements; and (3) addition of a six-month holding requirement for derivative securities.

2. Plan Awards and Distributions

a. *Shareholder approval.* Availability of current Rule 16b-3 is conditioned on the issuer's securing shareholder approval of the compensation plan and any material amendments to the plan.[146] Compensation plans must be described in the issuer's proxy statement, [147] and shareholder sanction

---

[134] Section 16(c) provides, in part, that it is unlawful for insiders to directly or indirectly sell any equity securities that they do not own or do not deliver within 20 days. There is a good faith exception. Short selling is discussed further in Section VI.D., *infra*.

[135] *Silverman v. Lando*, 306 F.2d 422 (2d Cir. 1962).

[136] The options were granted to the insiders so they would have protection when they sold short. If they were unsuccessful in manipulating the price down and were forced to cover their short sales, they could exercise the options and acquire the necessary stock. *See* Stock Exchange Practices at 51–52.

[137] The term "hedging" means lessening the risk of loss by offsetting the risk of a securities position with an opposite position in a related security.

[138] *See* 17 CFR 240.3b–3 (definition of short sale).

[139] Proposed Rule 16c–4(b).

[140] Stock Exchange Practices at 51–52.

[141] The Rule 16a-8(b) intra-trust transaction exemption applies to trusts generally, but is commonly used for benefit plans. For a discussion of that exemption, see Section III.A.5.e. *supra*.

[142] 17 CFR 240.16b-3.

[143] Release 34–18114 Q. 69 n.86.

[144] *See* Release 34–18114 Qs. 70, 71.

[145] *See* Section III.A.5.d., *supra*.

[146] 17 CFR 240.16b-3(a).

[147] 17 CFR 229.402.

of plan provisions has been viewed as a measure that deters insiders from implementing compensation plans that allow for abuse of inside information.

The shareholder approval requirement has been criticized as unclear, burdensome, and ineffective as a deterrent. The need to determine whether an amendment is material has resulted in a multitude of interpretive requests, many provoked by changes in plans in response to changes in the tax laws.[148]

The proposed rules would delete the requirement for shareholder approval and place greater reliance upon the disinterested administration requirement to assure that opportunities for abuse are minimized. Comment is requested, however, on whether the shareholder approval requirement should be retained or whether there are other mechanisms that provide better safeguards.

b. *Disinterested administration.* Under current Rule 16b-3, decisions regarding participation in and awards under an exempt plan must be made either (1) by a committee, the majority of whom are disinterested persons, or (2) by a pre-established formula.[149]

Under the proposed rule, the definition of "disinterested person" would be amended. Currently, a disinterested administrator is one who is not eligible for participation in any discretionary company plan and has not participated in any such plan for the past year. To be a disinterested administrator under the amended definition, a person could not participate in any discretionary plan of the issuer for the year before the transaction and could not be eligible to participate in any discretionary plan for the three years subsequent to the transaction. The exemption would be lost if an administrator failed to satisfy the conditions of the rule; loss of the exemption would not, however, be retroactive.

Given the multiplicity of plans an issuer frequently has, the Commission requests comment as to whether the rule should prohibit prior and/or future participation only in the plan as to which the person is an administrator.[150] The Commission recognizes the administrative burdens the proposed rule will impose, and requests comment on alternative mechanisms that would serve adequately the purposes of section 16 and be more efficient from the issuer's perspective. The Commission also requests comment on whether the proposed prohibition on subsequent participation would be equally effective if it covered only a shorter period, such as one or two years.

The disinterested administration requirement in proposed Rule 16b-3(b)(1)(i) has been further revised to require an administrator to exercise sole discretion in administering the plan. This is similar to the current requirement in Rule 16b-3(e)(3)(ii) for SARs. Current Rule 16b-3(b) does not have a sole discretion requirement and, thus, the participant is permitted more investment control.

As an alternative, proposed Rule 16b-3(b)(1)(ii) provides that the disinterested administration requirement is satisfied if insiders exercise no control or discretion in awarding securities under any plan in which the administrator participated during the past year or participates in the following three years.[151] In these non-discretionary plans, securities awards are determined automatically by application of a formula. Given the proposed deletion of the shareholder approval requirement, the proposed rule would limit the number of amendments to the formula that could be made to one every six months. Comment is solicited as to whether amendments should be permitted more often if necessary to comport with tax law changes.

c. *Plan limitations.* Current Rule 16b-3(c), [152] which provides that plans must limit dollar and security awards to a fixed amount, would be deleted as unnecessary. The provision was intended to prevent adoption of open-ended plans that could avoid shareholder approval requirements. Since the Commission proposes elimination of the shareholder approval requirement, this safeguard would be unnecessary.

The proposal would add a new requirement that derivative securities be held six months.[153] The change would be added to the definition of "plan" in proposed Rule 16b-3(c)(1)(ii), because this definition already imposes the requirement that securities awarded under a plan must be non-transferable. Because acquisitions of stock upon the exercise or conversion of a derivative security would be exempted under proposed Rule 16b-6(b), as discussed above, absent such a six-month holding requirement, short-term options, warrants, or rights could be used to undermine the purposes of section 16. For example, an acquisition of an option under the rule would be an exempt purchase and the immediate exercise of the option could be an exempt purchase of the underlying securities so that the immediate sale of the underlying stock would not result in a short-swing profit.

d. *Stock Appreciation Rights.* SARs appear in many different forms, but they generally have two common elements: The receipt of cash in tandem with or instead of stock, and a value governed by the market price of an underlying equity security. Current Rule 16b-3(e)[154] provides a safe harbor exemption from Section 16(b) liability for cash settlements of SARs. The safe harbor protects both the settlement for cash and the disposition of the SAR. A safe harbor was deemed necessary for the exercise of SARs to avoid the possibility that the exercise of an SAR would be determined to be a purchase of the underlying security, while the receipt of cash, instead of stock, would be deemed a concurrent sale of that security.[155] Thus, all profit resulting from the exercise of an SAR could be deemed to involve a short-swing profit subject to recovery under section 15(b). An SAR exercised for stock was simply viewed as a non-exempt purchase of securities.

The current safe harbor for cash-settled SARs was crafted with four conditions: (1) Information about the issuer must be current; [156] (2) the SAR must not be exercised in the first six months after grant; [157] (3) the disinterested plan administrators must have sole discretion over the form of payment or approval of the participant's election; [158] and (4) an election to

---

[148] *See, e.g., Centex Corp.* (Nov. 7, 1988) (withholding taxes); *Hibernia Corp.* (Nov. 23, 1987) (amendments to conform with recent changes in tax law).

[149] 17 CFR 240.16b-3(b). "Disinterested person" is defined in 16b-3(d)(3), which would be redesignated proposed Rule 16b-3(c)(3).

The disinterested administration requirement was adopted in 1949 [Exchange Act Release No. 4253 (May 6, 1949) [14 FR 2522]], deleted in 1956 [Exchange Act Release No. 5312 (May 21, 1956) [21 FR 3646]], and reinstated in 1960 [Exchange Act Release No. 6275 (May 26, 1960) [25 FR 4901]].

[150] The staff has interpreted the rules to permit participation in other plans of the issuer that are not subject to the discretion of any individual or committee (non-discretionary plans). *See, e.g., Hadco Corporation* (Oct. 19, 1987). This interpretation would be codified in proposed Rule 16b-3(c)(3).

[151] This is similar to current Rule 16b-3(b)(1)(iii).

[152] 17 CFR 240.16b-3(c).

[153] The general six month holding period requirement for options in current Rule 16b-6 would be rescinded.

[154] 17 CFR 240.16b-3(e).

[155] *See* Exchange Act Release No. 13097 (Dec. 22, 1976) [52 FR 754]; *Matas v. Seiss*, 467 F. Supp. 217 (S.D.NY. 1979 (an exercise of an SAR can be a simultaneous purchase and sale).

[156] 17 CFR 240.16b-3(e)(1).

[157] 17 CFR 240.16b-3(e)(2).

[158] 17 CFR 240.16b-3(e)(3)(ii).

exercise the SAR must be made during the period beginning on the third business day and ending on the twelfth business day ("10 day window") following the release of the periodic financial information required under section 13 of the Exchange Act.[159]

Under the proposed rules, the acquisition by an insider who chose to receive stock in exercising an SAR that offered a cash-or-stock election would be exempt from short-swing profit liability.[160] If the insider chose to receive cash, an exemption from section 16(b) liability would continue to be provided under proposed Rule 16b-3(d), if the conditions imposed currently were satisfied. The exemption for the cash election protects against liability arising from an analysis that the elected cash settlement was a simultaneous purchase and sale of the equity securities. While proposed Rule 12b–6(b) would exempt the hypothetical acquisition, there would be no exemption for the hypothetical sale if not for that afforded by proposed Rule 16b–3(d).

Cash settled SARs issued under a section 16b–3 exempt plan that do not provide the holder with a stock election would be wholly exempt from section 16.[161]

e. *Effect of proposed changes on pre-existing plans.* The proposed changes to Rule 16b–3 could compel registrants to amend their benefit plans to comply with the proposed changes relating to disinterested administration and the six month holding period. Comment is solicited as to the need for a phase-in period or some other form of temporary relief should the proposed rules be adopted. Comment is further solicited as to whether the proposed changes should have only a prospective application, so that a plan need not be amended until there is a material change in the plan, which under the current rules requires shareholder approval. In such case, the issuer could avoid the necesssity for shareholder approval (unless required by the terms of the plan) by amending the plan to comply with the new rules.

f. *Other changes.* Current Rule 16b–3(d) [162] defines several operative terms used in the Rule. The definitions would be retained without change in proposed Rule 16b–3(c), except that the definitions of "plan" and "distinterested person" would be amended to conform with the changes described above. It should be noted that the definition of "exercise of an option, warrant or right" in current Rule 16b–3(d)(2) has been retained as proposed Rule 16b–3(c)(2). Although exercises generally would be exempt under proposed Rule 16b–6(b), this definition was retained because the transactions enumerated are deemed to be entirely outside the purview of section 16, both for reporting and liability purposes.

In addition, the introductory paragraph to Rule 16b–3 would be simplified and designated proposed Rule 16b–3(a). No substantive change is intended.

VI. Synopsis of other changes

The other proposed changes are discussed in the order in which they would appear if the proposed amendments are adopted. A chart showing how the current rules would be restructured is included in Section IX below.

A. Rules under Section 16(a)

1. Definitions

a. *Equity security of such issuer.* Proposed Rule 16a–1(f) would define "equity security of such issuer" to include derivative securities overlying the issuer's equity securities, regardless of whether the derivative securities are issued by that registrant. Thus standardized and other third party options would be included in the definition, which codifies the Commission's interpretive position.[163] While standardized options had not been developed when section 16 was enacted, they are an equity security with great potential for abuse because they are short-term vehicles which offer the ability to leverage small investments into great profits. Consistent with the proposed treatment, Congress showed concern with all instruments known at the time of enactment (including issuer options) which provided an opportunity for abuse.[164]

b. *Owner of any security of the issuer.* Proposed Rule 16a–1(h) would define "owner of any security of the issuer" for purposes of section 16(b) short-swing profit recovery actions. The statute provides that, if the issuer fails to bring suit within 60 days of demand, such an owner may institute suit in the name and on behalf of the issuer to capture short-swing profits.

The section 16(b) action is similar to a derivative action under the Federal Rules of Civil Procedure.[165] However, there are differences, primarily with respect to standing. Unlike standard derivative actions, there is no requirement that a plaintiff have held the shares at the time of the alleged short-swing trading.[166] In fact, a plaintiff may achieve standing by purchasing a nominal number of shares of the issuer's stock subsequent to the discovery of a short-swing transaction.[167] Currently, the plaintiff is required to hold these shares throughout the legal process.[168] As set forth below, this result would be changed if the plaintiff ceased to be an owner because of a statutory merger or consolidation or other transaction over which the individual shareholder had no control.

When an issuer merges with and becomes a wholly-owned subsidiary of another company, shareholders of the issuer are compelled to dispose of their securities, receiving either cash or securities of the acquiring company. One court permitted a former shareholder of the issuer and current shareholder of the parent to bring a section 16(b) action when the issuer ceased to exist as a separate entity.[169] Where the issuer continues to exist as a wholly-owned subsidiary, however, the courts have uniformly denied standing to former shareholders and shareholders of the parent.[170] Thus, potential section 16(b) defendants in the acquired companies are shielded from liability, unless the parent decides to sue the former insiders of its subsidiary.

This result undercuts the policing function played by shareholders in section 16(b) actions. To preserve Congress' intent, the proposed rules would provide standing to the former public shareholders whose equity securites have been acquired in a business combination or similar corporate transaction over which the individual shareholder had no control.

The proposed rule would define "owner of any security of the issuer" as either a current beneficial owner of securities of the issuer (at the time of filing the suit) or a former beneficial owner who was compelled to dispose of

[170] *Untermeyer v. Valhi, Inc.*, 841 F.2d 26 (2d Cir.), *cert. denied*, 109 S. Ct. 175 (1988); *Lewis v McAdam*, 762, F.2d 800 (9th Cir. 1985) (per curiam); *Portnoy v. Kawecki Berlyco Industires, Inc., supra.*

the securities because of a business combination resulting in the issuer's becoming a non-reporting company.[171] This would address situations where the issuer becomes a subsidiary of another company as well as situations involving leveraged buy-outs and other forms of securities ownership redistribution. The standing would be determined at the time of suit and would not be affected if the issuer returned to reporting status during pendency of the action.

Comment is requested whether the definition should include only those former shareholders who are current shareholders of the parent company that controls the former company. The former shareholder who is a shareholder of the parent company that would receive the short-swing profit could be expected to have an economic interest in pursuing the case. Comment is also requested on alternative definitions of publicly owned company other than one referring to reporting status. The purpose of the definition is to assure that a section 16(b) action could be brought by security holders unaffiliated or unassociated with the controlling person.

2. Distributions

Current Rule 16b–2[172] would be moved from the section 16(b) rules to the Section 16(a) rules because there is little need for reports that disclose trades carried out as part of a distribution. The Commission promulgated Rule 16b–2 to exempt from section 16(b) transactions by persons involved in a distribution if three conditions are met: (1) The person must be in the business of distributing substantial blocks of stock and participating in the underwriting in good faith and in the ordinary course of business; (2) the security involved must be part of a substantial block of stock acquired with a view to distribution or the security must have been purchased to cover an over-allotment or to stabilize the market price; and (3) non-insider underwriters must participate in the distribution on terms as favorable, and to an equal extent, as the underwriters that are deemed to be insiders of the issuer ("equal participating requirement").[173]

The Commission proposes to eliminate the equal participation requirement. Transactions can be structured to avoid this requirement,[174] and it appears to address competitive concerns rather than the potential for abuse of inside information.

As with the current rule, proposed Rule 16a–17 would apply only to distributions and not to sales from an investment account of the seller.[175]

3. Exemptions for Both 16(a) and 16(b)

Current Rule 16a–10[176] would be retained with one minor change, the inclusion of the clause "except as provided in § 240.16a–6." The Rule would provide generally that any transaction exempted by a rule pursuant to section 16(a) likewise will be exempted from section 16(b), with the exception of proposed Rule 16a–6, which would provide a reporting deferral for small acquisitions, rather than an exemption.

B. Exemptive Rules under Section 16(b)

1. Transactions Approved by Regulatory Authority

Proposed Rule 16b–1 would exempt from the operation of section 16(b) specified transactions effected by issuers registered under the Investment Company Act and the Public Utility Holding Company Act, as well as exchanges of securities by persons subject to the Interstate Commerce Act ("Commerce Act").[177] The proposed rule would combine the current provisions of Rules 16b–1,[178] 16b–4,[179] and 16b–10[180] into a single rule without substantive change.

Current Rule 16b–1 exempts trades by registered investment companies where both the purchase and sale are exempt from the provisions of section 17(a) of the Investment Company Act, by order of the Commission pursuant to section 17(b).[181] Rule 16b–4 now exempts trades by public utility holding companies, or their subsidiaries, where both the purchase and sale have been approved or permitted by rules pursuant to the Public Utility Holding Company Act. Existing rule 16b–10 exempts exchanges by railroads that are approved by the Interstate Commerce Commission ("ICC") if the securities are acquired by persons subject to Part One of the Commerce Act, the acquiror is ordered to dispose of all securities exchanged for acquired securities, issuance of the securities was approved by the ICC pursuant to section 20(a)[182] of the Commerce Act, and the acquiror has transferred voting rights of the issuer's stock to a bank or trust until final disposition.

Proposed paragraph (a) of Rule 16b–1 would contain one clarifying change, to reflect the current staff interpretation that the exemption from section 16(b) embodied in current Rule 16b–1 is available where an issuer has not obtained a formal order from the Commission pursuant to the Rule's requirements, but instead meets the conditions of an exemptive rule under section 17(a) of the Investment Company Act.[183]

2. Bona Fide Gifts and Inheritance

Proposed Rule 16b–5 would exempt all acquisitions and dispositions via bona fide gifts or the laws of descent. Current Rule 16a–9 provides an exemption from section 16(b) for gifts under $10,000 and a reporting deferral (until the next required Form 4) for purposes of section 16(a).[184]

a. *Gifts.* There has been some uncertainty as to whether a gift is a sale for purposes of section 16. The issue has been addressed in three cases, all of which found that a bona fide gift was not a sale within the meaning of section 16.[185] Yet, the presence of a partial exemption for small gifts in Rule 16a–9 may undercut the holdings of those cases. The proposed rule would expand the exemption explicitly to cover all bona fide gifts. Bona fide gifts are those that are not required or inspired by any legal duty or that are in any sense a payment to settle a debt or other obligation,[186] and not made with thought of reward for past services or hope for future consideration. Employee benefit plan awards would not be considered gifts.

The Commission proposes to eliminate the reference to gifts in Rule 16a–9 and create a short-swing profit exemption in proposed Rule 16b–5(a), with deferred reporting required under proposed Rule 16a–3(f). Bona fide gifts present less likelihood for opportunities for abuse. Comment is solicited on the appropriateness of this exemption.

---

[171] The two year statute of limitations would not be affected.

[182] 49 U.S.C. 11301 (1982).

[183] Release 34–18114 Q.81.

[184] As noted above in Section III.B.3., the reporting deferral for small acquisitions not involving gifts is retained as proposed Rule 16a–6.

[185] *Shaw* v. *Dreyfuss*, 172 F.2d 140 (2d Cir. 1949), *cert. denied*, 337 U.S. 907 (1949); *Lewis* v. *Adler*, 331 F. Supp. 1258, 1268 (S.D.NY 1971); *Truncale* v. *Blumberg*, 80 F. Supp 367 (S.D.NY 1948).

[186] *See* Staff Accounting Bulletin 65 n.6 (Nov. 5, 1986).

b. *Inheritance.* There is no current rule to exempt transactions which occur as a result of the laws of descent. Under proposed Rule 16b–5(b), the Commission would exempt from section 16(b) both acquisitions and dispositions of equity securities through will or testament.[187] These transactions, however, would be disclosed on Form 5.

3. Dividend or Interest Reinvestment Plans (DRIPs)

Current Rule 16a–11 [188] provides an exemption from both section 16(a) reporting and section 16(b) profit recovery for dividend or interest reinvestment made pursuant to a plan available on the same terms to all holders.[189] While there are those who advocate extending the rule to exempt additional cash contributions to these plans, the proposed rules would not do so. Additional capital contributions call for an investment decision that could benefit from access to non-public information. Comment is requested, however, on whether a reporting deferral until the annual Form 5 would be appropriate for these additional capital contributions, even though they are not exempt from section 16(b). In addition, proposed Rule 16b–9 would limit the exemption to one from short-swing profit recovery.[190] No other substantive changes are proposed.

C. Other Rules Affected

1. Rule 12h–2

The proposal would rescind Rule 12h–2 [191] as being no longer necessary. The rule provides an exemption from section 16 for specified pre-registration transactions, but the exemption is limited to transactions in the securities of issuers registering pursuant to Section 12 prior to November 1, 1967.

2. Rule 30f–1

Rule 30f–1 [192] of the Investment Company Act would be amended to clarify that satisfying the reporting provisions under section 16(a) would satisfy section 30(f) of the Investment Company Act as well. Additionally, the amended rule would clarify that the rules under Section 16 of the Exchange Act apply to registered closed-end investment companies within the ambit of section 30(f). The proposed change would broaden Rule 30f–1 to require proposed Form 5.

[192] 17 CFR 240.30f–1.

D. Short Sale Prohibition [193]

Section 16(c) prohibits the sale of any equity security of the issuer if the selling insider either (1) does not own the security or (2) even if owning it, does not deliver it within 20 days after sale or mail it within 5 days.[194] An exemption is provided for persons acting in good faith who cannot deliver the securities in time, without undue inconvenience or expense.

Although the legislative history concerning section 16(c) is sparse, it indicates that Congress was concerned about and intended to eliminate abuses attendant on short selling. The legislative history focuses on investment pool operations conducted by certain insiders in conjunction with exchange members, which involved short selling that permitted them to repurchase shares at a much lower price.[195] These practices became known as "bear raids." In essence Congress was concerned about the manipulative effect of short selling and appeared to be troubled that insiders were taking positions that would benefit by an adverse movement in the price of the company's stock.

Total elimination of short selling was considered, but proponents argued that short sales were necessary to the market.[196] Congress decided to give the Commission general authority to regulate short selling in section 10(a) [197] of the Act, but specifically prohibited insiders from engaging in short sales.

Under the proposed rules, as described below, the three current rules under section 16(c) would not be changed substantially. Current Rule 16c–1 [198] provides an exemption for brokers who execute short sales for others, and Rule 16c–3 [199] provides an exemption for securities sold with the designation "when issued." No changes are proposed. Rule 16c–4 would be added to help eliminate the uncertainty surrounding short sales and derivative securities.[200] The rule would provide an exemption for hedging transactions with derivative securities.

Current Rule 16c–2 [201] provides an exemption for an underwriter where the sale is an over-allotment of an underwriting group and there is a good faith intention to offset the short position with a later purchase. Rule 16c–2(b) requires, similarly to current Rule 16b–2, that the insider underwriter must permit other members of the distributing group to participate equally. As with proposed Rule 16a–7, the Commission proposes deletion of the equal participation requirement of Rule 16c–2(b) as being unnecessary.

E. Market Making Exemption

Section 16(d) was added in 1964 in order to provide an exemption for over-the-counter ("OTC") market makers from sections 16(b) and (c). The exemption covers only market making transactions and excludes transactions for the market maker's investment account. There are no rules promulgated under section 16(d), although the section provides specific rulemaking authority to define "investment account." The proposed rules would not define the term, since no problems have been noted; however, the Commission solicits comment on the need for guidance in this area.

There is one aspect of section 16(d) that has been the subject of repeated interpretive requests—whether market makers are required to report transactions under section 16(a). The statute does not provide an express exemption from section 16(a) for market makers.[202] Given the changes in OTC trading and surveillance, however, the staff has issued interpretive letters exempting market makers from reporting.[203] Proposed Rule 16d–1 would codify the interpretive position. There appears to be little utility in requiring market maker reports where positions change constantly and the burden would be overwhelming.

F. Arbitrage

Section 16(e) provides an exemption from all of section 16 for bona fide arbitrage transactions. The Section gives the Commission rulemaking authority to define "bona fide arbitrage," but the Commission has not exercised this

authority, opting instead to leave such interpretation to the courts.[204] Only one rule has been promulgated under section 16(e)[205] and it prohibits officers and directors from using the exemption because they should not be engaged in performing arbitrage functions in their company's stock.

No changes and no additional rules are proposed, but comment is solicited as to whether further guidance in this area is needed.

VII. Revisions to Forms 3 And 4

The Commission proposes several minor revisions to Forms 3 and 4 and their instructions in order to enhance their usefulness, eliminate unnecessary provisions, and conform them to the proposed changes to section 16 described in the other sections of this release.

A. Revisions Common to Forms 3 and 4

1. The instructions to the forms captioned "When Statements are to Be Filed" and "Where Statements are to Be Filed" would be combined. A sentence would be added to the combined instruction stating that reporting persons shall file a duplicate original of the form with the issuer pursuant to proposed Rule 16a–3(e).

2. References appearing throughout the forms and instructions thereto to "puts," "calls," "options," "warrants," "convertible debentures," would be deleted and replaced with a general reference to "derivative securities."

3. The sequence of items in Tables I and II of the forms would be rearranged.

4. The instruction to the forms captioned "Statement of Amounts of Securities" would be revised to clarify that only those reporting pursuant to section 17(a) of the Public Utility Holding Company Act or section 30(f) of the Investment Company Act need to report debt securities.

The instruction also would be revised to state that a person owning securities beneficially through a trust, partnership, corporation or other entity shall indicate only the amount of securities representing the person's proportionate interest in the transaction or holdings of that entity. At the filer's option, the entire amount of the entity's holdings may be indicated instead of the proportionate interest. Other information concerning indirect ownership of securities in this paragraph would be deleted and addressed under the instruction captioned "Type of Ownership of Securities."

5. Two categories relating to the type and nature of reporting persons' beneficial ownership of securities, rather than just one, would appear in Tables I and II of the forms. In one category, reporting persons would indicate whether their ownership is direct or indirect; in the other category, reporting persons would describe the nature of any indirect ownership of securities.

6. The instruction to both forms captioned "Nature of Ownership of Securities" would be re-captioned "Type of Ownership of Securities" and revised to include all information regarding direct ownership in the first paragraph, and all information regarding indirect ownership in the second paragraph. The statements currently appearing in the second paragraph that discuss when a reporting person may be regarded as the indirect beneficial owner of securities would be deleted and replaced with a reference to proposed Rule 16a–1(a), which defines the term "beneficial owner." A statement would be added to clarify that securities holdings attributed to a reporting person due to the person's interest in a trust, partnership, corporation, or other entity are considered to be owned indirectly. A third paragraph would be added to provide information regarding disclaimers of beneficial ownership.

7. The instruction to the forms captioned "Puts, Calls, Options and Other Rights—Table II" would be recaptioned "Type of Derivative Security" and revised to state that reporting persons shall state whether a derivative security reported represents a right to buy, a right to sell, an obligation to buy, or an obligation to sell, the underlying security.

8. New columns would be added to Table II of the forms for information concerning the type and nature of ownership of derivative securities.

B. Revisions Related Only to Form 3

1. The instruction captioned "Price at Which Options may be Exercised" would be deleted.

2. Paragraph (b) of the instruction captioned "Reporting of Ownership in Certain Cases" would be revised to delete the reference to transferable warrants. The instruction currently states that transferable warrants issued by the issuer of the security subject to the warrants shall be reported in Table I; since transferable warrants are derivative securities, they would be reported in Table II of the Form 3, as revised, and no special instruction would be necessary.

The portion of the paragraph relating to convertible securities also would be revised. At present, it indicates that in reporting the ownership of a convertible security, the number of shares or units subject to the conversion privilege should be set forth in the explanation space on page 2 of the form. The revised instruction would state that only common stock convertible into another type of common stock shall be reported in this manner (*i.e.*, the common stock should be reported in Table I with an explanation on page 2 of the form that it is convertible into another type of common stock) and that all other convertible securities shall be reported as derivative securities in Table II of Form 3.

C. Revisions Related Only to Form 4

1. The instruction captioned "All Transactions to be Reported" would be re-captioned "Transactions to Be Reported" and revised to indicate that only transactions required to be reported on the Form 4, and not necessarily every transaction consummated by the reporting person, shall be so reported.

2. The instruction captioned "Character of Transaction" would be deleted. Instead, a new category captioned "Code for Character of Transaction" would be added to Tables I and II on Form 4. Reporting persons would choose a code from a list appearing on Form 4 that best identifies the character of the transaction being reported. Many types of transactions currently listed under the "Character of Transaction" caption would not have to be reported on the Form 4 under the proposed rules.

3. Paragraph (b) to the instruction captioned "Reporting of Transactions" would be revised to delete the reference to transferable warrants since, as stated in Section V.B.2 above, there is no reason to distinguish them from other types of derivative securities. The portion of the paragraph relating to the acquisition or disposition of convertible securities also would be revised in the manner set forth in Section VII.B.2. Finally, the last sentence in paragraph (b) would be deleted since conversions and exercises of derivative securities would, in most instances, be reported on Form 5 under the proposed rules.

4. Paragraph (d) of the instruction captioned "Reporting of Transactions" would be deleted. The first and second sentences in this paragraph state that certain types of derivative securities shall be reported in Table II. Since many of these transactions would be reported on Form 5, rather than on Form 4, under the proposed rules, and the revised Form 4 would indicate clearly that all

---

[204] *See Falco v. Donner Foundation*, 208 F.2d 600 (2d Cir. 1953) (court defines bona fide arbitrage).

[205] 17 CFR 240.16e–1.

transactions in derivative securities shall be reported in Table II, these directions would not be necessary. The last sentence of the paragraph states that transferable warrants shall be reported in Table I; this sentence would be deleted for the same reasons set forth in Section VII.C.3 above.

5. The instruction captioned "Statement of Dates" would be deleted. Instead, the information contained in the instruction would be incorporated in the "Date of Transaction" category on the form itself.

6. The instruction currently captioned "Statement of Dates" contains a reference to stock splits. That reference would be deleted from the instructions to the revised form because stock splits would be reported on Form 5 under the proposed rules.

7. A new category captioned "Purchase or Sale Price of Derivative Security" would be added to Table II of Form 4.

8. The instruction captioned "Purchase or Sale Price of Securities" would be revised to state that if a transaction did not involve cash, the nature of the consideration given or received shall be disclosed. The current instruction states that no information regarding the purchase or sale price of securities need be given for transactions not involving cash.

The instruction to Form 4 captioned "Beneficial Ownership at End of Month" would not be revised; however, comment is solicited as to whether the commission should continue to require reporting persons to report their month-end beneficial ownership of securities in which no transactions have been conducted. In light of the fact that the proposed Form 5 would require an annual reconciliation of beneficial holdings, this month-end information may not prove as useful or necessary as in the past.

D. Special Instructions—Privacy Act of 1974

A set of instructions would be added to the instructions to both forms regarding reporting persons' disclosure of their social security account numbers. The Commission issued a release in 1975 [206] stating that, in light of section 7 of the Privacy Act of 1974, [207] it would no longer require that social security account numbers be disclosed on certain forms, including Forms 3 and 4, that collect information from or about individuals. In order to avoid the costs that would have been involved in revising the forms to include the new instructions, a special notice was prepared indicating that disclosure of social security numbers is voluntary. This notice has been furnished to all persons requesting copies of Forms 3 and 4 from the Commission. Since additional revisions to the forms are being proposed, the Commission proposes to incorporate these special instructions into the forms.

VIII. Compliance with Section 16(a)

A. Lack of Compliance with Section 16(a)

The Commission is very concerned over the widespread lack of compliance with the reporting requirements under section 16(a). A review by the Commission of filings in calendar year 1987 indicated that more than 50 percent of filings made were more than three days late. [208] The high delinquency rate led to an increased focus on Forms 3 and 4 by the Commission's delinquent filing program, which identifies and prosecutes non-compliance with the filing requirements of the federal securities laws. [209] The Commission's staff has sent individual notices to persons and entities that repeatedly are late in filing their Form 4 reports and provided interpretive guidance in an effort to improve compliance with section 16(a). [210] In addition, the commission has recommended federal legislation that would provide it with fining authority for violations of section 16(a). [211]

B. Discussion of Proposals

While the proposed revisions to the rules under section 16, particularly the deferral of a number of transactions to an annual report and the requirement of an annual reconciliation, should reduce the amount of delinquencies due to insiders' oversight, the Commission believes further steps are necessary to address the problem. It is therefore proposing to amend the proxy rules, Form 10–K, and Form N-SAR to add a new Item 405 to Regulation S-K. The Item would require disclosure of delinquent filers and a brief discussion of the procedures designed by the registrant to assist insiders in meeting their filing obligations under sections 16(a) and 16(b).

The information about delinquent filers would consist of the names of all directors, officers, and ten percent holders that fail to comply with the filing requirements of section 16(a) during the registrant's fiscal year by failing to file or filing late any required Form 3, 4 or 5 and how many times each such person failed to file or failed to file in a timely manner. Comment is solicited as to whether registrants should also be required to disclose the dollar amount involved and the nature of the transactions not reported. It should be emphasized that proposed Item 405 specifies that the registrant is required to report only those delinquencies disclosed on the Forms 3, 4 and 5. There would be no further duty of inquiry.

As noted above, all reporting persons would be required to send copies of all of their Form 3, 4 and 5 reports to the registrant pursuant to proposed Rule 16a–3(e). [212] In addition, many registrants already assist their reporting persons in fulfilling the requirements of Section 16(a) and the Commission, by this action, anticipates that it will provide incentives to registrants to implement procedures to assist their insiders to the extent they do not already do so. [213]

---

[206] Exchange Release No. 11831 (Nov. 14, 1975) [40 FR 55318].

[207] 5 U.S.C. 552(a) (1982 and Supp. 1986).

[208] The review showed a 48 percent rate in 1986, and a 43 percent rate in 1988. A recent private study of more than 100,000 trades by reporting persons consummated between August, 1986 and July, 1987, came to similar results. *See generally* Novack, *State Dope*, FORBES, Nov. 2, 1987, at 180 (discussing a study by Jonathan Berntley); *see also "The Bentley Report*, Statutory Insider Trading 1983 to 1987" (1988) (this more recent study by Jonathan Bentley covering only the 1,000 largest issuers registered under section 12 and, among the other registered issuers, the 1,000 with the most active trading by insiders revealed a delinquency rate of about 33 percent). The earlier Bentley study, discussed by Novack, indicates that 40% of required sell reports and 39% of required buy reports on Form 4 were filed with the Commission at least three days late. The three day standard was used to allow for delays in the mail. Approximately 36% of the late buy reports and 26% of the late sell reports were overdue by one month ormore. Moreover, $8 billion of the $26 billion worth of stock trades analyzed allegedly were not reported until beyond the filing deadline. Of the $8 billion, more than $5 billion, or about 60% in market value of the trades, were filed two months or more after the trades occurred. These problems in compliance were found to exist in three out of every four companies involved in the study. These statistics do not reveal fully the extent of the compliance problem since the delinquency figures do not reflect purchases or sales for which no reports were filed.

[209] *See, eg., SEC* v. *Beall, SEC* v. *Geiringer, SEC* v. *Shanley*, Litigation Release No. 11328 (jan. 6, 1987); *SEC* v. *Lee, SEC* v. *Michael Industries, Inc., SEC* v. *Ziegler*, Litigation Release No. 11191 (Aug. 11, 1986).

[210] *See* Release 34–18114 and numerous interpretive letters addressing the section 16(a) reporting requirements.

[211] Letter to the Hon. George Bush, President United States Senate, from David S. Ruder, Chairman (Sept. 28, 1988). The proposed bill would be entitled the "Securities Law Enforcement Remedies Act of 1988." Should the Commission proposed bill be enacted, the Commission will consider permitting a six month grace period before seeking fines from insiders failing to comply.

[212] *See supra* Section III.B.3.

[213] *See* American Society of Corporation Secretaries, Inc., "Section 16 Survey Report" (Nov. 1988) (reporting that the majority of responding members of the organization assist their insiders).

The Item 405 disclosure would be required to be disclosed in the proxy statement by new Item 7 of Schedule 14A and in the Form 10–K by new Item 10 and in Form N–SAR by new Item 88.E. Pursuant to Item 7 of Schedule 14A, the disclosure would appear in all proxy and information statements relating to the election of directors. The requirement would supplement the information concerning directors, executive officers, and certain beneficial holders already provided under Item 10 of Part III of Form 10–K.[214]

Registrants would have a duty only to disclose information derived from reviewing Form 3, 4, and 5 filings by directors, officers, and ten percent holders for timeliness and disclosures revealing transactions in violation of section 16(a) that occurred during the year. Registrants may rely on Schedule 13D and 13G filings for the identities of their ten percent holders. All filings received by the registrant with a postmark after the due date should be presumed late, unless the reporting person demonstrates to the registrant that the form was filed timely with the Commission. (As provided by proposed Rule 16a–3(g), discussed above, the filer may be able to rely on the mailing date.) No additional inquiry by the registrant is necessary.

C. Request for Comment

The Commission solicits comment as to whether a distinction should be made between ten percent holders and directors and officers for purposes of the delinquent filers and compliance assistance procedures disclosure proposal. Specifically, comment is solicited as to whether ten percent holders should be excluded from the proposed disclosure requirement on grounds that the relationship between registrants and ten percent holders is substantially different and less direct than the relationship between registrants and their directors and officers.

Commenters are asked to comment on the effect of the proposed rule changes on compliance with the section 16(a) reporting requirements. The Commission also solicits comment on additional or alternative means to improve the prompt disclosure to investors of the information required by Forms 3 and 4.

IX. Proposed Treatment of Current Rules

A. The following chart lists the current rules and the corresponding proposed rules and indicates which rules would be changed substantively or reorganized.

[214] General Instruction G(3) to Form 10–K states that the information required by Part III shall be incorporated by reference from the registrant's definitive proxy or information statement which involves the election of directors, if such statement is filed with the Commission not later than 120 days after the end of the fiscal year covered by the Form 10–K. The instruction further states that if such proxy or information statement is not filed with the Commission in the 120-day period, the items comprising the Part III information must be filed as part of the Form 10–K, or as an amendment to the Form 10–K filed under cover of Form 8 not later than the end of the 120-day period.

Current rule	Content	Proposed rule	Substantive changes
12h–2	Offerings before 1967	Deleted	Yes.
16a–1(a)	Forms 3 and 4	16a–3(a)	No.
(b)	Filing another Form 3	16a–3(b)	No.
(c)	Copies to exchange	16a–3(c)	No.

16c-4	Derivative Securities Short Positions	None	N/A
16d-1	Marketmakers	None	N/A
30f-1	Investment Companies	30f-1	No.

X. Request for Comment

Any interested persons wishing to submit written comments on; the proposed amendments to Rules 16a–1 through 16c–3, Schedule 14A, Forms 10–K, 3 and 4; the addition of a new Rule 16d–1 and a new Form 5; the deletion of Rule 12h–2 under the Exchange Act; the addition of a new item to Regulation S–K; and the proposed amendments to Rule 30f–1 and Form N–SAR under the Investment Company Act; as well as on other matters that might have an impact on the proposals contained herein, are requested to do so. In addition, the Commission requests comments on whether any further changes to the Section 16 rules are necessary or appropriate at this time. The Commission also requests comment on whether the proposed rules, if adopted,

would have an adverse effect on competition that is neither necessary nor appropriate in furthering the purposes of the Exchange Act. Comments on this inquiry will be considered by the Commission in complying with its responsibilities under section 23(a) of the Exchange Act.[215]

XI Cost—Benefit Analysis

To evaluate the costs and benefits associated with the proposed amendments addressed in this release, the Commission requests commentators to provide views and data as to the costs and benefits associated with these proposals.

It is expected that the proposed amendments to the rules promulgated pursuant to section 16 would decrease significantly the reporting, recordkeeping, and compliance requirements imposed upon reporting persons subject to Section 16 for the following reasons.

Proposed Rule 16a–1(e) would define the term "officer" for purposes of section 16 in the same manner that "executive officer" currently is defined in Rule 3b–7. The proposed definition reflects concerns that the current definition of "officer" is over-broad and extends to some employees that do not have significant managerial or policy-making duties.

Proposed Rule 16a–1(a)(1) would state that for purposes of determining who is a ten percent beneficial owner only the rules under section 13(d) of the Exchange Act shall apply. Furthermore, proposed Rule 16a–4(a) would deem derivative securities to be of the same class of equity securities as the underlying securities and not a separate class of equity securities for purposes of determining ten percent beneficial ownership. Finally, proposed Rule 16a–1(c) would exclude derivative securities awarded pursuant to an employee benefit plan satisfying proposed Rule 16b–3, if exercisable solely for cash.

Proposed Rule 16a–3(f) would provide a reporting deferral for all trades exempted pursuant to rules promulgated under section 16(b), small acquisitions of securities, stock splits and stock dividends. Under the current rules, trades entitled to reporting deferrals must be reported in the first Form 4 filed by the insider subsequent to the exempted transaction. Under the proposed rules, the deferred period generally would be longer; all trades entitled to reporting deferrals except those falling under the small acquisitions deferral category only would be reported by the insider at the same time, within 30 days after the registrant's fiscal year end, on a Form 5.

Proposed Rule 16a–7 would provide a reporting exclusion for insider underwriters regarding trades associated with a distribution. Elimination of the need for insider underwriters to participate equally with non-insider underwriters in a distribution also is proposed.

Proposed Rule 16b–6(b) generally would exempt from section 16(b) exercises and conversions of derivative securities.

Proposed Rule 16b–5 would exempt from section 16(b) all acquisitions and dispositions via bona fide gifts regardless of their size. Current Rule 16a–9 provides such an exemption only for bona fide gifts under $10,000. Proposed Rule 16b–5 also would exempt from section 16(b) all acquisitions and dispositions via the laws of descent.

Proposed Rule 16c–4 would provide that selling a derivative security short or purchasing a put option is not prohibited under section 16 if the securities underlying the derivative security or put option do not exceed the amount of underlying securities otherwise owned. This exemption would become unavailable when a person sells underlying securities such that the securities underlying the derivative securities sold short exceed the amount of underlying securities otherwise owned. As a result of the proposal, put equivalent positions will be deemed violations of section 16(c) in certain circumstances. The current rules prohibit insiders from maintaining short positions in equity securities at any time.

The following proposed amendments may increase the reporting, recordkeeping, and compliance requirements imposed upon reporting persons subject to section 16. It is expected, however, as stated above, that the overall effect of the proposed amendments would be to decrease significantly the impact of such requirements upon reporting persons.

Under current Rule 16a–8(e) with respect to trustees and proposed Rule 16a–1(b), an insider is deemed to be the beneficial owner of securities owned by members of the insider's immediate family sharing the same residence. The current definition of "immediate family" in Rule 16a–8 would be broadened by proposed Rule 16a–1(b) to apply throughout Section 16 and to include siblings, fathers-in-law, mothers-in-law, sons-in-law, daughters-in-law, brothers-in-law, and sisters-in-law, as well as children, grandchildren, stepchildren, parents, stepparents, and spouses.

Current Rule 16a–8(c), which deems the trustee of a trust holding ten percent of a class of equity securities to be a reporting person for purposes of section 16, would be expanded by proposed Rule 16a–5(a)(2). Under the proposed rule, a trust would report not only when it is a ten percent holder, but also when the trustee is an insider. Furthermore, the exemption from section 16(a) provided in current Rule 16a–8(b) for beneficial ownership of securities solely as settlor or beneficiary or a trust where less than 20 pecent in market value of the trust consists of the registrant's securities would be deleted. Section III.A.5.a of the release discusses proposed Rule 16a–5 as well as the proposed modifications of current Rule 16a–8(b).

Proposed Rule 16a-3(a) would require all reporting persons subject to section 16 to file an annual reconciliation of beneficial holdings on Form 5. This requirement would increase the burden on reporting persons, particularly those who had no transactions during the year that otherwise would have been reportable on Form 4.

Proposed Rule 16a–3(e) would require insiders to forward copies of their Forms 3, 4 and 5 to the registrant's corporate secretary or other person designated to receive such filings.

Proposed Rule 16b–6(a) would clarify that a derivative security confers beneficial ownership in the underlying security for purposes of section 16(b).

The proposed amendments should not result in any substantial increase in the compliance requirements imposed upon companies registered pursuant to section 12 of the Exchange Act or whose securities are for any other reason subject to section 16. The proposed addition of a new Item 405 to Regulation S–K, triggered by Item 7 of Schedule 14A, Item 10 of Form 10–K and sub-item 88.E of Form N–SAR, would require registrants to describe their procedures for assisting insider compliance with sections 16(a) and 16(b) and report certain information regarding the non-compliance of their insiders with the reporting requirements of section 16(a). In order to fulfill their disclosure obligations, registrants would have to review the Form 3, 4, and 5 reports filed by their insiders. The proposed requirements should not place a significant burden on registrants since reporting persons would be required to send copies of all their Form 3, 4, and 5 reports to the registrants as well as to the Commission. Furthermore, Item 12 of Form 10–K already requires registrants to monitor annually the security

[215] 15 U.S.C. 78w(a) (1982).

holdings of officers, directors, and five percent security holders.

The Commission's proposal to eliminate entirely the current provision in Rule 16b–3(a) requiring shareholder approval of compensation plans and any material amendments thereto should decrease the burdens imposed on companies by section 16. The benefit of the deletion of the shareholder approval requirement would be offset to some extent, however, by the strengthened disinterested administration requirement in proposed Rule 16b–3(b).

XII. Summary of Initial Regulatory Flexibility Analysis

An Initial Regulatory Flexibility Analysis in accordance with 5 U.S.C. 603 has been prepared concerning the proposed amendments to Rules 16a–1 through 16c–3, Schedule 14A, Forms 10–K, 3 and 4; the addition of a new Rule 16d–1 and a new Form 5; the deletion of Rule 12h–2 under the Exchange Act, as well as the addition of a new item to Regulation S–K. Also a subject of this analysis are proposed amendments to Rule 30f–1 and Form N-SAR under the Investment Company Act. The analysis notes that the proposed amendments are intended to help assure that persons meet their reporting obligations and to ensure the fair and effective operation of section 16(b) by limiting the opportunities for abuse and removing transactions that do not involve the potential for abuse from the scope of the rules.

As discussed more fully in the analysis, many of the reporting persons the proposed amendments would affect are small entities, as defined by the Commission's rules.

It is expected that the overall effect of the proposed amendments would be to decrease significantly the impact of reporting, recordkeeping, and compliance requirements upon reporting persons subject to section 16, although certain of the proposed amendments may increase such requirements, as noted in the analysis.

The analysis discusses several possible significant alternatives to the proposed amendments including, among others, establishing different compliance or reporting requirements for small entities or exempting them from all or part of the proposed requirements. As discussed more fully in the analysis implementing any of these alternatives either would be duplicative of the proposed amendments or would not be consistent with the Exchange Act.

Comments are encouraged on any aspect of the analysis. A copy of the analysis may be obtained by contacting Brian J. Lane or Mark W. Green, Office of Disclosure Policy, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

XIII. Statutory Basis

The amendments to the proxy rules and section 16 rules are being proposed by the Commission pursuant to Exchange Act sections 3(a)(11), 3(b), 9(b), 10(a), 12(h), 13(a), 14, 16, and 23(a). The amendments to the section 30 rule are being proposed pursuant to Investment Company Act of 1940 section 38.

Reporting and recordkeeping requirements, Securities.

XIV. Text of Proposals

In accordance with the foregoing, Title 17, Chapter II of the Code of Federal Regulations is proposed to be amended as follows:

PART 229—STANDARD INSTRUCTIONS FOR FILING FORMS UNDER SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934 AND ENERGY POLICY AND CONSERVATION ACT OF 1975—REGULATION S–K

1. The authority citation of Part 229 continues to read:

Authority: Secs. 6, 7, 8, 10, 19(a), 48 Stat. 78, 79, 81, 85; secs. 12, 13, 14, 15(d), 23(a), 48 Stat. 892, 894, 901; secs. 205, 209, 48 Stat. 906, 908; sec. 203(a), 49 Stat. 704; secs. 1, 3, 8, 49 Stat. 1375, 1377, 1379; sec. 301, 54 Stat. 857; secs. 8, 202, 68 Stat. 685, 686; secs. 3, 4, 5, 6, 78 Stat. 565–568, 569, 570–574; sec. 1, 79 Stat. 1051; secs. 1, 2, 3, 82 Stat. 454, 455; secs. 1, 2, 3–5, 28(c), 84 Stat. 1435, 1497; sec. 105(b), 88 Stat. 1503; secs. 8, 9, 10, 11, 18, 89 Stat. 117, 118, 119, 155; 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a), 71*l*, 78m, 78n, 78*l*(d), 78w(a), unless otherwise noted.

2. Section 229.405 is added to Subpart 229.400 to read as follows:

§ 229.405 (Item 405) Compliance with Section 16(a) of the Exchange Act.

Every person having a class of equity securities registered pursuant to section 12 of the Exchange Act, every closed-end investment company registered under the Investment Company Act of 1940 [15 U.S.C. 80a–1 *et seq.*] and every holding company registered pursuant to the Public Utility Holding Company Act of 1935 [15 U.S.C. 79 *et seq.*] shall:

(a) Describe briefly its procedures for assisting directors, officers, beneficial owners of more than ten percent of any class of equity securities of the registrant, and any other person subject to section 16 of the Exchange Act because of the requirements of section 30 of the Investment Company Act or of section 17 of the Public Utility Holding Company Act, in complying with sections 16(a) and 16(b) of the Exchange Act; and

(b) Based on a review of the Forms 3, 4, and 5 provided to the registrant concerning transactions conducted during the fiscal year, list each such director, officer, beneficial owner and other person who failed to file any form required by section 16(a) of the Exchange Act in a timely manner. For each such filer, the registrant also shall disclose the number of times that filing was not timely.

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for Part 240 continues to read:

Authority: Sec. 23, 48 Stat. 901, as amended (15 U.S.C. 78w).

§ 240.12h–2 [Removed]

2. Section 240.12h–2 is removed.

3. By amending § 240.14a–101 by adding a paragraph (h) before the concluding text to Item 7 to read as follows:

§ 240.14a–101 Schedule 14A. Information required in proxy statement.

* * * * *

Item 7. Directors and Executive Officers

* * * * *

(h) The information required by Item 405 of Regulation S-K (§ 229.405 of this chapter).

* * * * *

4. Sections 240.16a–1 through 240.16a–10 and the undesignated center heading preceding them are revised and § 240.16a–11 is removed, as follows:

Reports of Directors, Officers, and Principal Shareholders

§ 240.16a–1 Definitions.

All terms defined in this rule shall be used only for purposes of section 16 of the Act. These terms shall not be limited to section 16(a) but shall apply to all subsections under section 16.

(a) Beneficial Ownership.

(1) Solely for purposes of determining who is a ten percent beneficial owner, the term "beneficial owner" shall mean any person who is deemed a ten percent beneficial owner by operation of the rules under section 13(d) of the Act.

(2) For all other purposes, the term "beneficial owner" shall mean any person who, directly or indirectly, through any contract, arrangement, understanding, relationship, or otherwise has or shares a pecuniary

BEST COPY AVAILABLE

interest in the subject securities. A person shall be deemed the beneficial owner of securities:

(i) That such person has the right to acquire through the exercise or conversion of any derivative security, whether it is presently exercisable or not;

(ii) That are held by any member of the immediate family sharing the same residence as the person; or

(iii) That are held by a general partnership, in proportion to that person's partnership interest.

(3) Where more than one person is deemed to be a beneficial owner of the same equity securities, both persons must report as beneficial owners of the securities. In such cases, short swing profit recovery would not be increased over what would otherwise be recoverable if there were only one beneficial owner.

(4) Any person filing a statement may declare expressly therein that the filing of such statement shall not be construed as an admission that such person is, for the purpose of section 16 of the Act, the beneficial owner of any equity securities covered by the statement, unless beneficial ownership is otherwise mandated by § 240.16a-1(a).

(b) The term "immediate family" shall mean any child, stepchild, grandchild, parent, stepparent, spouse, sibling, mother-in-law, father-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law. For the purpose of determining whether any of the foregoing relations exist, a legally adopted child of a person shall be considered a child of such person by blood.

(c) The term "derivative securities" shall mean any option, warrant, convertible security, stock appreciation right, or other similar right related to an equity security, but shall not include:

(1) The right of a pledgee of securities to sell the pledged securities;

(2) The right to acquire or the obligation to sell securities in connection with a merger, exchange offer, or consolidation involving the issuer of the securities;

(3) Securities awarded pursuant to an employee benefit plan satisfying § 240.16b-3 that can be exercised only for cash and permit no discretion as to whether to receive another form of equity security in lieu of cash; and

(4) Broad-based index options and broad-based index futures.

(d) The term "call equivalent position" shall mean a derivative security position that increases in value as the value of the underlying equity increases, including, but not limited to, a long convertible security, long call option, and short put option position.

(e) The term "put equivalent position" shall mean a derivative security position that increases in value as the value of the underlying equity decreases, including, but not limited to, a long put option and a short call option position.

(f) The term "equity security of such issuer" shall mean any equity security or derivative security of or relating to a particular issuer, whether or not issued by that issuer.

(g) The term "officer" shall mean a registrant's president, any vice-president of the registrant in charge of a principal business unit, division or function (such as sales, administration or finance), any other officer who performs a policy-making function or any other person who performs similar policy-making functions for the registrant. Officers of subsidiaries may be deemed officers of the registrant if they perform such policy-making functions for the registrant. In addition, when the registrant is a limited partnership, officers or employees of the general partners with policy-making functions are deemed officers of the registrant.

(h) The term "owner of any security of the issuer" for purposes of section 16 of the Act shall mean a beneficial owner of securities of the issuer at the time of suit or, if as a result of a business combination the issuer, at the time of suit, does not have a reporting obligation under section 13 or 15(d) of the Act with respect to an equity security, a former beneficial owner of the issuer who was required to surrender such securities due to such business combination.

§ 240.16a-2 Persons subject to section 16.

All directors, officers, and persons who are the beneficial owners of more than 10 percent of a class of equity securities of an issuer registered pursuant to section 12 of the Act shall be subject to the provisions of section 16, subject to the following:

(a) Any director or officer who is required to file a statement on Form 4 with respect to any change in beneficial ownership of equity securities which occurs within 6 months after becoming a director or officer of the issuer of such securities, or within 6 months after equity securities of such issuer first became registered pursuant to section 12 of the Act, shall include in the first such statement the information called for by Form 4 with respect to all changes in beneficial ownership of equity securities of such issuer which occurred within 6 months prior to the date of the changes which require the filing of such statement.

(b) Any person who has ceased to be a director or officer of an issuer that has equity securities registered pursuant to section 12 of the Act, or who is a director or officer of an issuer at the time it ceased to have any equity securities so registered, shall file a statement on Form 4 with respect to any change in beneficial ownership of equity securities of such issuer that shall occur on or after the date on which such person ceased to be such director or officer or the date on which the issuer ceased to have any equity securities so registered if such change shall occur within 6 months after any change in such person's beneficial ownership of such securities prior to such date.

(c) The transaction that results in a person becoming a 10 percent beneficial owner need not be reported unless the person already is required to file reports concerning securities of that issuer in another capacity. A 10 percent beneficial owner must report only those transactions conducted while holding at least 10 percent of any class of equity securities.

§ 240.16a-3 How to report.

(a) Initial statements of beneficial ownership of equity securities required by section 16(a) of the Act shall be filed on Form 3 (§ 249.103 of this chapter). Statements of changes in such beneficial ownership required by the section shall be filed on Form 4 (§ 249.104). Annual statements of reconciliation shall be filed on Form 5 (§ 249.105). All such statements shall be prepared and filed in accordance with the requirements of the applicable form.

(b) A person who already is filing statements pursuant to section 16(a) of the Act with respect to equity securities registered pursuant to either section 12 (b) or (g) of the Act need not file an additional statement on Form 3 (§ 249.103):

(1) When an additional class of equity securities of the same issuer becomes registered pursuant to the same section of the Act; or

(2) When such person assumes a different or an additional relationship to the same issuer; for example, when an officer becomes a director,

(c) Any issuer that has equity securities listed on more than one national securities exchange may designate one such exchange as the only exchange with which reports pursuant to section 16(a) of the Act need be filed. Such designation shall be made in writing and shall be filed with the Commission and with each national securities exchange on which any equity

security of the issuer is listed. The obligation to file with each national securities exchange on which any equity security of the issuer is listed shall be satisfied by filing with the designated exchange.

(d) Any person required to file a statement under both section 16(a) of the Act and section 17(a) of the Public Utility Holding Company Act of 1935 or section 30(f) of the Investment Company Act of 1940 may file a single statement containing the required information which will be deemed to be filed under both Acts. To comply with the requirement of section 16(a), where applicable, that statements be filed with national securities exchanges, a duplicate original of such statement shall be filed with such exchanges or with the exchange designated pursuant to § 240.16a-3(c).

(e) Any person required to file a statement under section 16(a) shall, at the time of filing, send or deliver a duplicate to the registrant's corporate secretary or other person designated by the registrant.

(f) A Form 5 filing shall be required from every person required to file statements under section 16(a) as of the end of the registrant's fiscal year. This statement shall be filed within 30 days of the end of the registrant's fiscal year. This filing shall be required regardless of whether the reporting person is the beneficial owner of any securities or there have been any transactions in the reported securities conducted during the year. All transactions during the fiscal year shall be reported on Form 4, except that the following shall be reported on Form 5:

(1) Changes in ownership resulting from stock splits or stock dividends occurring during the fiscal year;

(2) Small acquisitions during the fiscal year, unless previously reported on Form 4 pursuant to § 240.16a-6;

(3) All transactions conducted during the fiscal year that were exempted by operation of any rule pursuant to section 16(b) of the Act; and

(4) Any occurrence or transaction required to be reported on Form 3 or 4 under section 16(a) of the Act that was required to be filed prior to, and that has yet to be reported as of the date by which the Form 5 is filed; *Provided, however,* that the required Form 3 or 4 shall be appended to the Form 5.

(g) The date of filing with the Commission shall be the date of receipt by the Commission; *Provided, however,* the Form 3, 4 or 5 shall be deemed to have been timely filed if the filing person establishes that the Form had been transmitted to the Commission by first class mail or any equally prompt means on or before the date on which the filing was due.

§ 240.16a-4 Derivative securities.

(a) The granting, acquisition or disposition of any derivative security, or any expiration or cancellation thereof shall be deemed to effect a change in the beneficial ownership of the underlying securities to which the derivative security relates. For purposes of section 16 of the Act, both derivative securities and the underlying securities to which they relate shall be deemed to be the same class of equity securities, except that they shall be reported separately.

(b) For reporting purposes, the exercise or conversion of a call equivalent position shall be treated as:

(1) A purchase of the underlying security; and

(2) A closing of the derivative security position.

(c) For reporting purposes, the exercise of a put equivalent position shall be treated as:

(1) A sale of the underlying security; and

(2) A closing of the derivative security position.

Note.—Under § 240.16b-6(b), a purchase or sale incident to an exercise or conversion of a derivative security generally is exempt from section 16(b) of the Act.

§ 240.16a-5 Trusts and remote interests.

(a) The following provisions apply to trusts:

(1) In the event that more than 10 percent of any class of any equity security (other than an exempted security) that is registered pursuant to section 12 of the Act is held in a trust, as determined pursuant to Rule 16a-1(a)(1), both the trust and trustee shall file reports as specified in § 240.16a-3. The trustee shall report on behalf of the trust, and shall report separately transactions on behalf of the trustee as any other person subject to section 16 of the Act.

(2) In the event that a trustee is a person required to file reports pursuant to § 240.16a-3, the trustee shall report on behalf of each trust in which the trustee exercises investment decision-making authority, and also shall report separately transactions on behalf of the trustee.

(3) In the event that the following conditions are met, transactions of a trust will be attributable to a person specified in § 240.16a-2 as well as the trust:

(i) If a person specified in § 240.16a-2 is the trustee and at least one beneficiary of the trust is a member of the trustee's immediate family, all transactions of the trust will be attributed to the trustee and the trustee shall report the transactions of the trust as transactions of the trustee.

(ii) If a person specified in § 240.16a-2 owns securities as settlor of a trust and has the power to revoke the trust without obtaining the consent of the beneficiaries, all transactions of the trust will be attributed to the settlor and the settlor shall report the transactions of the trust as transactions of the settlor.

(4) If a person specified in § 240.16a-2 owns a vested beneficial interest in a trust, that person shall report the transactions of the trust unless meeting the conditions of § 240.16a-8. The person may report trust transactions in proportion to that person's beneficial interest.

(5) In the event a trust or other person becomes a reporting person pursuant to this rule, it shall likewise be subject to sections 16 (b) and (c) of the Act.

Note.—Transactions by a trustee on behalf of a settlor or beneficiary without such person's prior approval or direction need not be reported by such person, as specified in § 240.16a-8.

(b) A trustee is exempt from the provisions of section 16(a) under the Act for the 12 months following its appointment and qualification, to the extent the trustee is acting as:

(1) Executor or administrator of the estate of a decedent;

(2) Guardian or member of a committee for an incompetent; or

(3) Receiver, trustee in bankruptcy, assignee for the benefit of creditors, conservator, liquidating agent, or other similar person duly authorized by law to administer the estate or assets of another person.

(c) After the 12 month period following its appointment or qualification, a trustee previously exempt pursuant to paragraph (b) of this rule must report and be liable for all transactions of the estate being administered only where the estate is a beneficial owner of more than 10 percent of any class of equity security (other than an exempt security) that is registered pursuant to section 12 of the Act.

(d) The following interests are considered too remote to confer beneficial ownership for purposes of section 16(a) of the Act, notwithstanding the provisions of Rule 16a-1(a)(2):

(1) The remainder interest of a trust;

(2) Indirect interests in portfolio securities held by:

(i) Any holding company registered under the Public Utility Holding Company Act;

(ii) Any investment company registered under the Investment Company Act; and

(iii) A pension or retirement plan holding securities of an issuer whose employees generally are the beneficiaries of the plan.

§ 240.16a–6 Small acquisitions.

(a) Any acquisition that does not exceed $10,000 in market value is permitted to be reported on either a Form 4 or Form 5 (whichever is required to be filed first), subject to the following conditions:

(1) Total acquisitions of securities of the same class (including derivative securities) within the prior six months do not exceed $10,000 in market value; and

(2) The person effecting the acquisition does not within six months thereafter effect any disposition, other than by a transaction exempted from section 16(b) of the Act.

(b) Should an acquisition no longer qualify for the reporting deferral in paragraph (a) of this rule, all such acquisitions that have not yet been reported shall be reported on a Form 4 within 10 days after the close of the calendar month in which the conditions of paragraph (a) no longer are met.

§ 240.16a–7 Transactions effected in connection with a distribution.

(a) Any transaction of purchase and sale, or sale and purchase, of a security which is effected in connection with the distribution of a substantial block of securities shall be exempt from the provisions of section 16(a) of the Act, to the extent specified in this rule, as not comprehended within the purpose of said section, upon the following conditions:

(1) The person effecting the transaction is engaged in the business of distributing securities and is participating in good faith, in the ordinary course of such business, in the distribution of such block of securities; and

(2) The security involved in the transaction is:

(i) A part of such block of securities and is acquired by the person effecting the transaction, with a view to the distribution thereof, from the issuer or other person on whose behalf such securities are being distributed or from a person who is participating in good faith in the distribution of such block of securities, or

(ii) A security purchased in good faith by or for the account of the person effecting the transaction for the purpose of stabilizing the market price of securities of the class being distributed or to cover an over-allotment or other short position created in connection with such distribution.

(b) Each person participating in the transaction must qualify on an individual basis for an exemption pursuant to this rule.

§ 240.16a–8 Intra-trust transactions.

Transactions on behalf of a settlor or beneficiary within a trust conducted by the trustee without the prior approval or direction of the settlor or beneficiary, are exempt from the provisions of section 16(a) of the Act. This exemption does not extend to distributions from a trust.

§ 240.16a–9 Odd-lot dealers.

Securities purchased or sold by an odd-lot dealer in odd lots as reasonably necessary to carry on odd-lot transactions or in round lots to offset odd-lot transactions previously or simultaneously executed or reasonably anticipated in the usual course of business, shall be exempt from the provisions of section 16(a), with respect to participation by such odd-lot dealer in such transaction.

§ 240.16a–10 Exemptions under section 16(a).

Except as provided in § 240.16a–6, any transaction which has been or shall be exempted by the Commission from the requirements of section 16(a) shall, insofar as it is otherwise subject to the provisions of section 16(b), be likewise exempted from section 16(b).

5. Sections 240.16b–1 through 240.16b–9 are revised, §§ 240.16b–10 and 240.16b–11 are removed and the undesignated center heading preceding them is republished to read as follows:

Note: Two alternatives are proposed for § 240.16b–6(d).

Exemption of Certain Transactions From Section 16(b)

§ 240.16b–1 Transactions approved by regulatory authority.

(a) Any purchase and sale, or sale and purchase, of a security shall be exempt from the operation of section 16(b) of the Act, if the transaction is effected by an investment company registered under the Investment Company Act of 1940 and both the purchase and sale of such security have been exempted from the provisions of section 17(a) of that Act by rule or order of the Commission entered pursuant to section 17 of the Act.

(b) Any purchase and sale, or sale and purchase, of a security shall be exempt from the provisions of section 16(b) of the Act if:

(1) The person effecting such transaction is either a holding company registered under the Public Utility Holding Company Act of 1935 or a subsidiary thereof; and

(2) Both the purchase and the sale of such security have been approved or permitted by the Commission pursuant to the applicable provisions of that Act or the rules and regulations thereunder.

(c) Any acquisition of securities made in exchange for other securities shall be exempt from the provisions of section 16(b) of the Act if:

(1) The securities are acquired from the issuer;

(2) The person acquiring the securities is subject to one or more of the provisions of Part I of the Interstate Commerce Act;

(3) The person acquiring the securities is:

(i) Subject to an order of, or has accepted a condition imposed by, the Interstate Commerce Commission in an approval of a unification, merger or acquisition of control pursuant to section 5(2) of the Interstate Commerce Act, requiring such person to dispose of all securities of the same class as those exchanged for the securities acquired; and

(ii) The issuance of the securities acquired by such person has been approved by the Interstate Commerce Commission pursuant to section 20(a) of the Interstate Commerce Act; and

(4) The person acquiring voting equity securities has transferred all voting rights on an unrestricted basis to one or more banks and such transfer remains in effect until such securities are disposed of by such person.

§ 240.16b–2 Subscription rights.

(a) Any sale of a subscription right to acquire any subject security of the same issuer shall be exempt from the provisions of section 16(b) of the Act if:

(1) Such subscription right is acquired, directly or indirectly, from the issuer without the payment of consideration;

(2) Such subscription right by its terms expires within 45 days after the issuance thereof;

(3) Such subscription right by its terms is issued on a pro rata basis to all holders of the beneficiary security of the issuer; and

(4) A registration statement under the Securities Act of 1933 (15 U.S.C. 77a *et. seq.*) is in effect as to each subject security, or the terms of any exemption from such registration have been met in respect to each subject security.

(b) When used within this Section the following terms shall have the meaning indicated:

(1) The term "subscription right" means any warrant or certificate

evidencing a right to subscribe to or otherwise acquire an equity security;

(2) The term "beneficiary security" means a security registered pursuant to section 12 of the Act to the holders of which a subscription right is granted; and

(3) The term "subject security" means a security that is the subject of a subscription right.

(c) Notwithstanding anything contained herein to the contrary, if a person purchases subscription rights for cash or other consideration, then a sale by such person of subscription rights otherwise exempted by this Section will not be so exempted to the extent of such purchases for consideration within the 6-month period preceding or following such sale.

§ 240.16b-3 Benefit plans.

(a) *Exempt transactions.* The following transactions by a director or officer shall be exempt from the operation of section 16(b) of the Act if they occur pursuant to a plan which satisfies the conditions of this rule:

(1) The acquisition of an option, warrant, right, or shares of stock;

(2) The expiration, cancellation or surrender to the issuer of a stock option or stock appreciation right; and

(3) The surrender or delivery to the issuer of shares of its stock as payment for the exercise of an option, warrant or right with respect to shares of the same class.

(b) *Disinterested administration.* (1) The plan shall satisfy one of the following conditions:

(i) The plan is administered solely by a committee of directors, the majority of which are disinterested persons; or

(ii) The plan by its terms:

(A) Predetermines which officers and directors may receive grants;

(B) Predetermines the timing of the grants for all participants;

(C) Predetermines the amount of securities to be granted to individual participants (which shall be governed by a formula or standardized criteria for all participants, such as earnings of the issuer, value of the securities, years of service, etc.);

(D) Provides that no discretion, concerning the administration of the plan, shall be afforded to a person who is not a disinterested person; and

(E) Provides that the requirements described in paragraph (b)(1)(ii) (A) through (C) of this section shall not be amended more than once every six months.

(2) Compliance with this paragraph shall not be necessary with respect to any option or right granted, or other equity security acquired, prior to the date of the first registration of an equity security under section 12 of the Act.

(3) Plans that permit participation of persons other than those subject to section 16 of the Act need not comply with this paragraph regarding administration of the plan as it relates to those persons not subject to Section 16 of the Act.

(c) *Definitions.* Unless the context otherwise requires, all terms used in this rule shall have the same meaning as in the Act, the General Rules and Regulations thereunder, or the Rules under this section 16. In addition, the following definitions apply:

(1) The term "plan" shall mean an option, bonus, appreciation, profit sharing, retirement, incentive, thrift, savings or similar plan that meets the following conditions:

(i) The plan must be set forth in a written document describing the means or basis for determining the eligibility of individuals to participate and either the price at which the securities may be offered or the method by which the price or the amount of the award is to be determined; and

(ii) The plan must provide, with respect to any option or similar right (including a stock appreciation right) offered pursuant to the plan, that such option or right is not transferable other than by will or the laws of descent and distribution, and that it is exercisable during the employee's lifetime only by the employee or the employee's guardian or legal representative, but not for at least six months after grant, unless death or disability of the grantee occurs before the expiration of the six-month period.

(2) The term "exercise of an option, warrant or right" contained in paragraph (a) of this section shall not include:

(i) The making of an election to receive under any plan compensation in the form of stock or credits therefor, provided that such election is made either prior to the making of the award or prior to the fulfillment of all conditions to the receipt of the compensation and, provided further, that such election is irrevocable until at least six months after termination of employment;

(ii) The subsequent crediting of such stock;

(iii) The making of any election as to the time for delivery of such stock after termination of employment, provided that such election is made at least six months prior to any such delivery;

(iv) The fulfillment of any condition to the absolute right to receive such stock; or

(v) The acceptance of certificates for shares of stock.

(3) The term "disinterested person" used in paragraph (b) of this rule shall mean an administrator of a plan who

(i) During one year prior to the time of exercising discretion in administering the plan, the person has not been eligible for selection as a person to whom equity securities may be allocated or granted pursuant to the plan (or any other plan of the issuer or any of its affiliates) entitling the participants therein to acquire equity securities; and

(ii) Is not so eligible for three years after such exercise: *provided, however,* that a disinterested person may participate in a plan that satisfies the conditions of paragraph (b)(1)(ii) of this section if awards are not subject to the discretion of any person.

(d) *Cash Settlements of Stock Appreciation Rights.* Any transaction involving the exercise and cancellation of a stock appreciation right issued pursuant to a plan (whether or not the transaction also involves the related surrender and cancellation of a stock option), and the receipt of cash in complete or partial settlement of that right, shall be exempt from the operation of section 16(b) of the Act, as not comprehended within the purpose of that section, if all the following conditions are met:

(1) *Information about the issuer.* (i) The issuer of the stock appreciation right has been subject to the reporting requirements of section 13 of the Act for at least a year prior to the transaction and has filed all reports and statements required to be filed pursuant to that section during that year.

(ii) The issuer of the stock appreciation right on a regular basis does release for publication quarterly and annual summary statements of sales and earnings. This condition shall be deemed satisfied if the specified financial data appears—

(A) on a wire service,

(B) in a financial news service,

(C) in a newspaper of general circulation, or

(D) is otherwise made publicly available.

(2) *Administration of the plan.* (i) The plan shall be administered in the manner specified in paragraph (b)(1)(i) of this section.

(ii) The board or committee shall have sole discretion either

(A) to determine the form in which payment of the right will be made (i.e., cash, securities, or any combination thereof) or

(B) to consent to or disapprove the election of the participant to receive cash in full or partial settlement of the

right. Such consent or disapproval may be given at any time after the election to which it relates.

(iii) Any election by the participant to receive cash in full or partial settlement of the stock appreciation right, as well as any exercise by the participant of the stock appreciation right for such cash, shall be made during the period beginning on the third business day following the date of release of the financial data specified in paragraph (d)(1)(ii) of this section and ending on the twelfth business day following such date. This paragraph (d)(3)(iii) of this section, however, shall not apply to any exercise by the participant of a stock appreciation right for cash where the date of exercise:

(A) Is automatic or fixed in advance under the plan; and

(B) Is outside the control of the participant.

§ 240.16b–4 Issuer redemptions.

Any acquisition of an equity security (other than a convertible security or right to purchase a security) by a director or officer of the issuer of such security shall be exempt from the operation of section 16(b) upon condition that:

(a) The equity security is acquired by way of redemption of another security of an issuer, substantially all of whose assets other than cash (or government bonds) consist of securities of the issuer of the equity security so acquired;

(b) The acquired equity security:

(1) Represented substantially and in practical effect a stated or readily ascertainable amount of such equity security;

(2) Had a value which was substantially determined by the value of the redeemed equity security; and

(3) Conferred upon the holder the right to receive the acquired equity security without the payment of any consideration other than the security redeemed;

(c) No security of the same class as the security redeemed was acquired by the director or officer within six months prior to such redemption or is acquired within six months after such redemption; and

(d) The issuer of the acquired equity security has recognized the applicability of paragraph (a) of this section by appropriate corporate action.

§ 240.16b–5 Bona fide gifts and inheritance.

Both acquisitions and dispositions of equity securities shall be exempt from the operation of section 16(b) if they are:

(a) Bona fide gifts; or

(b) Transfers of securities by will or the laws of descent and distribution.

§ 240.16b–6 Derivative securities.

(a) The establishment of or increase in a call equivalent position or liquidation of or decrease in a put equivalent position shall be deemed a purchase of the underlying security for purposes of section 16(b) of the Act, and the establishment of or increase in a put equivalent position or liquidation of or decrease in a call equivalent position shall be deemed a sale of the underlying securities for purposes of section 16(b) of the Act.

(b) The closing of a derivative security position as a result of its exercise shall be exempt from the operation of section 16(b) of the Act, and the acquisition of underlying securities due to the exercise or conversion of a call equivalent position or the disposition of underlying securities due to the exercise of a put equivalent position shall be exempt from the operation of section 16(b) of the Act; *Provided, however,* that the acquisition or disposition of securities from the exercise of an out-of-the-money option, warrant, or right shall not be exempt.

(c) The disposition of a security received from the exercise of a derivative security awarded pursuant to a plan satisfying § 240.16b–3 shall be exempt from the provisions of section 16(b) if the disposition is pursuant to a plan or agreement for merger or consolidation, or reclassification of the issuers' securities, or for the exchange of its securities for the securities of another person which has acquired its assets, or which is in control, as defined in section 368(c) of the Internal Revenue Code of 1986, of a person which has acquired its assets, where the terms of such plan or agreement are binding upon all stockholders of the issuer except to the extent that dissenting stockholders may be entitled, under statutory provisions of provisions contained in the certificate of incorporation, to receive the appraised or fair value of their holdings.

Alternative A

* * * * *

(d) In determining the short-swing profit recoverable pursuant to section 16(b) of the Act from transactions involving the purchase and sale or sale and purchase of derivative and underlying securities the following rules apply:

(1) Short-swing profits in transactions involving the purchase and sale or sale and purchase of derivative securities that have identical characteristics (*e.g.*, purchases and sales of call options of the same strike price and expiration date, or purchases and sales of the same series of convertible debentures) shall be measured by the actual prices paid or received in the short-swing transactions.

(2) Short-swing profits in transactions involving the purchase and sale or sale and purchase of derivative securities having different characteristics (*e.g.*, the purchase of a call option and the sale of convertible debenture) or derivative securities and underlying securities shall not exceed the difference in price of the underlying security from the time of purchase or sale to the time of sale or purchase. Such profits may be approximated by measuring the short-swing profits that would have been realized had the subject transactions involved purchases and sales solely of the derivative security that was actually purchased or solely of the derivative security that was actually sold, valued as of the time of the matched purchase or sale, and calculated for the lesser of the number of ultimate underlying securities covered by the derivative security actually purchased or sold.

(3) Short-swing profits shall, to the extent practicable and necessary in order to provide an equitable measure of short-swing profit, be measured through the application of valuation techniques that adjust the measure of short-swing profit recovery to account for changes in—

(i) The price of the underlying equity,

(ii) The volatility of the underlying equity,

(iii) Prevailing interest rates,

(iv) The strike price, conversion price or conversion ratio of the derivative security

(v) The time to expiration of the derivative security, as well as

(vi) Any other factors that the court may deem relevant.

Alternative B

* * * * *

(d) In determining the short-swing profit recoverable, pursuant to section 16(b) of the Act, from the purchase and sale or sale and purchase of two different types of derivative securities or of derivative securities and underlying equity securities, the following rules apply:

(1) In the absence of a contrary judicial determination pursuant to paragraph (d)(2) of this section, the measure of short-swing profit liability shall be the difference in price of the underlying security from the time of purchase or sale to the time of sale or purchase.

(2) Nothing in this rule shall preclude courts from using valuation methods that are different than those contained in this rule, when the facts so require in

order to provide an equitable measure of profit.

(e) Any profit derived from writing an option upon expiration of the option, where the expiration was within six months of the writing of the option, shall be recoverable under section 16(b) of the Act.

§ 240.16b-7 Mergers, reclassifications, and consolidations.

(a) The following transactions shall be exempt from the provisions of section 16(b):

(1) The acquisition or disposition of a security of a company, pursuant to a merger or consolidation, in exchange for a security of a company which, prior to said merger or consolidation, owned 85 percent or more of the equity securities of all other companies involved in the merger or consolidation (except in the case of consolidation, owned 85 percent of the resulting company); or

(2) The acquisition or disposition of a security of a company, pursuant to a merger or consolidation, in exchange for a security of a company which, prior to said merger or consolidation, held over 85 percent of the combined assets of all the companies undergoing merger or consolidation, computed according to their book values prior to the merger or consolidation as determined by reference to their most recent available financial statements for a 12 month period prior to the merger or consolidation.

(b) A merger within the meaning of this rule shall include the sale or purchase of substantially all the assets of one company by another in exchange for stock which is then distributed to the security holders of the company that sold its assets.

(c) Notwithstanding the foregoing, if an officer, director or stockholder shall make any purchase (other than a purchase exempted by a rule under section 16(b) of the Act) of a security in any company involved in the merger or consolidation and any sale (other than a sale exempted by a rule under section 16(b) of the Act) of a security in any other company involved in the merger or consolidation within any period of less than 6 months during which the merger or consolidation took place, the exemption provided by this rule shall be unavailable.

§ 240.16b-8 Voting trusts.

Any acquisition or disposition of an equity security or certificate involved in the deposit or withdrawal from a voting trust or deposit agreement shall be exempt from the operation of section 16(b) of the Act if substantially all of the assets held under the voting trust or deposit agreement immediately after the deposit or immediately prior to the withdrawal consisted of equity securities of the same class as the security deposited or withdrawn: *Provided, however,* that this section shall not apply to the extent that there shall have been a purchase or sale of an equity security of the class deposited and a sale or purchase of any certificate representing such equity security (other than the actual deposit or withdrawal) transaction within a period of less than 6 months during which the deposit or withdrawal took place.

§ 240.16b-9 Dividend or interest reinvestment plans.

Any acquisition of securities resulting from reinvestment of dividends or interest shall be exempt from section 16(b) if it is made pursuant to a plan providing for the regular reinvestment of such dividends or interest; *Provided, however,* that the plan shall be made available on the same terms to all holders of securities of the class on which the reinvested dividends or interest are being paid.

6. Sections 240.16c–1 through 16c–3 are revised, and §§ 240.16c–4 and 16d–1 are added and the undesignated center heading is republished to read as follows:

Exemption of Certain Securities From Section 16(c)

§ 240.16c-1 Brokers.

Any security shall be exempt from the operation of section 16(c) of the Act to the extent necessary to render lawful the execution by a broker of an order for an account in which the broker has no direct or indirect interest.

§ 240.16c-2 Transactions effected in connection with a distribution.

Any security shall be exempt from the operation of section 16(c) of the Act to the extent necessary to render lawful any sale made by or on behalf of a dealer in connection with a distribution of a substantial block of securities, where the sale is represented by an over-allotment in which the dealer is participating as a member of an underwriting group, or the dealer or a person acting on his behalf intends in good faith to offset such sale with a security to be acquired by or on behalf of the dealer as a participant in an underwriting, selling, or soliciting-dealer group of which the dealer is a member at the time of the sale, whether or not the security to be so acquired is subject to a prior offering to existing security holders or some other class of persons.

§ 240.16c-3 Exemption of sales of securities to be acquired.

(a) Whenever any person is entitled, as an incident to his ownership of an issued security and without the payment of consideration, to receive another security "when issued" or "when distributed," the sale of the security to be acquired shall be exempt from the operation of section 16(c) provided, that:

(1) The sale is made subject to the same conditions as those attaching to the right of acquisition;

(2) Such person exercises reasonable diligence to deliver such security to the purchaser promptly after his right of acquisition matures; and

(3) Such person reports the sale on the appropriate form for reporting transactions by persons subject to section 16(a).

(b) This rule shall not be construed as exempting transactions involving both a sale of a security "when issued" or "when distributed" and a sale of the security by virtue of which the seller expects to receive the "when-issued" or "when-distributed" security, if the two transactions combined result in a sale of more units than the aggregate of those owned by the seller plus those to be received by the seller pursuant to the seller's right of acquisition.

§ 240.16c-4 Derivative securities.

(a) Establishing or increasing a put equivalent position shall not be prohibited under section 16(c) of the Act, provided that the securities underlying the put equivalent position so transacted do not exceed the amount of underlying securities otherwise owned.

(b) This rule shall become unavailable when a person sells underlying securities such that the securities underlying the put equivalents exceed the amount of underlying securities otherwise owned.

§ 240.16d-1 Market maker reporting.

Transactions exempt pursuant to section 16(d) of the Act, need not be reported on Forms 3, 4 or 5.

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for Part 249 continues to read as follows:

Authority: Securities Exchange Act of 1934, 15 U.S.C. 78a, unless otherwise noted.

2. By revising Item 10 of Form 10–K in § 249.310 to read as follows:

Item 10. Directors and Executive Officers of the Registrant

Furnish the information required by Items 401 and 405 of Regulation S–K. (§§ 229.401 and 229.405 of this chapter).

3. By revising the last sentence in § 249.104 to read as follows:

§ 249.104 Form 4, statement of changes in beneficial ownership of securities.

* * * Failure to disclose the information requested by this form, except for social security account numbers, may result in civil or criminal action against the persons involved for violations of provisions of the Federal securities laws and the rules promulgated thereunder.

4. By adding 249.105 to Subpart B to read as follows:

§ 249.105 Form 5 annual reconciliation of beneficial ownership of securities.

(a) This form shall be filed pursuant to Rule 16a–1(a) (17 CFR 240.16a–1(a)) for annual reconciliation of beneficial ownership of securities required to be filed pursuant to section 16(a) of the Securities Exchange Act of 1934. Under sections 16(a) and 23(a) of the Securities Exchange Act of 1934; sections 17(a) and 20(a) of the Public Utility Holding Company Act of 1935; and sections 30(f) and 38 of the Investment Company Act of 1940, and the rules and regulations thereunder, the Commission is authorized to solicit the information required to be supplied by this form by officers, directors and certain security holders of registered issuers.

(b) Disclosure of the information specified in this form is mandatory, except for social security account numbers, disclosure of which is voluntary. The information will be used for the primary purpose of determining and disclosing the holdings of officers, directors and beneficial owners of registered companies. This statement will be made a matter of public record. Therefore, any information given will be available for inspection by any member of the public.

(c) Because of the public nature of the information, the Commission can utilize it for a variety of purposes, including referral to other governmental authorities or securities self-regulatory organizations for investigatory purposes or in connection with litigation involving the Federal securities laws or other civil, criminal or regulatory statutes or provisions. Social security account numbers, if furnished, will assist the Commission in identifying officers, directors and security holders and, therefore, in promptly processing statements of beneficial ownership of securities on this form.

(d) Failure to disclose the information requested by this form, except for social security account numbers, may result in civil or criminal action against the persons involved for violation of provisions of the Federal securities laws and the rules promulgated thereunder.

5. By revising Forms 3 and 4 and adding a new Form 5.

Note: Forms 3 and 4 are not and Form 5 will not be included in the Code of Federal Regulations [§§ 249.103, 249.104 and 249.105].

Form 3—Initial Statement of Beneficial Ownership of Securities Special Instructions For Completing Form 3

Under sections 16(a) and 23(a) of the Securities Exchange Act of 1934; sections 17(a) and 30(a) of the Public Utility Holding Company Act of 1935; and sections 30(f) and 38 of the Investment Company Act of 1940, and the rules and regulations thereunder, the Commission is authorized to solicit the information required to be supplied by this form by officers, directors and certain security holders of a registered issuer.

Disclosure of the information specified in this form is mandatory, except for social security account numbers, disclosure of which is voluntary. The information will be used for the primary purpose of determining and disclosing the holdings of officers, directors and beneficial owners of registered companies. This statement will be made a matter of public record. Therefore, any information given will be available for inspection by any member of the public.

Because of the public nature of the information, the Commission can utilize it for a variety of purposes, including referral to the other governmental authorities or securities self-regulatory organizations for investigatory purposes or in connection with litigation involving the Federal securities laws or other civil, criminal or regulatory statutes or provisions. Social security account numbers, if furnished, will assist the Commission in identifying officers, directors, and security holders and, therefore, in promptly processing initial statements of beneficial ownership of securities.

Failure to disclose the information requested by this form, except for social security account numbers, may result in civil or criminal action against the persons involved for violation of provisions of the Federal securities laws and rules promulgated thereunder.

General Instructions

1. When and Where Statements are To Be Filed

(a) Within 10 days after the occurrence of any event which requires the filing of the statement on this form, three copies, at least one of which shall be manually signed, shall be filed with the Securities and Exchange Commission, Washington, DC 20549. The events which require the filing of a statement on this form are set forth in section 16(a) of the Securities Exchange Act of 1934, section 17(a) of the Public Utility Holding Company Act of 1935 and section 30(f) of the Investment Company Act of 1940. At the same time, one duplicate original of the statement shall be filed with each exchange on which any class of equity securities of the company is registered, unless the company has, in accordance with Rule 16a–3(c), designated a single exchange to receive such statements. One duplicate original also shall be filed with the company pursuant to Rule 16a–3(e). The filing date is the date of receipt at the Commission except as otherwise provided by Rule 16a–3(g).

(b) Acknowledgment of receipt of the statement by the Commission may be obtained by enclosing a self-addressed, stamped postal card identifying the statement filed.

2. Separate Statement for Each Company—Exception

A separate statement shall be filed with respect to the securities of each company, except that a single statement shall be filed with respect to the securities of a registered public utility holding company and of all of its subsidiary companies.

3. Date as of Which Information Is To Be Given

Information as to the amount of securities beneficially owned, including those subject to derivative securities, shall be given as of the date on which the event occurred that requires the filing of the statement on this form.

4. Classes of Securities To Be Reported

(a) Persons reporting pursuant to section 16(a) of the Securities Exchange Act of 1934 shall include information as to their beneficial ownership of all classes of equity securities of the company even though one or more of such classes may not be registered pursuant to section 12 of the Act.

(b) Persons reporting pursuant to section 17(a) of the Public Utility Holding Company Act of 1935 shall include information as to their beneficial ownership of all classes of securities of the registered holding company and of all of its subsidiary companies.

(c) Persons reporting pursuant to section 30(f) of the Investment Company Act of 1940 shall include information as to their beneficial ownership of all classes of securities of the registered closed-end investment company (other

than "short-term paper" as defined in section 2(a)(38) of the Act).

5. Statement Required Although No Securities are Owned

If any person required to file a statement on this form does not own any securities required to be reported, a statement shall be made on this form to report that fact.

6. Reporting of Ownership in Certain Cases

(a) When two or more securities are owned as a unit and both are required to be reported, report each security separately and describe the unit relationship in the space provided for explanation on the form. If one or more of the securities comprising the unit is not required to be reported, the other security or securities shall be reported separately and the unit relationship described as indicated above.

(b) Securities owned indirectly shall be reported on separate lines from those owned directly and also from those owned through a different type of indirect ownership.

(c) In reporting the ownership of common stock that is convertible into another type of common stock, the stock should be listed in Table I with the number of shares or units subject to the conversion privilege and the conversion price per share or unit set forth in the explanation space. Other convertible securities shall be reported as derivative securities.

7. Title of Securities

The title of securities in Column 1 of Table I and Columns 1 and 2 of Table II shall be stated as specifically as possible; for example, "Common Stock," "Class A Common Stock," "$6 Convertible Preferred Stock," etc. Include the name of the issuer of the securities if it is a public utility holding company or a subsidiary thereof.

8. Statement of Amounts of Securities

(a) In stating amounts of securities in Column 2 of Table I and Column 3 of Table II, give the number of securities, or if debt is required to be reported, give the face amount of the debt securities.

(b) In stating amounts of securities beneficially owned through a partnership, corporation, trust, or other entity, the reporting person shall indicate only the amount of securities representing his proportionate interest in the holdings of the partnership, corporation, trust, or other entity. See Instruction 9(b) below. Alternatively, at the option of the reporting person, the entire amount of the entity's interest may be reported.

9. Type of Ownership of Securities

(a) The following securities shall be reported as owned directly: Securities held in the name of the reporting person or in the name of a bank, broker, or nominee for the account of the reporting person; and securities held in joint tenancy, tenancy in common, tenancy by the entirety, or as community property.

(b) Securities that are beneficially owned, but that are not owned directly, *e.g.*, through a spouse, child, or other member of the reporting person's immediate family, shall be reported as indirectly owned; "beneficial owner" and "immediate family" are defined in Rules 16a–1 (a) and (b), respectively. Furthermore, securities holdings attributed to a reporting person due to the person's interest in a partnership, corporation, trust, or other entity also are considered to be owned indirectly.

(c) Beneficial ownership of the securities reported on this form may be disclaimed. See Rule 16a–1(a)(4).

10. Type of Derivative Security

The type of derivative security owned shall be reported in Column 1 of Table II. If appropriate, state whether it represents a right to buy, a right to sell, an obligation to buy, or an obligation to sell, the securities subject to the derivative security.

11. Inclusion of Additional Information

A statement may include any additional information or explanation deemed relevant by the person filing the statement.

12. Signature

If the statement is filed for a corporation, partnership, trust or other entity, the name of the organization shall appear over the signature of the officer or other person authorized to sign the statement. If the statement is filed for an individual, it shall be signed by the individual or specifically on behalf of the individual by a person authorized to sign for the individual. If signed on behalf of the individual by another person, the authority of such person to sign the statement shall be confirmed to the Commission in writing as soon as practicable by the individual for whom the statement is filed, unless such a confirmation which is still in effect is on file with the Commission.

BILLING CODE 8010-01-C

Form 4—Statement of Changes in Beneficial Ownership of Securities Special Instructions for Completing Form 4

Under sections 16(a) and 23(a) of the Securities Exchange Act of 1934; sections 17(a) and 20(a) of the Public Utility Holding Company Act of 1935; and sections 30(f) and 38 of the Investment Company Act of 1940, and the rules and regulations thereunder, the Commission is authorized to solicit the information required to be supplied by this form by officers, directors and certain security holders of registered issuers.

Disclosure of the information specified in this form is mandatory, except for social security account numbers, disclosure of which is voluntary. The information will be used for the primary purpose of determining and disclosing the holdings of officers, directors and beneficial owners of registered companies. This statement will be made a matter of public record. Therefore, any information given will be available for inspection by any member of the public.

Because of the public nature of the information, the Commission can utilize it for a variety of purposes, including referral to other governmental authorities or securities self-regulatory organizations for investigatory purposes or in connection with litigation involving the Federal securities laws or other civil, criminal or regulatory statutes or provisions. Social security account numbers, if furnished, will assist the Commission in identifying officers, directors and security holders and, therefore, in promptly processing statements of changes in beneficial ownership of securities.

Failure to disclose the information requested by this form, except for social security account numbers, may result in civil or criminal action against the persons involved for violation of provisions of the Federal securities laws and rules promulgated thereunder.

General Instructions

1. When and Where Statements Are To Be Filed

(a) On or before the 10th day after the end of the month in which any change in beneficial ownership has occurred, three copies of the statement on this form, at least one of which is manually signed, shall be filed with the Securities and Exchange Commission, Washington, DC 20549. At the same time, one duplicate original of the statement shall be filed with each exchange on which any class of equity securities of the company is registered, unless the company has, in accordance with Rule 16a–3(c), designated a single exchange to receive such statements. One duplicate original also shall be filed with the company pursuant to Rule 16a–3(e). The filing date is the date of receipt at the Commission except as otherwise provided.

(b) Acknowledgement of receipt of the statement by the Commission may be obtained by enclosing a self-addressed, stamped postal card identifying the statement filed.

2. Separate Statement for Each Company—Exception

A separate statement shall be filed with respect to the securities of each company, except that a single statement shall be filed with respect to the securities of a registered public utility holding company and all of its subsidiary companies.

3. Classes of Securities To Be Reported

(a) Persons reporting pursuant to section 16(a) of the Securities Exchange Act of 1934 shall include information required to be reported as to certain changes in the amount of securities beneficially owned, changes in the nature of beneficial ownership, and the amount of their beneficial ownership at the end of the month of all classes of equity securities of the company, even though one or more of such classes may not be registered pursuant to section 12 of the Act.

(b) Persons reporting pursuant to section 17(a) of the Public Utility Holding Company Act of 1935 shall include information required to be reported as to certain changes in the amount of securities beneficially owned, changes in the nature of beneficial ownership and the amount of their beneficial ownership at the end of the month of all classes of securities of the registered holding company and all of its subsidiary companies.

(c) Persons reporting pursuant to section 30(f) of the Investment Company Act of 1940 shall include information required to be reported as to certain changes in the amount of securities beneficially owned, changes in the nature of beneficial ownership and the amount of their beneficial ownership at the end of the month of all classes of securities of the registered closed-end investment company (other than "short-term paper," as defined in section 2(a)(38) of the Act).

4. Transactions to Be Reported

The following transactions which result in a change of beneficial ownership should be reported on Form 5 rather than this form: Stock splits and stock dividends occurring during the fiscal year; small acquisitions that are to be reported on a deferred basis pursuant to Rule 16a–6; and transactions conducted during the company's fiscal year that were exempt from the provisions of section 16(b) of the Exchange Act by operation of any rule pursuant to such section. All other transactions which result in a change of beneficial ownership in the company's securities shall be reported on this form, except those that are excluded from the reporting and liability provisions of section 16 by operation of Rule 16a–5, 16a–7, 16a–8 or 16a–9. Transactions required to be reported on this form shall be reported even though acquisitions and dispositions during the month are equal, or the change involves only the nature of ownership, such as a change from indirect ownership through a trust or corporation to direct ownership by the reporting person.

5. Reporting of Transactions

(a) When a transaction relates to the acquisition or disposition of two or more securities as a unit and both are required to be reported, report each security separately and describe the unit relationship in the space provided for explanation. If one or more of the securities comprising the unit is not required to be reported, the other security or securities shall be reported separately and the unit relationship described as indicated above.

(b) Securities owned indirectly shall be reported on separate lines from those owned directly and also from those owned through a different type of indirect ownership.

(c) In reporting the acquisition or disposition of common stock that is convertible into another type of common stock, the transaction should be listed in Table I with the number of shares or units subject to the conversion privilege and the conversion price per share or unit set forth in the explanation space. Other convertible securities shall be reported as derivative securities.

6. Title of Securities

The title of securities in Column 1 of Table I and Columns 1 and 3 of Table II shall be stated as specifically as possible: for example, "Common stock," "Class A stock," "$6 Convertible Preferred Stock," etc. Include the name of the issuer of the securities if it is a public utility holding company or a subsidiary thereof.

7. Statement of Amounts of Securities

(a) In stating amounts of securities in Columns 3, 4 and 7 of Table I and

Columns 4 and 7 of Table II, give the number of securities, or if debt is required to be reported, give the face amount of the debt securities.

(b) In stating amounts of securities beneficially owned through a partnership, corporation, trust, or other entity, the reporting person shall indicate only the amount of securities representing the proportionate interest of the person in the transaction conducted by the partnership, corporation, trust, or other entity. Alternatively, at the option of the reporting person, the entire amount of the entity's interest may be reported. See Instruction 9(b) below.

8. Purchase or Sale Price of Securities

(a) If any transaction reported in Table I or II involved a purchase or sale of securities for cash or obligation to pay cash, state in Column 6 the purchase price per share or other unit, exclusive of brokerage commissions or other costs of execution. If the transaction was only partly for cash and partly for other consideration, state the amount of cash per share or other unit and the nature of the additional consideration. If the transaction did not involve cash, state the nature of the consideration given or received.

(b) When two or more securities are purchased or sold as a unit, the purchase or sale price of the unit shall be stated in Column 6 with respect to one of the securities and cross-referenced with respects to the other security or securities.

9. Type of Ownership of Securities

(a) The following securities shall be reported as owned directly: Securities held in the name of the reporting person or in the name of a bank, broker or nominee for the account of the reporting person; and securities held in joint tenancy, tenancy in common, tenancy by the entirety or as community property.

(b) Securities that are beneficially owned, but that are not owned directly, *e.g.*, through a spouse, child, or other member of the reporting person's immediate family, shall be reported as indirectly owned; "beneficial owner" and "immediate family" are defined in Rules 16a–1(a) and (b), respectively. Furthermore, securities holdings attributed to a reporting person due to the interest of the person in a partnership, corporation, trust, or other entity also are considered to be owned indirectly.

(c) Beneficial ownership of the securities reported on this form may be disclaimed. See Rule 16a–1(a)(4).

10. Beneficial Ownership at End of Month

Beneficial ownership at the end of the month covered by the statement (Column 7 of Tables I and II) of all accounts required to be reported shall be shown even though there has been no change during the month in the ownership of securities of one or more classes or accounts. For example, a person reporting a transaction relating to common stock shall in addition to providing all the information in Table I relating to such transaction, report the amount of preferred stock, convertible debentures, etc., owned at the end of the month.

11. Type of Derivative Security

The type of derivative security owned shall be reported in Column 1 of Table II. If appropriate, state whether the derivative security represents a right to buy, a right to sell, an obligation to buy, or an obligation to sell, the underlying securities; for example, "Purchase of Put," "Sale of Put," "Purchase of Call," "Sale of Call," etc.

12. Inclusion of Additional Information

A statement may include any additional information or explanation deemed relevant by the person filing the statement.

13. Signature

If the statement is filed for a corporation, partnership, trust, etc., the name of the organization shall appear over the signature of the officer or other person authorized to sign the statement. If the statement is filed for an individual, it shall be signed by the individual or specifically on behalf of the individual by a person authorized to sign for the individual. If signed on behalf of the individual by another person, the authority of such person to sign the statement shall be confirmed to the Commission in writing as soon as practicable by the individual for whom the statement is filed, unless such a confirmation which is still in effect is on file with the Commission.

Form 5—Annual Reconciliation of Beneficial Ownership of Securities

Special Instructions for Completing Form 5

Under sections 16(a) and 23(a) of the Securities Exchange Act of 1934; sections 17(a) and 30(a) of the Public Utility Holding Company Act of 1935; and sections 30 (f) and 38 of the Investment Company Act of 1940, and the rules and regulations thereunder, the Commission is authorized to solicit the information required to be supplied by this form by officers, directors and certain security holders of registered issuers.

Disclosure of the information specified in this form is mandatory, except for social security account numbers, disclosure of which is voluntary. The information will be used for the primary purpose of determining and disclosing the holdings of officers, directors and beneficial owners of registered companies. This statement will be made a matter of public record. Therefore, any information given will be available for inspection by any member of the public.

Because of the public nature of the information, the Commission can utilize it for a variety of purposes, including referral to other governmental authorities or securities self-regulatory organizations for investigatory purposes or in connection with litigation involving the Federal securities laws or other civil, criminal or regulatory statutes or provisions. Social security account numbers, if furnished, will assist the Commission in identifying officers, directors and security holders and, therefore, in promptly processing statements of beneficial ownership of securities on this form.

Failure to disclose the information requested by this form, except for social security account numbers, may result in civil or criminal action against the persons involved for violation of provisions of the Federal securities laws and the rules promulgated thereunder.

General Instructions

1. When and Where Statements Are To Be Filed

(a) On or before the 30th day after the end of the company's fiscal year, three copies of the statement on this form, at least one of which is manually signed, shall be filed with the Securities and Exchange Commission, Washington, DC 20549. At the same time, one duplicate original of the statement shall be filed with each exchange on which any class of equity securities of the company is registered, unless the company has in accordance with Rule 16a–3(c), designated a single exchange to receive such statements. One duplicate original also shall be filed with the company pursuant to Rule 16a–3(e). The filing date is the date of receipt at the Commission except as otherwise provided by Rule 16a–3(g).

(b) Acknowledgment of receipt of the statement by the Commission may be obtained by enclosing a self-addressed, stamped postal card identifying the statement filed.

2. Separate Statement for Each Company—Exception

A separate statement shall be filed with respect to the securities of each company, except that a single statement shall be filed with respect to the securities of a registered public utility holding company and all of its subsidiaries.

3. Classes of Securities To Be Reported

(a) Persons reporting pursuant to section 16(a) of the Securities Exchange Act of 1934 shall include information as to transactions required to be reported on this form in all classes of equity securities of the company even though one or more of such classes may not be registered pursuant to section 12 of the Act.

(b) Persons reporting pursuant to section 17(a) of the Public Utility Holding Company Act of 1935 shall include information as to transactions required to be reported on this form in all classes of securities of the registered holding company and all of its subsidiary companies.

(c) Persons reporting pursuant to section 30(f) of the Investment Company Act of 1940 shall include information as to transactions required to be reported on this form in all classes of securities of the registered closed-end investment company (other than "short-term paper", as defined in section 2(a)(38) of the Act).

4. Statement Required Even if No Transactions Have Been Conducted or No Securities Are Owned

A statement on this form is required regardless of whether the reporting person conducted any transactions in the company's securities during the company's fiscal year. See Rule 16a–3(f). If any person required to file a statement on this form does not own any securities required to be reported, a statement shall be made on this form to report that fact.

5. Transactions To Be Reported

Stock splits or stock dividends occurring during the fiscal year shall be reported on this form. See Rule 16a–3(f)(1). Small acquisitions that are to be reported on a deferred basis pursuant to Rule 16a–6 shall be reported on this form. In accordance with Rule 16a–3(f)(1), all transactions in the company's securities conducted during the company's fiscal year that were exempted from liability under section 16 of the Exchange Act (by operation of rules promulgated pursuant to section 16(b) of such Act) and, therefore, are to be reported on a deferred basis, shall be reported on this form. Any occurrence or transaction required to be reported on Form 3 or 4 under section 16(a) of the Act that was required to be filed prior to, and that has yet to be reported as of the date by which this Form 5 is filed shall be reported on this Form 5; *Provided, however,* that such Form 3 or 4 shall be appended to this Form 5. Transactions involving derivative securities shall be reported in Table II; all other transactions shall be reported in Table I.

6. Reporting of Transactions

(a) When a transaction relates to the acquisition or disposition of two or more securities as a unit and both are required to be reported, report each security separately and describe the unit relationship in the space for comments below Table II. If one or more of the securities comprising the unit is not required to be reported, the other security or securities shall be reported separately and the unit relationship described as indicated above. In reporting the acquisition or disposition of common stock that is convertible into another type of common stock, the transaction should be listed in Table I with the number of shares or units subject to the conversion privilege and the conversion price set forth in the space for comments below Table II. Other convertible securities should be reported as derivative securities.

(b) Securities owned indirectly shall be reported on separate lines from those owned directly and also from those owned through a different type of indirect ownership.

(c) If a derivative security is converted or exercised, the transaction shall be reported in Table II and the acquisition or disposition of the security subject to the derivative security shall be reported in Table I.

7. Title of Securities

The title of securities in Column 1 of Table I and Columns 1 and 3 of Table II shall be stated as specifically as possible; for example, "Common stock," "Class A common stock," "$6 Convertible Preferred Stock," etc.

Include the name of the issuer of the seccurities if it is a public utility holding company or a subsidiary thereof.

8. Statement of Amounts of Securities

(a) In stating amounts of securities in Columns 3 and 4 of Table I and Column 4 of Table II and in Section A under the heading "Additional Information," give the number of securities, or if debt is required to be reported, give the face amount of the debt securities.

(b) In stating amounts of securities beneficially owned through a partnership, corporation, trust, or other entity, the reporting person shall indicate only the amount of securities representing the proportionate interest of the person in the transaction or holdings of the partnership, corporation, trust, or other entity. See Instruction 10(b) below. Alternatively, at the option of the reporting person, the entire amount of the entity's interest may be reported.

9. Purchase or Sale Price of Securities

(a) If any transaction reported in Table I or II involved a purchase or sale of securities for cash or obligation to pay cash, state in Column 6 the purchase price per share or other unit, exclusive of brokerage commissions or other costs of execution. If the transaction was only partly for cash and partly for other consideration, state the amount of cash per share or other unit and the nature of the additional consideration. If the transaction did not involve cash, state the nature of the consideration given or received.

(b) When two or more securities are purchased or sold as a unit, the purchase or sale price of the unit shall be stated in Column 6 with respect to one of the securities and cross-referenced with respect to the other security or securities.

10. Type of Ownership of Securities

(a) The following securities shall be reported as owned directly: Securities held in the name of the reporting person or in the name of a bank, broker, or nominee for the account of the reporting person; and securities held in joint tenancy, tenancy in common, tenancy by the entirety, or as community property.

(b) Securities that are beneficially owned, but that are not owned directly, *e.g.*, through a spouse, child, or other member of the reporting person's immediate family, shall be reported as indirectly owned; "beneficial owner" and "immediate family" are defined in Rules 16a–1(a) and (b), respectively. Furthermore, securities holdings attributed to a reporting person due to the person's interest in a partnership, corporation, trust, or other entity also are considered to be owned indirectly.

(c) Beneficial ownership of the securities reported on this form may be disclaimed. See Rule 16a–1(a)(4).

11. Type of Derivative Security

The type of derivative security owned shall be reported in Column 1 of Table II. If appropriate, state whether the derivative security represents a right to buy, a right to sell, an obligation to buy, or an obligation to sell, the underlying securities; for example, "Purchase of Put," "Sale of Put," "Purchase of Call," "Sale of Call," "Acquisition of Warrant," "Disposition of Warrant," "Exercise of Rights," etc.

12. Beneficial Ownership at End of Fiscal Year

(a) The title and amount of securities beneficially owned by the reporting person as of the last day of the company's fiscal year shall be disclosed in Part A of this form. See Instructions 7 and 8.

(b) When two or more securities are owned as a unit, report each security separately and describe the unit relationship in the space provided for comments below Part A. If one or more of the securities comprising the unit is not requried to be reported, the other security or securities shall be reported separately and the unit relationship described as indicated above.

(c) In reporting the ownership of common stock that is convertible into another type of common stock, the number of shares or units subject to the conversion privilege should be set forth in the space for comments below Part A. Other convertible securities should be reported as derivative securities.

13. Certification of Compliance with Section 16(a)

(a) All reporting persons shall certify in Part B of the "additional Information" section on page 2 of this form whether or not they have filed with the Commission and each exchange with which filing is required all required Form 3 or 4 reports relating to events occurring and/or transactions consummated during the company's fiscal year.

(b) If the certification cannot be given, the reporting person must either: (1) Provide an indication that three copies of all reports on Forms 3 and 4 that should have been, but were not, filed are attached to this Form; or (2) list the events and/or transactions that triggered the reporting requirements, the dates on which such events and/or transactions occurred, and explain why the required reports have not been filed.

14. Inclusion of Additional Information

A statement may include any additional information or explanation deemed relevant by the person filing the statement.

15. Signature

If the statement is filed for a corporation, partnership, trust, etc., the name of the organization shall appear over the signature of the officer or other person authorized to sign the statement. If the statement is filed for an individual, it shall be signed by the individual or specifically on behalf of the individual by a person authorized to sign for the individual. If signed on behalf of the individual by another person, the authority of such person to sign the statement shall be confirmed to the Commission in writing as soon as practicable by the individual for whom the statement is filed, unless such a confirmation which is still in effect is on file with the Commission.

BILLING CODE 8010–01–M

17 CFR Part 230

[Rel. No. 33–6808, File No. S7–23–88]

Resale of Restricted Securities; Changes of Method of Determining Holding Period of Restricted Securities Under Rules 144 and 145

AGENCY: Securities and Exchange Commission.

ACTION: Extension of comment period.

SUMMARY: The Securities and Exchange Commission is extending from December 31, 1988 to January 31, 1989, the date by which comments on Securities Act Release No. 33–6806 (October 25,1988) [53 FR 33147] regarding proposed Rule 144A and proposed changes to the method of determining the holding period of restricted securities under Rules 144 and 145 must be submitted.

DATE: Comments on Release No. 33–6806 must be received on or before January 31, 1989.

ADDRESS: Comments on Release No. 33–6806 should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comment letters should refer to File No. S7–23–88. All comment letters will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: Sara Hanks or Samuel Wolff, (202) 272–3246, Office of International Corporate Finance, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: In Securities Act Release No. 33–6806, the Commission requested comments on proposed Rule 144A, which would provide a non-exclusive safe harbor from the registration requirements of the Securities Act for resales of securities to institutional investors. Release 6806 also proposed for comment amendments to Rules 144 and 145, changing the method of determining the holding period of restricted securities. In view of the many questions raised in the Release, potential commenters have requested additional time. The Commission had determined to extend the comment period from December 31, 1988 to January 31, 1989.

By the Commission.

Jonathan G. Katz,

Secretary.

December 2, 1988.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1926

[Docket No. S–301B]

Concrete and Masonry Construction Safety Standards; Lift-Slab Construction

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Extension of written comment period and period for requesting an informal hearing.

SUMMARY: This notice extends the time in which written comments and requests for a hearing may be submitted concerning the notice of proposed rulemaking which OSHA issued on September 15, 1988 [53 FR 35972] on lift-slab construction. This notice also restates the procedures for submitting hearing requests.

DATE: Written comments and requests for a hearing must be postmarked by February 12, 1989.

ADDRESS: Comments and requests for a hearing must be submitted, in quadruplicate, to the Docket Office, Docket S–301B, Room N–2634, 200 Constitution Avenue NW., Washington, DC 20210. Telephone (202) 523–7894. All materials submitted will be available for public inspection and copying at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. James Foster, U.S. Department of Labor, OSHA, Room N–3647, 200 Constitution Avenue NW., Washington, DC 20210. Telephone (202) 523–8151.

SUPPLEMENTARY INFORMATION: OSHA issued a Notice of Proposed Rulemaking on September 15, 1988, [53 FR 35972] which proposed to revise the safety standards for lift-slab construction. Interested parties were given until November 14, 1988, to submit comments pertaining to the proposal. The notice of proposed rulemaking also informed the public of the opportunity to request an informal public hearing on the proposal. Subsequently, OSHA received a request for an extension of the comment period. OSHA published a notice in the **Federal Register** on November 8, 1988 [53 FR

45102] announcing that it was extending the period for comments and hearing requests until December 14, 1988.

OSHA has received another request from an interested person to extend the comment period once again to allow ample opportunity for a complete and full response to the proposed provisions and the specific issues raised in the proposal. To ensure the fullest participation of interested persons, OSHA is hereby extending the period until February 12, 1989.

In addition, interested persons have until February 12, 1989, to request an informal hearing on the proposal. The notice of proposed rulemaking sets forth five conditions that objections and hearing requests must satisfy. It is important that hearing requests clearly indicate the subjects to be addressed at the hearing and the evidence to be presented by the party requesting the hearing. Therefore, OSHA is restating the conditions for submitting objections and hearing requests.

Objections and hearing requests should be submitted in quadruplicate to the Docket Office at the above address and must comply with the following conditions:

1. The objections and hearing requests must include the name and address of the individual or organization making the objection or request;

2. The objections and hearing requests must be postmarked by February 12, 1989.

3. The objections and hearing requests must specify with particularity the provisions of the proposed rule to which each objection is taken, or concerning which a hearing request is made, and must state the grounds therefor;

4. Each objection and hearing request must be separately stated and numbered; and

5. The objections and hearing requests must be accompanied by a detailed summary of the evidence proposed to be adduced at the requested hearing.

Authority

This document was prepared under the direction of John A. Pendergrass, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210. It is issued under section 6(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 655), section 107 of the Contract Work Hours and Safety Standards Act (Construction Safety Act), (40 U.S.C. 333), Secretary of Labor's Order No. 9–83 (49 FR 35736), and 29 CFR Part 1911.

Signed at Washington, DC, this 8th day of December 1988.

John A. Pendergrass,

Assistant Secretary of Labor.

[FR Doc. 88–28601 Filed 12–12–88; 8:45 am]

BILLING CODE 4510–26–M

DEPARTMENT OF THE TREASURY

31 CFR Part 103

Proposed Rescission of Bank Secrecy Act Exemption Regarding Merchant Shippers

AGENCY: Departmental Offices, Department of the Treasury.

ACTION: Request for comments on proposed rescission of Bank Secrecy Act CMIR exemption.

SUMMARY: The Treasury Department is requesting comments before rescinding the limited exemption of merchant shippers from the reporting requirements of 31 CFR 103.23.

DATE: Comments are due February 13, 1989.

ADDRESS: Comments should be sent to Amy G. Rudnick, Director, Office of Financial Enforcement, Department of the Treasury, Room 4320, 1500 Pennsylvania Avenue NW., Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: Kathleen A. Scott, Attorney Advisor, Office of Assistant General Counsel (Enforcement), Department of Treasury, (202) 566–9947.

SUPPLEMENTARY INFORMATION: The Bank Secrecy Act, Pub. L. 91–508 (codified at 12 U.S.C. 1829b, 12 U.S.C. 1951 *et seq.*, and 31 U.S.C. 5311–5324), authorizes the Secretary of the Treasury to require reports on the international transportation and receipt of monetary instruments. 31 U.S.C. 5316. Pursuant to this authority, Treasury has issued regulations requiring that a form be filed reporting the international tranportation and receipt of monetary instruments that exceed $10,000. (Form 4790, the "CMIR"). *See* 31 CFR 103.11(k) and 103.23. The Secretary may prescribe and revoke exemptions from the requirements of the Act or its regulations. *See* 31 U.S.C. 5318 (a)(5) and 31 CFR 103.45(a).

Merchant shipping companies were granted an exemption to this requirement for moneys on board ship for their own use. The exemption states:

> An exemption is granted to any merchant shipping company from the requirement to report the transportation into or out of the United states of currency or bearer instruments in amounts in excess of $5,000 with respect to currency or bearer instruments placed on board ship by the owner or operator in order to provide for reasonable shipping needs. Records of such money placed on board are to be maintained by the shipping companies.

This exemption was promulgated prior to the statutory increase in the transportation filing amount to $10,000 in 1984. *See* Pub. L. 98–473, Title II, section 901(c), October 12, 1984.

Treasury has reviewed this exemption and has concluded, in light of the law enforcement utility of data regarding the international flow of currency, that there should be reporting of transportation or receipt of monetary instruments in excess of $10,000 by merchant shipping companies. In addition, this rescission would be consistent with the policy of the Department of the Treasury to deny discretionary CMIR exemptions, except to those involved in financial institution transactions. *See* 31 CFR 103.23(c).

While Treasury has absolute discretion in granting and revoking exemptions from the Bank Secrecy Act and the regulations thereunder, it has decided to request comments as to the impact, if any, of revocation of this exemption. After the comments are received and analyzed, the Department of the Treasury will publish its final decision on whether the exemption will be revoked or continued.

Submission of Comments

Treasury requests comments from all interested persons concerning this notice. All comments received before the closing date will be carefully considered. Oral comments must be reduced to writing and submitted to Treasury to receive consideration. Comments received after the closing date will be treated as possible suggestions for future action. The Treasury Department will not recognize any materials or comments, including the name of any person submitting comments, as confidential. Any material not intended to be disclosed to the public should not be included in comments. All comments submitted will be available for public inspection during the hours that the Treasury Library is open to the public. The Treasury Library is located in Room 5030, 1500 Pennsylvania Avenue NW., Washington, DC 20220. Appointments must be made to view the comments. Persons wishing to view the comments submitted should contact the Office of Financial Enforcement at (202) 566–8022.

Dated: November 18, 1988.

John P. Simpson,

Acting Assistant Secretary (Enforcement).

[FR Doc. 88-28590 Filed 12-12-88; 8:45 am]

BILLING CODE 4910-25-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SW-FRL-3489-9]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Proposed Exclusion

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comment.

SUMMARY: The Environmental Protection Agency (EPA or Agency) today is proposing to grant a petition submitted by Mason Chamberlain, Incorporated, Bay St. Louis, Mississippi, to exclude certain solid wastes generated at its facility from the lists of hazardous wastes contained in 40 CFR 261.31 and 261.32. This action responds to a delisting petition submitted under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of Parts 260 through 268, 124, 270, and 271 of Title 40 of the Code of Federal Regulations, and under 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator to exclude a waste on a "generator-specific" basis from the hazardous waste lists. Today's proposed decision is based on an evaluation of waste-specific information provided by the petitioner.

The Agency is also proposing the use of an organic leachate model and a fate and transport model and their application in evaluation the waste-specific information provided by the petitioner. These models have been used in evaluating the petition to predict the concentration of hazardous constituents released from the petitioned waste, once it is disposed of.

DATES: EPA is requesting public comments on today's proposed decision and on the applicability of the organic leachate and the fate and transport models used to evaluate the petition. Comments will be accepted until January 27, 1989. Comments postmarked after the close of the comment period will be stamped "late."

Any person may request a hearing on this proposed decision and/or the models used in the petition evaluation by filing a request with Joseph Carra, whose address appears below, by December 28, 1988. The request must contain the information prescribed in 40 CFR 260.20(d).

ADDRESSES: Send three copies of your comments to EPA. Two copies should be sent to the Docket Clerk, Office of Solid Waste (OS-305), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. A third copy should be sent to Jim Kent, Variances Section, Assistance Branch, PSPD/OSW (OS-343), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Identify your comments at the top with this regulatory docket number: "F-88-MCEP-FFFFF."

Requests for a hearing should be addressed to Joseph Carra, Director, Permits and State Programs Division, Office of Solid Waste (OS-340), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

The RCRA regulatory docket for this proposed rule is located at the U.S. Environmental Protection Agency, 401 M Street SW., (sub-basement), Washington, DC 20460, and is available for viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding Federal holidays. Call (202) 475-9327 for appointments. The public may copy material from any regulatory docket at a cost of $0.15 per page.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline, toll free at (800) 424-9346, or at (202) 382-3000. For technical information concerning this notice, contact Robert Kayser, Office of Solid Waste (OS-343), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 382-4536.

SUPPLEMENTARY INFORMATION:

I. Background

A. Authority

On January 16, 1981, as part of its final and interim final regulations implementing section 3001 of RCRA, EPA published an amended list of hazardous wastes from non-specific and specific sources. This list has been amended several times, and is published in 40 CFR 261.31 and 261.32. These wastes are listed as hazardous because they typically and frequently exhibit one or more of the characteristics of hazardous wastes identified in Subpart C of Part 261 (*i.e.*, ignitability, corrosivity, reactivity, and extraction procedure (EP) toxicity or meet the criteria for listing contained in 40 CFR 261.11 (a)(2) or (a)(3).

Individual waste streams may vary, however, depending on raw materials, industrial processes, and other factors. Thus, while a waste that is described in these regulations generally is hazardous, a specific waste from an individual facility meeting the listing description may not be. For this reason, 40 CFR 260.20 and 260.22 provide an exclusion procedure, allowing persons to demonstrate that a specific waste from a particular generating facility should not be regulated as a hazardous waste.

To have their wastes excluded, petitioners must show that wastes generated at their facilities do not meet any of the criteria for which the wastes were listed. See 40 CFR 260.22(a) and the background documents for the listed wastes. In addition, the Hazardous and Solid Waste Amendments (HSWA) of 1984 require the Agency to consider any factors (including additional constituents) other than those for which the waste was listed, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. Accordingly, a petitioner also must demonstrate that the waste does not exhibit any of the hazardous characteristics (*i.e.*, ignitability, reactivity, corrosivity, and EP toxicity), and must present sufficient information for the Agency to determine whether the waste contains any other toxicants at hazardous levels. See 40 CFR 260.22(a), 42 U.S.C. 6921(f), and the background documents for the listed wastes. Although wastes which are "delisted" (*i.e.*, excluded) have been evaluated to determine whether or not they exhibit any of the characteristics of hazardous waste, generators remain obligated to determine whether or not their waste remains non-hazardous based on the hazardous waste characteristics.

In addition to wastes listed as hazardous in 40 CFR 261.31 and 261.32, residues from the treatment, storage, or disposal of listed hazardous wastes and mixtures containing hazardous wastes also are eligible for exclusion and remain hazardous wastes until excluded. See 40 CFR 261.3 (c) and (d)(2). The substantive standard for "delisting" a treatment residue or mixture is the same as previously described for listed wastes.

B. *Approach Used to Evaluate This Petition*

In making a delisting determination, the Agency evaluates each petitioned waste against the listing criteria and factors cited in 40 CFR 261.11 (a)(2) and (a)(3). If the Agency believes that the waste remains hazardous based on the factors for which the waste was originally listed, EPA will propose to deny the petition. If, however, the Agency agrees with the petitioner that

the waste is non-hazardous with respect to the original listing criteria, EPA then will evaluate the waste with respect to other factors or criteria, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. The Agency considers whether the waste is acutely toxic, and considers the toxicity of the constituents, the concentration of the constituents in the waste, their tendency to migrate and to bioaccumulate, their persistence in the environment once released from the waste, plausible and specific types of management of the petitioned waste, the quantities of waste generated, and any other additional factors which may characterize the petitioned waste.

The Agency is proposing to use such information to identify plausible exposure routes for hazardous constituents present in the waste, and is proposing to use a particular fate and transport model to predict the concentration of hazardous constituents that may be released from the petitioned waste after disposal and to determine the potential impact of the unregulated disposal of Mason Chamberlain's petitioned waste on human health and the environment. Specifically, the models will be used to predict compliance-point concentrations which will be compared directly to the levels of regulatory concern for particular hazardous constituents.

EPA believes that this fate and transport model represents a reasonable worst-case waste disposal scenario for the petitioned wastes, and that a reasonable worst-case scenario is appropriate when evaluating whether a waste should be relieved of the protective management constraints of RCRA Subtitle C. Because a delisted waste is no longer subject to hazardous waste control, the Agency is generally unable to predict and does not control how a waste will be managed after delisting. Therefore, EPA currently believes that it is inappropriate to consider extensive site-specific factors. For example, a generator may petition the Agency for delisting of a metal hydroxide sludge which is currently being managed in an on-site landfill and provide data on the nearest drinking water well, permeability of the aquifer, dispersivities, etc. If the Agency were to base its evaluation solely on these site-specific factors, the Agency might conclude that the waste, at that specific location, cannot affect the closest well, and the Agency might grant the petition. Upon promulgation of the exclusion, however, the generator is under no obligation to continue to manage the waste at the on-site landfill. In fact, it is likely that the generator will either choose to send the delisted waste off site immediately, or will eventually reach the capacity of the on-site facility and subsequently send the waste off site to a facility which may have very different hydrogeological and exposure conditions.

The Agency also considers the applicability of ground-water monitoring data to its evaluation of delisting petitions. In this case, the Agency determined that, because Mason Chamberlain utilizes off-site disposal of the petitioned waste, ground-water monitoring data collected from the petitioner's facility would not characterize the effects of the petitioned waste on the underlying aquifer at the off-site disposal facility. Therefore, the Agency did not request ground-water monitoring data.

Finally, the Hazardous and Solid Waste Amendments of 1984 specifically require the Agency to provide notice and an opportunity for comment before granting or denying a final exclusion. Thus, a final decision will not be made on this petition until all public comments (including those at requested hearings, if any) are addressed.

II. Disposition of Petition

Mason Chamberlain, Inc., Mississippi Army Ammunition Plant, National Space Technology Laboratories Base, Bay St. Louis, Mississippi

1. Petition for Exclusion

Mason Chamberlain, Inc. (Mason Chamberlain), located at the Mississippi Army Ammunition Plant, formerly the National Space Technology Laboratories Base, Bay St. Louis, Mississippi, produces the 155 millimeter M483 projectile (body, base, and ogive) and cargo grenade metal parts, and loads, assembles, and packs the round except for the propellant charge and the projectile fuse. Mason Chamberlain has petitioned the Agency to exclude its wastewater treatment sludge listed as EPA Hazardous Waste No. F019—"Wastewater treatment sludge from the chemical conversion coating of aluminum." The wastewater treatment sludge is generated from the metal finishing operations associated with production of the projectile and cargo grenade metal parts. The listed constituents of concern for EPA Hazardous Waste No. F019 are chromium and complexed cyanide. Mason Chamberlain petitioned to exclude its waste because it does not believe that the waste meets the criteria of the listing. Mason Chamberlain also believes that its treatment process generates a non-hazardous waste because the constituents of concern, although present in the waste, are in essentially immobile form. Mason Chamberlain further believes that the waste is not hazardous for any other reason. Review of this petition included consideration of the original listing criteria, as well as the additional factors required by the Hazardous and Solid Waste Amendments of 1984. See section 222 of the Amendments, 42 U.S.C. 6921(f), and 40 CFR 260.22(d) (2)–(4). Today's proposal to grant this petition for delisting is the result of the Agency's evaluation of Mason Chamberlain's petition.

2. Background

Mason Chamberlain petitioned the Agency to exclude its wastewater treatment sludge on December 22, 1986. Additional information was submitted to the Agency on September 25, 1987, December 22, 1987, and April 29, 1988. In support of its petition, Mason Chamberlain submitted (1) detailed descriptions of its manufacturing and waste treatment processes; (2) a list of all the raw materials used in both the manufacturing and treatment processes; (3) results from total constituent analyses for all the EP toxic metals, nickel, and cyanide; (4) results from the extraction procedure (EP) and Oily Waste extraction procedure (OWEP) toxicity analyses for all the EP toxic metals, nickel, and cyanide; (5) results from total constituent analyses for total sulfide; (6) results from total oil and grease analyses; (7) results from analyses for the characteristics of ignitability, corrosivity, and reactivity; and (8) results from total constituent analyses for the priority pollutants.[1]

Three production operations are in use at Mason Chamberlain's Bay St. Louis facility: (1) The projectile metal parts operation; (2) the cargo grenade metal parts operation; and (3) the production support operation. The projectile metal parts operation consists of forging, machining, cleaning/surface preparation, chemical finishing, and welding of aluminum and steel. The cargo grenade metal parts operation consists of machining and chemical finishing of cargo grenade metal parts. The production support operation, is a combined waste treatment system for the treatment of eight waste streams generated by the following processes: (1) Chromate conversion coating of

[1] A subset of 40 CFR 261, Appendix VIII constituents which include the volatile, semi-volatile acid extractable compounds and the base/neutral extractable compounds.

BEST COPY AVAILABLE

aluminum; (2) anodizing of aluminum; (3) anodic hard coating of aluminum; (4) zinc phosphating of ferrous surfaces; (5) surface treatment; (6) various cleaning of oils and coolants from machinery; (7) coal pile runoff water; and (8) boiler blowdown wastewater from the production of steam.

These eight waste streams contain alkaline waste, soluble coolant waste, non-detergent oily waste, acid/alkali rinse, chromium rinse, and containerized wastewater. The waste streams are pretreated prior to entering the combined waste treatment system; pretreatment methods vary depending on the chemical characteristics of each of the waste streams. The alkaline waste, acid/alkali rinse water, boiler blowdown, and coal pile runoff undergo pH adjustment prior to entering the combined treatment system. Soluble coolant waste pretreatment consists of flocculation, separation, and skimming or settling. Non-detergent oily waste is skimmed before entering the combined treatment system, and hexavalent chromium from the chromium rinse is reduced to trivalent chromium by the addition of bisulfate. Containerized wastewater from batch processes or spent tanks receives one of these pretreatment methods on the basis of constituents contained in the wastewater.

After pretreatment, the various waste streams are pumped to the combined waste treatment system for final treatment. Wastes are treated by reducing any remaining hexavalent chromium, separating oily constituents, and precipitating metal hydroxides. The combined waste treatment systems consists of two-stage (primary and secondary) solid contact clarification, sand filtration, and teriary pH adjustment. Effluent from the treatment system is discharged or returned to the system for further filtration. The sludges from the primary and secondary contact clarifiers are dewatered using a filter press. The waste stream covered by this petition is the dewatered sludge filter cake obtained from the primary and secondary contact clarifiers only. Sludges from the pretreatment of soluable oily wastes are further treated and shipped off site to a regulated facility, and are not included in this exclusion petition.

To collect representative samples from filter presses like Mason Chamberlain's petitoners are normally requested to collect a minimum of four composite samples comprised of independent grab samples collected over time (*e.g.*, grab samples collected every hour and composited by shift). See "Test Methods for Evaluating Solid Wastes: Physical/Chemical Methods," U.S. EPA Office of Solid Waste and Emergency Response, Publication SW-846 (third edition), November 1986, and "Petitions to Delist Hazardous Wastes—A Guidance Manual," U.S. EPA, Office of Solid Waste (EPA/530-SW-85-003), April 1985.

Mason Chamberlain collected six composite samples of filter cake sludge during the period of August 27, 1986 through October 8, 1986. Total constituent concentrations (*i.e.*, mass of a particular constitute per mass of waste) were determined for cadmium, chromium, lead, nickel, cyanide, and sulfide. Standard extraction procedure (EP) concentrations (*i.e.*, mass of a particular constituent per unit volume of extract) were determined for all the EP toxic metals, nickel, and cyanide. The wastewater treatment sludge filter cake exhibited an oil and grease content ranging from 0.037 percent to 3.63 percent. Wastes having more than one percent total oil and grease may either have significant concentrations of the constituents of concern in the oil phase, which may not be detected using the standard EP leachate procedure, or the concentration of oil and grease may be sufficient to coat the solid phase of the sample and interfere with the leaching of metals from the sample. Because the percentage of total oil and grease exceeded one percent in four of the six samples, Mason Chamberlain collected an additional four composite samples during the period of May 11, 1987 through June 5, 1987, and performed the Oily Waste Extraction Procedure (OWEP) on these samples. See SW-846 Method No. 1330. Results from total constitutent analyses for arsenic, barium, mercury, selenium, and silver were also submitted.

Based on the Agency's review of Mason Chamberlain's manufacturing and waste treatment process descriptions, the Agency requested total constituent analyses for hazardous constituents (*e.g.*, those listed in 40 CFR Part 261, Appendix VIII) that might potentially enter the waste stream as runoff from the on-site coal pile. As a result, Mason Chamberlain also performed total constituent analyses for the priority pollutants on these four additional composite samples. The detection limits for several of the priority pollutants exceeded those specified in "Methods for Chemical Analysis of Waste Water," U.S. EPA (EPA/600/4-79-020), March 1983. Mason Chamberlain, therefore, collected an additional four composite samples during the period of January 18, 1988 through February 13, 1988. Thus, Mason Chamberlain submitted analyses for a total of fourteen composite samples, two with a percentage of oil and grease less than one percent, and twelve with a percentage of oil and grease greater than one percent.

All samples were collected using a time composite sampling method. Sampling was conducted once on each day that the filter cake sludge was dumped from the filter press (which varied from one to four times per week). From each batch of the filter cake sludge, three grab samples were collected, one from each end of the press and one from the center of the press. The three grab samples from each sampling event were then combined to form weekly composite samples. Mason Chamberlain claims that due to a consistent manufacturing and treatment process, the analyses from samples collected over each of the three sampling periods are representative of any variation in the wastewater treatment sludge constituent concentrations.

3. Agency Analysis

Mason Chamberlain used SW-846 method numbers 7060 through 7760, 9010, and 9030 to quantify the total constituent concentrations of all the EP toxic metals, nickel, cyanide, and sulfide in their waste. Mason Chamberlain used SW-846 method numbers 1310 (standard EP) and 1330 (OWEP) to quantify the leachable concentrations of all the EP toxic metals, nickel, and cyanide. (The cyanide extractions were modified by using distilled water instead of acetic acid in order to prevent the volatilization of cyanide. Analyses for EP or OWEP leachable concentrations of sulfide or reactive sulfide are not necessary since the Agency's level of regulatory concern is based on the total constituent concentration of reactive sulfide.) Mason Chamberlain used SW-846 method numbers 8240 and 8270 to quantify the total constituent concentrations of the priority pollutants present in the waste. Table 1 presents the maximum total constituent concentrations of all the EP toxic metals (except selenium), nickel, cyanide, and sulfide. Table 2 presents the maximum leachate values of the EP toxic metals, nickel, and cyanide, obtained using the standard EP or OWEP tests. Table 3 presents the maximum total constituent concentrations for the three priority pollutants identified in Mason Chamberlain's waste (*i.e.*, phenol, dimethylphthalate, and bis(2-ethylhexyl)phthalate).

TABLE 1.—MAXIMUM TOTAL CONSTITUENT CONCENTRATIONS

[Wastewater treatment sludge filter cake]

Constituents	Total constituent concentrations (mg/kg)
Arsenic	ND (0.007)
Banum	ND (0.5)
Cadmium	1.8
Chromium	1196.0
Lead	22.7
Mercury	0.008
Selenium	0.24
Silver	0.028
Nickel	157.0
Cyanide	ND (0.05)
Sulfide	ND (1.0)

ND: Not Detected. Denotes concentrations below the detection limit specified in the parenthesis.

TABLE 2.—MAXIMUM LEACHATE CONCENTRATIONS

[Wastewater treatment sludge filter cake]

Constituents	Leachate concentrations (mg/l)
Arsenic	0.005 [1]
Banum	0.4 [1]
Cadmium	0.06 [2]
Chromium	0.13 [2]
Lead	0.25 [2]
Mercury	ND (0.002) [1]
Selenium	0.026 [2]
Silver	0.20 [2]
Nickel	1.5 [1]
Cyanide	ND (0.05) [1]

ND: Not Detected. Denotes concentrations below the detection limit specified in the parenthesis.
[1] Obtained from the Standard EP toxicity test.
[2] Obtained from the OWEP toxicity test.

TABLE 3.—MAXIMUM TOTAL CONSTITUENT CONCENTRATIONS

[Wastewater treatment sludge filter cake]

Constituents	Concentrations (ppm)
Phenol	247.22
Dimethylphthalate	1.82
Bis(2-ethylhexyl)phthalate	6.14

These detection limits represent the lowest concentrations quantifiable by Mason Chamberlain, when using the appropriate SW–846 analytical methods to analyze its waste. (Detection limits may vary according to the waste and waste matrix being analyzed, *i.e.*, the "cleanliness" of waste matrices varies and "dirty" waste matrices may cause interferences, thus raising the detection limits.)

Based on the results obtained from the characteristics testing, none of the analyzed samples exhibited the characteristics of ignitability, corrosivity, or reactivity. See 40 CFR 261.21, 261.22, and 261.23.

Mason Chamberlain submitted a signed certification stating that, based on current annual waste generation, its maximum annual generation rate of wastewater treatment sludge filter cake will be 1,262 cubic yards per year. The Agency may review a petitioner's estimates and, on ocasion, has requested a petitioner to re-evalaute estimated waste volume. EPA accepts Mason Chamerlain's certified estimate of 1,262 cubic yards.

EPA does not generally verify submitted test data before proposing delisting decisions, and has not verified the data upon which it proposes to grant Mason Chamberlain's exclusion. The sworn affidavit submitted with this petition binds the petitioner to present truthful and accurate results. The Agency, however, conducts a spot-check sampling and analysis program to verify the representative nature of the data for some percentage of the submitted petitions, and may select to visit this facility in the furutre for spot-check sampling.

4. Agency Evaluation

The Agency considered the appropriateness of alternative disposal scenarios for filter cake wastes and decided that a landfill scenario is the most reasonable, worst-case scenario for this waste. Under a landfill disposal scenario, the major exposure route of concern for any hazardous constituents would be ingestion of contamianted ground water. The Agency, therefore, evaluated the petitioned waste using its vertical and horizontal spread (VHS) landfill model which predicts the potential for ground-water contamination from wastes that are landfilled. See 50 *FR* 7882 (February 26, 1985), 50 *FR* 48896 (November 27, 1985), and the RCRA public docket for these notices for a detailed description of the VHS model and its parameters. This modeling approach, which includes a ground-water transport scenario, was used with conservative, generic parameters to predict reasonable worst-case contaminant levels in ground water at a hypothetical receptor well (i.e., the model estimates the ability of an aquifer to dilute the toxicant from a specific volume of waste). In addition, the Agency used its organic leachate model (OLM) to estiamte the leachable portion of the organic constituents in the petitioned waste. See 50 *FR* 48953 (November 27, 1985), 51 *FR* 41084 (November 13, 1986), and the RCRA public docket for these notices for a detailed description of the OLM and its parameters. The results of the OLM analysis were used in conjunction with the VHS model to estimate the potential impact of the organic constituents on the underlying ground water. The Agency requests comments on the use of the OLM and VHS model as applied to the evalaution of Mason Chamerblain's waste.

Specifically, the Agency used the VHS model to evalaute the mobility of all the hazardous inorganic constituents (except mercury and cyanide—see explanation below) from Mason Chamberlain's waste. The Agency's evaluation, using the waste volume of 1,262 cubic yards and the maximum reported EP or OWEP leachate concentrations, generated the compliance-point concentrations shown in Table 4. The Agency did not evalaute the mobility of the remaining inorganic constituents (i.e., mercury and cyanide) from Mason Chamberlain's waste because they were not detected in the EP extract using the appropriate SW–846 analytical test methods (see Table 2). The Agency believes it is inappropriate to evalaute non-detectable concentrations of a constituent of concern in its modeling efforts if the non-detectable value was obtained using the appropriate analytical method. Specifically, if a constituent cannot be detected (when using the appropriate analytical method) the Agency assumes that the constituent is not present and therefore does not present a threat to either human health or the environment.

TABLE 4—VHS MODEL: CALCULATED COMPLIANCE-POINT CONCENTRATIONS LISTED AND NON-LISTED CONSTITUENTS

[Wastewater treatment sludge filter cake]

Constituents	Compliance-point concentrations (mg/1)	Levels of regulatory concern (mg/1) [1]
Arsenic	0.00039	0.05
Banum	0.031	1.0
Cadmium	0.00470	0.01
Chromium	0.010	0.05
Lead	0.019	0.05
Selenium	0.002	0.01
Silver	0.016	0.05
Nickel	0.12	0.5

[1] See "Docket Report on Health-Based Levels and Solubilities Used in the Evaluation of Delisting Petitions," June 8, 1988, located in the RCRA public docket

The wastewater treatment sludge filter cake exhibited arsenic, barium, cadmium, chromium, lead, selenium, silver, and nickel levels at the compliance point below the levels used in delisting decision-making.

Because the concentrations of total cyanide and total sulfide are less than

VOL 53 ISS 239 DE 13 1988 UMI

0.05 mg/kg and 1.0 mg/kg, respectively, the Agency believes that the concentrations of reactive cyanide and reactive sulfide will be below the Agency's interim standards of 250 ppm and 500 ppm, respectively. See "Interim Agency Thresholds for Toxic Gas Generation," July 12, 1985, Internal Agency Memorandum in the RCRA public docket.

The Agency evaluated the mobility of the organic constituents detected in Mason Chamberlain's waste using the VHS model. The agency used the OLM to predict leachable concentrations of the organic compounds detected in Mason Chamberlian's waste. The resulting leachable concentrations and estimated volume of waste (*i.e.*, 1,262 cubic yards) were then used as inputs in the VHS model in order to assess the potential impacts of these constituents upon the ground water. Table 5 presents the calculated compliance-point concentrations.

TABLE 5.—VHS MODEL: CALCULATED COMPLIANCE-POINT CONCENTRATIONS PRIORITY POLLUTANT CONSTITUENTS

[Wastewater treatment sludge filter cake]

Constituents	Compliance-point concentrations (mg/l)	Levels of regulatory concern (mg/l) [1]
Phenol	0.49	10
Dimethylphthalate	0.01	350.0
Bis(2-ethylhexyl)phthalate	0.001	0.0042

[1] See "Docket Report on Health-Based Levels and Solubilities Used in the Evaluation of Delisting Petitions," June 8, 1988, located in the RCRA public docket.

As indicated by Table 5, the waste does not exhibit levels of phenol, dimethylphthalate, or bis(2-ethylhexyl)phthalate at the compliance point in concentrations exceeding the health-based levels. The Agency determined that no other hazardous constituents of concern are likely to be present or formed as reaction products or by-products of Mason Chamberlain's waste. In addition, on the basis of test results submitted by the petitioner, pursuant to § 260.22, the Agency concludes that the waste does not exhibit any of the characteristics of ignitability, corrosivity, or reactivity. See 40 CFR 261.21, 261.22, and 261.23.

5. Conclusion

The agency believes that Mason Chamberlain's wastewater treatment system renders its F019 wastes non-hazardous. Mason Chamberlian's manufacturing and wastewater treatment processes are believed to be uniform and consistent because the facility does not perform as a job shop or have seasonal product variations. The Agency, therefore believes that analyzed samples of treated waste reflect the day-to-day variations in manufacturing and treatment processes that will continue to be used. The Agency, therefore, is proposing that Mason Chamberlian's wastewater treatment sludge filter cake be considered non-hazardous, as it would not present a hazard to either human health or the environment.

The Agency proposes to grant an exclusion to Mason Chamberlain, Inc., located in Bay St. Louis, Mississippi, for its wastewater treatment sludge filter cake described in its petition as EPA Hazardous Waste F019. If the proposed rule becomes effective, the wastewater treatment sludge filter cake would no longer be subject to regulation under 40 CFR Parts 262 through 268 and the permitting standards of 40 CFR Part 270.

If made final, the proposed exclusion will apply only to the processes covered by the original demonstration. The facility would require a new exclusion if either its manufacturing or treatment processes were altered and accordingly would need to file a new petition. The facility must treat waste generated from changed processes as hazardous until a new exclusion is granted.

Although management of the waste covered by this petition would be relieved from Subtitle C jurisdiction upon final promulgation of an exclusion, the generator of a delisted waste must either treat, store, or dispose of the waste in an on-site facility, or ensure that the waste is delivered to an off-site storage, treatment, or disposal facility, either of which is permitted, licensed, or registered by a State to manage municipal or industrial solid waste. Alternatively, the delisied waste may be delivered to a facility that beneficially uses or reuses, or legitimately recycles or reclaims the waste, or treats the waste prior to such beneficial use, resure, recycling, or reclamation.

III. Effective Date

This rule, if promulgated, will become effective immediately. The Hazardous and Solid Waste Amendments of 1984 amended Section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six-month period to come into compliance. That is the case here, because this rule, if promulgated, would reduce the existing requirements for persons generating hazardous wastes. In light of the unnecessary hardship and expense that would be imposed on this petitioner by an effective date six months after promulgation and the fact that a six-month deadline is not necessary to achieve the purpose of section 3010, EPA believes that these exclusions should be effective immediately upon promulgation. These reasons also provide a basis for making this rule effective immediately, upon promulgation, under the Administrative Procedures Act, pursuant to 5 U.S.C. 553(d).

IV. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This proposal to grant an exclusion is not major, since its effect, if promulgated, would be to reduce the overall costs and economic impact of EPA's hazardous waste management regulations. This reduction would be achieved by excluding wastes generated at a specific facility from EPA's lists of hazardous wastes, thereby enabling this facility to treat its waste as non-hazardous. There is no additional impact due to today's rule. This proposal is not a major regulation and no Regulatory Impact Analysis is required.

V. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment, if promulgated, will not have an adverse economic impact on small entities since its effect would be to reduce the overall costs of EPA's hazardous waste regulations and would be limited to one facility. Accordingly, I hereby certify that this proposed regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 261

Hazardous materials, Waste treatment and disposal, Recycling.

Date: December 5, 1988.

Jeffery D. Denit,

Deputy Director, Office of Solid Waste.

For the reasons set out in the preamble, 40 CFR Part 261 is proposed to be amended as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for Part 261 continues to read as follows:

Authority: Secs. 1006, 2002(a), 3001, and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6921, and 6922.)

2. In Table 1 of Appendix IX, add the following wastestreams in alphabetical order:

Appendix IX—Wastes Excluded Under §§ 260.20 and 260.22.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[MM Docket No. 88-526, RM-6122; FCC 88-348]

Radio Broadcasting Services; Modification of FM and TV Authorizations To Specify a New Community of License

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The FCC proposes to adopt a procedure whereby existing licensees and permittees of FM and TV broadcast authorizations could request a new city of license during the course of rule making proceedings to amend the FM and TV Tables of Allotments, without subjecting the licensee or permittee to the risk of losing its authorization to competing applicants. Currently, the risk of losing an authorization may discourage changes in the city of license, even though the changes may be beneficial to the community and the licensee. The proposed action could allow licensees and permittes to change city of license more easily, resulting in a fairer, more equitable, and more efficient distribution of services.

DATES: Comments must be filed on or before January 9, 1989, and reply comments on or before January 24, 1989.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Karl Kensinger, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Notice of Proposed Rule Making,* MM Docket No. 88-526, adopted October 28, 1988, and released December 1, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Summary of Notice of Proposed Rule Making

1. Any licensee or permittee currently seeking to change its city of license during the course of rule making proceedings to amend the FM and TV Tables of Allotments must compete with other applicants for the same allotment, regardless of whether the frequency is already occupied. The Christian Voice of Cental Ohio ("petitioner"), an FM licensee, filed a petition for rule making requesting an amendment of the Commission's rules to implement a procedure for FM licensees to upgrade facilities on higher class adjacent or co-channel frequencies, but in a different city of license, at the request of the licensee. Petitioner requested the amendment after learning that it could not upgrade its FM station without opening a filing window for competing applications, as the upgrade required a change of city of license.

2. The Commission believes petitioner's claims have merit, not only in the narrow case presented by petitioner, but also in a wider context. Therefore, we propose to amend our rules to provide a procedure whereby a licensee or permittee may petition the Commission for an amendment to the FM and TV Tables, and modification of its license accordingly, without placing its existing authorization at risk, and regardless of whether that change involves a change in transmitter site, a change in class of channel, or both. The proposal could also apply to television licensees and permittees desiring to exchange intraband noncommercial/commercial channels.

3. Two primary public interest benefits could result from the proposed change. First, removing the licenee's or permittee's risk of losing its present authorization in requesting a new city of license may promote a fair, equitable, and efficient distribution of facilities. Secondly, the proposed procedure, used in conjunction with a transmitter site relocation or in conjunction with the Commission's procedures for modifying licenses to a higher class of channel in the course of rule making proceedings to amend the Tables, my allow licensees and permittees to upgrade facilities in a manner that was previously procedurally impractical.

4. The Commission is of the tentative view that the proposal should be limited in certain respects. First, the proposal should be limited to cases in which the proposed allotment is mutually exclusive with the present allotment. Second, the proposal should not apply to nonadjacent channel upgrades. Finally, the proposed procedure should be utilized only where the petition is able to demonstrate that the proposed new community of license is preferable under our allotment priorities and policies to the present community of license. The Commission requests comments on these views.

5. This is a non-restricted notice and comment rulemaking proceeding. *See* Section 1.1206 of the Commission's Rules, 47 CFR 1.1206 for rules governing permissible *ex parte* contracts.

6. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 605, it is certified that the proposed rule will not, if promulgated, have a significant impact on small licensees because the new rule is not burdensome. The new rule will allow greater licensee and permittee discretion in choosing facilities.

7. The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified requirements or burden upon the public.

8. Pursuant to applicable procedures set forth in 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before January 9, 1989, and reply comments on or before January 24, 1989. All relevant and timely

comments will be considered by the Commission before final action is taken in this proceeding.

9. This Notice of proposed Rule Making is issued pursuant to authority contained in Sections 4(i) and 303 of the Commnications Act of 1934, as amended.

List of Subjects in 47 CFR Part 1

Radio, Television.

Part 1 of Title 47 of the Code of Federal Regulations is proposed to be amended as follows:

PART 1—[AMENDED]

1. The authority citation for Part 1 continues to read as follows:

Authority: 47 U.S.C. 154 and 303.

§ 1.420 [Amended]

2. Section 1.420 is proposed to be amended by adding new paragraph (i) preceeding the concluding paragraph to read as follows:

* * * * *

(i) In the course of the rulemaking proceeding to amend § 73.202(b) or § 73.606(b), the Commission may modify the license or permit of an FM or television broadcast station to specify a new community of license on the same channel, or on an adjacent or co-channel, or on any channel mutually exclusive with the licensee's or permittee's present assignment, where the amended allotment would be mutually exclusive with the licensee's or permittee's present assignment.

* * * * *

Federal Communications Commission.

Joyce Butler,

Acting Secretary.

BILLING CODE 6712-01-M

---

47 CFR 73

[MM Docket No. 88-533; RM-6398, 6470]

Radio Broadcasting Service; Clarksville and Lanesville, IN

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on two mutually-exclusive petitions for rule making seeking the allotment of Channel 226A. The first, filed by Janet Miller, seeks the allotment to Lanesville, Indiana, as that community's first local broadcast service (RM-6398). The second proponent, Owen-Jackson seeks the allotment to Clarksville, Indiana, as that community's first local broadcast service (RM-6470). Reference coordinates used for Lanesville are 38-14-13 and 85-59-09. Those for Clarksville are 38-17-01 and 85-50-32.

DATES: Comments must be filed on or before January 20, 1989 and reply comments on or before February 6, 1989.

ADDRESS: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioners or their counsel, as follows: Janet Miller, 1680 Hwy. 62E, Corydon, IN 47112, and John Wells King., Esq., Haley, Bader & Potts, 2000 M St., NW., Suite 600, Wash., DC 20036-4574.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 88-533, adopted November 1, 1988, and released November 29, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, *all ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1. 1204(b) for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

47 CFR Part 73

[MM Docket No. 88-532, RM-6415]

Radio Broadcasting Services; Yazoo City, MS and Rayville, LA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition filed by St. Pé Broadcasting, Inc., proposing the substitution of FM Channel 221C2 for Channel 221A at Yazoo City, Mississippi, and modification of the license of Station WJNS(FM) to reflect the higher class of channel. The coordinates used for Channel 221C2 at Yazoo City are 33-03-57 and 90-35-01. To accommodate the substitution at Yazoo City, it would be necessary to substitute FM Channel 222A for Channel 221A at Rayville, Louisiana, Station KTJC(FM). The coordinates for Channel 222A at Rayville are 32-27-22 and 91-39-27.

DATES: Comments must be filed on or before January 20, 1989, and reply comments on or before February 6, 1989.

ADDRESS: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Timothy K. Brady, P.O. Box 986, Brentwood, Tennessee 37024-0986, (Counsel for the petitioner).

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 1837

Proposed Changes to the NASA FAR Supplement

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: This proposed rule provides NASA's policy regarding pension portability in service contracts.

DATE: Comments are due not later than January 12, 1989.

ADDRESS: Comments should be addressed to W.A Greene, Chief, Regulations Development Branch, Procurement Policy Division (Code HP), Office of Procurement, NASA Headquarters, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: W.A. Greene, Telephone: (202) 453-8923.

SUPPLEMENTARY INFORMATION:

Background

NASA has recently assessed use of pension portability clauses in service contracts. The purpose of these clauses is to transfer pension benefits for contractor employees from one service contract to the successor contract. This proposed rule establishes agencywide policy for the use and approval of pension portability requirements.

Impact

The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. This proposed regulation falls in this category. The proposed rule is not expected to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* because we do not believe that a substantial number of small entities, who are NASA contractors, will have a significant economic impact from this rule. The rule would appear to primarily affect large, consolidated service contracts. Moreover, it will not impose compliance costs with a demonstrably greater impact on small businesses than large businesses, such that small business competition would be adversely affected. Therefore, an initial regulatory flexibility analysis has not been performed. Comments are invited from small businesses and other interested parties. This rule does not impose any reporting or recordkeeping requirements subject to the Paperwork Reduction Act of 1980.

List of Subjects in 48 CFR Part 1837

Government procurement.

S.J. Evans,

Assistant Administrator for Procurement.

PART 1837—[AMENDED]

1. The authority citation for 48 CFR Part 1837 continues to read as follows:

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1837.1—Service Contract—General

2. Subpart 1837.1 is amended by adding 1837.101, 1837.110, and 1837.170 to read as follows:

1837.101 Definitions.

"Pension portability" means the recognition and continuation in a successor service contract of the predecessor service contract's pension rights and benefits for contractor employees.

1837.110 Solicitation provisions and contract clauses.

The contracting officer shall obtain the Assistant Administrator for Procurement's (Attn: Code HP) approval before using in a solicitation, contract, or negotiated contract modification for additional work any installation-developed clause involving pension portability.

1837.170 Pension portability.

It is NASA's policy not to require pension portability in service contracts. However, if it is in the Government's best interest, NASA may consider the inclusion of pension portability requirements in a service contract under the following conditions:

(a) Only defined contribution plans shall be permitted in portability provisions;

(b) At a minimum, vesting shall be 100 percent at contract completion or termination; and

(c) There must be a clear description of the plan, including coverage regarding service, pay, and benefits, as appropriate, from prior contractors.

BILLING CODE 7510-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 88-24; Notice 01]

RIN 2127-AC06

Federal Motor Vehicle Safety Standards; Head Restraints

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Grant of petitions for rulemaking; request for comments and notice of proposed rulemaking (NPRM).

SUMMARY: This notice grants two related petitions for rulemaking from Mr. Dale T. Fanzo and Mr. Mark E. Goodson and proposes to amend Safety Standard No. 202, *Head Restraints*, to extend the applicability of the standard to trucks, multipurpose passenger vehicles (MPV's) and buses with a gross vehicle weight rating (GVWR) of 10,000 pounds or less. The agency tentatively concludes that applying Standard No. 202 to these vehicles would significantly reduce neck and head injuries to front seat occupants in rear impact crashes. This notice also requests comments on issues relating to the use of the rear window as a head restraint in light trucks.

DATES: Comment closing date: February 13, 1989. The proposed effective date is September 1, 1991.

ADDRESSES: Comments should refer to the docket number and notice number and be submitted in writing to: Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street, SW., Washington, DC, 20590. Telephone: (202) 366-5267.

FOR FURTHER INFORMATION CONTACT: Mr. Edward Jettner, NRM-12, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh St., SW., Washington, DC, 20590. Telephone: (202) 366-4917.

SUPPLEMENTARY INFORMATION: This notice grants two related petitions for rulemaking from Mr. Dale T. Fanzo of Bethel Park, Pennsylvania and Mr. Mark E. Goodson of Lewisville, Texas, and proposes to amend Safety Standard No.

202, *Head Restraints*, to extend the applicability of the standard to trucks, multipurpose passenger vehicles (MPV's) and buses with a gross vehicle weight rating (GVWR) of 10,000 pounds or less. (This notice will occasionally use the term "light trucks and vans" to refer to trucks, MPV's and buses with a GVWR of 10,000 pounds or less.) Currently, the standard applies only to passenger cars.

In his petition, Mr. Fanzo informed the agency that his "mini-van" was struck from behind by a welding truck. The petitioner believes that the neck injury he experienced could have been prevented or at least reduced in severity if his seat had been equipped with a head restraint. He asserts that there is no reason to distinguish between his type of vehicle, which appears to have been designated a "multipurpose passenger vehicle" by its manufacturer, and a passenger car for the purposes of Standard No. 202, since he uses his vehicle as he would a passenger car. The petitioner believes further that most "mini-vans" are purchased by families for personal use. To the petitioner, this fact warrants regarding these vehicles on par with passenger cars for the purpose of determining the appropriate application of Federal head restraint requirements. Accordingly, the petitioner requests that NHTSA require head restraints "on vehicles other than passenger cars."

Mr. Goodson requests that NHTSA issue a safety standard that would "minimize spinal, cerebral, cranial, and vertebral injuries that occur when light trucks (i.e., less than 5000 pounds GVWR) are involved in rear end collisions." In particular, Mr. Goodson suggests that the standard should focus on the glazing material used for the rear window in light trucks and require that these vehicles "have safety features so as to minimize compression of the head and spine due to striking the rear glass." This petitioner said that the standard should require the use of certain types of glazing and mounting systems that ensure that the glazing would deform in a manner that absorbs some of the kinetic energy generated by an occupant hitting the rear window and reduce any chances of occupant ejection from the vehicle through the rear window. Mr. Goodson believes that a standard for minimizing the severity of injuries occurring to occupants of light trucks in rear end collisions is needed to make the light truck "a safer vehicle," and, similarly to Mr. Fanzo, cites in particular the increased usage of the vehicle for carrying passengers as a reason for achieving that end.

Mr. Goodson suggests that Standard No. 202 head restraints and energy-absorbing rear window glazing would in combination provide the protection necessary to reduce the number and severity of injuries to light truck occupants in rear impacts. However, because the "spirit and intent" of Mr. Goodson's suggestion is "to lessen the severity of injuries that occur when a small truck is rear ended" (quoting from page two of the Goodson petition), NHTSA has determined that the two petitioners share similar interest in requirements for head restraints in light trucks and vans providing protection in rear end and other collisions. The agency has therefore combined the Fanzo and Goodson petitions and will respond to both petitions in this notice.

After carefully reviewing the issues raised in the petitions, NHTSA has determined that further consideration of those issues is warranted. The agency has therefore decided to grant the petitions insofar as they request an extension of Standard No. 202 to light trucks and vans, and issue a proposal for amending the standard along those lines. As explained below, NHTSA is proposing to extend the standard only to MPV's, trucks and buses with a GVWR of 10,000 pounds or less, and to limit the proposal for small school buses.

The agency emphasizes that the proposal contained herein is limited to the issue of head restraints only, and does not propose a new standard for glazing as suggested by the Goodson petition. Instead, NHTSA is interested in obtaining more information about possible trends in manufacturers' use of glazing as a head restraint in light trucks, and requests comments to specific questions set forth in the "Rear Windows" subsection of the part of this notice entitled, "Other Issues."

Background

Standard No. 202 requires a head restraint for the driver position and the right front seating position in passenger cars, to reduce the frequency and severity of neck injuries in rear impacts and other collisions. The standard also sets height, width and strength requirements for the restraint. The restraint is intended to limit rearward motion of an occupant's head in a rear impact crash, thereby preventing whiplash injury due to hyperextension of the neck.

Whiplash injuries typically occur in the soft tissues (such as the intervertebral discs, ligaments and skeletal muscle) joining together the vertebrae that support the head (i.e., the cervical spine). Whiplash commonly occurs when the head is thrown suddenly rearward with a snap during a rear impact crash. Whiplash injuries may not be immediately apparent after the crash, and some crash victims may not develop symptoms of pain or discomfort until several days after the accident. Neck pain and stiffness are the most common whiplash symptoms, but if the cervical nerves and spine are injured, the head, shoulder, arms or upper back could be affected. Whiplash can be difficult to cure because of differing physiological responses among victims. The symptoms can last several days, or can cause long term (i.e., a year or more) disability. Data indicate that whiplash victims miss an average of four days of work. (National Crash Severity Study, June, 1980.)

In general, motor vehicle manufacturers currently use two types of head restraints to meet the requirements of Standard No. 202. "Integral head restraints" use the design of the seat to meet Standard No. 202. Typically, they consist of a seat back that is extended high enough to meet the height requirement of the standard and a seat structure strong enough to withstand the required force levels. The integral head restraint is a nonadjustable or "automatic" device requiring no action on the part of the occupant, regardless of his or her height, to be effective. "Adjustable head restraints" consist of a separate cushion that is attached to the seat back, typically by sliding metal shafts. Adjustable head restraints provide sufficient vertical motion to accommodate different occupant seating heights.

Information from manufacturers of light trucks indicates that head restraints were offered as either standard or optional equipment on approximately 64 percent of the 1986 light truck and van models. It appears that head restraints are more likely to be offered on "top line" or luxury models, rather than as an optional or standard feature on the full range of vehicle model types.

Safety Need

National estimates of accident data for 1982–1985 indicate that approximately 17,800 whiplash injuries occurred annually to front seat occupants 15 years and older in light trucks and vans involved in rear impacts. (NHTSA chose to highlight injuries to persons 15 years and older because the agency determined that current seat backs are high enough to provide sufficient head support to most children younger than 15 years old.) 4.6 percent of all occupants in light trucks in

reported rear impacts suffered whiplash injuries and 34.4 percent of those injured in rear impacts suffered whiplash injuries. The agency tentatively believes that these injury rates can be significantly reduced by applying Standard No. 202 to light trucks and vans. Further, accident data also indicate that there are 11,046 head injuries annually due to impacts with the rear window and/or window frame structure of pickup trucks. The agency believes that, in addition to preventing whiplash injuries, head restraints in light trucks might also prevent some minor head injuries to occupants of light trucks.

Additional information on these and other matters discussed in this notice can be found in the agency's preliminary regulatory evaluation, which analyzes in detail the impacts of this rulemaking action. This document is available in the docket.

The agency has previously given notice that it was considering extending the applicability of Standard No. 202 to light trucks and vans. In March 1974, the agency formally proposed consolidating Standards No. 202 and No. 207, *Seating Systems*, upgrading their requirements and extending them to all MPV's, trucks and buses with a GVWR of 10,000 pounds or less. (39 FR 10268) The agency stated that it was proposing to extend the head restraint requirement to light trucks and vans because their "broad and increasing use as passenger vehicles on the highway requires that they be well-equipped with passenger-car-type safety systems." While today's NPRM proposes slightly different requirements than those contained in the 1974 NPRM, NHTSA iterates its belief in upgrading the safety of light trucks and vans in issuing this proposal.

Effectiveness of 202

In 1982, NHTSA published an evaluation report concerning Safety Standard No. 202, which evaluated the effectiveness and costs of head restraints in passenger cars. "An Evaluation of Head Restraints, Federal Motor Vehicle Safety Standard 202," NHTSA, February, 1982. The report showed that both integral and adjustable head restraints have been performing as intended, supporting the neck and preventing hyperextension thereof, and that they *significantly reduce* the overall injury risk in rear impact crashes. Integral restraints reduce the overall risk by approximately 17 percent, and adjustable restraints by 10 percent. (Integral restraints were found to be nearly twice as effective as adjustable head restraints because 75 percent of the latter are left in the lowest position by occupants, which does not adequately protect an occupant of average or greater height.) Integral restraints were found to add $12 (in 1981 dollars) to the lifetime cost of owning and operating a car; adjustable restraints, $40. The lifetime cost of head restraints, including fuel consumption, was estimated to average $32.35 (1981 dollars), with 28 percent of the head restraints being integral and 72 percent adjustable.

Because the National Traffic and Motor Vehicle Safety Act makes it incumbent upon NHTSA to ensure that safety standards are appropriate for the type of vehicle to which they apply, even though Standard No. 202 has been proven effective for passenger cars it is important to determine whether its requirements are appropriate for light trucks and vans. The agency has tentatively made a positive finding on the appropriateness of and need for extending Standard No. 202 to light trucks and vans, based on changes in the use and user characteristics of such vehicles.

NHTSA concurs with the petitioners' belief that increasing numbers of light trucks and vans are being used to transport passengers instead of or in addition to property. The Census Bureau's "Truck Inventory and Use Survey" shows that pickup truck use has changed from 1967 to 1982 from being 51 percent personal transportation to 66 percent personal transportation, and from 26 percent agricultural use to 12 percent agricultural use. NHTSA tentatively concludes that the greater use of light trucks as passenger carrying vehicles is leading to increases in the number of light trucks and vans on the road, the number of persons transported in such vehicles, and consequently, the number of persons exposed to accident situations where whiplash and other injuries are likely to occur. In addition, the agency believes that as the use of light trucks and vans increases, and as the likelihood that an accident would occur involving a light truck or van increases, the overall number of rear impact collisions into these vehicles might increase.

NHTSA has found that there are indications that there will be continued growth in the number of light trucks and vans in the vehicle fleet and the amount of miles traveled by those vehicles. NHTSA's "Light Truck and Van Safety" report to Congress (May 1987) states that: (1) In general, light trucks have been capturing an increased share of the light duty vehicle market (including passenger cars), rising from a low of 14.9 percent in 1971 to an all time high of 28.7 percent in 1985 (the most recent year for which data were available); (2) in 1977, only 10.2 percent of light truck sales were compact vehicles, while in 1985, it was 52.6 percent; (3) pickup trucks have lost sales percentage, dropping from 66.8 percent in 1977 to 59.3 percent in 1985; (4) van sales have increased from 21.3 percent to 22.7 percent; and (5) there has been a large shift from conventional cargo vans toward compact passenger vans. NHTSA therefore believes extending Standard No. 202 in the manner proposed herein would not only reduce current whiplash and head injuries, but would also help prevent potential increases in injury rates that are likely to accompany the changes in the on-road vehicle fleet.

NHTSA also believes that there is a likelihood that whiplash injury rates for light trucks and vans will increase, absent an amendment to Standard No. 202 proposed herein, due not only to changes in the ways light trucks and vans are used, but also to changes in vehicle *user* characteristics. Several studies have shown that females are more vulnerable to neck injury than males, and accident data for passenger cars show that females have higher whiplash injury rates than males. (One explanation for this phenomenon is that females on the average have much narrower necks than males, with smaller muscle mass, yet their necks must support heads of roughly the same size as those of males.) National accident data also show that currently, more males drive light trucks than females. NHTSA believes that, as increasing numbers of light trucks and vans are used for transporting passengers, the number of female occupants in these vehicles will increase. The agency tentatively believes, therefore, that whiplash accident rates for light trucks and vans could increase coincident with increases in female occupancy rates for these vehicles.

In sum, the agency believes that the above data indicate that light trucks and vans are increasingly being used as passenger vehicles and that increasing numbers of passengers will therefore be subject to crash situations resulting in whiplash injuries. For these reasons, and because the agency tentatively concludes that Standard No. 202 would significantly reduce whiplash and other injuries to front seat occupants of light trucks and vans, the agency proposes to extend the applicability of the standard.

VOL 53 ISS 239 DE 13 1988 UMI

Other issues

Exclusions

Vehicles over 10,000 pounds GVWR. This notice proposes to extend Standard No. 202 only to trucks, MPV's and buses with a GVMR of 10,000 pounds or less, and the school bus driver's seat of school buses with a GVWR of 10,000 pounds or less, and not to heavier vehicles. NHTSA has excluded heavier vehicles from this proposal because the agency has determined there is no safety need for head restraints in vehicles with a GVWR greater than 10,000 pounds. Based on national accident data estimates for 1982–1985, occupants of trucks with a GVWR greater than 10,000 pounds received an annual average of 1,400 whiplash injuries (compared to an annual 17,800 whiplash injuries for occupants of light trucks in the same time period). Further, while NHTSA estimates that 14.8 percent of front seat occupants in passenger cars and 4.6 percent of front seat occupants in light trucks received whiplash injuries in rear end collisions, the whiplash injury rate for occupants of heavy trucks is only 2.5 percent. Since the whiplash injury rate for heavy trucks is relatively low, and because the agency is aware of no indications that heavy trucks are becoming more similar in appearance or use to passenger cars, the same considerations for applying Standard No. 202 to light trucks and vans do not apply to vehicles with GVWR's greater than 10,000 pounds. NHTSA has therefore concluded that it is unnecessary at this time to propose extending Standard No. 202 to vehicles above the 10,000 pounds GVWR limit.

Light trucks within certain weight limits. In preparing this proposal, NHTSA analyzed the effect of vehicle weight on the risk of whiplash injury that a light truck occupant might experience in a crash. As a surrogate for vehicle weight, NHTSA compared domestic light trucks to foreign light trucks, since foreign light trucks weigh less as a group. The agency found no significant difference in whiplash injury rates between the two classes of trucks. Because of the relatively small sample size of foreign trucks in the data base, whether vehicle size or weight is a factor in whiplash injuries remains in doubt. The agency requests comments on whether size or weight are factors in whiplash injuries within the light truck category, and whether the proposed standard would be more cost-effective for certain sub-classes of vehicles (based on weight, size, type of use, or other factors.)

School bus right outboard front seating position. NHTSA has also decided to propose requiring a head restraint for only the driver's position of school buses with a GVWR of 10,000 pounds or less, and to exclude the right outboard front seating position on small school buses from the requirements of Standard No. 202. The agency believes that this exclusion is reasonable because passenger seats on small school buses must already meet their own seat back height and strength requirements, and it appears that a vast majority of the occupants of that seating position are children for whom current seat backs provide the type of head support that would be offered by a head restraint.

Rear seats. The national accident data estimates for 1982–1985 showed that while 17,800 whiplash injuries were suffered annually by front seat occupants in light trucks and vans in rear impacted vehicles, there were only an estimated 81 whiplash injuries annually involving rear seat occupants in those vehicle classes. Because of these estimates, NHTSA does not find adequate justification for proposing head restraints for the rear seats of light trucks and vans. Nonetheless, the agency is interested in information on the feasibility and costs of installing head restraints in the rear seating positions and the current or future availability of rear seat head restraints in vans and other MPV's.

Visibility

NHTSA does not believe that head restraints in light trucks and vans would obstruct a driver's visibility to a significant degree, or that any limitations in visibility resulting from the head restraints would be significantly causative of accident involvement. Nevertheless, comments are requested on this issue.

Rear Windows

In his petition, Mr. Goodson said that the rear window in light trucks can provide protection against head and neck injuries resulting from impact that window if proper glazing and mounting systems were used. NHTSA is interested in obtaining information on this issue. However, the agency emphasizes its concern about the practicability of the specific recommendation from Mr. Goodson to use rear window glazing as a means of providing head restraint in rear impact conditions. Of particular concern is the possibility that with laminated glass, lacerative injuries to the head, neck or shoulders could increase compared to tempered glass.

The agency sees many parameters influencing the effectiveness of the petitioner's suggestions for rear windows, including the size and shape of the rear window glazing, the spatial relationships between the window and the occupant, the angle of installation and the window frame arrangement. In particular, the head must be close to a restraining surface for that surface to limit the neck deflection angle to 45 degrees from the vertical. Many light trucks have movable seats that would significantly limit the effectiveness of the rear window as a head/neck restraint. Also, the type of glazing may be influential in determining overall effectiveness and expected safety benefits.

The agency is seeking research data which would bear directly on the efficacy of the various types of glazing which could be used in rear window openings to mitigate whiplash injuries. Currently, FMVSS No. 205, *Glazing Materials*, permits the use of 11 different types of glazing in this location. The agency is particularly interested in possible positive aspects of using tempered, laminated or glass-plastic glazing as a means of reducing whiplash injuries. However, the issue is *not* limited to the choice between the various types of glass because the selection of an engineering approach to implement the Goodson recommendations must take into account a variety of considerations, e.g., different types of glazing, thickness of glazing, mounting structure, size and shape of the window, location of the window from the occupant's head, modifications (such as sliding partitions) permitted in the proposed window, etc.

The agency requests comments on the issues outlined above and answers to the following specific questions. What contribution could cost-effective glazing mounting systems make to enhancing the head restraint capabilities of rear windows? What are the relative costs of different mounting systems? If rear windows were used as head restraints, should extra padding be specified for the mounting frame? Do rear window options such as sliding partitions reduce the safety benefits? How would scratches or other damage to the window affect its ability to function properly as a head restraint? How often are rear windows currently replaced in used light trucks because of damage to the glazing or mounting system? The agency is also interested in data on HIC (Head Injury Criteria) values for impacts on different types of glazing. Would a combination of restraints, such as glazing coupled with head restraints, provide significantly greater safety benefits than either restraint used singularly?

Leadtime

The current availability of engineering and manufacturing resources needed to implement the proposed extension of Standard No. 202 is illustrated by the availability of head restraints as standard or optional equipment on roughly 64 percent of the 1986 light truck and van models. The agency believes that a two year leadtime would be sufficient for the industry to meet 100 percent implementation of the proposed extension of the standard.

Costs and Benefits

NHTSA has examined the effect of this rulemaking action and determined that it is not major within the meaning of Executive Order 12291. It is, however, significant within the meaning of the Department of Transportation's regulatory policies and procedures. The economic effects of this rulemaking action are discussed in detail in the regulatory impact analysis.

NHTSA estimates that the average cost per affected vehicle is approximately $29.20 ($20 per vehicle plus $9.20 lifetime fuel penalty cost accounting for 7 additional pounds of weight per vehicle). This estimate is based on the assumption that the proportion of adjustable to integral head restraints among the affected population of vehicles would be the same as the proportion in model year 1986 fleet of light trucks with head restraints, i.e., 60 percent adjustable; 40 percent integral. Under the assumption that approximately 30 percent of the total light truck and van fleet in use have head restraints, 3.0 million vehicles would be affected by this proposed amendment. The total estimated impact cost of the proposed amendment is $87.6 million per year.

At this time, the agency does not have as much information as it would like concerning whiplash injuries and their costs. Whiplash injuries are not like the typical AIS 1 (minor cuts or bruises) or even AIS 2 (moderate injuries—broken bones, etc.), because whiplash injuries often involve longer term pain and stiffness. These symptoms, and perhaps rehabilitation therapy, often last a year or longer. The agency is interested in comments from the public, insurance companies, and medical researchers regarding the average cost of whiplash injuries (or data relating to the cost of the more minor whiplash injuries and/or the cost of the more severe whiplash injuries, with some indication as to what percent of all whiplash injuries are represented by these costs). The agency is also interested in tort judgments and/or settlements made regarding the value of pain and suffering associated with whiplash injuries, as well as work days lost and impairment as a result of whiplash injury.

The 1982 evaluation of Standard No. 202 found that adjustable head restraints were 10 percent effective and the integral head restraints were 17 percent effective in reducing all rear impact injuries. Assuming that the same effectiveness estimates apply to light trucks, the average effectiveness for light trucks is estimated to be 12.8 percent. NHTSA estimates that approximately 3,690 to 8,270 injuries could be reduced annually when the remainder of the light truck fleet was equipped with head restraints. These injury reductions are over and above those currently obtained by head restraints already present in approximately 30 percent of the light truck and van fleet.

Regulatory Flexibility Act

NHTSA has considered the effects of this rulemaking action under the Regulatory Flexibility Act. I hereby certify that it would not have a significant economic impact on a substantial number of small entities. The primary cost effect of this proposed rule would be on manufacturers of light trucks and vans, which are large corporations. Altough some small businesses that supply the metal or padding parts for adjustable head restraints or the seats with integral head restraints might experience a greater demand for their products, the agency does not believe that these would be significant. Further, although many final stage manufacturers are small businesses, the impact on them should be minor since the relatively small increase in the price of the completed vehicles can be passed on to the ultimate consumer, small organizations and governmental units.

Environmental Effects

NHTSA has analyzed this rulemaking action for the purposes of the National Environmental Policy Act. The agency has determined that implementation of this action would not have any significant impact on the quality of the human environment.

Federalism

This action has been analyzed in accordance with the principles and criteia contained in Executive Order 12612, and it has been determined that the proposed rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Comments

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length. (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation. 49 CFR Part 512.

All comments received before the close of business on the comment closing date indicated above for the proposal will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments received too late for consideration in regard to the final rule will be considered as suggestions for further rulemaking action. Comments on the proposal will be available for inspection in the docket. The NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

Regulatory Information Number

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this

VOL
53
ISS
239
DE
13
1988
UMI

document can be used to cross-reference this action with the Unified Agenda.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

In consideration of the foregoing, NHTSA proposes to amend 49 CFR Part 571 as follows:

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

1. The authority citation for Part 571 would continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

2. Paragraph S2 and the introductory text of paragraph S4 of Safety Standard No. 202, *Head Restraints*, [49 CFR 571.202], would be revised to read as follows:

§ 571.202 Standard No. 202; Head Restraints

* * * * * *

S2. *Application.* This standard applies to passenger cars, and to multipurpose passenger vehicles, trucks and buses with a GVWR of 10,000 pounds or less.

* * * * *

S4. *Requirements.* Except for school buses, a head restraint that conforms to either (a) or (b) shall be provided at each outboard front designated seating position. For school buses, a head restraint that conforms to either (a) or (b) shall be provided for the driver's seating position.

* * * * *

Issued on: December 8, 1988.

Barry Felrice,

Associate Administrator for Rulemaking.

Federal Register
Vol. 53, No. 239
Tuesday, December 13, 1988

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Foster Grandparent Program and Senior Companion Program, Income Eligibility Levels

AGENCY: ACTION.

ACTION: SSI adjusted income eligibility levels for the Foster Grandparent and Senior Companion Programs.

SUMMARY: This notice adjusts the 1988 income eligibility levels for the Foster Grandparent and Senior Companion Programs published in the **Federal Register**, June 22, 1988 (53 FR 120).

This adjustment is based on the 1988 Supplemental Security Income (SSI) guidelines disseminated by the Social Security Administration in October 1988. Revised income eligibility level for each state adopts the higher amount of either: (a) 125% of the Department of Health and Human Services (DHHS) Proverty Income Guidelines, or (b) 100% of the DHHS Guidelines plus the current amount of each state supplemented federal SSI. Amounts are rounded to the next highest multiple of $5.00.

Persons whose incomes met the eligibility levels published on June 22, 1988, shall remain eligible under the conditions provided in current policy. The adjusted eligibility levels in this Notice shall apply to persons enrolling in the Programs on or after its effective date.

SCHEDULES OF INCOME ELIGIBILITY LEVEL: FOSTER GRANDPARENT PROGRAM AND SENIOR COMPANION PROGRAM

[For the following States]

State	One	Two	Three	Four	Five	Six	Seven	Eight
AK	$10,870	$14,990	$17,440	$19,890	$22,340	$24,790	$27,240	$29,690
CA	9,300	16,900	18,860	20,820	22,780	24,740	26,700	28,660
CO	7,215	11,235	13,195	15,155	17,115	19,465	21,915	24,365
CT	10,610	14,475	16,435	18,395	20,355	22,315	24,275	26,235
HI	8,315	11,125	13,940	16,750	19,565	22,375	25,190	28,000
MA	7,320	10,155	12,115	14,565	17,015	19,465	21,915	24,365
WI	7,215	9,725	12,115	14,565	17,015	19,465	21,915	24,365

For household units in all states, the District of Columbia, Puerto Rico, and the Virgin Islands (except Alaska, California, Colorado, Connecticut, Hawaii, Massachusetts, and Wisconsin) the following income eligibility levels as published in the June 22, 1988 **Federal Register**, shall apply.

[For Household Units Of]

One	Two	Three	Four	Five	Six	Seven	Eight
$7,215	$9,665	$12,115	$14,565	$17,015	$19,465	$21,915	$24,365

Four household units with more than eight members, add to each additional household member (over eight): Alaska *$2,450,* Hawaii *$3,250,* all others *$1,960.*

EFFECTIVE DATE: December 9, 1988.

FOR FURTHER INFORMATION CONTACT: Rey Tejada, Program Officer, Foster Grandparent Program/Senior Companion Program, 806 Connecticut Avenue NW., M–1006, Washington, DC 20526 or telephone (202) 634–9349.

SUPPLEMENTARY INFORMATION: ACTION programs are authorized pursuant to sections 211 and 213 of the Domestic Volunteer Service Act of 1973, as amended Pub. L. 93–113, 87 Stat. 394. The income eligibility levels are determined by the currently applicable guideline published by DHHS pursuant to sections 652 and 673(2) of the Omnibus Budget Reconciliation Act of 1981 which requires poverty income guidelines to be adjusted for Consumer Price Index changes.

Donna M. Alvarado,

Director of ACTION.

BILLING CODE 6050–28–M

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

Feed Grain Donations for the Lake Traverse Indian Reservation in South Dakota

Pursuant to the authority set forth in section 407 of the Agricultural Act of 1949, as amended (7 U.S.C. 1427) and Executive Order 11336, I have determined that:

1. The chronic economic distress of the needy members of the Lake Traverse Sioux Reservation in South Dakota has been materially increased and become

acute because of severe and prolonged drought, thereby creating a serious shortage of feed and causing increased economic distress. This reservation is designated for Indian use and is utilized by members of the Sisseton-Wahpeton Sioux Tribe for grazing purposes.

2. The use of feed grain or products thereof made available by the Commodity Credit Corporation (CCC) for livestock feed for such needy members of the Tribe will not displace or interfere with normal marketing of agricultural commodities.

3. Based on the above determinations, I hereby declare the reservation and grazing lands of the Tribe to be acute distress areas and authorize the donation of feed grain owned by the CCC to livestock owners who are determined by the Bureau of Indian Affairs, United States Department of the Interior, to be needy members of the Tribe utilizing such lands. These donations by the CCC may commence upon December 15, 1988, and shall be made available through May 15, 1989, or such other date as may be stated in a notice issued by the Department of Agriculture.

Signed at Washington, DC on December 8, 1988.

Vern Neppl,

Acting Administrator, Agricultural Stabilization and Conservation Service.

BILLING CODE 3410-05-M

Forest Service

Southern Forest Experiment Station; Southern Pine Beetle

AGENCY: Forest Service, USDA.

ACTION: Notice; request for research proposals.

SUMMARY: In Fiscal Year 1989, the Southern Forest Experiment Station will proivide $500,000.00 for southern pine beetle cooperative research. Proposals will be considered for funding as described in the supplementary information section.

DATE: For consideration, proposals must be postmarked by February 17, 1989.

ADDRESSES: To obtain information on how to submit a proposal for cooperative research, write to: Project Leader, RWU-4501, Southern Forest Experiment Station, 2500 Shreveport Highway, Pineville, LA 71360.

FOR FURTHER INFORMATION CONTACT: J. Robert Bridges at the Pineville address given above; telephone 318/473-7323, (FTS) 497-7232.

SUPPLEMENTARY INFORMATION: The Southern Forest Experiment Station research work unit in Pineville, Louisiana, conducts long-term research on the southern pine beetle, *Dendroctonus frontalis*, the most destructive insect pest of southern pines. Because of the seriousness of southern pine beetle outbreaks, Congress has appropriated money to accelerate work on this pest as part of Forest Service's Pest Outbreak Priority Research Program.

The goal of the research program is to develop environmentally acceptable intervention tactics and strategies for delaying and suppressing southern pine beetle outbreaks. Proposals will be accepted to:

(1) Develop technology for prediction of outbreaks.

(2) Develop and test innovative new control procedures including biological, chemical, and behavioral chemical techniques.

(3) Evaluate the area-wide effectiveness of cut-and-leave and other control practices.

Proposals will be approved for funding based on scientific merit. Proposals will be sent to peer scientists for review. In addition, a review panel of scientists and other experts will be assembled to provide advice on the scientific and technical merit of proposals.

James E. Bell,

Acting Director.

Date: December 6, 1988.

BILLING CODE 3410-31-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 38-88]

Foreign-Trade Zone 49—Newark/Elizabeth, NJ; Application for Subzone Squibb Pharmaceutical Plant, New Brunswick, NJ

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Port Authority of New York and New Jersey, grantee of Foreign-Trade Zone 49, requesting special-purpose subzone status for the pharmaceutical plant of E.R. Squibb & Sons, Inc. (Squibb), in New Brunswick, New Jersey. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on November 28, 1988.

The Squibb plant (96 acres) is located in the City of New Brunswick at 1 Squibb Drive. (A portion of the facilities are in the adjoining Township of North Brunswick.) The facility employs some 2,500 persons and is used to produce a number of therapeutic and diagnostic pharmaceutical products such as antibiotics, antiflammatory compounds, hormonal products and cardiovascular products. About one-half of the finished products made at the plant use foreign-sourced materials, and the amount of foreign materials used in these products ranges from 0 to 90 percent, averaging about 45 percent. The ingredients and materials sourced abroad include diatrizoic acid, meglumin, procainamide, iodamide, iopamidol, mebrofenen, and tetracycline. The company also imports insulia in finished form. Some of the products are exported.

Zone procedures would exempt Squibb from Customs duty payments on foreign materials used in its exports. On its domestic sales, the company will be able to choose the same duty rate that applies to finished pharmaceutical products. The application indicates that, under the present tariff system, most of the finished products made at the plant are subject to 3.7 percent duty rate, whereas the rates on the ingredients used in the production of those products range from 5.3 to 13.5 percent.

The applicant states that the Harmonized Tariff System, which goes into effect on January 1, 1989, will reduce the magnitude of duty differentials, but the significant tariff inversions will remain.

The application indicates that zone savings would help improve the plant's international competitiveness.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli, (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; Peter J. Baish, Area Director, U.S. Customs Service, New York Region, Airport International Plaza, Room 210A, Newark, New Jersey 07114; and Colonel Marion C. Caldwell, District Engineer, U.S. Army Engineer Division New York, 26 Federal Plaza, New York, New York 10278-0090.

Comments concerning the proposed subzone are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before January 24, 1989.

A copy of the application is available for public inspection at each of the following locations:

Area Director's Office, U.S. Customs Service, Airport International Plaza, Room 210A, Newark, New Jersey 07114

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 2835, 14th and Pennsylvania Avenue NW., Washiongton, DC 20230.

Dated: December 7, 1988.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 88-28554 Filed 12-12-88; 8:45 am]

BILLING CODE 3510-DS-M

International Trade Administration

[A-122-802]

Final Determination of Sales at Less Than Fair Value; Thermostatically Controlled Appliance Plugs and Internal Probe Thermostats Therefor From Canada

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We have determined that thermostatically controlled appliance plugs and internal probe thermostats therefor from Canada are being, or are likely to be, sold in the United States at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to continue to suspend liquidation of all entries of the subject merchandise from Canada as described in the "Suspension of Liquidation" section of this notice.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Maria Mac Kay or Marianne Stout, Office of Agreements Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, telephone: 202/377-8667 (Mac Kay) or 202/377-5760 (Stout).

SUPPLEMENTARY INFORMATION:

Final Determination

We have determined that thermostatically controlled appliance plugs and internal probe thermostats therefor from Canada are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 735 of the Tariff Act of 1930, as amended (19 U.S.C. 1673d) (the Act). The estimated margin of sales at less than fair value is 29.27 percent *ad valorem*, as shown in the "Suspension of Liquidation" section of this notice.

Case History

On September 22, 1988, we made an affirmative preliminary determination in this case (53 FR 37825—September 28, 1988). The following events have occurred since the publication of that notice.

We verified the responses submitted by ATCO Controls, Inc. (ATCO) in Canada from October 11 to October 14, 1988.

On October 13, 1988, we received a request from ATCO for a public hearing, which we denied because the request was untimely. We received written comments from ATCO on November 7, 1988. Petitioner submitted no written comments.

On October 24, 1988, pursuant to section 734 of the Act, ATCO requested a suspension agreement under which it would have changed its prices to eliminate completely any amount by which the merchandise exceeds the United States price. We have concluded that the suspension of this investigation would not be in the public interest, nor would effective monitoring of the proposed suspension agreement be practicable, within the meaning of section 734(d) of the Act.

Scope of Investigation

The products covered by this investigation are thermostatically controlled appliance plugs and internal probe thermostats therefor.

For purposes of this investigation, the term thermostatically controlled appliance plugs refers to any device designed to connect an electrical outlet (typically a common wall receptable) with a small cooking appliance of 2,000 watts or less (typically a griddle, deep fryer, frying pan, multicooker, and/or wok) and regulate the flow of electricity and thus the temperature therein; consisting of (1) a probe thermostat encased in a single housing set with a temperature control knob (typically a dial calibrated with various temperature settings), and (2) a cord set.

The term internal probe thermostat refers to any device designed to regulate automatically the flow of electricity, and thus the temperature, in a small heating apparatus of 2,000 watts or less (typically small cooking appliances); consisting of a stainless steel tube (which connects to the heating apparatus) and other components used for thermostatic control.

The products are currently provided for under item numbers 711.7820 and 711.7840 of the *Tariff Schedules of the United States, Annotated* (TSUSA) and are currently classifiable under item numbers 9032.10.00, 9032.20.00, 9032.89.60, 9032.90.60, and 9033.00.00 of the *Harmonized Tariff Schedule* (HTS).

Period of Investigation

The period of investigation for thermostatically controlled appliance plugs and internal probe thermostats therefor from Canada extends from November 1, 1987 through April 30, 1988.

Fair Value Comparisons

To determine whether sales in the United States of thermostatically controlled appliance plugs and internal probe thermostats therefor from Canada were made at less than fair value, we compared the United States price with the foreign market value for ATCO, using the data provided in the responses.

In its responses, ATCO stated that sales in Canada of the subject merchandise during the period of investigation fell into two categories. Certain models meeting Canadian technical specifications were sold to unrelated Canadian appliance manufacturers for packaging with various small appliances to be sold in the Canadian market. Other models meeting U.S. technical specifications were sold to unrelated Canadian appliance manufacturers for packaging with small appliances to be sold in the United States. ATCO contends that the second category of sales should be treated as sales to the United States for purposes of fair-value comparisons.

The Department, however, considers ATCO's second category of sales to be home-market sales because this merchandise, as such, is not sold in the United States. Rather, the products that are ultimately sold in the United States consist of small appliances, merchandise which is not subject to this investigation.

Therefore, the Department compared ATCO's sales of the subject merchandise meeting U.S. technical specifications to United States purchasers with ATCO's home-market sales of subject merchandise meeting U.S. technical specifications.

We did not take into account ATCO's sales of the subject merchandise meeting Canadian technical specifications in our preliminary determination based on the assumption that sales to the United States involved only merchandise meeting U.S. specifications, as indicated in the questionnaire response. During verification, however, we ascertained

VOL
53
ISS
239
DE
13
1988
UMI

that small quantities of the subject merchandise meeting the Canadian technical specifications were sold to U.S. purchasers during the period of investigation. We did not take these transactions into account for purposes of our final determination because of the small volume involved.

United States Price

We based United States price on purchase price, in accordance with section 772(b) of the Act, because the merchandise was sold to an unrelated purchaser in the United States prior to its importation. We calculated purchase price based on the f.o.b. or delivered, packed prices to U.S. customers. We made additions to purchase price for duty drawback, *i.e.*, import duties which were rebated, or not collected, by reason of the exportation of the subject merchandise to the United States, in accordance with section 772(d)(1)(B) of the Act. Where appropriate, we made deductions from purchase price for inland freight, brokerage costs, and customs duty.

Foreign Market Value

In accordance with section 773(a)(1)(A) of the Act, we calculated foreign market value based on f.o.b. or delivered, packed prices to unrelated purchasers in Canada. In accordance with § 353.15 of our regulations, we made an adjustment to foreign market value for differences in circumstances of sale for technical services. In accordance with § 353.16 of our regulations, where there was no identical product in the home market with which to compare a product in the United States, we made an adjustment to the foreign market value of similar merchandise to account for differences in the physical characteristics of the merchandise. In order to adjust for differences in packing between the two markets, we deducted Canadian packing costs from foreign market value and added U.S. packing costs.

Currency Conversion

We made currency conversions in accordance with § 353.56(a)(1) of our regulations. We made all currency conversions using the daily exchange rates certified by the Federal Reserve Bank of New York.

Verification

As provided in section 776 of the Act, we verified all information used in reaching the final determination in this investigation. We used standard verification procedures, including examination of relevant accounting records and original source documents provided by the respondent.

Interested Party Comments

Respondent's Comments

Comment 1: On November 7, 1988 ATCO requested that the Department extend the period of investigation to cover a May sale made by ATCO to one of its U.S. customers. ATCO's counsel argued that this sale was negotiated during the period of investigation, although written proof of the sale was not available until a couple of weeks after the end of the period of investigation.

DOC Position: The Department has considered the argument presented by the petitioner. Because a sufficient number of transactions were already included in the original period of investigation to make fair value comparisons, the Department found an extension to be unwarranted. Furthermore, the Department received such request after verification and was unable to verify the additional transactions. Thus, the Department decided against extending the period of investigation.

Continuation of Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of thermostatically controlled appliance plugs and internal probe thermostats therefor from Canada that are entered, or withdrawn from warehouse, for consumption on or after September 28, 1988, the date of publication of the preliminary determination in the **Federal Register**. The U.S. Customs Service shall require a cash deposit or posting of a bond equal to the estimated amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price, which is 29.27 percent *ad valorem*. This suspension of liquidation will remain in effect until further notice.

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. If the ITC determines that material injury, or threat of material injury, does not exist in this case, this proceeding will be terminated and all securities posted as a result of suspension of liquidation will be refunded. If the ITC determines that material injury, or threat of material injury, does exist in this case, we will issue an antidumping duty order directing Customs officers to assess an antidumping duty on thermostatically controlled appliance plugs and internal probe thermostats therefor from Canada which are entered, or withdrawn from warehouse, for consumption on or after the date on which liquidation was suspended. The antidumping duty will equal the amount by which the foreign market value of the subject merchandise exceeds United States price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Jan W. Mares,

Assistant Secretary for Import Administration.

December 5, 1988.

[FR Doc. 88-28555 Filed 12-12-88; 8:45 am]
BILLING CODE 3510-DS-M

[A-583-805]

Initiation of Antidumping Duty Investigation; Martial Arts Uniforms From Taiwan

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the U.S. Department of Commerce, we are initiating an antidumping duty investigation to determine whether imports of martial arts uniforms from Taiwan are being, or are likely to be, sold in the United States at less than fair value. We are notifying the U.S. International Trade Commission (ITC) of this action so that it may determine whether imports of martial arts uniforms materially injure, or threaten material injury to, a U.S. industry. If this investigation proceeds normally, the ITC will make its preliminary determination on or before December 30, 1988. If that determination is affirmative, we will make a preliminary determination on or before April 24, 1989.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 377-3965.

SUPPLEMENTARY INFORMATION:

The Petition

On November 15, 1988, we received a petition filed in proper form by Century Martial Art Supply, Inc. on behalf of the domesic martial arts uniform industry. In compliance with the filing

requirements of 19 CFR 353.36, petitioner alleges that imports of martial arts uniforms from Taiwan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material injury to, a U.S. industry.

United States Price and Foreign Market Value

Petitioner's estimate of United States price is based on a price to an unrelated party in the United States, less a wholesaler's mark-up, U.S. duty, ocean freight, brokerage fees, drayage and associated charges. Petitioner's estimate of foreign market value (FMV) is based on a retail price in the home market, less retailer and wholesaler mark-ups.

Based on a comparison of FMV to the United States price, petitioner alleges a dumping margin of 8.5 percent.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether it sets forth the allegations necessary for the initiation of an antidumping duty investigation, and whether it contains information reasonably available to the petitioner supporting the allegations.

We examined the petition on martial arts uniforms from Taiwan and found that it meets the requirements of section 732(b) of the Act. Therefore, in accordance with section 732 of the Act, we are initiating an antidumping duty investigation to determine whether imports of martial arts uniforms from Taiwan are being, or are likely to be, sold in the United States at less than fair value. If our investigation proceeds normally, we will make our preliminary determination by April 24, 1989.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. On January 1, 1989, the U.S. tariff schedules will be fully converted to the *Harmonized Tariff Schedule* (HTS) and all merchandise entered or withdrawn from warehouse for consumption on or after this date will be classified solely according to the appropriate HTS item number(s). Until that time, however, the Department will be providing both the appropriate *Tariff Schedules of the United States Annotated* (TSUSA) item numbers and the appropriate HTS item numbers with our product descriptions. As with the TSUSA, the HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive as to the scope of the product coverage.

We are requesting petitioners to include the appropriate HTS item number(s) as well as the TSUSA item number(s) in all new petitions filed with the Department. A reference copy of the proposed HTS schedule is available for consultation at the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230. Additionally, all U.S. Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

The products covered by this investigation include the following articles: Martial art uniforms for men, boys, women, girls and infants. The uniforms consist of tops, pants and belts and are imported from Taiwan separately or as ensembles. They are made of cotton or of man-made fibers, either ornamented or not ornamented. They are suitable for wearing while practicing all forms of martial arts, including but not limited to: Judo, Karate, Kung Fu, Tae Kwon Do, Ninja, Ninjutsu, Hakama, Tai Chi, Jujitsu and Hapkido. These products are normally provided for in TSUSA items 381.6300, 381.0830, 381.3200, 384.0950, 281.9700, 384.2400, 384.5000 and 384.9200 (HTS subheadings 6203.22.1000, 6203.23.0070, 6203.23.0080, 6203.23.0090, 6203.29.20, 6204.22.1000, 6204.23.00 and 6204.29.20) and may also be entered under TSUS items 381.05, 381.08, 381.31, 381.32, 381.33, 381.56, 381.62, 381.63, 381.65, 381.95, 381.97, 381.98, 384.05, 384.07, 384.09, 384.23, 384.24, 384.26, 384.46, 384.47, 384.50, 384.52, 384.90, 384.91, 384.92, and 384.94 (HTS subheadings 6203.22.10, 6203.23.00, 6203.29.20, 6203.42.40, 6203.43.40, 6203.49.20, 6204.22.10, 6204.62.40, 6204.63.35, 6204.69.25, 6209.20.30, 6209.20.50, 6209.30.20, 6209.30.30, 6209.90.20, 6209.90.30, and 6217.10.00).

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonproprietary information. We will allow the ITC access to all privileged and business proprietary information in our files, provided it confirms in writing that it will not disclose such information either publicly or under administrative protective order without the written consent of the Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by December 30, 1988, whether there is a reasonable indication that imports of martial arts uniforms from Taiwan materially injure, or threaten material injury to, a U.S. industry. If its determination is negative, the investigation will terminate; otherwise, it will proceed according to the statutory and regulatory procedures.

This notice is published pursuant to section 732(c)(2) of the Act.

Jan W. Mares,

Assistant Secretary for Import Administration.

December 6, 1988.

Final Negative Countervailing Duty Determination: Thermostatically Controlled Applicance Plugs and International Probe Thermostats Therefor From Canada

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We determine that no benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Canada of thermostatically controlled applicance plugs and internal probe thermostats therefor (the subject merchandise), as described in the "Scope of Investigation" section of this notice.

We have notified the U.S. International Trade Commission (ITC) of our determination.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Vincent P. Kane or Roy Malmrose, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-2815 or 377-5414.

SUPPLEMENTARY INFORMATION:

Final Determination

Based on our investigation, we determine that no benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers,

VOL 53 ISS 239 DE 13 1988 UMI

or exporters in Canada of the subject merchandise.

Case History

Since the publication of the preliminary determination (*Preliminary Affirmative Countervailing Duty Determination: Thermostatically Controlled Appliance Plugs and Internal Probe Thermostats Therefor from Canada Malaysia and Taiwan* (53 FR 27738, July 22, 1988)), the following events have occurred. The Government of Canada (GOC) and ATCO Controls, Inc. (ATCO), the respondent of company in this investigation, submitted supplemental questionnaire responses on the following dates: July 22 and August 10, 1988.

From August 2 to August 5, 1988, we conducted verification in Canada of the questionnaire responses of the GOC and ATCO.

On August 22, 1988, we received a request from the petitioner, pursuant to section 705(a)(1) of the Act, to extend the date of the final determination to correspond with the date of the final determination in the antidumping investigations of the same products from Canada, Hong Kong, Japan, Malaysia and Taiwan. We extended the due date to December 6, 1988 and we published notice of the extension in the **Federal Register** Extension of the Due Dates for the Final Countervailing Duty Determinations: Certain Thermostatically Controlled Applicance Plugs and Internal Probe Thermostats Therefor From Canada, Malaysia and Taiwan (53 FR 39493, October 7, 1988).

An amended response based on information reviewed at verification was submitted by ATCO on August 10, 1988. None of the interested parties requested a public hearing or submitted briefs.

Exclusion Request

On June 10, 1988, ATCO stated that it has neither applied for nor received benefits from any of the programs under investigation and requested an exclusion from any countervailing duty order which might result from the investigation.

Because ATCO is the only respondent company in this investigation, and we have confirmed that it received no benefits, we are issuing a final negative determination. Therefore, the exclusion provision does not apply. Exclusion is relevant only within the context of an affirmative determination and a countervailing duty order.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules will be fully converted to the *Harmonized Tariff Schedule* (HTS) and all the merchandise entered or withdrawn from warehouse for consumption on or after that date will be classified solely according to the appropriate HTS item number(s). Until that time, however, the Department will be providing both the appropriate *Tariff Schedules of the United States Annotated* (TSUSA) item number(s) and the appropriate HTS item number(s) with its product descriptions. As with the TSUSA, the HTS item numbers are provided for convenience and Customs purposes. The Department's written description of the products under investigation remains dispositive as to the scope of the product coverage.

We are requesting petitioners to include the appropriate HTS item number(s) as well as the TSUSA item number(s) in all petitions filed with the Department through the end of this year. A reference copy of the HTS is available for consultation in the Central Records Unit, Room B–099, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230. Additionally, all U.S. Customs offices have reference copies, and petitioners may contact the import specialist at their local Customs office to consult the schedule.

The products covered by this investigation are theromstatically controlled applicance plugs and internal probe thermostats therefor. For purposes of this investigation, the term thermostatically controlled appliance plug refers to any device designed to connect an electrical outlet (typically a common wall receptacle) with a small cooking appliance of 2,000 watts or less (typically a griddle, deep fryer, fry pan, multicooker, and/or wok) and regulate the flow of electricity, and thus the temperature, therein; consisting of (1) a probe thermostat encased in a single housing set with a temperature control knob (typically a dial calibrated with various temperature settings), and (2) a cord set.

The term internal probe thermostat refers to any device designed to automatically regulate the flow of electricity, and thus the temperature, in a small heating apparatus of 2,000 watts or less (typically small cooking appliances), consisting of a stainless steel tube (which connects to the heating apparatus) and other components used for thermostatic control.

The products are currently provided for under TSUSA item numbers 711.7820 and 711.7840 and under HTS 9032.10.00, 9032.20.00, 9032.89.60, 9032.90.60, and 9033.00.00.

Analysis of Programs

For purposes of this final determination, the period for which we are measuring subsidies (the review period) is ATCO's fiscal year, July 1, 1986, through August 31, 1987. Based upon our analysis of the petition, the responses to our questionnaires, and the verification, we determine the following:

I. Programs Determined Not to be Used

Based on verified information, we determine that manufacturers, producers, and exporters in Canada of the subject merchandise did not apply for, claim, or receive benefits during the review period for exports of the subject merchandise to the United States under the programs listed below. These programs were described in the preliminary determination in this investigation.

A. Federal Programs

1. Certain Types of Investment Tax Credits
2. Community-based Industrial Adjustment Program
3. Programs for Export Market Development and Promotional Projects
4. Regional Development Incentives Program
5. Industrial and Regional Development Program
6. Export Credit Financing

B. Joint Federal-Provincial Programs

1. Agricultural and Rural Development Agreements
2. General Development Agreements
3. Economic and Regional Development Agreements

C. Provincial Program

1. Ontario Development Corporation (ODC)

Verification

We verified the information used in making our final determination in accordance with section 776(b) of the Act. We used standard verification procedures including meeting with government and company officials and examining relevant accounting records and original source documents of the respondents. Our verification results are outlined in detail in the public versions of the verification reports which are on file in Central Records Unit (Room B–099) of the Main Commerce Building.

ITC Notification

In accordance with section 705(d) of the Act, we will notify the ITC of our determination. Since we have determined that no subsidies are being provided to manufacturers, producers or exporters in Canada of thermostatically controlled appliance plugs and internal probe thermostats therefor, the investigation will be terminated upon the publication of this notice in the **Federal Register**. Hence, the ITC is not required to make a final injury determination.

This determination is published pursuant to section 705(d) of the Act (19 U.S.C. 1671d(d)).

Jan W. Mares,

Assistant Secretary for Import Administration.

December 6, 1988.

Final Negative Countervailing Duty Determination: Thermostatically Controlled Appliance Plugs and Internal Probe Thermostats Therefor From Malaysia

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We determine that no benefits which constitute bounties or grants within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Malaysia of thermostatically controlled appliance plugs and internal probe thermostats therefor (the subject merchandise), as described in the "Scope of Investigation" section of this notice.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Vincent Kane or Roy Malmrose, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-2815 or 377-5414.

SUPPLEMENTARY INFORMATION:

Final Determination

Based on our investigation, we determine that no benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Malaysia of the subject merchandise.

Case History

Since the publication of the preliminary determination (*Preliminary Negative Countervailing Duty Determination: Thermostatically Controlled Appliance Plugs and Internal Probe Thermostats Therefor from Canada* (53 FR 27740, July 22, 1988)) the following events have occurred. On August 3, 1988, Power Electronics Sdn. Bhd. (Power Electronics), the respondent company in this investigation, submitted a revised version of its nonconfidential supplementary response.

On August 22, 1988, we received a request from the petitioner, under section 705(a)(1) of the Act, to extend the date of the final determination to correspond with the date of the final determinations in the antidumping investigations of the same products from Canada, Hong Kong, Japan, Malaysia, and Taiwan. Pursuant to petitioner's request, we extended the date of the final determination to December 6, 1988, and published notice of the extension in the **Federal Register** (*Extention of the Due Dates for the Final Countervailing Duty Determinations: Certain Thermostatically Controlled Appliance Plugs and Internal Probe Thermostats Therefor From Canada, Malaysia and Taiwan* (53 FR 39493, October 7, 1988)).

From September 12 to September 22, 1988, we conducted verification in Malaysia of the questionnaire responses of the Government of Malaysia and Power Electronics.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules will be fully converted to the *Harmonized Tariff Schedule* (HTS) and all the merchandise entered or withdrawn from warehouse for consumption on or after that date will be classified solely according to the appropriate HTS item number(s). Until that time, however, the Department will be providing both the appropriate *Tariff Schedules of the United States Annotated* (TSUSA) item number(s) and the appropriate HTS item number(s) with its product descriptions. As with the TSUSA, the HTS item numbers are provided for convenience and Customs purposes. The Department's written description of the products under investigation remains dispositive as to the scope of the product coverage.

We are requesting petitioners to include the appropriate HTS item number(s) as well as the TSUSA item number(s) in all petitions filed with the Department through the end of this year. A reference copy of the HTS is available for consultation in the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all U.S. Customs offices have reference copies, and petitioners may contact the import specialist at their local Customs office to consult the schedule.

The products covered by this investigation are thermostatically controlled appliance plugs and internal probe thermostats therefor. For purposes of this investigation, the term thermostatically controlled appliance plug refers to any device designed to connect an electrical outlet (typically a common wall receptacle) with a small cooking appliance of 2,000 watts or less (typically a griddle, deep fryer, fry pan, multicooker, and/or wok) and regulate the flow of electricity, and thus the temperature, therein; consisting of (1) a probe thermostat encased in a single housing set with a temperature control knob (typically a dial calibrated with various temperature settings), and (2) a cord set.

The term internal probe thermostat refers to any device designed to automatically regulate the flow of electricity, and thus the temperature, in a small heating apparatus of 2,000 watts or less (typically small cooking appliances); consisting of a stainless steel tube (which connects to the heating apparatus) and other components used for thermostatic control.

The products are currently provided for under TSUSA item numbers 711.7820 and 711.7840 and under HTS item numbers 9032.10.00, 9032.20.00, 9032.89.60, 9032.90.60, and 9033.00.00.

Analysis of Programs

For purposes of this final determination, the period for which we are measuring bounties or grants (the review period) is calendar year 1987, which corresponds to the fiscal year of the respondent company. Based upon our analysis of the petition, the responses to our questionnaries, and the verification, we determine the following:

I. Programs Determined Not to Confer a Bounty or Grant

We determine that bounties or grants are not being provided to manufacturers, producers or exporters in Malaysia of the subject merchandise under the following programs:

A. Agreement with the Islamic Development Bank

The Islamic Development Bank (IDB) is a multilateral development bank subscribed to by 44 Islamic nations. It is located in Jeddah, Saudi Arabia. The Industrial Development Bank of Malaysia, generally referred to as Bank Kemajuan, is a development bank owned by the Government of Malaysia through the Ministry of Finance. Bank Kemajuan offers a foreign trade financing facility enabling importers to get short-term financing from the IDB.

At verification we found that Power Electronics had a foreign trade financing facility agreement with Bank Kemajuan and the IDB. Power Electronics, Bank Kemajuan and the IDB entered a tripartite agreement under which the IDB agreed to open letters of credit in favor of Power Electronics' foreign component suppliers. The agreement stipulated that the IDB purchase a quantity of goods and resell them at a mark-up to Power Electronics against the security of a guarantee from Bank Kemajuan.

The agreement with the IDB is not countervailable. Section 303 of the Act (19 U.S.C. 1303) states that "whenever any country, dependency, colony, province, or other political subdivision of government, person, partnership, association, cartel, or corporation, shall pay or bestow, directly or indirectly, any bounty or grant upon the manufacture or production or export of any article or merchandise manufactured or produced in such country, dependency, colony, province, or other political subdivision of government, then upon the importation of such article or merchandise into the United States . . . there shall be levied and paid, in all such cases, in addition to any duties otherwise imposed, a duty equal to the next amount of such bounty or grant, however the same be paid or bestowed." Since the merchandise under investigation is produced in Malaysia and the agreement with Power Electronics is from an international development institution which is located outside of Malaysia, we determine that the agreement is not countervailable. See, for example, the *Final Affirmative Countervailing Duty Determination: Fuel Ethanol from Brazil*, (51 FR 3361, January 27, 1986) and *Initiation of Countervailing Duty Investigation: Certain Textiles and Textile Products from the Philippines*, (49 FR 34381, August 30, 1984).

B. Guarantee Agreement with Bank Kemajuan

Bank Kemajuan is required to guarantee all transactions between the IDB and Malaysian enterprises. Bank Kemajuan agreed to guarantee Power Electronics' liabilities to the IDB under the foreign trading financing facility agreement in return for a corporate guaranteed from Power Electronics' parent company and an annual guarantee fee of one percent. We confirmed that Power Electronics paid its guarantee fee at one percent per annum according to schedule.

We examined whether the guarantee received by Power Electronics was provided on terms inconsistent with commercial considerations by comparing the guarantee fee paid by Power Electronics with the commercial fee for a one-year loan guarantee. We verified that the commercial fee for a one-year loan guarantee is between one and 1.25 percent, depending on the client, or about one percent if the client is guaranteed by a parent company. Since Power Electronics paid a guarantee fee of one percent after its parent company pledged a corporate guarantee, we determine that the guarantee provided Power Electronics by Bank Kemajuan is not on terms inconsistent with commercial considerations and is not countervailable. Given this conclusion, we need not consider whether this program is provided to a specific enterprise or industry, or group of enterprises or industries.

II. Programs Determined Not to Be Used

Based on verified information, we determine that manufacturers, producers, or exporters in Malaysia of the subject merchandise did not apply for, claim or receive benefits during the review period for exports of the subject merchandise to the United States under the programs listed below. These programs were described in the preliminary determination in this investigation.

A. Export Tax Incentives

1. Abatement of Taxable Income Based on the Ratio of Export Sales to Total Sales and an Abatement of Five Percent of the Value of Indigenous Materials Used in Exports
2. Allowance of Taxable Income of Five Percent for
Trading Companies Exporting Malaysian-made Products
3. Double Deduction for Export Credit Insurance Payments
4. Double Deduction for Export Promotion Expenses
5. Allowance of a Percentage of Net Taxable Income Based on the F.O.B. Value of Export Sales
6. Industrial Building Allowance

B. Other Export Incentives

1. Export Credit Refinancing
2. Export Insurance Program

C. Other Tax Incentives

1. Pioneer Status Under the Investment Incentives Act of 1968
2. Pioneer Status Under the Promotion of Investments Act of 1986
3. Investment Tax Allowance
5. Reinvestment Allowance

D. Medium-and Long-term Government Financing

E. Reduction in the Cost of State Land for New Industry

F. Preferential Financing for Bumiputras

Verification

We verified the information used in making our final determination in accordance with section 776(b) of the Act. We used standard verification procedures including meeting with government and company officials and examining relevant accounting records and original source documents of the respondents. Our verification results are outlined in detail in the public versions of the verification report which are on file in the Central Record Unit (Room B-099) of the Main Commerce Building.

This determination is published pursuant to section 705(d) of the Act [19 U.S.C. 1671d(d)].

Jan W. Mares,

Assistant Secretary for Import Administration.

[FR Doc. 88-28664 Filed 12-12-88; 8:45 am]

BILLING CODE 3510-DS-M

[C-583-802]

Final Affirmative Countervailing Duty Determination: Thermostatically Controlled Appliance Plugs and Internal Probe Thermostats Therefor From Taiwan

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We determine that benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Taiwan of thermostatically controlled appliance plugs and internal probe thermostats therefor (the subject merchandise), as described in the "Scope of

Investigation" section of this notice. The estimate net subsidy and duty deposit rate is 2.41 percent *ad valorem*.

We haved notified the U.S. International Trade Commission (ITC) of our determination. If the ITC determines that imports of these products materially injure, or threaten material injury to, a U.S. industry, we will direct the U.S. Customs Service to resume the suspension of liquidation of all entries of the subject merchandise from Taiwan, that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of the countervailing duty order and to require a cash deposit or bond on entries of these products in the amount equal to the estimated net subsidy.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Vincent P. Kane or Roy Malmrose, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–2815 or 377–5414.

SUPPLEMENTARY INFORMATION:

Final Determination

Based on our investigation, we determine that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Taiwan of the subject merchandise. For purposes of this investigation, the following programs are found to confer subsidies:

- Preferential Export Financing.
- Export Loss Reserves.
- Preferential Income Tax Rate Ceiling of 22 Percent.
- Overrebate of Duty Drawback on Imported Materials Physically Incorporated in Export Merchandise.
- Rebate of Import Duties and Indirect Taxes on Imported Materials not Physically Incorporated in Export Merchandise.

As discussed in the "Analysis of Programs" section below, the estimated net subsidy rate is based on best information available.

Case History

Since the publication of the preliminary determination in the **Federal Register**, (*Preliminary Affirmative Countervailing Duty Determination: Thermostatically Controlled Appliance Plugs and Internal Probe Thermostats Therefor from Taiwan* (53 FR 27742, July 22, 1988)), the following events have occurred. On August 22, 1988, we received a request from the petitioner, pursuant to section 705(a)(1) of the Act, to extend the date of the final determination to correspond with the date of the final determinations in the antidumping investigations of the same products from Canada, Hong Kong, Japan, Malaysia and Taiwan. We extend the due date to December 6, 1988 and we published notice of the extension in the **Federal Register** (*Extension of the Due Dates for the Final Countervailing Duty Determinations: Certain Thermostatically Controlled Appliance Plugs and Internal Probe Thermostats Therefor From Canada, Malaysia and Taiwan* (53 FR 39493, October 7, 1988)).

As detailed in the *Case History* section of our preliminary determination, we received no responses to our questionnaire from either the Taiwanese authorities or the manufacturers, producers, or exporters of the subject merchandise.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules will be fully converted to the *Harmonized Tariff Schedule* (HTS) and all the merchandise entered or withdrawn from warehouse for consumption on or after that date will be classified solely according to the appropriate HTS item number(s). Until that time, however, the Department will be providing both the appropriate *Tariff Schedules of the United States Annotated* (TSUSA) item number(s) and the appropriate HTS item number(s) with its product descriptions. As with the TSUSA, the HTS item numbers are provided for convenience and Customs purposes. The Department's written description of the products under investigation remains dispositive as to the scope of the product coverage.

We are requesting petitioners to include the appropriate HTS item number(s) as welll as the TSUSA item number(s) in all petitions filed with the Department through the end of this year. A reference copy of the HTS is available for consultation in the Central Records Unit, Room B–099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.Additionally, all U.S. Costoms offices have reference copies, and petitioners may contact the import specialist at their local Customs office to consult the schedule.

The products covered by this investigation are thermostatically controlled appliance plugs and internal probe thermostats therefor. For purposes of this investigation, the term thermostatically controlled appliance plug refers to any device designed to connect an electrical outlet (typically a common wall receptacle) with a small cooking appliance of 2,000 watts or less (typically a griddle, deep fryer, fry pan, multicooker, and/or wok) and regulate the flow of electricity, and thus the temperature, therein; consisting of (1) a probe thermostat encased in a single housing set with a temperature control knob (typically a dial calibrated with various temperature settings), and (2) a cord set.

The term internal probe thermostat refers to any device designed to regulate automatically the flow of electricity, and thus the temperature, in a small heating apparatus of 2,000 watts or less (typically small cooking appliances), consisting of a stainless steel tube (which connects to the heating apparatus) and other components used for thermostatic control.

The products are currently provided for under TSUSA item numbers 711.7820 and 711.7840 and under HTS item numbers 9032.10.00, 9032.20.00, 9032.89.60, 9032.90.60, 9033.00.00.

Analysis of Programs

Because we did not receive responses to our questionnaires, we are using the best information available as required under section 776(c) of the Act (19 U.S.C. 1677e(c)), adversely inferring countervailability and receipt of benefits based on the absence of responses. As best information available, we used the highest estimated net subsidy found from each program in any past countervailing duty final determination involving Taiwan.

For programs which have been alleged, but which we have never found to be used in any previous case, we inferred the use and countervailability of these programs in our preliminary determination and used, as best information available, the highest rate applied to a subsidy program in any investigation on Taiwan. Upon further evaluation, we have changed this approach for the final determination and are assuming that these programs were not used. We have made this assumption because the petitioner has not provided any information as to the extent or use of these programs, the programs were found not used in all previous investigations and we have never determined if the programs are countervailable. This approach is more consistant with our approach in cases involving similar circumstances. See, for example, the *Final Affirmative*

BEST COPY AVAILABLE

Countervailing Duty Determination: Industrial Phosphoric Acid from Israel (52 FR 25447, July 7, 1987) and the *Preliminary Affirmative Countervailing Duty Determination: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, from Israel* (53 FR 48670, December 2, 1988).

Based upon our analysis of the petition and the past final countervailing duty determinations involving imports from Taiwan, we determine the following:

I. Programs Determined to Confer Subsidies

A. Preferential Export Financing

Petitioner alleges that under the Export Financing Program, registered exporters, upon presentation of a letter of credit to authorized foreign currency banks, are eligible for below-market financing covering up to 85 percent of an export transaction. The Central Bank then arranges an interest rate accommodation with the participating banks. The most recent investigation in which this program was determined to be countervailable was the *Final Negative Countervailing Duty Determination: Porcelain-on-Steel Cooking Ware from Taiwan* (51 FR 36453, October 10, 1986) *(Porcelain-on-Steel Cooking Ware.)*. We have received no further information on the preferential export financing program in this investigation. Therefore, as best information available, we determine that exporters of the subject merchandise in Taiwan benefit from this program.

The highest estimated net subsidy for this program in any previous final countervailing duty determination is 0.10 percent *ad valorem*, which is the rate found in the *Final Negative Countervailing Duty Determination: Oil Country Tubular Goods from Taiwan* (51 FR 19583, May 30, 1986).

B. Export Loss Reserves

Petitioner alleges that Article 31 of the Statute for Encouragement of Investment (SEI) allows firms to set aside a reserve of up to one percent of the previous year's export sales to be used for compensation of export losses. Petitioner alleges that this reserve is treated as a deduction from taxable income and allows firms to shelter significant amounts of revenue from taxation. The most recent investigation in which this program was determined to be countervailable was the *Final Affirmative Countervailing Duty Determination: Certain Stainless Steel Cooking Ware from Taiwan* (51 FR 42891, November 26, 1986) (*Stainless Steel Cooking Ware).* We have received no further information on the export loss revenue program in this investigation. Therefore, as best information available, we determine that exporters of the subject merchandise from Taiwan benefit from this program.

The highest estimated net subsidy for this program in any previous final countervailing duty determination is 0.02 percent *ad valorem*, which is the rate found in the *Final Negative Countervailing Duty Determinction: Welded Carbon Steel Line Pipe from Taiwan* (50 FR 53363, December 31, 1985).

C. Preferential Income Tax Rate Ceiling of 25 Percent for Big Trading Companies

Petitioner alleges that Article 15 of the SEI permits certain business firms to pay no more than 25 percent in corporate income tax rather than the standard 35 percent. We determined in *Stainless Steel Cooking Ware*, the most recent investigation in which this program was determined to be countervailable, that the 25 percent income tax ceiling granted to big trading companies is based on export performance; therefore, it confers an export subsidy. We have received no further information on the preferential income tax rate ceiling of 25 percent for big trading companies program in this investigation. Therefore, as best information available, we determine that manufacturers, producers or exporters of the subject merchandise from Taiwan benefit from this program.

The highest estimated net subsidy for this program in any previous final countervailing duty determination is 0.16 percent *ad valorem*, which is the rate found in *Porcelain-on-Steel Cooking Ware.*

D. Overrebate of Duty Drawback on Imported Materials Physically Incorporated in Export Merchandise

Taiwan authorities give duty drawback on imported materials physically incorporated in export products. Duty drawback is refunded on a shipment-by-shipment basis and is calculated by applying a pre-established duty drawback rate to the net weight of the finished product in each shipment. The most recent investigation in which this program was determined to be countervailable was *Stainless Steel Cooking Ware.* We have received no further information on the overrebate of duty drawback on imported materials physically incorporated in export merchandise program in this investigation. Therefore, as best information available, we determine that exporters of the subject merchandise from Taiwan benefit from this program.

The highest estimated net subsidy for this program in any previous final countervailing duty determination is 2.13 percent *ad valorem*, which is the rate found in *Stainless Steel Cooking Ware.*

E. Rebate of Import Duties and Indirect Taxes on Imported Materials Not Physically Incorporated in Export Merchandise

Taiwan authorities approve rebates of import duties and indirect taxes on imported materials not physically incorporated in export merchandise. The most recent investigation in which this program was determined to be countervailable was *Stainless Steel Cooking Ware.* We have received no further information on the rebate of import duties and indirect taxes on imported materials not physically incorporated in export merchandise program in this investigation. Therefore, as best information available, we determine that exporters of the subject merchandise from Taiwan benefit from this program.

The highest estimated net subsidy for this program in any previous final countervailing duty determination is 0.002 percent *ad valorem*, which is the rate found in *Stainless Steel Cooking Ware.*

II. Programs Determined Not to be Used

The following programs were found to be not used in all previous countervailing duty determinations involving imports from Taiwan. In our preliminary determination we inferred the use and counteravailability of these programs and used, as best information available, the highest rate applied to a subsidy program in any investigation on Taiwan. We have changed this approach for the final determination and are assuming that these programs were not used. The justification for this assumption is described in the *Analysis of Programs* section of this notice.

A. *Accelerated Depreciation and Tax Holidays*

Petitioner alleges that Article 6 of the SEI gives newly established "productive enterprises" the right to accelerate depreciation on fixed assets, machinery and equipment or to select a five-year holiday on corporate income taxes. In addition, expanding firms may select a four-year holiday on income derived from increased capacity or a rapid depreciation of newly purchased buildings or equipment.

B. *Duty Exemptions and Deferrals on Imported Equipment*

Petitioner alleges that Article 21 of the SEI allows productive enterprises to pay import duties and dues on selected capital equipment not manufactured domestically in a series of installments beginning one year from the date of importation. In addition, qualified enterprises may be exempted from paying import duties on machinery or equipment to be used for the establishment or expansion of an approved project or for research and development.

C. *Preferential Income Tax Rate Ceiling of 22 Percent*

Article 15 of the SEI permits firms designated by the Taiwan authorities as "important" productive enterprises to pay a marginal tax rate of 22 percent as opposed to the standard income tax rate of 35 percent.

Verification

In accordance with section 776(c) of the Act, we made our final determination on the basis of the best information available. We verified this information in prior countervailing duty investigations of merchandise from Taiwan.

Suspension of Liquidation

In accordance with our preliminary affirmative countervailing duty determination published on July 22, 1988, we directed the U.S. Customs Service to suspend liquidation on the products under investigation and to require a cash deposit or bond equal to the duty deposit rate. This final countervailing duty determination was extended to coincide with the companion final antidumping determinations, pursuant to section 606 of the Trade and Tariff Act of 1984 (section 705(a)(1) of the Act). Under Article 5, paragraph 3 of the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade (the Subsidies Code), provisional measures cannot be imposed for more than 120 days without final affirmative determinations of subsidy and injury. Therefore, on October 7, 1988, we instructed the U.S. Customs Service to discontinue the suspension of liquidation on the subject merchandise entered on or after November 21, 1988, but to continue the suspension of liquidation of all entries or withdrawals from warehouse, for consumption, of the subject merchandise entered between July 22, 1988, and November 20, 1988. We will reinstate suspension of liquidation under section 703(d) of the Act on the date of publication of the countervailing duty order, if the ITC issues a final affirmative injury determination, and again require duty deposits on all entries of the subject merchandise.

ITC Notification

In accordance with section 705(d) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If the ITC determines that material injury, or the threat of material injury, does not exist, this proceeding will be terminated and all estimated duties deposited or securities posted as a result of the suspension of liquidation will be refunded or cancelled. If, however, the ITC determines that such injury does exist, we will issue a countervailing duty order, directing Customs officers to assess countervailing duties on all entries of thermostatically controlled appliance plugs and internal probe thermostats therefor entered, or withdrawn from warehouse, for consumption, as described in the "Suspension of Liquidation" section of this notice.

This determination is published pursuant to section 705(d) of the Act (19 U.S.C. 1671(d)).

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

Tuners (Of The Type Used In Consumer Electronic Products) From Japan; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to a request by a respondent, the Department of Commerce has conducted an administrative review of the antidumping duty finding on tuners (of the type used in consumer electronic products) from Japan. The review covers one manufacturer/exporter of this merchandise to the United States, Toa Electric Co., Ltd., and the period December 1, 1986 through November 30, 1987. There were no known shipments of this merchandise to the United States by this firm during the period.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Edward Haley or Robert Marenick, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230: (202) 377-5255.

SUPPLEMENTARY INFORMATION:

Background

On June 1, 1987, the Department of Commerce ("the Department") published in the **Federal Register** (52 FR 20445) the final results of its last administrative review of the antidumping duty finding on tuners (of the type used in consumer electronics products) from Japan (35 FR 18914, December 12, 1970). A respondent, Toa Electric Co., Ltd., requested in accordance with § 353.53a(a) of the Commerce Regulations that we conduct an administrative review. We published a notice of initiation of the antidumping duty administrative review on January 27, 1988 (53 FR 2262). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules will be fully converted to the Harmonized Tariff Schedule ("HTS") and all merchandise entered or withdrawn from warehouse for consumption on or after this date will be classified solely according to the appropriate HTS item number(s). Until that time, however, the Department will be providing both the appropriate *Tariff Schedules of the United States Annotated* (TSUSA) item number(s) and the appropriate HTS item number(s) with its product descriptions. As with the TSUSA, the HTS item numbers are provided for convenience and customs purposes. The written description remains dispositive as to the scope of the product coverage.

We are requesting petitioners to include the appropriate HTS item

number(s) as well as the TSUSA item number(s) in all petitions filed with the Department through the end of this year. A reference copy of the HTS is available for consultation in the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all U.S. Customs offices have reference copies, and petitioners may contact the import specialist at their local customs office to consult the schedule.

Imports covered by the review are shipments of tuners (of the type used in consumer electronic products) consisting primarily of television receiver tuners and tuners used in radio receivers such as household radios, stereo and high fidelity radio systems, and automobile radios. They are virtually all in modular form, aligned and ready for simple assembly into the consumer electronic product for which they were designed. The term "consumer electronic product" includes television sets, radios, and other electronic products of the type commonly bought at retail by household consumers, whether or not used in or around the household. Excluded are complete stereophonic tuners which are consumer products themselves, but not excluded are modular-type stereophonic tuners. Tuners covered by the finding are currently classifiable under TSUSA item numbers 685.0200 and 685.3300, and HTS item numbers 8529.90.10 and 8529.90.50.

The review covers one manufacturer/exporter of Japanese tuners to the United States and the period December 1, 1986 through November 30, 1987. There were no known shipments of this merchandise to the United States by the firm during the period, and there are no known unliquidated entries.

Preliminary Results of the Review

Because there were no shipments during this review, we based our margin determination in this proceeding on the last margin found for this firm. We preliminarily determine that a margin of 1.9 percent exists for Toa Electric Co., Ltd. for the period December 1, 1986 through November 30, 1987.

Interested parties may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice, and may request a hearing within 8 days of the date of publication. Any hearing, if requested, will be held 35 days after the date of publication or the first workday thereafter. Prehearing briefs and/or written comments may be submitted not later than 25 days after the date of publication. Rebuttal briefs or rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 32 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

As provided for by section 353.48(b) of the Commerce Regulations, the Department shall require a cash deposit of estimated antidumping duties based on the above margin for the firm. For any future shipments from the remaining known manufacturers/exporters not covered in this review, the cash deposit will continue to be at the rate published in the final results of the last administrative review. The above margin does not change the current rate of cash deposit for new exporters. These deposit requirements are effective for all shipments of Japanese tuners (of the type used in consumer electronic products) entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.53(a).

Date: December 1, 1988.

Jan W. Mares,

Assistant Secretary for Import Administration.

Final Determination of Sales at Not Less than Fair Value; Thermostatically Controlled Appliance Plugs and Internal Probe Thermostats Therefor From Hong Kong

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We have determined that thermostatically controlled appliance plugs and internal probe thermostats therefor from Hong Kong are not being, nor are likely to be, sold in the United States at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Alain Letort or Bruce Harsh, Office of Agreements Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230, telephone: 202/377-3818 (Letort) or 202/377-0182 (Harsh).

SUPPLEMENTARY INFORMATION:

Final Determination

We have determined that thermostatically controlled appliance plugs and internal probe thermostats therefor from Hong Kong are not being, nor are likely to be, sold in the United States at less than fair value within the meaning of section 735 of the Tariff Act of 1930, as amended (19 U.S.C. 1673d) (the Act). We have found that the weighted-average margin for the company being investigated is *de minimis*.

Case History

On September 22, 1988, we made a negative preliminary determination in this case (53 FR 37827—September 28, 1988). The following events have occurred since the publication of that notice.

We verified the responses submitted by Advance Thermo Control, Ltd. (ATC) in Hong Kong from October 3 to October 7, 1988. We received no request for a public hearing, nor did we receive any written comments, from any of the interested parties.

Scope of Investigation

The products covered by this investigation are thermostatically controlled appliance plugs and internal probe thermostats therefor.

For purposes of this investigation, the term thermostatically controlled appliance plug refers to any device designed to connect an electrical outlet (typically a common wall receptacle) with a small cooking appliance of 2,000 watts or less (typically a griddle, deep fryer, frying pan, multicooker, and/or wok) and regulate the flow of electrically and thus the temperature therein; consisting of (1) a probe thermostat encased in a single housing set with a temperature control knob (typically a dial calibrated with various temperature settings), and (2) a cord set.

The term internal probe thermostat refers to any device designed to regulate automatically the flow of electricity, and thus the temperature, in a small heating apparatus of 2,000 watts or less (typically small cooking appliances); consisting of a stainless steel tube (which connects to the heating apparatus) and other components used for thermostatic control.

The products are currently provided for under item numbers 711.7820 and 711.7840 of the *Tariff Schedules of the United States, Annotated* (TSUSA) and are currently classifiable under item

numbers 9032.10.00, 9032.20.00, 9032.89.60, 9032.90.60, and 9033.00.00 of the *Harmonized Tariff Schedule* (HTS).

Period of Investigation

Because the original period of investigation from November 1, 1987 through April 30, 1988 would not have captured an adequate number of sales, we extended the period of investigation in order to encompass the twelve months from May 1, 1987 through April 30, 1988, instead of using the six-month period defined by § 353.38(a) of our regulations.

Fair Value Comparisons

To determine whether sales of thermostatically controlled appliance plugs and internal probe thermostats therefor from Hong Kong in the United States were made at less than fair value, we compared the United States price with the foreign market value for ATC, using the data provided in the responses.

For purposes of our preliminary determination, we disregarded certain sales reported by ATC as being sales to the United States since it was unclear whether these were United States or third-country sales and the number of these sales was insignificant. During verification, we ascertained that these sales involved merchandise ultimately destined to the United States which were merely transshipped through a third country. Therefore, we have considered these sales as sales to the United States for purposes of our final determination.

Because there were no home-market sales of the subject merchandise during the period of investigation, we used ATC's sales of probe thermostats to Canada for purposes of comparison with sales to the United States, as provided by section 773(a)(1)(B) of the Act.

United States Price

We based United States price on purchase price (PP), in accordance with section 772(b) of the Act, because the merchandise was sold to an unrelated purchaser in the United States prior to its importation. We calculated purchase price based on the f.o.b. or c. & f. packed prices to U.S. customers. We made deductions, where appropriate, for foreign inland freight and ocean or air freight.

ATC also claimed an upward adjustment to purchase price to reflect the fact that it gave a discount on certain U.S. sales where the U.S. customer provided engineering assistance to ATC. We disallowed this adjustment because respondent was unable during verification to document or quantify either the discount or the amount of engineering assistance provided.

Foreign Market Value

In accordance with section 773(a)(1)(B) of the Act, we calculated foreign market value based on f.o.b. or c. & f. packed prices to unrelated purchasers in Canada. We made deductions, where appropriate, for foreign inland freight and ocean or air freight. In accordance with § 353.16 of our regulations, where there was no identical product in the third-country market with which to compare a product in the United States, we made an adjustment to the foreign market value of similar merchandise to account for differences in the physical characteristics of the merchandise.

In accordance with § 353.15 of our regulations, we made an adjustment for differences in circumstances of sale for credit expenses. In order to adjust for differences in packing between the two markets, we deducted Canadian packing costs from foreign market value and added U.S. packing costs.

Currency Conversion

We made currency conversions in accordance with § 353.56(a)(1) of our regulations. We made all currency conversations using the daily exchange rates certified by the Federal Reserve Bank of New York.

Verification

As provided in section 776(d) of the Act, we verified all information used in reaching the final determination in this investigation. We used standard verification procedures, including examination of relevant accounting records and original source documents provided by the respondent.

Final Result

The weighted-average dumping margin for all manufacturers, producers, and exporters in Hong Kong of the merchandise subject to this investigation is 0.06 percent *ad valorem*, which is *de minimis*.

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Jan W. Mares,

Assistant Secretary for Import Administration.

December 15, 1988.

Final Determination of Sales at Less than Fair Value; Thermostatically Controlled Appliance Plugs and Internal Probe Thermostats Therefor From Japan

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We have determined that thermostatically controlled appliance plugs and internal probe thermostats therefor from Japan are being, or are likely to be, sold in the United States at less than fair value. We have notified the U.S Internal Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to continue to suspend liquidation of all entries of the subject merchandise from Japan as described in the "Suspension of Liquidation" section of this notice.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Alain Letort or Jane Siegel, Office of Agreements Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington DC 20230, telephone: 202/377-3818 (Letort) or 202/377-0409 (Siegel).

SUPPLEMENTARY INFORMATION:

Final Determination

We have determined that thermostatically controlled appliance plugs and internal probe thermostats therefor from Japan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 735 of the Tariff Act of 1930, as amended (19 U.S.C. 1673d) (the Act). The estimated margin of sales at less than fair value is 63.64 percent *ad valorem*, as shown in the "Suspension of Liquidation" section of this notice.

Case History

On September 22, 1988, we made an affirmative preliminary determination in this case (53 FR 37828—September 28, 1988). Since the publication of that notice, we have received no response or comments from Toshiba Heating Appliance Co. Ltd. (Toshiba), which accounted for virtually all the exports to the United States from Japan during the period of investigation. We have received no comments from any other interested party in this investigation.

Scope of Investigation

The products covered by this investigation are thermostatically controlled appliance plugs and internal probe thermostats therefor.

For purposes of this investigation, the term thermostatically controlled appliance plug refers to any device designed to connect an electrical outlet (typically a common wall receptacle) with a small cooking appliance of 2,000 watts or less (typically a griddle, deep fryer, frying pan, multicooker, and/or wok) and regulate the flow of electricity and thus the temperature therin; consisting of (1) a probe thermostat encased in a single housing set with a temperature control knob (typically a dial calibrated with various temperature settings), and (2) a cord set.

The term internal probe thermostat refers to any device designed to regulate automatically the flow of electricity, and thus the temperature, in a small heating apparatus of 2,000 watts or less (typically small cooking appliances); consisting of a stainless steel tube (which connects to the heating apparatus) and other components used for thermostatic control.

The products are currently provided for under item numbers 711.7820 and 711.7840 of the *Tariff Schedules of the United States, Annotated* (TSUSA) and are currently classifiable under item numbers 9032.10.00, 9032.20.00, 9032.89.60, 9032.90.60, and 9033.00.00 of the *Harmonized Tariff Schedule* (HTS).

Period of Investigation

The period of investigation for thermostatically controlled appliance plugs and internal probe thermostats therefor from Japan extends from Novermber 1, 1987 through April 30, 1988.

Fair Value Comparisons

To determine whether the sales of the subject merchandise in the United Sates were made at less than fair value, we compared the United States price, based on the best information available, with the foreign market value, also based on the best information available. We used the best information available, as required by section 776(c) of the Act, because no questionnaire responses were submitted.

United States Price

Since we did not have specific data as to the quantities and prices of the subject merchandise sold in the United States, we used the price information provided in the petition as the best information available, pursuant to section 776(c) of the Act. We used the packed United States price estimated by petitioner minus deductions for foreign inland freight, ocean freight, U.S. customs duty, brokerage and handling charges, and U.S. inland freight.

Foreign Market Value

Since we did not have specific data as to the quantities and prices of the subject merchandise sold in Japan or third countries, we used the constructed value of the subject merchandise provided in the petition as the best information available, pursuant to section 776(c) of the Act. The constructed value calculated in the petition was based on petitioner's manufacturing cost for the fourth quarter of 1987, adjusted to reflect Japanese manufacturing costs, with the statutorily mandated addition of 10 percent of the cost of manufacture for general expenses and 8 percent of the cost of manufacture plus general expenses for profit.

Continuation of Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of thermostatically controlled appliance plugs and internal probe thermostats therefor from Japan that are entered, or withdrawn from warehouse, for consumption, on or after September 28, 1988, the date of publication of the preliminary determination in the **Federal Register**. The U.S. Customs Service shall require a cash deposit or posting of a bond equal to the estimated amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price, which is 63.64 percent *ad valorem*. This suspension of liquidation will remain in effect until further notice.

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. If the ITC determines that material injury, or threat of material injury, does not exist in this case, this proceeding will be terminated and all securities posted as a result of suspension of liquidation will be refunded. If, however, the ITC determines that material injury, or threat of material injury, does exist, we will issue an antidumping duty order directing Customs officers to assess an antidumping duty on thermostatically controlled appliance plugs and internal probe thermostats therefor from Japan which are entered, or withdrawn from warehouse, for consumption, on or after the date on which liquidation was suspended. The antidumping duty will equal the amount by which the foreign market value of the subject merchandise exceeds United States price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673(d)).

Jan W. Mares,

Assistant Secretary for Import Administration.

Final Determination of Sales at Less Than Fair Value; Thermostatically Controlled Appliance Plugs and Internal Probe Thermostats Therefor From Malaysia

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We have determined that thermostatically controlled appliance plugs and internal probe thermostats therefor from Malaysia are being, or are likely to be, sold in the United States at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to continue to suspend liquidation of all entries of the subject merchandise from Malaysia as described in the "Suspension of Liquidation" section of this notice.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Alain Letort or Jane Siegel, Office of Agreements Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, telephone: 202/377-3818 (Letort) or 202/377-0409 (Siegel).

SUPPLEMENTARY INFORMATION:

Final Determination

We have determined that thermostatically controlled applicance plugs and internal probe thermostats therefor from Malaysia are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 735 of the Tariff Act of 1930, as amended (19 U.S.C. 1673d) (the Act). The estimated margin of sales at less than fair value is 28.13 percent *ad valorem*, as shown in the "Suspension of Liquidation" section of this notice.

Case History

On September 22, 1988, we made an affirmative preliminary determination in this case (53 FR 37830—September 28, 1988). Since the publication of that notice, we have received no response or comments from Power Electronics Sdn. Bhd. (Power), which accounted for virtually all the exports to the United States from Malaysia during the period of investigation. We have received no comments from any other interested party in this investigation.

Scope of Investigation

The products covered by this investigation are thermostatically controlled appliance plug and internal probe thermostats therefor.

For purposes of this investigation, the term thermostatically controlled appliance plug refers to any device designed to connect an electrical outlet (typically a common wall receptacle) with a small cooking appliance of 2,000 watts or less (typically a griddle, deep fryer, frying pan, multicooker, and/or wok) and regulate the flow of electricity and thus the temperature therein; consisting of (1) a probe thermostat encased in a single housing set with a temperature control knob (typically a dial calibrated with various temperature settings), and (2) a code set.

The term internal probe thermostat refers to any device designed to regulate automatically the flow of electricity, and thus the temperature, in a small hearing apparatus of 2,000 watts or less (typically small cooking appliances); consisting of a stainless steel tube (which connects to the heating apparatus) and other components used for thermostatic control.

The products are currently provided for under item numbers 711.7820 and 711.7840 of the *Tariff Schedules of the United States, Annotated* (TSUSA) and are currently classifiable under item numbers 9032.10.00, 9032.20.00, 9032.89.60, 9032.90.60, and 9032.00.00 of the *Harmonized Tariff Schedule* (HTS).

Period of Investigation

The period of investigation for thermostatically controlled appliance plugs and internal probe thermostats therefor from Malaysia extends from November 1, 1987 through April 30, 1988.

Fair Value Comparisons

The determine whether the sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price, based on the best information available, with the foreign market value, also based on the best information available. We used the best information available, as required by section 776(c) of the Act, because Power failed to respond to sections B through D of our questionnaire.

United States Price

Since we did not have specific data as to the quantities and prices of the subject merchandise sold in the United States, we used the price information provided in the petition as the best information available, pursuant to section 776(c) of the Act. We used the packed United States price estimated by petitioner minus deductions for foreign inland freight, ocean freight, brokerage and handling charges, and U.S. inland freight.

Foreign Market Value

Since we did not have specific data with respect to the quantities and prices of the subject merchandise sold in Malaysia or third countries, we used the constructed value of the subject merchandise provided in the petition as the best information available, pursuant to section 776(c) of the Act. The constructed value calculated in the petition was based on petitioner's manufacturing cost for the fourth quarter of 1987, adjusted to reflect Malaysian manufacturing costs, with the statutorily mandated addition of 10 percent of the cost of manufacture for general expenses and 8 percent of the cost of manufacture plus general expenses for profit.

Continuation of Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of thermostatically controlled appliance plugs and internal probe thermostats therefor from Malaysia that are entered, or withdrawn from warehouse, for consumption, on or after September 28, 1988, the date of publication of the preliminary determination in the **Federal Register**. The U.S. Customs Service shall require a cash deposit or posting of a bond equal to the estimated amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price, which is 28.13 percent *ad valorem*. This suspension of liquidation will remain in effect until further notice.

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. If the ITC determines that material injury, or threat of material injury, does not exist in this case, this proceeding will be terminated and all securities posted as a result of suspension of liquidation will be refunded. If, however, the ITC determines that material injury, or threat of material injury, does exist, we will issue an antidumping duty order directing Customs officers to assess an antidumping duty on thermostatically controlled appliance plugs and internal probe thermostats therefor from Malaysia, which are entered, or withdrawn from warehouse, for consumption, on or after the date on which liquidation was suspended. The antidumping duty will equal the amount by which the foreign market value of the subject merchandise exceeds United States price.

This determination is published pursuant to section 753(d) of the Act (19 U.S.C. 1673d(d)).

Jan W. Mares,
Assistant Secretary for Import Administration.

December 5, 1988.

Final Determination of Sales at Less Than Fair Value; Thermostatically Controlled Appliance Plugs and Internal Probe Thermostats Therefor From Taiwan

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We have determined that thermostatically controlled appliance plugs and internal probe thermostats therefor from Taiwan are being, or are likely to be, sold in the United States at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to continue to suspend liquidation of all entries of the subject merchandise from Taiwan as described in the "Suspension of Liquidation" section of this notice.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Alain Letort or Jane Siegel, Office of Agreements Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230, telephone: 202/377-3818 (Letort) or 202/377-0409 (Siegel).

VOL 53 ISS 239 DE 13 1988 UMI

SUPPLEMENTARY INFORMATION:

Final Determination

We have determined that thermostatically controlled appliance plugs and internal probe thermostats therefor from Taiwan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 735 of the Tariff Act of 1930, as amended (19 U.S.C. 1673d) (the Act). The estimated margin of sales at less than fair value is 34.47 percent *ad valorem*, as shown in the "Suspension of Liquidation" section of this notice.

Case History

On September 22, 1988, we made an affirmative preliminary determination in this case (53 FR 37831—September 28, 1988). Since the publication of that notice, we have received no response or comments from Cheng Da Electronics Co Ltd., Etowah Taiwan Enterprises Co. Ltd., Inwardness Enterprise Co. Ltd., and Shin Chin Industrial Co. Ltd., which accounted for virtually all the exports to the United States from Taiwan during the period of investigation. We have received no comments from any other interested party in this investigation.

Scope of Investigation

The products covered by this investigation are thermostatically controlled appliance plugs and internal probe thermostats therefor.

For purposes of this investigation, the term thermostatically controlled appliance plug refers to any device designed to connect an electrical outlet (typically a common wall receptacle) with a small cooking appliance of 2,000 watts or less (typically a griddle, deep fryer, frying pan, multicooker, and/or wok) and regulate the flow of electricity and thus the temperature therein; consisting of (1) a probe thermostat encased in a single housing set with a temperature control knob (typically a dial calibrated with various temperature settings), and (2) a cord set.

The term internal thermostat refers to any device designed to regulate automatically the flow of electricity, and thus the temperature, in a small heating apparatus of 2,000 wats or less (typically small cooking appliances); consisting of a stainless steel tube (which connects to the heating apparatus) and other components used for thermostatic control.

The products are currently provided for under item numbers 711.7820 and 711.7840 of the *Tariff Schedules of the United States, Annotated* (TSUSA) and are currently classifiable under item numbers 9032.10.00, 9032.20.00, 9032.89.60, 9032.90.60, and 9033.00.00 of the *Harmonized Tariff Schedule* (HTS).

Period of Investigation

The period of investigation for thermostatically controlled appliance plugs and internal probe thermostats therefor from Taiwan extends from November 1, 1987 through April 30, 1988.

Fair Value Comparisons

To determine whether the sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price, based on the best information available, with the foreign market value, also based on the best information available. We used the best information available, as required by section 776(c) of the Act, because no questionnaire responses were submitted.

United States Price

Since we did not have specific data as to the quantities and prices of the subject merchandise sold in the United States, we used the price information provided in the petition as the best information available, pursuant to section 776(c) of the Act. We used the packed United States price estimated by petitioner minus deductions for foreign inland freight, ocean freight, brokerage and handling charges, and U.S. inland freight.

Foreign Market Value

Since we did not have specific data with respect to the quantities and prices of the subject merchandise sold in Taiwan or third countries, we used the constructed value of the subject merchandise provided in the petition as the best information available, pursuant to section 776(c) of the Act. The constructed value calculated in the petition was based on petitioner's manufacturing cost for the fourth quarter of 1987, adjusted to reflect Taiwanese manufacturing costs, with the statutorily mandated addition of 10 percent of the cost of manufacture for general expenses and 8 percent of the cost of manufacture plus general expenses for profit.

Continuation of Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of thermostatically controlled appliance plugs and internal probe thermostats therefor from Taiwan that are entered, or withdrawn from warehouse, for consumption, on or after September 28, 1988, the date of publication of the preliminary determination in the **Federal Register**. The U.S. Customs Service shall require a cash deposit or posting of a bond equal to the estimated amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price, which is 34.47 percent *ad valorem*. This suspension of liquidation will remain in effect until further notice.

Article VI:5 of the General Agreement on Tariffs and Trade provides that "[n]o product * * * shall be subject to both antidumping and countervailing duties to compensate for the same situation of dumping or export subsidization." This provision is implemented by section 772(d)(1)(D) of the Act, which prohibits assessing dumping duties on the portion of the margin attributable to export subsidies, since there is no reason to require a cash deposit or bond for that amount. However, in the parallel countervailing duty investigation of the same merchandise from Taiwan, the suspension of liquidation on entries of the subject merchandise was terminated on October 7, 1988 in accordance with Article 5:3 of the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade. Since no cash deposit or bond is currently being posted in the countervailing duty investigation, the level of export subsidies (as determined in the final affirmative countervailing duty determination on thermostatically controlled appliance plugs and internal probe thermostats therefor from Taiwan) will not be subtracted from the dumping margin for cash deposit or bonding purposes. If the ITC makes an affirmative determination of injury in both investigations, the level of export subsidies will be subtracted from the dumping margin for cash deposit or bonding purposes.

The cash deposit or bonding rate established in the preliminary determination of sales at less than fair value shall remain in effect with respect to entries, or withdrawals from warehouse, made prior to the date of publication of this notice in the **Federal Register**. This suspension of liquidation will remain in effect until further notice.

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. If the ITC determines that material injury, or threat of material injury, does not exist in this case, this proceeding will be terminated and all securities posted as a result of suspension of liquidation will be refunded. If, however, the ITC determines that material injury, or threat of material injury, does exist, we will issue an antidumping duty order directing Customs officers to assess an

antidumping duty on thermostatically controlled applicance plugs and internal probe thermostats therefor from Taiwan which are entered, or withdrawn from warehouse, for consumption, on or after the date on which liquidation was suspended. The antidumping duty will equal the amount by which the foreign market value of the subject merchandise exceeds United States price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673(d)).

Jan W. Mares,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Final Approval of Amendment; Florida Coastal Zone Management Program

AGENCY: National Oceanic and Atmospheric Administration, National Ocean Service, Office of Ocean and Coastal Resource Management.

ACTION: Approval of amendment to Florida Coastal Program.

SUMMARY: The Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service, National Oceanic and Atmospheric Administration (NOAA) received a request from the State of Florida to amend the Florida Coastal Management Program (FCMP) to incorporate legislative changes to three Chapters of Florida Statutes: Creation of the Marine Fisheries Commission, Chapter 370 F.S.; measures to protect surface and ground water, Chapter 376 F.S.; and, the Warren S. Henderson Wetlands Protection Act of 1984, and related changes to Chapter 403 F.S. The State's request was made pursuant to section 306(g) of the Coastal Zone Management Act of 1972, as amended (CZMA), 16 U.S.C. 14559(g) and implementing regulations at 15 CFR 923.81. These amendments to the FCMP provide new policy for, and a new entity to promulgate regulations dealing with living marine resources (Chapter 370 F.S.); provide additional regulatory authority and funds to protect Florida's ground water resources (Chapter 376 F.S.); and update and clarify the State regulatory policies and procedures for protecting wetlands. (Chapter 403 F.S.)

Notice is hereby given that the Director of the Office of Ocean and Coastal Resource Management has reviewed the amendment request and has made a determination that the FCMP as amended will still constitute an approvable program and that the procedural requirements of section 306(c) of the CZMA have been met.

Notice of intent to approve the amendment was published in the **Federal Register** on Wednesday, March 2, 1988, and interested parties had until April 1, 1988 to comment on the proposed changes. A full text of the proposed amendment along with an environmental assessment was distributed to Federal agencies and other interested parties. All comments have been responded to and Final Findings of Approvability approved by the Director of OCRM. The above mentioned amendment is now officially a part of the federally-approved Florida CZMP.

Inquiries regarding this program should be addresssed to: Mr. William Millhouser, Regional Manager, South Atlantic and Gulf Regions, Office of Ocean and Coastal Resource Management, 1825 Connecticut Avenue, Washington, DC 20235, (202) 673-5138.

BILLING CODE 3510-08-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Guaranteed Access Levels for Certain Cotton and Man-Made Fiber Textile Products Exported From the Dominican Republic

December 8, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing guaranteed access levels.

EFFECTIVE DATE: December 8, 1988.

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

SUPPLEMENTARY INFORMATION: In a Memorandum of Understanding dated May 20, 1988, the Governments of the United States and the Dominican Republic agreed to establish guaranteed access levels for certain cotton and man-made fiber textile products exported from the Dominican Republic during the period December 1, 1988 through May 31, 1989.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, published on December 16, 1987). A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States Annotated (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 51 FR 21208, published on June 11, 1986; 52 FR 26057, published on July 10, 1987; and 53 FR 23143, published on June 20, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 8, 1988.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Memorandum of Understanding dated May 20, 1988 between the Governments of the United States and the Dominican Republic; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, and the Special Access Program as set forth in 51 FR 21208 (June 11, 1986) and 52 FR 26057 (July 10, 1987), effective on December 8, 1988, guaranteed access levels are established for properly certified textile products in the categories listed below. These products shall be assembled in the Dominican Republic from fabric formed and cut in the United States and exported from the Dominican Republic during the period which began on December 1, 1988 and extends through May 31, 1989:

Category	Guaranteed access levels
338/638	500,000 doz.
339/639	500,000 doz.

Category	Guaranteed access levels
340/640	500,000 doz.
342/642	500,000 doz.
347/348/647/648	1,750,000 doz.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements

[FR Doc. 88-28561 Filed 12-12-88; 8:45 am]

BILLING CODE 3510-DR-M

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in the People's Republic of Bangladesh

December 8, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Anne Novak, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for Categories 340/640 and 342/642 are being increased by application of swing, reducing Category 641 to account for the swing applied. The limit for Categories 340/640 is being increased also for carryover.

A description of the textile and apparel categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, published on December 16, 1987). A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States Annotated (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 752, published on January 12, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 8, 1988.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on January 7, 1988 by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton and man-made fiber textile products, produced or manufactured in Bangladesh and exported during the period which began on February 1, 1988 and extends through January 31, 1989.

Effective on December 15, 1988, the directive of January 7, 1988 is amended further to adjust the limits for cotton and man-made fiber textile products in the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and Bangladesh:

Category	Adjusted 12-mo. limit [1]
340/640	1,594,065 doz.
342/642	222,473 doz.
641	389,943 doz.

[1] The limits have not been adjusted to account for any imports exported after January 31, 1988.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88-28562 Filed 12-12-88; 8:45 am]

BILLING CODE 3510-DR-M

Establishment of an Import Limit for Certain Man-Made Fiber Textile Products Exported From the Dominican Republic

December 8, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing a limit.

EFFECTIVE DATE: December 15, 1988.

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Article 3 of the Arrangement Regarding International Trade in Textiles.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Inasmuch as a mutually satisfactory solution between the U.S. Government and the Government of the Dominican Republic has not been reached for Category 633 and the sixty-day consultation period stipulated under Article 3 of the Mulitifiber Arrangement has expired, the U.S. Government has decide to control imports in this category for the period June 30, 1988 through June 29, 1989.

The United States remains committed to finding a solution concerning Category 633. Should such a solution be reached in consultations with the Government of the Dominican Republic, further notice will be published in the **Federal Register.**

A description of the textile and apparel categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, published on December 16, 1987). Also see 53 FR 27214, published on July 19, 1988.

Philip J. Martello,

Acting Chairman, Committee for the Implemetation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 8, 1988.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further amended on July 31, 1986; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on December 15, 1988, entry into the United States for consumption of withdrawal from warehouse for consumption on man-made fiber textile products in Category 633, produced or manufactured in the Dominican Republic and exported during the twelve-month period which began on June 30, 1988 and extends through June 29, 1989, in excess of 54,869 dozen.

Textile products in Category 633 which have been exported to the United States prior to June 30, 1988 shall not be subject to this directive.

Textile products in Category 633 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

You are directed to charge 12,063 dozen to the limit established in this directive for Category 633. These charges are for goods imported during the period June 30, 1988 through September 30, 1988.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Group II:	
200, 201, 220-229, 237, 239, 300/301, 317, 326, 330-334, 345, 349-352, 359-362, 369-S [1], 369-O [2], 600-607, 611-635, 638-652, 659, 665pt.[3], 666-670 and 831-859, as a group	109,856,763 square meters equivalent
Sublevels within Group II:	
300/301	2,926,657 kilograms
369-S	402,629 kilograms
640	140,526 dozen.
641	831,388 dozen
642	252,647 dozen.

[1] In Category 369-S, only tariff number 6307.10.20.10

[2] In Category 369-O, all tariff numbers except 6307.10.20.10 in 369-S and rugs exempt from the Bilateral Agreement in tariff numbers 5702.10.90.20, 5702.49.10.10 and 5702.99.10.10.

[3] In Category 665pt., all tariff numbers except rugs exempt from the Bilateral Agreement in tariff numbers 5702.10.90.30, 5702.42.20.10, 5702.92.00.10 and 5703.20.10.00

Imports charged to these category limits for the period January 1, 1988 through December 31, 1988 shall be charged against the levels of restraint to the extent of any unfilled balances. In the event the limits established during the period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The levels set forth above are subject to adjustment in the future according to the provisions of the current bilateral agreement between the Governments of the United States and India.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in India

December 9, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 14, 1988.

FOR FURTHER INFORMATION CONTACT: Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 343-6494. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION: The current limit for Categories 338/339/340 is being increased for swing, reducing the limit for Category 219. As a result, the limit for Categories 338/339/340, which is currently filled, will re-open.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Appeal Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, published on December 16, 1988). Also see 53 FR 58, published on January 4, 1988; and 53 FR 43467, published on October 27, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the agreement, but are designed to assist only in the implementation of certain of its provisions.

Authority: Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956 (7 U.S.C. 1854).

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 9, 1988.

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 30, 1987, as amended, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in India and exported during the period which began on January 1, 1988 and extends through December 31, 1988.

Effective on Dec. 14, 1988, the directive of December 30, 1987 is amended further to adjust the limits for the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and India:

Category	Adjusted 12-mo limit [1]
219	41,176,200 square yards.
338/339/340	1,338,124 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1987.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

DEPARTMENT OF DEFENSE

Office of the Secretary

DoD Freedom of Information Act Program

AGENCY: Department of Defense.

ACTION: Notice.

SUMMARY: The Office of the Inspector General, Department of Defense is designated a DoD Component for the purposes of responding to requests pursuant to the Freedom of Information Act (FOIA). Consequently, FOIA requests for Office of the Inspector General records may be sent to the Department of Defense, Office of the Inspector General, Assistant Inspector General for Investigations, 400 Army Navy Drive, ATTN: FOIA Coordinator, Arlington, VA 22202.

DATE: January 3, 1989, for all Freedom of Information Act requests, appeals, and legal complaints received on or after January 3, 1989. All requests, appeals, and legal complaints received prior to January 3, 1989, will be transferred to the Office of the Inspector General, Department of Defense, effective April 3, 1989.

FOR FURTHER INFORMATION CONTACT: Charlie Y. Talbott, Office of the Assistant Secretary of Defense (Public Affairs), Washington, DC 20301-1400, telephone (202) 697-1180.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Department of the Air Force

Privacy Act of 1974; Altered Systems of Records

AGENCY: Department of the Air Force.

ACTION: Notice of three altered systems of records subject to the Privacy Act of 1974, published for any public comment.

SUMMARY: The Air Force is altering three existing systems of records subject to the Privacy Act of 1974, as amended (5 U.S.C. 552a).

DATES: This proposed action will be effective without further notice January 12, 1988, unless comments are received which would result in a contrary determination.

ADDRESS: Send any comments to Ms. Linda G. Adams, SAF/AADA, The Pentagon, Washington, D.C. 20330-1000, telephone: (202) 694-3488, AUTOVON: 224-3488.

SUPPLEMENTARY INFORMATION: The Air Force published systems of records notices subject to the Privacy Act of 1974 in the **Federal Register** as follows:

FR Doc. 85-10237 (50 FR 22332) May 29, 1985 (Compilation)
FR Doc. 85-14122 (50 FR 24672) June 12, 1985
FR Doc. 85-15062 (50 FR 25737) June 21, 1985
FR Doc. 85-26775 (50 FR 48477) November 8, 1985
FR Doc. 85-29261 (50 FR 50337) December 10, 1985
FR Doc. 86-2527 (51 FR 4531) February 5, 1986
FR Doc. 86-4546 (51 FR 7371) March 3, 1986
FR Doc. 86-10044 (51 FR 16735) May 6, 1986
FR Doc. 86-11696 (51 FR 18927) May 23, 1986
FR Doc. 86-25787 (51 FR 41382) November 14, 1986

FR Doc. 86–25788 (51 FR 41402) November 14, 1986
FR Doc. 86–27635 (51 FR 44332) December 9, 1986
FR Doc. 87–8139 (52 FR 11845) April 13, 1987
FR Doc. 88–14507 (53 FR 24354) June 28, 1988
FR Doc. 88–26193 (53 FR 45800) November 14, 1988

The specific changes to the altered systems of records are set forth below, followed by the system notices, as amended, published in their entirety.

The Air Force submitted altered system reports, as required by 5 U.S.C. 552a(o) of the Privacy Act of 1974 on December 2, 1988, to the Administrator, Office of Information and Regulatory Affairs, OMB; the President of the Senate; and the Speaker of the House of Representatives, pursuant to paragraph 4b of Appendix I to OMB Circular No. A–130, "Federal Agency Responsibilities for Maintaining Records About Individuals" dated December 12, 1985 (50 FR 52730, December 24, 1985).

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

December 8, 1988.

System name: Automated Personnel Management System (51 FR 41382), November 14, 1986.

Changes:

* * * * *

Categories of individuals covered by the system: Delete current entry and replace with "Personnel, including military, civilians, contractors, and TDY personnel, assigned to the office or unit as specified in the governing regulation or operating instruction for the system."

* * * * *

Authority for maintaining the system: In first line, change "10 U.S.C. 8012" to "10 U.S.C. 8013." In line two at end of first sentence, add "* * * and Executive Order 9397." Delete last sentence. "A copy of the directive * * * to the command Privacy Act Officer."

* * * * *

Safeguards: Replace "Regulation 300–13, Safeguarding Personal Information in Automatic Data Processing Systems" with "Regulation 700–10, Information Systems Security."

Retention and disposal: Replace entire item with "Destroy when no longer needed, or when individual transfers or separates from service, whichever is sooner.

System manager(s) and address: Delete current entry and replace with "Chief of the office or unit where records are maintained."

* * * * *

Contesting records procedures: At end of entry, add "* * * (32 CFR Part 806b)"

* * * * *

F030 AF A

SYSTEM NAME:

030 AF A—Automated Personnel Management System.

SYSTEM LOCATION:

Units or offices at all levels within the Air Force, and Headquarters United States Space Command (HQ USSPACECOM), who implement the system under a specific authorizing local or higher directive.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Personnel, including military, civilians, contractors, and TDY personnel, assigned to the office or unit as specified in the governing directive for the system.

CATEGORIES OF RECORDS IN THE SYSTEM:

Data obtained from existing personnel or training records or from the individual. Record includes name, grade, SSN, unit of assignment, security clearance, supervisor, duty title, office and telephone number, home address and telephone number, dependents, education and training, speciality or job qualifications, performance/effectiveness reports, awards/decorations, promotions, duty assignment history and similar information listed in the governing directive for the system.

AUTHORITY FOR MAINTAINING THE SYSTEM:

10 U.S.C. 8013, Secretary of the Air Force: Powers and duties; delegation by; as implemented by a specific governing directive, and Executive Order 9397. The system cannot be operated until a directive is published listing authorized locations, subjects, categories of records, safeguards, and management procedures.

PURPOSE(S):

Used to locate, manage and train assigned personnel.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records from this system of records may be disclosed for any of the blanket routine uses published by the Air Force.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Stored on computer or word processor and output products as listed in the governing directive.

RETRIEVABILITY:

Filed by name or Social Security Number (SSN).

SAFEGUARDS:

Records are accessed by custodian of the system and by persons servicing the records who are properly cleared for need-to-know. Records are protected in accordance with Air Force Regulation 700–10, Information Systems Security.

RETENTION AND DISPOSAL:

Destroy when no longer needed, or when individual transfers or separates from service, whichever is sooner.

SYSTEM MANAGER(S) AND ADDRESS:

Chief of the office or unit where records are maintained.

NOTIFICATION PROCEDURE:

Requests from individuals should be sent to the System Manager.

RECORD ACCESS PROCEDURES:

Individuals can obtain assistance in gaining access from the System Manager.

CONTESTING RECORDS PROCEDURES:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the System Manager and are published in Air Force Regulation 12–35 (32 CFR Part 806b).

RECORD SOURCE CATEGORIES:

Information obtained from personnel records, training records or the individual

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

SYSTEM NAME:

030 AF MP B—Substance Abuse Reorientation and Treatment Case Files.

SYSTEM LOCATION:

At servicing Air Force installations Social Actions offices. Official mailing addresses are in the Department of Defense directory in the appendix to the Air Force's system notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Air Force active duty military personnel and dependents, Air Force civilian employees, and Air Force Reserve personnel, who are enrolled in the Air Force Substance Abuse Reorientation and Treatment (SART) Program.

CATEGORIES OF RECORDS IN THE SYSTEM:

As a minimum, the file contains forms, automated data base, counseling case notes, and commander's letters documenting entry and participation in the Air Force SART Program, to include: Date and means of identification and substance of abuse.

AUTHORITY FOR MAINTAINING THE SYSTEM:

42 U.S.C, Section 290dd–3, Confidentiality of Patient Records; 42 U.S.C., Section 290ee–3, Confidentiality of Patient Records; Air Force Regulation 30–2, Social Actions Program; Air Force Regulation 40–792, Drug and Alcohol Abuse Prevention and Control Program, and Executive Order 9397.

PURPOSE(S):

The file is used to process members in the SART Program; to develop a reorientation or treatment plan; to assist commanders in decisions for program disposition; to document progress of individuals in the SART; and to prepare recurring reports. Records in this system which reveal the identity, diagnosis, prognosis, or treatment of any individual for substance abuse may be disclosed according to 42 U.S.C. 290dd–3 for those records related to alcohol abuse and 42 U.S.C. 290ee–3 for those records related to drug abuse. Disclosure within the Air Force its limited to those individuals who need the records in connection with programs relating to abuse treatment, reorientation, research, health, program evaluation or assignment to duty. Persons authorized by 42 U.S.C. 290dd–3 and 42 U.S.C. 290ee–3 may review, handle, or have access to the file. These persons include social actions and medical personnel, to include certified volunteers directly engaged in the reorientation and treatment of a person; Veterans Administration (VA) treatment personnel, when members are transferred directly to a VA facility; personnel attending a SART intervention meeting; commanders or persons acting under their authority for

purposes consistent with those for which the case files are maintained; persons authorized to conduct program evaluations, with or without the consent of the member concerned; persons authorized in the official performance of their duties. The blanket routine uses published by the Department of the Air Force for its system of records do not apply in these cases. Disclosure is also authorized to other components of the Armed Forces when they provide heatlh care to identified individuals.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Records from this system of records may not be disclosed for any of the blanket routine uses published by the Air Force except for Congressional inquiries when the Congressional office is acting with the consent of a constituent who is the subject of the files maintained.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEMS:

STORAGE:

Maintained in file folders and computer disks.

RETRIEVABILITY:

Filed by name, by SSN, by other identification number or system identifier.

SAFEGUARDS:

Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in performance of their official duties who are properly screened and cleared for need-to-know. Records are stored and secured in lockable receptacles and are controlled by personnel screening.

RETENTION AND DISPOSAL:

Destroy forms, notes, and letters one year after completion of Track 4 of SART program or discharge from the service and six months after completion of Tracks 1, 2, and 3. All paper files will be destroyed by tearing into pieces, shredding, pulping, macerating, or burning, unless needed as background for case files supporting a separation action or other actions under directives, in which case, disposition will be the same as the file which they support. Data stored on automated computer screens at the servicing AF installation will be erased from memory two years after completion of SART Program.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Social Actions Branch, Human Resources Development Division, Directorate of Personnel Programs, HQ USAF; and Directors or Assistants for Social Actions at Major Command Headquarters; and Chiefs, Social Actions at Air Force installations.

NOTIFICATION PROCEDURE:

Chief, Social Actions servicing AF installations. Requests to determine existence of a file should include full name, grade, and unit of assignment. Personal visit proof of identity requires full name and possession of Department of Defense (DD) Form 2 AF, Armed Forces Identification Card; DD Form 1173, Uniformed Services Identification and Privileges Card; or driver's license and personal recognition of substance abuse office personnel.

RECORD ACCESS PROCEDURES:

Chief, Social Actions servicing AF installation. Mailing addresses are in the Department of Defense directory in the appendix to the Air Force's systems notices.

CONTESTING RECORDS PROCEDURES:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the System Manager and are published in Air Force Regulation 12–35 (32 CFR Part 806b).

F045 ARPC B

SYSTEM NAME:

045 ARPC B—Inactive Duty Training, Extension Course Institute (ECI) Training.

SYSTEM LOCATION:

Air Reserve Personnel Center (ARPC), Denver CO 80280–5000.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Air Force Reserve and National Guard personnel.

CATEGORIES OF RECORDS IN THE SYSTEM:

Authorization for inactive training, authorization for individual inactive duty training (for nonpay status only; for pay status authorization). Certificate of completion issued on completion of volume of a course. Point credit source document maintained on active Air Force Reserve member.

AUTHORITY FOR MAINTAINING THE SYSTEM:

10 U.S.C. 1331, Age and service requirements; 1332, Computation of years of service in determining entitlement to retired pay; and 1333, Computation of years of service in computing retired pay as implemented

VOL 53 ISS 239 DEC 13 1988 UMI

by Air Force Regulation (AFR) 35–41, Vol II, Reserve Training; and Executive Order 9397.

PURPOSE(S):

To record completion of each volume of a correspondence course by a Reservist and show training performed for either paid or nonpaid status. Record is used by military personnel clerks to audit a Reservist point credit account and as a cross check to ensure accuracy of the Reservist's yearly point credit account as it pertains to his pay account.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Records from this system of records may be disclosed for any of the blanket routine uses published by the Air Force.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEMS:

STORAGE:

Maintained in visible file binders/cabinets.

RETRIEVABILITY:

Filed by name and Social Security Number (SSN).

SAFEGUARDS:

Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in performance of their official duties who are properly screened and cleared for need-to-know. Records are protected by guards.

RETENTION AND DISPOSAL:

Inactive duty training documents (originals) are destroyed after 5 years. ECI certificates (duplicates) issued on completion of a course are filed in the field personnel record until it is outdated, then it is destroyed by tearing into pieces, macerating, shredding, pulping, or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, ARPC, Denver CO 80280–5000.

NOTIFICATION PROCEDURE:

Requests from individuals should be addressed to the Records Manager, ARPC/DAD, Denver CO 80280–5000. Written requests for information should contain full name, SSN, current mailing address and, if known, the case (control) number on correspondence received from ARPC. Records may be reviewed in the Records Review Room, ARPC, Denver CO 80280–5000 between 8:00 a.m. and 3:00 p.m. on normal workdays. Visitors wishing to see their records should provide a current Reserve identification card and/or drivers license and some verbal information that could verify the person's identification.

RECORD ACCESS PROCEDURES:

Individuals can obtain assistance in gaining access from the Records Manager, ARPC/DAD, Denver CO 80280–5000, telephone (303) 370–4667.

CONTESTING RECORDS PROCEDURES:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the System Manager and are published in Air Force Regulation 12–35 (32 CFR Part 806b).

RECORD SOURCE CATEGORIES:

Information from individual Reservist, Air National Guard and Air Force Reserve unit.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

BILLING CODE 3810–01–M

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for a Flood Control Study of Rio Grande de Arecibo, Arecibo, PR

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: The Jacksonville District U.S. Army Corps of Engineers intends to prepare a Draft Environmental Impact Statement on the feasibility of providing flood control along the Rio Grande de Arecibo, with particular interest in the city of Arecibo, Puerto Rico. Structural and nonstructural alternatives to alleviate flood damages will be studied.

FOR FURTHER INFORMATION CONTACT: Ms. Lizabeth Rhodes, 904–791–1691, U.S. Army Corps of Engineers, Jacksonville District, P.O. Box 4970, Jacksonville, Florida.

SUPPLEMENTARY INFORMATION: a. The Rio Grande de Arecibo Feasibility Report is being undertaken under the authority of a resolution by the Committee of Public Works and Transportation of the House of Representatives dated September 23, 1982. The local sponsor for the study is the Department of Natural Resources. Several preliminary alternative plans will be evaluated in a definite project report (DPR). Plan 1 includes a 2.6-kilometer-long by 2.5-meter-high earth levee along the Rio Grande de Arecibo; a 1.4-kilometer-long diversion channel along the Rio Santiago; and channel improvements consisting of a 300-meter-long concrete channel and 1.2 kilometers of channel enlargement. Fill would be obtained from a nearby commercial quarry. A pump station would be constructed near the conjunction of Rio Grande de Arecibo and Rio Santiago. Plan 1 would protect against the 100-year flood event, Plan 2 is the same as plan 1 except 500-year flood protection would be provided. Plan 3 includes a 2.6-kilometer-long earth levee and 1.4-kilometer-long diversion channel as in plan 1, but also involves a detention basin. Plan 3 would provide 100-year flood protection. A no action plan will also be evaluated.

b. Scoping: The scoping process as outlined by the Council on Environmental Quality will be utilized to involve Federal, Commonwealth, local agencies, and other interested persons and organizations. A scoping letter (June 1, 1988) has been sent to interested Federal, Commonwealth, and local agencies requesting their comments and concerns. Interested persons and organizations wishing to participate in the scoping process should contact the Corps of Engineers at the address above. Significant issues anticipated include concern for: wetlands, water quality, agricultural lands, wildlife, fisheries, recreation, groundwater resources, and endangered and threatened species. Preliminary coordination with the Puerto Rico State Historic Preservation Office (SHPO) revealed Arecibo as one of the oldest continuously inhabited settlements on Puerto Rico. Sites that are listed or may be eligible for inclusion on the National Register of Historic Places may be present in the vicinity of the study area. Identification of other significant issues to be addressed in the EIS will be determined through the scoping process.

c. Coordination with the U.S. Fish and Wildlife Service and National Marine Fisheries Service will be accomplished in compliance with section 7 of the Endangered Species Act. Coordination required by applicable Federal and Commonwealth laws and policies will be conducted. If discharge of material into waters of the United States is involved, the discharge will be specified by application of the criteria of section 404(b) of the Clean Water Act.

d. DEIS Preparation: It is estimated that the DEIS will be available to the public in May 1990.

Dated: November 28, 1988.

A.J. Salem,

Chief, Planning Division.

BILLING CODE 3710-AJ-M

DEPARTMENT OF ENERGY

Assistant Secretary for International Affairs and Energy Emergencies

Proposed Subsequent Arrangement Between U.S. and Japan

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation between the Government of the United States of America and the Government of Japan concerning Peaceful Uses of Nuclear Energy.

The subsequent arrangement to be carried out under the above-mentioned agreement involves approval of the following sale: Contract Number S-JA-378, for the supply of 30 grams of plutonium-239 to the Japan Atomic Energy Research Institute, Tokai-Mura, Japan, for use in reactor physics experiments.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Date: December 8, 1988.

George J. Bradley, Jr.,

Principal Deputy Assistant Secretary for International Affairs and Energy Emergencies.

[FR Doc. 88-28678 Filed 12-12-88; 8:45 am]

BILLING CODE 6450-01-M

Financial Assistance Award; Intent to Award Grant to the Improved Gravity Drainage Co.

AGENCY: U.S. Department of Energy.

ACTION: Notice of noncompetitive financial assistance.

SUMMARY: The Department of Energy announces that pursuant to 10 CFR 600.7(b) it is restricting eligibility for a grant under procurement request number 19-88BC14291.000 to the Improved Gravity Draining Company for "Development of a Novel Subsurface Oil Production Technology".

Scope: The grant is to fund the development of an oil mining project. A major goal of the proposed research effort is to demonstrate the technical and economic feasibility of recovering oil from shallow (less than 2,000 feet deep), heterogeneous petroleum reservoirs by the use of an novel subsurface oil production technology. The technology involves drilling shafts and mining tunnels into rock formations that underlie shallow oil-bearing zones and using directional drilling methods to place injection and production wells in strategic locations so that volumetric sweep and oil recovery efficiences can be maximized. State-of-the-art enhanced oil recovery techniques such as steam, gas, and chemical flooding will be modified as necessary to enhance the recovery of crude oil by gravity and pressure depletion. The proposed program is expected to significantly enhance DOE's effort to improve enhanced oil recovery methods and increase domestic reserves.

In accordance with 10 CFR 600.7(b)(2)(i) (B) and (D), the Improved Gravity Drainage Company (IGDC) has been selected as the grant recipient. IGDC is composed of an engineering firm, a mining firm, and consultants who are internationally recognized as experts in mining, reservoir engineering, and enhanced oil recovery. Due to the company's key personnel involvement in engineering studies involving design of conventional oil mining projects, the necessary expertise and familiarity reside with IGDC. Additionally, the industry has expressed a willingness to fund a portion of this effort.

The term of the grant will be for a four year period at an estimated value of $15,000,000.00, of which the DOE share is less than 50%.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Pittsburgh Energy Technology Center, P.O. Box 10940, MS 921-165, Pittsburgh, PA 15236, Attn: David N. Barnett, Telephone: AC 412/892-5912.

Date: November 10, 1988.

Gregory J. Kawalkin,

Acting Director, Acquisition and Assistance Division.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

Hydroelectric Application Filed With the Commission

December 8, 1988.

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection.

a. *Type of Application:* Transfer of License.

b. *Project No.:* 8492-007.

c. *Date Filed:* November 15, 1988.

d. *Applicant:* Prodek, Inc. and Prodek/Hydro Resources Joint Venture.

e. *Name of Project:* McGee Creek Project.

f. *Location:* On the McGee Creek in Atoka County, Oklahoma.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Applicant Contacts:* Mr. James B. Vasile, Newman & Holtzinger, P.C., 1615 L Street NW., Suite 1000, Washington, DC 20036, (202) 955-6654; Flake H. Wells, III, Vice President, Prodek, Inc., 2431 E. 61st Street, Suite 318, Tulsa, OK 74136, (918) 749-7749; Kenneth W. Oberg, Vice President, Hydro Resources Inc., 100 Australian Avenue, Suite 304, West Palm Beach, FL 33406, (407) 683-6996.

i. *FERC Contact:* Steven H. Rossi, (202) 376-9814.

j. *Comment Date:* December 23, 1988.

k. *Description of Transfer:* On November 15, 1988, Prodek, Inc. (licensee) and Prodek/Hydro Resources Joint Venture (transferee) filed a joint application for transfer of a minor license for the McGee Creek Project No. 8492.

The purpose of the proposed transfer of license is to facilitate the financing of the project. Construction started on October 26, 1988.

The proposed transfer would not result in any changes in the operation of the project. All engineering, design, and feasibility studies performed would be transferred to the transferee. The transferee states that it would comply wth all the terms and conditions of the license.

l. *This notice also consists of the following standard paragraphs:* B and C.

Standard Paragraphs

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice

and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "RECOMMENDATIONS FOR TERMS AND CONDITIONS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATIONS," "PROTEST" OR "MOTION TO INTERVENE," as applicable, and the project number of the particular application to which the filing is in response. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. An additional copy must be sent to: the Director, Division of Project Review, Office of Hyrdopower Licensing, Federal Energy Regulatory Commission, Room 204–RB, at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon each representative of the applicant specified in the particular application.

Lois D. Cashell,

Secretary.

[FR Doc. 88–28604 Filed 12–12–88; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP89–39–000]

ANR Pipeline Co.; Proposed Changes In FERC Gas Tariff

December 7, 1988.

Take notice that on December 1, 1988, pursuant to section 4 of the Natural Gas Act and Part 154 of the Federal Energy Regulatory Commission's ("Commission") Regulations thereunder, ANR Pipeline Company ("ANR") tendered for filing with the Commission Fifth Revised Sheet No. 570 of its FERC Gas Tariff, Original Volume No. 2 with an effective date of January 1, 1989.

ANR states Fifth Revised Sheet No. 570 shows an increase of $15,269 in the monthly charge paid by the High Island Offshore System ("HIOS") to ANR pursuant to Rate Schedule X–64 under Original Volume No. 2 of ANR's F.E.R.C. Gas Tariff. Rate Schedule X–64 is a Service Agreement dated August 4, 1977 between ANR and HIOS. Under the terms of this Service Agreement, which was approved by Commission Order issued July 6, 1978 at Docket No. CP78–134, ANR provides certain gas measurement, dehydration and related services for HIOS.

Any person desiring to be heard or to protest said filing should file a motion to intervene or to protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 or Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 15, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to the proceeding must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 88–28606 Filed 12–12–88; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. RP88–147–002; RP88–45–011; TQ89–2–31–000]

Arkla Energy Resources; Filing of Revised Tariff Sheets Reflecting Tariff Adjustment and Revised Tariff Lanaguage

December 8, 1988.

Take notice that on December 1, 1988, Arkla Energy Resources (AER), a division of Arkla, Inc., tendered for filing the following tariff sheets:

(1) *Docket No. RP88–147–000 Substitute Tariff Sheets effective June 1, 1988*
Rate Schedule No. X–26
Original Volume No. 3
Rate Schedule G–2
First Revised Volume No. 1
2nd Substitute 4th Rev. Sheet 187D
2nd Substitute 9th Rev. Sheet 12C
2nd Substitute 10th Rev. Sheet 12D

(2) *Docket No. RP88–45–000 Substitute Tariff Sheets effective July 1, 1988*
1st Substitute 5th Rev. Sheet 187D
1st Substitute 10th Rev. Sheet 12C
1st Substitute 11th Rev. Sheet 12D

(3) *Docket No. TQ89–2–31 Quarterly PGA filing effective January 1, 1989*
2nd Revised Sheet No. 185.1
99th Revised Sheet No. 4

AER states that in (1) above the substitute tariff sheets are filed to become effective June 1, 1988 in complianace with Commission order dated September 30, 1988 requiring AER to make certain PGA lanaguage changes in the tariff sheets which were filed September 1, 1988 in accordance with Order 483.

AER states that in (2) above the substitute tariff sheets are filed to become effective July 1, 1988 to track the changes in the tariff sheets in (1) above.

AER states that in (3) above the tariff sheets reflect its third quarterly PGA filing under the Commission's transitional rules of Order No. 483.

AER states that the proposed changes would increase its system cost by $216,243 and its jurisdictional sales and service by $10,569 for the PGA period of January, February, and March 1989 as adjusted.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before December 15, 1988. Protests will be considered by the Commission in determining the apropriate action to be taken, but will not serve to make Protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 88–28607 Filed 12–12–88; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP88–184–005]

El Paso Natural Gas Co.; Tariff Filing

December 7, 1988.

Take notice that on December 1, 1988, pursuant to Part 154 of the Federal Energy Regulatory Commission's ("Commission") Regulations Under the Natural Gas Act, El Paso Natural Gas Company ("El Paso") submitted a filing pursuant to the Commission's "Order Accepting for Filing and Suspending Tariff Sheets, Subject to Refund and Conditions," issued June 30, 1988, at Docket No. RP88–185–000, and the "Order Granting Rehearing and Denying Rehearing In Part," issued November 21, 1988, at Docket No. RP88–184–001.

El Paso states that on June 1, 1988, at Docket No. RP88–184–000, El Paso tendered certain tariff sheets which served to establish the procedures by

which El Paso proposed to recover from its customers, as prescribed by Order No. 500, a portion of the payments (referred to herein as "buyout" or "buydown" payments or costs) to its natural gas suppliers made in settlement of claims arising under gas purchase agreements or to terminate or suspend such agreements. By order issued June 30, 1988, the Commission conditionally accepted and suspended such tariff sheets, subject to refund, until El Paso's acceptance of a blanket certificate under Subpart G of Part 284 or December 1, 1988, whichever is earlier. Ordering paragraphs (B), (C) and (D) directed El Paso to file revised tariff sheets and certain supporting data and information within thirty (30) days of the issuance of the order. On August 1, 1988, El Paso filed in compliance with the June 30, 1988 order.

El Paso further states that on August 1, 1988, El Paso also filed a request for rehearing and clarification wherein El Paso requested, among other things, modification of that portion of the June 30, 1988 order requiring El Paso to "first allocate costs between jurisdictional and non-jurisdictional customers based on the cumulative deficiency methodology" before making further allocations with regard to the take-or-pay costs to be paid in the fixed charge or absorbed by the pipeline. In its order on rehearing issued November 21, 1988, the Commission modified this portion of the June 30, 1988 order and directed El Paso to revise the methodology so that, after allocating 50 percent of the total take-or-pay settlement costs to the volumetric surcharge, El Paso would then allocate a share of the remaining 50 percent to its nonjurisdictional customers on the same purchase deficiency basis as it uses to allocate those costs among its jurisdictional customers. El Paso must then absorb 50 percent of the costs remaining after it has made this allocation to its nonjurisdictional customers and allocate the other 50 percent among its jurisdictional customers based upon the same purchase deficiency methodology used for the allocation between jurisdictional and nonjurisdictional customers. The tendered tariff sheets reflects such modification to the allocation methodology.

El Paso also states that the tendered tariff sheets reflect certain modifications with regard to the recovery period, the amortization period, the amortization amount and the dates for adjustments. All such modifications are in compliance with the Commission's June 30, 1988 suspension order. The tendered tariff sheets also reflect certain other clarifications which the Commission discussed in the November 21, 1988 order on rehearing.

With respect to the Commission's requirement in its June 30, 1988 suspension order that the tariff sheets are suspended until El Paso accepts a blanket certificates under Subpart G of Part 284, or December 1, 1988, whichever is earlier, El Paso states that it filed concurrently with this filing its acceptance of the blanket authorization granted by order issued November 2, 1988, at Docket No. CP88-433-000.

El Paso stated that it also filed concurrently with this filing its motion to place into effect on December 1, 1988, those tariff sheets accepted and suspended by the June 30, 1988 order together with the tariff sheets filed in this filing which tariff sheet contain the modifications described in this filing.

El Paso, as evidence of its election to participation in the equitable sharing mechanism, also filed, on December 1, 1988, to withdraw its pending petition for review of the Commission's orders at Docket No. RP87-16-000, rejecting El Paso's prior proposal to direct bill the full amount of its buyout or buydown costs.

El Paso requested that the Commission grant any and all waivers of its rules and regulations as may be necessary so as to permit the tendered tariff sheets to become effective on December 1, 1988, the date El Paso filed its acceptance of the blanket authorization granted by order issued November 2, 1988 at Docket No. CP88-433-000.

Copies of the filing were served upon all parties of record in Docket No. RP88-184-000 and, otherwise, upon all interstate pipeline system sales customers and shippers of El Paso and interested state regulatory commissions.

Any person desiring to be heard or to protect said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Sections 285.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 14, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants partis to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 88-28608 Filed 12-12-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP88-184-004]

El Paso Natural Gas Co.; Motion to Place Tariff Sheets into Effect

December 7, 1988.

Take notice that El Paso Natural Gas Company ("El Paso"), on December 1, 1988, tendered for filing pursuant to section 4(e) of the Natural Gas Act and §154.67(a) of the Federal Energy Regulatory Commission's ("Commission") Regulations Under the Natural Gas Act, a motion to place into effect on December 1, 1988, certain tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1, Original Volume No. 1-A, Third Revised Volume No. 2 and Original Volume No. 2A, and the rates and modifications set forth therein.

El Paso states that on June 1, 1988, at Docket No. RP88-184-000, it tendered certain tariff sheets which served to establish procedures by which El Paso proposed to recover from its customers, as prescribed by Order No. 500, a portion of the payments (referred to herein as "buyout" or "buydown" payments or costs) to its natural gas suppliers made in settlement of claims arising under gas purchase agreements or to terminate or suspend such agreements. By order issued June 30, 1988, at Docket No. RP88-184-000, the Commission conditionally accepted and suspended such tariff sheets, subject to refund, until El Paso's acceptance of a blanket certificate under Subpart G of Part 284, or December 1, 1988, whichever is earlier.

El Paso further states that in a related filing made on June 1, 1988, at Docket No. RP88-44-004, El Paso filed primary and alternate tariff sheets to reflect certain modifications to those rates which were suspended until July 1, 1988, at Docket No. RP88-44-000. Such rates differed from previously filed rates at such docket in that they were adjusted for the removal of take-or-pay buyout and buydown costs, an increase in throughput quantity and certain other adjustments. The Commission, by order issued June 30, 1988, accepted the primary tariff sheets, subject to refund and conditions.

El Paso states the tariff sheets accepted by the Commission at Docket No. RP88-184-000 were conditioned, among other things, El Paso filing

revised tariff sheets within thirty (30) days of the date of the order to reflect the requirements of ordering paragraphs (B), (C) and (D) of the June 30, 1988 order. The Commission also stated that El Paso would need to refile the tariff sheets reflecting the rates implementing its passthrough proposal accepted by the June 30, 1988 order at Docket No. RP88–44–004, consistent with the terms of both June 30, 1988 orders. On August 1, 1988 at Docket No. RP88–184–001, El Paso filed revised tariff sheets in compliance with the June 30, 1988 order.

El Paso also states that on November 21, 1988 at Docket No. RP88–184–001, the Commission issued an "Order Granting Rehearing and Denying Rehearing in Part" wherein the Commission stated that "El Paso is directed to revise its methodology so that, after allocating 50 percent of the total take-or-pay settlement costs to the volumetric surcharge, El Paso will allocate a share of the remaining 50 percent to its non-jurisdictional customers on the same purchase deficiency basis it uses to allocate those costs among its jurisdictional customers. El Paso must then absorb 50 percent of the costs remaining after it has made allocation to its non-jurisdictional customers and allocate the other 50 percent among its jurisdictional customers based upon the same purchase deficiency methodology used for the allocation between jurisdictional and non-jurisdictional customers." El Paso filed concurrently with this motion certain tariff sheets which reflect the above-described Commission directive along with certain other modifications made pursuant to the Commission's June 30, 1988 suspension order and the November 21, 1988 rehearing order to clarify and simplify certain aspects of the recovery procedure. Such revisions are more fully explained in the concurrent tariff filing; however, the tariff sheets incorporating such changes were also included in the motion.

El Paso states that with respect to the requirement that the tariff sheets are suspended until El Paso accepts a blanket certificate under Subpart G of Part 284, or December 1, 1988, whichever is earlier, El Paso filed concurrently with this motion its acceptance of the blanket authorization granted by order issued November 2, 1988 at Docket No. CP88–433–000.

El Paso also states that, as required by the June 30, 1988 order, El Paso filed, on December 1, 1988, to withdraw its pending petition for review of the Commission's orders at Docket No. RP87–16–000, rejecting El Paso's earlier proposal to direct bill its buyout or buydown costs.

El Paso states that its motion placed into effect as of December 1, 1988 those tariff sheets approved by the Commission's June 30, 1988 order and those tariff sheets containing the revisions as filed concurrently with the motion pursuant to the November 21, 1988 and the June 30, 1988 orders.

Copies of the filing were served upon each person designated on the official service list compiled by the Secretary in Docket No. RP88–184–000, and otherwise, upon all interstate pipeline system sales customers and shippers of El Paso and all interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before Dec. 14, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 88–28609 Filed 12–12–88; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TQ89–2–33–000]

El Paso Natural Gas Co.; Proposed Change in Rates

December 8, 1988.

Take notice that El Paso Natural Gas Company ("El Paso"), on December 1, 1988, tendered for filing pursuant to Part 154 of the Federal Energy Regulatory Commission's ("Commission") Regulations Under the Natural Gas Act, a notice of a Quarterly Adjustment in Rates, effective January 1, 1989, for jurisdictional gas service rendered to sales customers served by El Paso's interstate gas transmission system under rate schedules affected by and subject to section 19, Purchased Gas Cost Adjustment Provision ("PGA"), of the General Terms and Conditions in El Paso's FERC Gas Tariff, First Revised Volume No. 1.

El Paso states that it has tendered certain tariff sheets in compliance with its PGA provisions which reflect a net decrease of $0.0149 per dth below those rates placed in effect on October 1, 1988 at Docket No. TQ89–1–33–000. The decrease of $0.0149 per dth, after elimination of the Current Adjustment reflected in El Paso's Interim PGA effective December 1, 1988, results in a Current Adjustment of $.5731 per dth. Regarding the Surcharge Adjustment, El Paso will continue not collecting such surcharge in accordance with the Commission's September 30, 1988 order accepting and suspending El Paso's Quarterly PGA filing at Docket No. TQ89–1–33–000, *et al.*, effective October 1, 1988.

Copies of the filing were served upon all of El Paso's interstate pipeline system sales customers and all interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 16, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestant parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 88–28618 Filed 12–12–45; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP89–37–000]

High Island Offshore System; Proposed Changes in FERC Gas Tariff December 8, 1988.

Take notice that on December 1, 1988, High Island Offshore System ("HIOS") tenders for filing, pursuant to Section 4 of the Natural Gas Act, tariff sheets to its FERC GAS Tariff, Original Volume No. 1 as follows:

Twenty-First Revised Sheet No. 4

HIOS states Twenty-First Revised Sheet No. 4 will result in a net reduction in revenues of approximately $.1 million based on the 12 month period ending August 31, 1988 as adjusted, as compared with the revenues generated through use of HIOS' present rates.

However, some shippers may experience an increase in annual charges, based on varying load factors.

HIOS states the proposed changes in rates are necessary to reflect:

(a) A decrease in the level of operation and maintenance expenese, including adjusted costs from U-T Offshore System and ANR Pipeline Company for Cameron Meadows and Grand Chenier facilities, respectively;

(b) An existing depreciation rate of 4.48%, which includes a .15% negative salvage allowance;

(c) An increase in the cost of partners' capital and a refinancing of long-term debt at a higher rate of interest, which results in an overall rate of return of 13.07%, which is required to afford HIOS the opportunity to earn a fair and reasonable rate of return;

(d) Declining levels of transportation volumes, and

(e) A significant decrease in the demand rate, and a substantial increase in the commodity rate, relating principally to HIOS' refinancing of long term debt.

HIOS requests that Twenty-First Revised Sheet No. 4 and supporting data also considered to satisfy the two year compliance filing requirements, pursuant to the FERC order dated December 6, 1977, at Docket No. CP75–104, *et al.*, as well as a rate increase filed pursuant to Section 4 of the Natural Gas Act. In accordance with the provisions of the aforesaid Commission Order, HIOS requests that the Twenty-First Revised Sheet No. 4 be made effective, on January 1, 1989.

Any person desiring to be heard or to protest said filing should file a motion to intervene or to protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20425, in accordance with Rule 211 or Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 15, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to became a party to the proceeding must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[Docket No. TQ89–2–5–000]

Midwestern Gas Transmission Co.; Rate Filing

December 7, 1988.

Take notice that on December 1, 1988, Midwestern Gas Transmission Company (Midwestern) filed Forty-Fifth Revised Sheet No. 5 to Original Volume No. 1 of its FERC Gas Tariff to be effective January 1, 1989.

Midwestern states that the current Purchased Gas Cost Rate Adjustments reflected for Forty-Fifth Revised Sheet No. 5 consist of a .1210 cents per dekatherm adjustment applicable to the gas component of Midwestern's sales rates, a (.29) per dekatherm adjustment applicable to the Demand D–1 component and a .0001 cents per dekatherm adjustment applicable to the Demand D–2 component of Midwestern's rates.

Midwestern states that copies of the filing have been mailed to all of its jurisdictional customers on its Southern System and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before December 15, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene; provided, however, that any person who had previously filed a motion to intervene in this proceeding is not required to file a further motion. Copies of this filing are on file with the Commission and area available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP88–193–004]

Midwestern Gas Transmission Co.; Rate Filing

December 7, 1988.

Take notice that on December 1, 1988, Midwestern Gas Transmission Company (Midwestern) filed the following revised tariff sheets to Volume No. 1 of its FERC Gas Tariff to be effective January 1, 1989:

Sixteenth Revised Sheet No. 7
Third Revised Sheet No. 192
Second Revised Sheet No. 193

Midwestern states that revisions to Sheet No. 7 are authorized by Article XVII of its gas tariff. Midwestern states that revisions to Sheet Nos. 192 and 193 are being filed in compliance with the Commission's order on October 6, 1988 in Subdocket Nos. RP88–193–001 and 003.

Midwestern states that copies of the filing have been mailed to all of its jurisdictional customers on its Southern System and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before December 15, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene; provided, however, that any person who had previously filed a motion to intervene in this proceeding is not required to file a further motion. Copies of this filing are on file with the Commission and area available for public inspection.

Midwestern Gas Transmission Co.; Rate Filing

December 8, 1988.

Take notice that on December 1, 1988, Midwestern Gas Transmission Company (Midwestern) filed Thirty-Fourth Revised Sheet No. 6 to Original Volume No. 1 of its FERC Gas Tariff to be effective December 1, 1988.

Midwestern states that the current Purchased Gas Cost Rate Adjustments reflected on Thirty-Fourth Revised Sheet No. 6 consist of a 53.2 cents per dekatherm adjustment applicable to the gas component of Midwestern's sales rates. The need for this adjustment arises from dramatically increased purchases by Midwestern's customers, which in turn is causing Midwestern to purchase additional quantities of higher cost supplemental supplies.

Midwestern states that copies of the filing have been mailed to all of its jurisdictional customers on its Southern System and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before December 16, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene; provided, however, that any person who had previously filed a motion to intervene in this proceeding is not required to file a further motion. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TQ89-3-37-000]

Northwest Pipeline Corp.; Proposed Change in Sales Rates Pursuant to Purchase Gas Cost Adjustment

December 8, 1988.

Take notice that on December 2, 1988, Northwest Pipeline Corporation ("Northwest") submitted for filing a proposed change in rates applicable to service rendered under rate schedules affected by and subject to Article 16, Purchased Gas Cost Adjustment Provision ("PGA"), of its FERC Gas Tariff, First Revised Volume No. 1. Such change in rates is for the purpose of reflecting changes in Northwest's estimated cost of purchased gas for the three months ending March 31, 1989.

Northwest states the current PGA adjustment for which notice is given herein, aggregates to an increase of 21.21¢ per MMBtu in the commodity rate for all rate schedules affected by and subject to the PGA. The proposed change in Northwest's commodity rates for the first quarter of 1989 would increase sales revenues by approximately $5,171,210. The instant filing also provides for a minor reduction in the demand components of Northwest's gas sales rates. The proposed rate changes have been reflected on Forty-Seventh Revised Sheet No. 10 with a proposed effective date of January 1, 1989. Northwest also filed Fourth Revised Sheet No. 302 to its Volume No. 1 tariff and Third Revised Sheet No. 601 to its Volume No. 1-A tariff to reflect adjustments to the Index of Purchasers and Index of Shippers.

A copy of this filing is being served on Northwest's jurisdictional customers and affected state commissions.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 16, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public

inspection in the Public Reference Room.

[Docket No. RP89-1-002]

Northwest Pipeline Corp.; Change in FERC Gas Tariff

December 8, 1988.

Take notice that on December 5, 1988, Northwest Pipeline Corporation ("Northwest") in compliance with ordering paragraph (c) of the Federal Energy Regulatory Commission ("Commission") order issued November 4, 1988 in the above-captioned docket, submitted the following tariff sheet to be a part of its FERC Gas Tariff:

First Revised Volume No. 1

Original Sheet No. 11

Northwest states Original Sheet No. 11 reflects the total principal and the monthly amount to be billed to each customer under Northwest's proposal. Northwest also filed certain additional information applicable to its Account No. 191 direct-bill proposal that was filed on October 6, 1988, as amended October 27, 1988 as required by the November 4 order.

A copy of this filing has been served on Northwest's jurisdictional sales customers and affected state commissions.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 16, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. TQ89-1-38-000]

Ringwood Gathering Co.; Proposed Changes in FERC Gas Tariff

December 8, 1988.

Take notice that on December 2, 1988, Ringwood Gathering Company (Ringwood), 4828 Loop Central Drive, Loop Central Three, suite 850, Houston, Texas 77081, filed Substitute Forty-Fifth Revised Sheet No. PGA-1 to its FERC Gas Tariff reflecting its current quarterly pursuant to 18 CFR 154.308, computed in accordance with technical suggestions by the Commission Staff, including the computation of Ringwood's surcharge adjustment.

Copies of the filing were served upon Ringwood's jurisdictional customers and interested state agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.215, 385.211). All such motions or protests should be filed on or before December 16, 1988. Protests will be considered by the Commission in determining the appropriate action to the taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP89-325-325-000]

Southern Natural Gas Co.; Request Under Blanket Authorization

December 8, 1988.

Take notice that on December 1, 1988 Southern Natural Gas Company (Southern), Post Office Box 2563, Birmingham, Alabama 35202-2563, filed in Docket No. CP89-325-000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.020) for authorization to provide interruptible transportation services for Rangeline Corporation (Rangeline) under its blanket certificate issued in Docket No. CP88-316-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Southern states that it would perform the proposed transportation services for Rangeline, a marketer, pursuant to service agreements dated September 16, 1988, September 30, 1988, and October 3, 1988, all under Southern's Rate Schedule IT. It is further stated that the service agreements each have a primary term of one month with successive terms of one month thereafter unless cancelled by either party. Southern indicates that the receipt points would be located in Alabama, Georgia, Mississippi and the onshore and offshore areas of Louisiana and Texas. Delivery for each service would be at delivery points in South Carolina.

Southern states that the Service Agreement dated September 16, 1988, provides for a maximum transportation quantity of 500 MMBtu of gas on a peak day. Rangeline estimates that it would request 150 MMBtu on an average day and 54,750 MMBtu on an annual basis.

Southern states that the second Service Agreement dated September 30, 1988, provides for up to 5,000 MMBtu of gas to be transported on a peak day. Rangeline anticipates that it would request 2,000 MMBtu on an average day and 730,000 MMBtu on an annual basis.

Southern states that the third Service Agreement dated October 3, 1988, provides for a maximum transportation quantity of 15,000 MMBtu on a peak day. Rangeline estimates that it would request 3,500 MMBtu on an average day and 1,277,500 MMBtu on an annual basis.

Southern indicates that it commenced the transportation of gas for Rangeline pursuant to the Service Agreements dated September 16, 1988, September 30, 1988 and October 3, 1988 on October 1, 1988 (at Docket No. ST89-224), October 4, 1988 (at Docket No. ST89-226), and October 4, 1988 (at Docket No. ST89-227), respectively, for a 120-day period pursuant to § 284.223(a) of the Commission Regulations (18 CFR 284.223(a).

Lois D. Cashell,

Secretary.

[FR Doc. 88-28625 Filed 12-12-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TQ89-2-8-000]

South Georgia Natural Gas Co.; Proposed Changes to FERC Gas Tariff

December 8, 1988.

Take notice that on December 1, 1988, South Georgia Natural Gas Company ("South Georgia") tendered for filing Fiftieth Revised Sheet No. 4 to its FERC Gas Tariff, First Revised Volume No. 1. This tariff sheet and supporting

information is being filed with a proposed effective date of January 1, 1989, pursuant to the Purchased Gas Cost Adjustments provision set out in Section 14 of South Georgia's FERC Gas Tariff.

South Georgia states that Fiftieth Revised Sheet No. 4 reflects a revised Current Adjustment computed in accordance with § 154.305(c) of the Commission's Regulations. The Current Adjustment, which is proposed to be in effect from January 1, 1989, through March 31, 1989, reflects an increase in jurisdictional revenues of approximately $185,000, which is attributable to a decrease in the D–1 and commodity components of $.993 and $.065, respectively, and an increase in the D–2 components of Rate Schedules G–1/I1 and G–2/I–2 of $.132 and $.106, respectively.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (§§ 385.214, 385.211). All such motions or protests should be filed on or before December 15, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TA89–1–18–000]

Texas Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

December 7, 1988.

Take notice that Texas Gas Transmission Corporation (Texas Gas), on December 1, 1988, tendered for filing the following revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1:

Fourteenth Revised Sheet No. 10
Fourteenth Revised Sheet No. 10A

Texas Gas states that these tariff sheets reflect changes in purchased gas costs and the unrecovered purchased gas cost surcharge pursuant to the Purchased Gas Adjustment clause of Texas Gas's FERC Gas Tariff and are proposed to be effective February 1, 1989.

Copies of the filing were served upon Texas Gas's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such protests or motions should be filed on or before December 29, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717–01–M

[Docket No. TQ89–2–42–000]

Transwestern Pipeline Co.; Proposed Changes in FERC Gas Tariff

December 7, 1988.

Take notice that on December 1, 1988, Transwestern Pipeline Company (Transwestern) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheet:

51st Revised Sheet No. 5

Transwestern states this tariff sheet is filed pursuant to its Purchased Gas Adjustment provision set forth in Article 19.4 of the General Terms and Conditions of Transwestern's FERC Gas Tariff. Second Revised Volume No. 1. The Current Adjustment reflected herein represents an increase of $0.7019/dth as measured against Transwestern's flex PGA filing in Docket No. TF89–4–42, which became effective on December 1, 1988.

The proposed effective date for the tariff sheet listed above is January 1, 1989.

Copies of the filing were served on Transwestern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before December 15, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are available for public inspection in the Public Reference Room.

BILLING CODE 6717–01–M

[Docket Nos. CP89–288–000 et al.]

United Gas Pipe Line Co. et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. United Gas Pipe Line Company

[Docket No. CP89–288–000]

December 6, 1988.

Take notice that on November 23, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP89–288–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport gas on an unterruptible basis for MidCon Marketing Corporation (MidCon), a marketer of natural gas, under United's blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Specifically, United requests authority to transoort a maximum daily quantity of 618,000 MMBtu on behalf of MidCon pursuant to the Interruptible Gas Transportation Agreement T1–21–1422, dated February 25, 1988, as amended on April 7, 1988, June 2, 1988, July 18, 1988, and August 24, 1988, between United and MidCon. Umted will receive the gas at various existing points in Texas, Louisiana and Mississippi for delivery at various existing delivery points in Louisiana and Mississippi.

Service under § 284.223(a) commenced on October 14, 1988, as reported in Docket No. ST89–389.

Comment date: January 20, 1989, in accordance with Standard Paragraph G at the end of this notice.

2. United Gas Pipe Line Company

[Docket No. CP89–289–000]

December 6, 1988.

Take notice that on November 23, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP89–289–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport gas on an interruptible basis for PSI, Inc., a marketer of natural gas, under United's blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Specifically, United requests authority to transport a maximum daily quantity of 61,800 MMBtu on behalf of PSI, Inc. pursuant to the Interruptible Gas Transportation Agreement T1–21–1869, dated October 1, 1988, between United and PSI, Inc. United will receive the gas at an existing receipt point in Vermilion Parish, Louisiana for delivery at various existing delivery points in Louisiana.

Service under § 284.223(a) commenced on October 1, 1988, as reported in Docket No. ST89–691.

Comment date: January 20, 1989, in accordance with Standard Paragraph G at the end of this notice.

3. United Gas Pipe Line Company

[Docket No. CP89–290–000]

December 6, 1988.

Take notice that on November 23, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP89–290–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport gas on an interruptible basis for Amoco Production Company (Amoco), a producer of natural gas, under United's blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United proposes to transport on an interruptible basis up to 18,110 MMBTu of Natural gas on a peak day, 38,110 MMBtu on an average day and 13,910,150 MMBtu on an annual basis for Chevron. United States that it would perform the transportation service for Chevron under United's Rate Schedule ITS for a primary term of one year and continue on a monthly basis thereafter. It is explained that the service has commented under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–735. United indicates that no new facilities would be necessary to provide the subject service.

Comment date: January 20, 1988, in accordance with Standard Paragraph G at the end of this notice

4. United Gas Pipe Line Company

[Docket No. CP89–291–000]

December 6, 1988.

Take notice that on November 23, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP89–291–000 a request pursuant to § 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport gas on an interruptible basis for Victoria Gas Corporation (Victoria), a marketer of natural gas, under United's blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Specifically, United requests authority to transport a maximum daily quantiy of 103,000 MMBtu on behalf of Victoria pursuant to the Interruptible Gas Transportation Agreement T1–21–1750, dated July 14, 1988, as amended October 14, 1988, and October 24, 1988, between United and Victoria. United will receive the gas at various existing receipt points in Texas, Louisiana and Mississippi for delivery at various existing delivery points in Texas, Louisiana, Mississippi, Alabama and Florida.

Service under § 284.223(a) commenced on November 1, 1988, as reported in Docket No. CP89–693.

Comment date: January 20, 1989, in accordance with Standard Paragraph G at the end of this notice.

5. Moraine Pipeline Company

[Docket No. CP89–295–000]

December 7, 1988.

Take notice that on November 28, 1988, Moraine Pipeline Company (Moraine), 701 East 22nd Street, Lombard, Illinois, 61048, filed in Docket No. CP89–295–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide interruptible transportion service on behalf of PSI, Inc. (PSI), a marketer of natural gas, under Moraine's blanket certificate issued in Docket No. CP86–492–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Pursuant to a transportation service agreement executed October 17, 1988, Moraine proposes to transport up to a maximum of 150,000 MMBtu of natural gas per day for PSI from a point of receipt located at the interconnection between the facilities of Moraine and Natural Gas Pipeline Company of America at Grayslake in Lake County, Illinois to a point of delivery located at the interconnection between the facilities of Moraine and Wisconsin Natural Gas Company (the ultimate purchaser) in Kenosha County, Wisconsin. PSI has advised Moraine that it expects the average daily transportation quantity to be 2,200 MMBtu and based on that average, it expects the annual transportation volume to be 803,000 MMBtu. It is stated that the transportation service would be performed under Moraine's Rate Schedule ITS and consistent therewith, Moraine may agree to accept additional quantities as overrun gas. Finally, Moraine states that the service commenced November 8, 1988, as reported in Docket No. ST89–934–000, pursuant to Section 284.223(a) of the Commission's Regulations.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. Southern Natural Gas Company

[Docket No. CP89–301–000]

December 7, 1988.

Take notice that on November 29, 1988, Southern Natural Gas Company (Southern) filed in Docket No. CP89–301–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations for authorization to provide interruptible transportation services for certain shippers under its blanket certificate issued in Docket No. CP88–316–000 under section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Southern proposes to transport gas on an interruptible basis for Hadson Gas Systems, Inc. (Hadson), a marketer; Arco Oil & Gas Company (Arco), a producer; and Archer Daniels Midland Company (ADM), an end user, pursuant to service agreements dated August 4, 1988; August 18, 1988; and August 26, 1988, respectively, all under Southern's Rate Schedule IT. It is stated that the service agreements each have a primary term of one month with successive terms of one month thereafter unless cancelled by either party. Appendix A attached hereto sets forth the peak day, average day and annual information for each service, as well as receipt point/delivery

point information applicable to each service. Southern asserts that no new facilities are required to implement any of the proposed services.

Southern states that it commenced each of the transportation services pursuant to the 120-day self-implementing provision of § 284.223(a)(1) of the Commission's Regulations on the day set forth on Appendix A hereto as reported in the docket listed thereon.

In its request for authorization, Southern also petitions the Commission for a waiver of the 120-day limit on self-implementing transportation imposed by §284.223(a) of the Commission's Regulations for each of the services set forth herein. Southern states that this filing has not been made in time for the 45-day notice period to expire prior to expiration of said 120-day self-implementing period as a result of Southern overlooking first delivery dates for these services. Southern states that it has implemented check procedures to prevent such oversights in the future. Southern only requests a waiver to the extent necessary to allow it to continue these transportation services under §284.223(a) until the 45-day notice period expires.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

7. High Island Offshore System

[Docket No. CP89-303-000]

December 7, 1988.

Take notice that on November 19, 1988, High Island Offshore System (HIOS), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP89-303-000 an application pursuant to section 7(c) of the Natural Gas Act requesting authorization to transport natural gas, on an interruptible basis, for NML Development Corporation (NML), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

HIOS states that it has entered into two gas transportation agreements dated November 14, 1988, to provide on an interruptible basis, transportation of up to a maximum daily quantity of 95,000 Mcf as long-haul gas and a maximum daily quantity of 20,000 Mcf as short-haul gas for NML for a primary term of 11 years for each transportation agreement and continuing year to year thereafter. HIOS states that the gas for the long-haul transportation would be received at various receipt points located along HIOS system in the High Island Area, offshore Texas. The gas for the short-haul transportation would be received at a receipt point located on HIOS system in the West Cameron Area, offshore Louisiana it is stated. HIOS proposes to transport the long-haul gas to an existing interconnection of ANR Pipeline Company (ANR) or U-T Offshore System (U-TOS) in Block 167, West Cameron Area, offshore Louisiana or Stringray Pipeline Company in Block A-330, High Island Area, offshore Texas and to transport the short-haul gas to an existing interconnection of ANR or U-TOS in Block 167, West Cameron area, offshore Louisiana.

HIOS proposes to charge NML 9.66 cents per Mcf for the long-haul transportation and 4.87 cents per Mcf for the short-haul transportation under its Rate Schedule IT for Interruptible Transportation Service.

Comment date: December 28, 1988, in accordance with Standard Paragarph F at the end of this notice.

8. Northwest Pipeline Corporation

[Docket No. CP89-304-000]

December 7, 1988.

Take notice that on November 29, 1988, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89-304-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation on behalf of Williams Gas Marketing (Williams), under Northwest's blanket certificate issued in Docket No. CP86-578-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northwest requests authorization to transport, on an interruptible basis, up to a maximum of 37,000 MMBtu of natural gas per day for Williams, a marketer of natural gas, from existing wells located in La Plata County, Colorado and Rio Arriba and San Juan Counties, New Mexico, to the Ignacio Plant delivery point in La Plata County, Colorado, and the existing interconnections with El Paso Natural Gas Company at La Jara in Rio Arriba County, New Mexico. Northwest anticipates transporting, 3,000 MMBtu of natural gas on an average day and an annual volume of 1,100,000 MMBtu.

Northwest states that the transportation of natural gas for Williams commenced October 14, 1988, as reported in Docket No. ST89-678-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to Northwest in Docket No. CP86-578-000.

Comment date: January 23, 1989, in accordance with Standard Paragarph G at the end of this notice.

9. Panhandle Eastern Pipe Line Company

[Docket No. CP89-306-000]

December 7, 1988.

Take notice that on November 30, 1988, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP89-306-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) and the Natural Gas Policy Act (18 CFR 284.223) for authorization to transport natural gas for Archer Daniels Midland Company (Archer Daniels), a shipper and end-user of natural gas, under Panhandle's blanket certificate issued in

Docket No. CP86–585–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Panhandle proposes to transport up to 5,000 dekatherms (dkt) of natural gas equivalent per day on an interruptible basis on behalf of Archer Daniels pursuant to a transportation agreement dated September 26, 1988, between Panhandle and Archer Daniels. Panhandle would receive gas at various existing points of receipt on its system in Texas, Oklahoma, Kansas, Colorado, Wyoming, and Illinois and delivery equivalent volumes, less fuel used and unaccounted for line loss, to the City of Bushnell in Fulton County, Illinois.

Panhandle states that the estimated daily and estimated annual quantities would be 2,500 dkt and 912,000 dkt, respectively. Service under § 284.223(a) commenced on October 5, 1988, as reported in Docket No. ST89–819.

Comment date: January 23, 1989, in accordance with Standard Paragarph G at the end of this notice.

10. United Gas Pipe Line Company

Docket No. CP89–309–000]

December 7, 1988.

Take notice that on November 30, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, pursuant to its blanket certificate of public convenience and necessity issued in Docket No. CP82–430–000, filed in Docket No. CP89–309–000 a request pursuant to § 157.216(b) of the Commission's Regulations under the Natural Gas Act for authorization to abandon its firm sales service of natural gas to Maple Gulf Coast Properties Corporation (Maple), a direct industrial sales customer, at its gas engine water injection plant, Smith County, Texas, all as more fully set forth in the request on file with the Commission and open to public inspection.

United States that Maple has consented to the proposed authorization request and that the facilities are to remain in place to serve Maple at the same location under an existing interruptible gas sales contract.

Comment date: January 23, 1989, in accordance with Standard Paragarph G at the end of this notice.

11. Southern Natural Gas Company

[Docket No. CP89–314–000]

December 7, 1988.

Take notice that on November 30, 1988, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202–2563, filed in Docket No. CP89–314–000 a request pursuant to §§ 157.205 and 284.223(b) of the Commission's Regulations under the Natural Gas Act for authorization to provide transportation service on a firm basis for Arco Oil and Gas Company (Arco), a producer, under its balnket certificate issued in Docket No. CP88–316–000 pursuant to section 7 of the Natural Gas Act, all as more fuly set forth in the request on file with the Commission and open to public inspection.

Southern proposes to transport 40,000 Mcf of gas on a peak day. Southern indicates that Arco anticipates requesting the full transportation demand of 40,000 Mcf of gas on an average day, and therefore, 14,600,000 Mcf of gas on an annual basis. Southern proposes to receive the gas at a receipt point in Offshore Texas and would transport it to a delivery point in Refugio County, Texas. Southern indicates that the service agreement is for a primary term through March 31, 1989 with successive terms of one month thereafter unless cancelled by either party. Southern asserts that no new facilities are required to implement the proposed service.

Southern indicates that it reported to the Commission in Docket No. ST89–222 that the Arco service began on October 1, 1988 under the 120-day automatic authorization provisions of § 284.233(a).

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

12. United Gas Pipe Line Company

[Docket No. CP89–316–000]

December 8, 1988.

Take notice that on December 1, 1988 United Gas Pipeline Company (United), P.O. Box 1478, Houston, Texas 77251, filed in Docket No. CP89–316–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under the blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United proposes to transport natural gas for Brock Gas Systems and Equipment Company (Brock). United explains that service commenced November 1, 1988, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–738. United explains that the peak day quantity would be 47,524 MMBtu, the average daily quantity would be 47,524 MMBtu, and that the annual quantity would be 17,346,260 MMBtu. United explains that it would receive natural gas for Brock's account at existing interconnections in the states of Louisiana and Mississippi. United states that it would redeliver the gas for Brock's account at existing interconnections in the state of Louisiana.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

13. United Gas Pipe Line Company

[Docket No. CP89–317–000]

December 8, 1988.

Take notice that on December 1, 1988 United Gas Pipeline Company (United), P.O. Box 1478, Houston, Texas 77251, filed in Docket No. CP89–317–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under the blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United proposes to transport natural gas for LaSER Marketing Company (LaSER). United explains that service commenced November 1, 1988, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–771. United explains that the peak day quantity woult be 5,150 MMBtu, the average daily quantity would be 5,150 MMBtu, and that the annual quantity would be 1,879,750 MMBtu. United explains that it would receive natural gas for LaSER's account at existing interconnections in the state of Texas. United states that it would redeliver the gas for LaSER's account at existing interconnections between United and Texas Eastern Transmission Corporation in Nacogdoches County, Texas.

Comment date: January 23, 1989, in accordance with Standard Paragaph G at the end of this notice.

14. United Gas Pipe Line Company

[Docket No. CP89–318–000]

December 8, 1988.

Take notice that on December 1, 1988 United Gas Pipeline Company (United), P.O. Box 1478, Houston, Texas 77251, filed in Docket No. CP89–318–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under the blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file

with the Commission and open to public inspection.

United proposes to transport natural gas for Marathon Oil Company (Marathon). United explains that service commenced October 27, 1988, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–877. United explains that the peak day quantity would be 30,900 MMBtu, the average daily quantity would be 80,900 MMBtu, and that the annual quantity would be 11,278,500 MMBtu. United explains that it would receive natural gas for Marathon's account at an existing interconnection between United and Sea Robin Pipeline Company in Vermilion Parish, Louisiana. United states that it would redeliver the gas for Marathon's account at existing interconnections in the state of Louisiana.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

15. United Gas Pipe Line Company

[Docket No. CP89–319–000]

December 8, 1988.

Take notice that on December 1, 1988 United Gas Pipeline Company (United), P.O. Box 1478, Houston, Texas 77251, filed in Docket No. CP89–319–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under the blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United proposes to transport natural gas for MidCon Marketing Corporation (MidCon). United explains that service commenced October 1, 1988, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–876. United explains that the peak day quantity would be 103,000 MMBtu, the average daily quantity would be 103,000 MMBtu, and that the annual quantity would be 37,595,000 MMBtu. United explains that it would receive natural gas for MidCon's account at an existing interconnection between United and Sea Robin Pipeline Company in Vermilion Parish, Louisiana. United states that it would redeliver the gas for MidCon's account at existing interconnections in the state of Louisiana.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

16. United Gas Pipe Line Company

[Docket No. CP89–320–000]

December 8, 1988.

Take notice that on December 1, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1479, filed in Docket No. CP89–320–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Chevron, U.S.A. Inc. (Chevron), a producer of natural gas, under United's blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United proposes to transport on an interruptible basis up to 38,110 MMBtu of natural gas on a peak day, 38,110 MMBtu on an average day and 13,910,150 MMBtu on an annual basis for Chevron. United states that it would perform the transportation service for Chevron under United's Rate Schedule ITS for a primary term of one year and continue on a monthly basis thereafter. It is explained that the service has commenced under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–735. United indicates that no new facilities would be necessary to provide the subject service.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

17. United Gas Pipe Line Company

[Docket No. CP89–321–000]

December 8, 1988.

Take notice that on December 1, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1479, filed in Docket No. CP89–321–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Arco Oil and Gas Company (Arco), a producer of natural gas, under United's blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United proposes to transport on an interruptible basis up to 15,540 MMBtu of natural gas on a peak day, 15,540 MMBtu on an average day and 12,310,560 MMBtu on an annual basis for Arco. United states that it would perform the transportation service for Arco under United's Rate Schedule ITS for a primary term of one year and continue on a monthly basis thereafter. It is explained that the service has commenced under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–854. United indicates that existing facilities would be used to provide the subject service.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

18. United Gas Pipe Line Company

[Docket No. CP89–322–000]

December 8, 1988.

Take notice that on December 1, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1479, filed in Docket No. CP89–322–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Citizen's Gas Supply Corporation (Citizen's), a marketer of natural gas, under United's blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United proposes to transport on an interruptible basis up to 102,588 MMBtu of natural gas on a peak day, 102,588 MMBtu on an average day and 12,310,560 MMBtu on an annual basis for Citizen's. United states that it would perform the transportation service for Citizen's under United's Rate Schedule ITS for a primary term of one month from the date of the first delivery and continue on a monthly basis thereafter. It is explained that the service has commenced under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–826. United indicates that no new facilities would be needed to provide the subject transportation service.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

19. United Gas Pipe Line Company

[Docket No. CP89–323–000]

December 8, 1988.

Take notice that on December 1, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1479, filed in Docket No. CP89–323–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Mobil Natural Gas, Inc. (Mobil), a marketer of natural gas, under United's blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as

more fully set forth in the request which is on file with the Commission and open to public inspection.

United proposes to transport on an interruptible basis up to 103,000 MMBtu of natural gas on a peak day, 103,000 MMBtu on an average day and 37,595,000 MMBtu on an annual basis for Mobil. United states that it would perform the transportation service for Mobil under United's Rate Schedule ITS for a primary term of one month from the date of first delivery and continue on a monthly basis thereafter. It is explained that the service has commenced under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–878. United indicates that no new facilities would be necessary to provide the subject service.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

20. Panhandle Eastern Pipe Line Company

[Docket No. CP89–308–000]

December 8, 1988.

Take notice that on November 30, 1988, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP89–308–000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to partially abandon sales service to Northern Indiana Public Service Company (NIPSCO), an existing jurisdictional sales customer under Panhandle's Rate Schedule G–1, all as more fully set forth in the application on file with the Commission and open to public inspection.

Panhandle states that the proposed abandonment would reduce the total annual quantity of gas delivered to NIPSCO from 34,684,000 Mcf to 24,278,800 Mcf. Panhandle states that the term of its existing agreement with NIPSCO expired October 31, 1988 and accordingly, Panhandle requests that authority for the partial abandonment to be effective November 1, 1988 for a term through October 31, 1990.

Panhandle states that the partial abandonment of sales service reflects the result of contract negotiation between Panhandle and NIPSCO that will allow NIPSCO to realign its sales service contract demand to match its actual requirements.

Comment date: December 29, 1988, in accordance with Standard Paragraph F at the end of the notice.

21. Williams Natural Gas Company

[Docket No. CP89–129–000]

December 8, 1988.

Take notice that on November 3, 1988, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP89–129–000 an application, as supplemented on December 2, 1988, pursuant to section 7(b) of the Natural Gas Act (NGA) for authorization to abandon Rate Schedule E for all future uses and to cancel such rate schedule, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

WNG states that on July 20, 1988, it accepted a Revised Stipulation and Agreement and a certificate issued in Docket No. CP86–631–001 authorizing open access transportation and the restructured sales services established under the Revised Stipulation and Agreement. It is stated that these new sales services include: (1) A partial requirements, contract demand-type service under a new sales Rate Schedule PR(A) and (2) a new full requirements service under a new sale Rate Schedule F. It is stated that these new sales service options all provide various opportunities for sales customers to convert sales service to firm and/or interruptible transportation and, in the case of the new Rate Schedule F service, to reduce sales service.

WNG also requests permission for and approval of the abandonment of all future uses of Rate Schedule E and the cancellation of such rate schedule. WNG states that such authorization would be appropriate because Drumright Gas Authority (Drumright) and Oklahoma Natural Gas Company (ONG), the only customers under Rate Schedule E, have terminated their service agreements and no longer require service under that rate schedule. It is stated that Drumright and ONG currently receive sales service under WNG's recently authorized Rate Schedules PR(A) and F, respectively. WNG states that Rate Schedule E service is not available to new customers.

Comment date: December 29, 1988, in accordance with Standard Paragraph F at the end of this notice.

22. Natural Gas Pipeline Company of America

[Docket No. CP89–328–000]

December 8, 1988.

Take notice that on December 2, 1988, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP89–328–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for American Central Gas Marketing Company (American Central), a marketer, under the blanket certificate issued in Docket No. CP86–582–000, pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Natural states that pursuant to a transportation agreement dated May 27, 1988, as amended, under its Rate Schedule ITS, it proposes to transport up to 300,000 MMBtu per day equivalent of natural gas (plus any additional volumes accepted pursuant to the overrun provisions of Natural's Rate Schedule ITS) for American Central from points of receipt listed in Exhibit "A" of the agreement to delivery points listed in Exhibit "B," which transportation service involves interconnections between Natural and various transporters. Natural states that it would receive the gas at various existing points on its system offshore Louisiana and offshore Texas, and in Louisiana, Texas, Oklahoma, New Mexico, Kansas, Wyoming, Iowa, and Illinois. Natural states that it would transport and redeliver the gas to various delivery points in Texas, Louisiana, Arkansas, Nebraska, Kansas, Missouri, Iowa, Indiana, Michigan, New York, California, and Illinois.

Natural advises that service under § 284.223(a) commenced October 4, 1988, as reported in an ST docket filing made concurrently with the instant request. Natural further advises that it would transport 75,000 MMBtu on an average day and 27,375,000 MMBtu annually.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

23. Southern Natural Gas Company

[Docket No. CP89–313–000]

December 8, 1988.

Take notice that on November 30, 1988, Southern Natural Gas Company (Southern) filed in Docket No. CP89–313–000 a request pursuant to the notice procedure in §§ 157.205 and 284.223(b) of the Commission's Regulations under the Natural Gas Act for authorization to transport gas on a firm basis for Tejas Power Corporation (Tejas) under Southern's blanket certificate issued in Docket No. CP88–316–000, under section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Southern states it would perform the proposed transportation service for Tejas, a marketer, pursuant to a service agreement dated September 7, 1988, under Southern's Rate Schedule FT. Southern also states that the service agreement is for a primary term through April 1, 1989, with successive terms of one month thereafter unless cancelled by either party. Southern further states it shall transport 8,000 Mcf of gas on a peak day and Tejas anticipates requesting the full transportation demand of 8,000 Mcf of gas on an average day, and accordingly, 2,920,000 Mcf of gas on an annual basis. Southern proposes to receive the gas at various receipt points in Offshore Texas for delivery to delivery points in Texas. The receipt and delivery points are listed in Exhibit C of the application as Exhibits A and B of the September 7, 1989, transportation agreement which provides for this service and is on file with the Commission and open to public inspection. Southern asserts that no new facilities are required to implement the proposed service.

Southern states that it commenced transportation of natural gas for Tejas on October 1, 1988, as reported in Docket No. ST89–228 pursuant to the 120-day self-implementing provision of § 284.223(a)(1) of the Commission's Regulations. Southern states that it proposes to continue this transportation service in accordance with the provisions of §§ 284.221 and 284.223(b) of the Commission's Regulations.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

24. Northern Natural Gas Company, Division of Enron Corp.

[Docket No. CP89–310–000]

December 8, 1988.

Take notice that on November 30, 1988, Northern Natural Gas Company, Division of Enron Corp., (Northern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77002, filed in Docket No. CP89–310–000, a request for authorization pursuant to §§ 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act and Northern's blanket certificate issued in Docket No. CP86–401–000 pursuant to section 7 of the Natural Gas Act, for authorization to install a small volume facility to provide natural gas service to Peoples Natural Gas (Peoples) for resale to Vess Oil Corp., an industrial user, in Rice County, Kansas, all as more fully set forth in the application on file with the Commission and open to public inspection.

Northern states that the estimated peak and annual volumes to be delivered at the subject delivery point, in the fifth year of service, is 6 Mcf and 2,136 Mcf, respectively. Northern also states that the total cost of the proposed facilities would be $1,690, which would be reimbursed by Peoples. It is further stated that the volumes delivered would be served from existing firm entitlements of Peoples.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

25. Tennessee Gas Pipeline Company

[Docket No. CP88–522–004]

December 8, 1988.

Take notice that on November 18, 1988, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 75252–2511, filed in Docket No. CP88–522–004, an amendment to its application in Docket No. CP88–522–000 for authorization to render standby service for its Rate Schedule CD, G and GS customers, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection. In its application in Docket No. CP88–522–000, Tennessee proposed to allow its Rate Schedule CD, G and GS customers that convert a portion of their firm sales entitlement to firm transportation service to elect standby service equivalent to the amount of service converted, not to exceed fifty percent of the lesser of the customer's original or reduced sales entitlements.

Tennessee states that by this amendment, Tennessee is revising the availability conditions of standby service to reflect the effect of the Commission's requirement in Tennessee Docket No. RP–88–228 that Tennessee develop Demand$_2$ Rates on the basis of its customers' nominations. Specifically, Tennessee indicates that standby service would be available to customers that convert a portion of their firm sales service entitlement to standby service, provided that the level of standby service for any customer would not exceed (i) on a daily basis, fifty percent of the customer's daily entitlement to sales service, and (ii) on a monthly basis, fifty percent of the customer's nominated D_2 quantities for the month.

Comment date: December 29, 1988, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[FR Doc. 88–28605 Filed 12–12–88; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP89-38-000]

U-T Offshore System; Proposed Changes in FERC Gas Tariff

December 7, 1988.

Take notice that on December 1, 1988, U-T Offshore System (U-TOS) tendered for filing Eleventh Revised Sheet No. 4 to its FERC Gas Tariff, Original volume No. 1. The proposed effective date of the enclosed Tariff Sheet is January 1, 1989. The rate changes proposed herein would increase annual revenues from jurisdictional transportation services by approximately $17,000 based on the 12-month period ending August 31, 1988, as adjusted, compared with the revenues generated through the presently effective rates.

U-TOS states that the principal reasons for the rate changes filed herein are as follows:

(a) Increased cost of capital which results in an overall rate of return of 13.51% which is required to afford U-TOS the opportunity to earn a fair and reasonable return,

(b) A reduction in rate base due to increase in reserve for depreciation, and

(c) A decrease in projected transportation quantities to a level equal to approximately 68% use of U-TOS' daily contract demand of 1,038,457 Mcf.

U-TOS states that it has served copies of this filing upon all of its shippers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and procedure (18 CFR 385.211, 214). All such motions or protests should be filed on or before December 14, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 88-28624 Filed 12-12-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP89-40-000]

Williams Natural Gas Co.; Proposed Changes in FERC Gas Tariff

December 8, 1988.

Take notice that Williams Natural Gas Company (WNG) on December 1, 1988, tendered for filing the following tariff sheets to its FERC Gas Tariff, Original Volume No. 1.

Fifth Revised Sheet No. 2
Original Sheet Nos. 6B-6D
First Revised Sheet No. 109
Original Sheets Nos. 110-111

The proposed effective date of these tariff sheets is December 2, 1988.

WNG states that this filing places tariff sheets into effect which establish the procedures pursuant to Order No. 500 through which WNG will recover from its customers the take-or-pay and contract reformation cost fixed charges and commodity surcharges which WNG's pipeline suppliers bill to WNG under § 2.104 of the Commission's General Policy and interpretations. In particular, this filing is being made pursuant to § 2.104(e) of the Commission's General Policy and Interpretations which permits downstream pipelines to flow through approved upstream pipeline take-or-pay and contract reformation costs to their customers on an "as billed" basis.

WNG states that copies of its filing were served on all jursidictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance iwth §§ 385.211, 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 16, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPP-180796; FRL-3490-6]

Receipt of Application for a Specific Exemption To Use Thiophanate-Methyl; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the Florida Department of Agriculture and Consumer Services (hereafter referred to as the "Applicant") for use of thiophanate-methyl (CAS 23564-05-8) to control white mold, *Sclerotinia sclerotiorum*, on 5,000 acres of potatoes in Florida. In accordance with 40 CFR 166.24, EPA is soliciting comment before making the decision whether or not to grant this specific exemption request.

DATE: Comments must be received on or before December 28, 1988.

ADDRESS: Three copies of written comments, bearing the identifying notation "OPP-180796," should be submitted by mail to:

Public Docket and Freedom of Information Section, Field Operations Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

In person, bring comments to: Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By Mail:

Gene Asbury, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

Office location and telephone number: Rm. 7168, Crystal Mall 2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-7890)

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue an emergency exemption to permit the use of the fungicide, thiophanate-methyl available as Topsin M 70% WP (EPA Registration No. 4581–322) and Topsin M 4.5 F1 (EPA Registration No. 4581–352) from Penwalt Corp., to control *Sclerotinia* infections on 5,000 acres of potatoes in Florida.

Information in accordance with 40 CFR Part 166 was submitted as part of this request. The Applicant indicates that prior to 1971, potato growers were using calcium cyanamide to control *Sclerotinia*, but this product is no longer available. According to the Applicant, without effective control, potato growers could experience 34 percent crop losses. With the use of Topsin M, growers expect their crop losses to be at most 5 percent. The potential dollar loss without thiophanate-methyl for the 1988–89 season is estimated to be approximately four million dollars.

Topsin M will be applied at a maximum rate of 1.4 pounds active ingredient per acre. Up to two applications may be made. A maximum of 10,000 pounds active ingredient will be needed to treat a maximum of 5,000 acres. Applications will be completed by March 31, 1989.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require that the Agency publish notice of receipt in the **Federal Register** and solicit public comment on an application for a specific exemption proposing use of a pesticide which contains an active ingredient which is or has been the subject of a Special Review and is intended for a use that could pose a risk similar to the risk posed by any use of the pesticide which is or has been the subject of the Special Review (40 CFR 166.24(a)(5)). A rebuttable presumption against registration (RPAR) for thiophanate-methyl was published December 7, 1977 (42 FR 61970). The risks considered in that document which could be similar to the risks posed by this proposed use are: Mutagenicity; and reduction to nontarget organisms. Thiophanate-methyl was removed from the special review process on October 20, 1982 (47 FR 46747) because it was determined that the potential risks were not unreasonable and were exceeded by the benefits associated with its use. Accordingly, interested persons may submit written views on this subject to the Program Management and Support Division at the address above.

The Agency, accordingly, will review and consider all comments received during the comment period.

Date: November 22, 1988.

Anne E. Lindsay,

Acting Director, Registration Division, Office of Pesticide Programs.

[FR Doc. 88–28647 Filed 12–12–88; 8:45 am]

BILLING CODE 6560–50–M

[OPP–180797; FRL–3490–7]

Receipt of Application for a Specific Exemption to Use Metalaxyl; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the California Department of Food and Agriculture (hereafter referred to as the "Applicant") for use of metalaxyl (CAS 57837–19–1) to control downy mildew, *Peronospora sparsa*, on 400 acres of caneberries in California. In accordance with 40 CFR 166.24, EPA is soliciting comment before making the decision whether or not to grant this specific exemption request.

DATE: Comments must be received on or before December 28, 1988.

ADDRESSES: Three copies of written comments, bearing the identifying notation "OPP–180797," should be submitted by mail to:

Public Docket and Freedom of Information Section, Field Operations Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday excluding legal holidays.

FOR FURTHER INFORMATION CONTACT:

By mail:

Gene Asbury, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716B, Crystal Mall 2, 1921 Jefferson Davis Highway, Arlington, VA, (703–557–7890).

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue an emergency exemption to permit the use of the fungicide, metalaxyl available as Ridomil 2E (EPA Registration No. 100–607) from Ciba Geigy Corporation, to control downy mildew on 400 acres of caneberries in California.

Information in accordance with 40 CFR Part 166 was submitted as part of this request. The Applicant indicates that this disease infects the plants during wet weather in the fall and overwinters in the roots. In the spring, the overwintering spores germinate and infect the growing canes and developing fruit. Warm, wet weather creates an ideal condition for the development and growth of this disease. According to the Applicant, there are no pesticides currently registered for the control of downy mildew on caneberries and without effective control, significant economic losses of thirty to fifty percent could result if mildew outbreaks occur this season. The potential dollar loss without metalaxyl for the 1988–89 season is estimated to be over one half of a million dollars.

Metalaxyl will be applied at a maximum rate of 0.25 pound active ingredient per linear feet of plant row or 1.38 pounds active ingredient per acre. Up to two applications may be made. A maximum of 1,104 pounds active ingredient may be needed to treat a maximum of 400 acres. Applications will be completed by April 30, 1989.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require that the Agency publish notice of receipt in the **Federal Register** and solicit public comment on an application for a specific exemption that has been requested or granted for that use in any three previous years and a complete application for registration of the use and/or a petition for a tolerance for residues in or on the commodity has not been submitted to the Agency. Use of metalaxyl in or on caneberries was denied in 1983 and 1984 for lack of an

adequate toxicological data base and was subsequently granted in both 1987 and 1988. Accordingly, interested persons may submit written views on this subject to the Program Management and Support Division at the address above.

The Agency, accordingly, will review and consider all comments received during the comment period.

Dated: November 22, 1988.

Anne E. Lindsay,

Acting Director, Registration Division, Office of Pesticide Programs.

[FIFRA Docket No. 630, et al.; FRL-3490-4]

Pesticide Products Containing Tributyltin Compounds

AGENCY: Environmental Protection Agency.

ACTION: Notice of objections and request for hearing.

The U.S. Environmental Protection Agency (EPA) announced its final decision to cancel registrations and deny applications of all pesticide products containing tributyltin (TBT) compounds as active ingredients for use as antifoulants unless registrants modified certain terms and conditions of their registrations. (53 FR 39022, October 4, 1988.) Concerning EPA's decision, notice is hereby given, pursuant to the appropriate section of the Rules of Practice, 40 CFR 164.8, promulgated under the Federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. 136, *et seq.*, that objections and requests for hearings were filed by some registrants regarding certain of their enumerated and registered products containing TBT as an active ingredient.

For information concerning the issues involved and other details of this proceeding, interested persons are referred to the docket in this matter on file with the Hearing Clerk, Environmental Protection Agency, (Mail Code A-110) Room 3708, Waterside Mall, 401 M Street, SW., Washington, DC 20460. (202-382-4865).

Dated: December 7, 1988.

Frank W. Vanderheyden,

Administrative Law Judge.

BILLING CODE 6560-50-M

[FRL-3490-1]

Risk Assessment Forum Special Report on Ingested Inorganic Arsenic: Skin Cancer; Nutritional Essentiality

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Notice of availability of Risk Assessment Forum Report.

SUMMARY: This notice announces the availability of an EPA Risk Assessment Forum report entitled "Special Report on Ingested Inorganic Arsenic: Skin Cancer; Nutritional Essentiality," EPA/625/3-87/013. Developed as guidance for EPA scientists, this report analyzes several issues relating to skin cancer risk from exposure to ingested inorganic arsenic and addresses the possible role of arsenic in human nutrition.

ADDRESSES: To obtain a single copy of the document, interested parties should contact the Office of Research and Development Publication Center, CERI, U.S. Environmental Protection Agency, 26 West Martin Luther King Drive, Cincinnati, Ohio 45268, Tel: (513) 569-7562 or FTS 684-7562. Please provide your name, mailing address, and the EPA document number when requesting a copy of the document.

FOR FURTHER INFORMATION CONTACT: Linda C. Tuxen, Technical Liaison, Risk Assessment Forum, Tel: (202) 475-6743 or FTS 475-6743.

SUPPLEMENTARY INFORMATION: A Technical Panel of EPA scientists was convened by EPA's Risk Assessment Forum to study three major issues regarding ingestion exposure to arsenic: The validity of the Tseng et al. (1968) study (Prevalence of Skin Cancer in an Endemic Area of Chronic Arsenicism in Taiwan. J. Natl. Cancer Inst. 40(3):453-463) on ingested inorganic arsenic in relation to non-melanoma skin cancer in a Taiwanese population and the applicability of the study to the U.S. population; interpretation and use of arsenic-associated skin lesions reported by Tseng et al. for cancer risk assessment; and the possible role of arsenic in human nutrition. Also examined were other issues relating to hazard identification and dose-response assessment for arsenic-induced skin cancer, including the pathology of arsenic-associated skin lesions, the gene-level effects of arsenic and the possibility of a threshold mechanism. This report summarizes the Technical Panel's review and analysis of relevant data on these issues.

The Technical Panel concludes in the Forum report that the Tseng et al. study demonstrates a relationship between inorganic arsenic ingestion and elevated skin cancer risk in the study population. The report analyzes dose-response data from this study, as well as independent studies from other countries that also show an association between arsenic ingestion and elevated skin cancer.

The Forum report discusses a possible role for arsenic in human nutrition. The Technical Panel reviewed several studies on arsenic as a possible essential element in the diet to assess the overall impact of arsenic exposure on human health. The report concludes that while arsenic is a plausible nutritional requirement in animals and a possible requirement in humans, additional studies are needed to determine the nature of any human effects, the levels of arsenic that would be essential in the human diet, and the adequacy of current dietary levels.

EPA's Risk Assessment Council reviewed and concurred with the Forum's analysis. In detailed comments reprinted in the Forum report, the Council emphasized that the uncertainties and assumptions described in the report should be weighed in Agency risk assessments for this element.

Date: December 6, 1988.

Erich Bretthauer,

Acting Assistant Administrator for Research and Development.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Agency Report Forms Under OMB Review

AGENCY: Equal Employment Opportunity Commission.

ACTION: Request for comments.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed information collection requests to OMB for review and approval, and to publish a notice in the Federal Register notifying the public that the agency has made such a submission. The proposed report form under review is listed below.

DATE: Comments must be received on or before January 27, 1989. If you anticipate commenting on a report form but find that time to prepare will prevent you from submitting comments promptly, you should advise the OMB Reviewer and Agency Clearance Officer of your intent as early as possible.

ADDRESS: Copies of the proposed report form, the request for clearance (Standard Form 83), supporting statement, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer. Comments on the item listed should be submitted to the Agency Clearance Officer and the OMB Reviewer.

FOR FURTHER INFORMATION CONTACT:

EEOC Agency Clearance Officer: Margaret P. Ulmer, Office of Management, Room 386, 2401 E Street NW., Washington, DC 20507; Telephone (202) 634–1932.

OMB Reviewer: Joseph Lackey, Human Resources and Housing Branch, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503; Telephone (202) 395–7316.

Type of Request: Extension (No change).

Title: Employer Information Report EEO–1.

Form Number: Standard Form 100.

Frequency of Report: Annually.

Type of Respondent: Private employers with 100 or more employees and certain Federal government contractors with 50 or more employees.

Standard Industrial Classification (SIC) Code: Multiple.

Description of Affected Public: IND/HHID and Farms and Businesses/INST.

Responses: 126,700.

Reporting Hours: 558,500.

Federal Cost: $610,000.

Applicable under section 3504(h) of Pub. L. 96–511: Not applicable.

Number of Forms: 1.

Abstract-Needs/Users: EEO–1 data are used by EEOC to investigate charges of discrimination against employers in private industry. Data are shared with several Federal government agencies, particularly the Office of Federal Contract Compliance Programs (OFCCP), U.S. Department of Labor. Under section 709(d) of Title VII of the Civil Rights Act of 1964, as amended, EEO–1 data are also shared with approximately 127 State and local FEPC agencies.

For the Commission.

John Seal,

Management Director, Equal Employment Opportunity Commission.

[FR Doc. 88–28539 Filed 12–12–88; 8:45 am]

BILLING CODE 6570–06–M

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirements Submitted to Office of Management and Budget for Review

December 1, 1988.

The Federal Communications Commission has submitted the following information collection requirements to the Office of Management and Budget for review and clearance under the Paperwork Reduction Act, as amended (44 U.S.C. 3501 *et seq.*).

Copies of the submissions may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037. For further information on these submissions contact Jerry Cowden, Federal Communications Commission, (202) 632–7513. Persons wishing to comment on these information collections should contact Eyvette Flynn, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395–3785.

OMB Number: 3060–0308.

Title: Section 90.505, Developmental operation (Showing required).

Action: Extension.

Respondents: State or local governments, businesses (including small businesses), and non-profit institutions.

Frequency of Response: On occasion.

Estimated Annual Burden: 100 responses; 200 hours; 2 hours each.

Needs and Uses: This rule specifies additional information that must be submitted by applicants requesting a developmental authorization. This information is used by the Commission to evaluate the use that will be made of the spectrum and the potential for interference.

OMB Number: 3060–0295.

Title: Sections 90.607 (b)(1) and (c)(1), Supplemental information to be furnished by applicants for facilities under this subpart.

Action: Extension.

Respondents: State or local governments, businesses (including small businesses), and non-profit institutions.

Frequency of Response: On occasion.

Estimated Annual Burden: 2,028 responses; 507 hours; 15 minutes each.

Needs and Uses: This rule requires certain applicants requesting 800 MHz facilities to furnish a list of any other licensed facilities they hold within 40 miles of the base station applied for. This information is used to determine if an applicant's proposed system is necessary in light of communications facilities it already owns, and helps the Commission to distribute limited spectrum equitably.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

BILLING CODE 6712–01–M

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice that the following agreement(s) has been filed with the Commission pursuant to section 15 of the Shipping Act, 1916, and section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in §§ 560.7 and/or 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No.: 224–200192.

Title: Port of Houston Authority Terminal Agreement (Port).

Parties: Port of Houston Authority, Shippers Stevedoring Company (SSC).

Filing Party: Algenita Scott Davis, Counsel, Port of Houston Authority, P.O. Box 2562, Houston, TX 77252–2562.

Synopsis: The agreement provides that SSC will perform or have performed public marine terminal services, including freight handling and cargo loading/unloading at the Port's wharves and transit shed Number 31. The term of the agreement expires December 31, 1990.

Agreement No.: 224–200191.

Title: Port of Houston Authority Terminal Agreement.

Parties: Port of Houston Authority of Harris County, Texas (Port) and Young & Company.

Filing Party: Algenita Scott Davis, Counsel, Port of Houston Authority, P.O. Box 2562, Houston, TX 77252–2562.

Synopsis: The agreement provides that Young & Company will perform or have performed freight handling services at the Port's Wharves and Transit Sheds Numbers 28 and 29, including loading and unloading cargo from land carriers at the facility subject to the charges, rates, rules and regulations in the Port's Tariff No. 8. The term of the agreement expires December 31, 1990.

By Order of the Federal Maritime Commission.

Dated: December 8, 1988.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Comerica Inc., et al.; Formations of, Acquisitions by, and Mergers of Bank Holding Companies; and Acquisitions of Nonbanking Companies

The companies listed in this notice have applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed companies have also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The applications are available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competitions, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 30, 1988.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Comerica Incorporated,* Detroit, Michigan; to acquire the successor by merger of Alliance Financial Corporation, Dearborn, Michigan, and thereby indirectly acquire Dearborn Bank and Trust Company, Dearborn, Michigan, and Huron Community Bank, East Tawas, Michigan. In connection with this application, AFC Acquisition Corporation, Detroit, Michigan, has applied to become a bank holding company by merging with Alliance Financial Corporation.

In addition, Comerica and AFC Acquisition Corporation have applied to acquire Alliance Data Services, Inc., Dearborn, Michigan, and thereby engage in providing data processing services to Dearborn Bank and Trust Company, Dearborn, Michigan and Huron Community Bank, East Tawas, Michigan, and 5 other banks located throughout the State of Michigan, pursuant to § 225.25(b)(7) of the Board's Regulation Y. These activities will be conducted in the State of Michigan.

B. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Norwest Corporation,* Minneapolis, Minnesota; to merge with The Bank Group, Inc., Wayzata, Minnesota, and thereby indirectly acquire The Bank Wayzata, Wayzata, Minnesota; The Bank North, Crystal, Minnesota; and The Bank Excelsior, Excelsior, Minnesota.

In connection with this application, Applicant has also applied to acquire Wayzata Mortgage Company, Plymouth, Minnesota, and thereby engage in making, acquiring, and servicing loans or other extensions of credit as would be made by a mortgage company pursuant to § 225.25(b)(1) of the Board's Regulation Y; and The I.M.F. Group, Inc., Wayzata, Minnesota, and thereby engage in general insurance agency activities pursuant to section 4(c)(8)(G) of the Bank Holding Company Act of 1956, as amended.

Board of Governors of the Federal Reserve System, December 7, 1988.

James McAfee,

Associate Secretary of the Board.

Johnson Heritage Bancorp, Ltd., et al.; Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the office of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than Janaury 4, 1989.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Johnston Heritage Bancorp, Ltd.,* Racine, Wisconsin; to acquire 100 percent of the voting shares of Rock County Bancorp, Janesville, Wisconsin, and thereby indirectly acquire Rock County National Bank of Janesville, Janesville, Wisconsin, and Rock County Savings and Trust Company, Janesville, Wisconsin. In connection with this application, J.H. Acquisition Corp., Racine, Wisconsin, has applied to become a bank holding company by acquiring 100 percent of the voting

shares of Rock County Bancorp, Janesville, Wisconsin.

Board of Governors of the Federal Reserve System, December 7, 1988.

Change in Bank Control; Acquisition of Shares of Banks or Bank Holding Companies; Frank Kiang, et al.

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than December 27, 1988.

A. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Frank or Rosaline Kiang,* Oakland, California; to acquire 24.9 percent of the voting shares of Met Financial Corporation, Oakland, California, and thereby indirectly acquire Metropolitan National Bank, Oakland, California.

Board of Governors of the Federal Reserve System, December 7, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Societe Generale; Application to Deal in Foreign Currency Options as a Specialist

Societe Generale, Paris, France ("Applicant"), has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) ("BHC Act") and § 225.23(a)(3) of the Board's Regulation Y (12 CFR 225.23(a)(3)), for permission to engage *de novo* through Societe Generale Options-North America, Inc., Philadelphia, Pennsylvania ("Company"), in the activity of dealing as the specialist in Deutsche mark options and Japanese yen options traded on the Philadelphia Stock Exchange during the Exchange's day trading session.

Applicant states that the proposed activities consist of three basic functions:

(1) To use reasonable efforts to make a "fair and orderly" market in Deutsche mark and Japanese yen option and to engage, to a reasonable degree under existing circumstances, in dealings for its own account when a lack of price continuity or temporary supply/demand disparities exist;

(2) To collate and publish the best bids/offers for Deutsche mark and Japanese yen options; and

(3) To act as agent for orders in Deutsche mark and Japanese yen options, in particular for "limit orders" that are left on the specialists' "books."

The Board has not previously determined that the proposed activities are permissible under section 4(c)(8) of the Bank Holding Company Act. Section 4(c)(8) provides that a bank holding company may, with Board approval, engage in any activity "which the Board after due notice and opportunity for hearing has determined (by order or regulation) to be so closely related to banking or managing or controlling banks as to be a proper incident thereto." Applicant contends that the proposed activity is functionally equivalent to foreign exchange activities in which banks widely engage. Applicant also states that several banks have been permitted to engage in the proposed activity of acting as specialist in foreign currency options on the Philadelphia Stock Exchange.

In determining whether an activity is a proper incident to banking, the Board must consider whether the proposal may "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Applicant contends that the proposed activity would result in public benefits by stimulating the development and liquidity of the options market which would aid banks generally in reducing their foreign exchange risk exposure. Applicant argues that the proposed activity would not result in adverse effects because they are not predominantly speculative. Rather, Company will generate revenues from its bid/ask spreads, on a carefully hedged basis, in a closely regulated environment.

In 1985, the Board denied an application by Compagnie Financiere de Suez and Banque Indosuez to act as a specialist in French franc options on the Philadelphia Stock Exchange due to the potential adverse effects that might stem from the proposal. 72 Federal Reserve Bulletin 141 (1968). Applicant contends that its proposal is distinguishable from the above case in light of its experience in the proposed activities gained in trading on overseas markets as well as changes in the domestic foreign currency options market since the Board's decision.

Any views or requests for hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than January 6, 1989. Any request for a hearing must, as required by § 262.3(e) of the Board's Rules of Procedure (12 CFR § 262.3(e)), be accompanied by a statement in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of New York.

Board of Governors of the Federal Reserve System, December 7, 1988.

James McAfee,

Associate Secretary of the Board.

United Banks of Colorado, Inc.; Applications to Engage de novo in Permissible Nonbanking Activities; Correction

This notice corrects a previous **Federal Register** notice (FR Doc. 88-25150) published at page 44123 of the issue for Tuesday, November 1, 1988.

Under the Federal Reserve Bank of Kansas City, the entry for United Banks of Colorado, Inc. is amended to read as follows:

1. United Banks of Colorado, Inc., Denver, Colorado; to engage de novo in data processing activities and employee benefits consulting services through a partnership joint venture between its 4(c)(8)(G) insurance subsidiary, United Banks Insurance Services, Inc., and an unaffiliated company, Thompson and Company Insurance Services, Inc., Pasadena, California, pursuant, respectively, to 12 CFR 225.25 (b)(7) and previous orders of the Board. *Centerre Bancorporation,* 73 Federal Reserve Bulletin 365 (1987); *Norstar Bancorp, Inc.,* 72 Federal Reserve Bulletin 729

(1986); *BankVermont Corporation*, 72 Federal Reserve Bulletin 377 (1986); *Norstar Bancorp, Inc.*, 71 Federal Reserve Bulletin 656 (1985). The joint venture will not sell insurance as part of its employee benefits consulting service.

Comments on this application must be received by December 27, 1988.

Board of Governors of the Federal Reserve System, December 7, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Winter-Park Bancshares, Inc., et al.; Applications to Engage de novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 4, 1989.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Winter-Park Bancshares, Inc.*, Exeland, Wisconsin; to engage *de novo* through its subsidiary, Winter Insurance Agency, Winter, Wisconsin, in insurance activities in a town of less than 5,000 pursuant to § 225.25(b)(8)(iii) of the Board's Regulation Y. These activities will be conducted in Winter, Wisconsin; Park Falls, Wisconsin; Gilman, Wisconsin; and Owen, Wisconsin.

B. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *The Mitsubishi Bank, Limited*, Tokyo, Japan; to engage *de novo* through its subsidiary, MBL Futures, Inc., Chicago, Illinois, in acting as a futures commission merchant for nonaffiliated persons in the execution and clearance on major commodity exchanges of futures contracts and options on futures contracts for bullion, foreign exchange, government securities, and certificates of deposit and other money market instruments that a bank may buy or sell in the cash market for its own account pursuant to § 225.25(b)(18) of the Board's Regulaton Y.

Board of Governors of the Federal Reserve System, December 7, 1988.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Statements of General Policy or Interpretation Staff Commentary On the Fair Debt Collection Practices Act

AGENCY: Federal Trade Commission.

ACTION: Publication of staff commentary.

SUMMARY: The Commission staff is issuing its Commentary on the Fair Debt Collection Practices Act that will supersede all previously issued staff interpretations of the Act. The purpose of the Commentary is to clarify and codify these interpretations.

DATE: December 13, 1988.

ADDRESS: Federal Trade Commission, Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Clarke W. Brinckerhoff, Program Advisor, John F. LeFevre, Program Advisor, Division of Credit Practices, Federal Trade Commission, Washington, DC 20580, (202) 326-3208 or (202) 326-3209.

SUPPLEMENTARY INFORMATION: On March 7, 1986, the staff of the Federal Trade Commission ("staff" or "FTC staff") published its proposed Staff Commentary on the Fair Debt Collection Practices Act ("FDCPA") in the **Federal Register** (51 FR 8019). That notice set forth the text of the proposed Commentary, along with (1) the staff's rationale for issuing the Commentary and (2) a list of the principal areas where it varied in appreciable measure from the informal opinions previously offered by the FTC staff. That notice also briefly described the FDCPA, the Commission's role in enforcing the statute, and the FTC's staff's interest in improving the present method of providing advice by making informal staff letters available to the public. It explained that the staff viewed the publication of the Commentary as an opportunity to provide a more comprehensive vehicle for providing staff opinions concerning the FDCPA, and to revise previous advice that the staff had come to believe was inconsistent or inaccurate. Both the notice dated March 7, 1986, and the introduction to the proposed Commentary specified that it does not have the force of a trade regulation rule or formal agency action, and that it is not binding on the Commission or the public.

The notice in the **Federal Register** dated March 7, 1986, stated that the FTC staff would accept public comments on the proposed Commentary to aid in preparation of the final product. Three trade associations, six corporations, the consumer protection division of the offices of three state Attorneys General, one state regulatory agency, one national consumer organization, two local consumer groups, and two law firms responded to this invitation. Although the notice stated the FTC staff was requesting comments until May 6, 1986, all comments were taken into account in preparing the Commentary, even those received after that date.

On July 9, 1986, four months after publication of the proposed Commentary, the President signed into law a bill (Pub. L. 99-3610 repealing former section 803(6)(F), which had exempted "any attorney-at-law collecting a debt as an attorney on behalf of and in the name of a client." The FTC staff has responded to a large number of inquiries from attorneys seeking its views on how the FDCPA applies to their practices. Therefore, the staff has added comments in appropriate locations to reflect the advice it has provided to attorneys on these issues.

This notice (1) summarizes comments received from the public in response to the FTC staff's 1986 publication of the Fair Debt Collection Practices Act Commentary in "proposed" form, (2) highlights the major areas where the staff revised the Commentary based on those comments or refused to do so, and (3) outlines the major issues added to the Commentary, reflecting written advice which the staff has provided to attorneys following repeal of the

"attorney-at-law collecting a debt" exemption in July 1986.

In this notice, the word "comment" refers to an opinion set forth in the Commentary by the staff, "public commenter" refers to a party that submitted views on the proposed Commentary following its publication in the **Federal Register**, and "public comments" refers to those views.

Principal Revisions To Commentary Based on Public Comments

Generally, the FTC staff found the public comments helpful in preparing the final version of the Commentary, although not all the proposals were adopted. Most of the public comments were aimed at clarifying the staff's intent. The redraft adopted these suggestions where it appeared that they resulted in an appreciable improvement. The overwhelming majority of the revisions the FTC staff made in the Commentary involved only minor changes (adding a word or parenthetical phrase or making some minor editorial change), and were designed to clarify points or to avoid possible unintended inferences. However, besides the addition of comments relating to attorney debt collectors, there were some changes of a substantive nature that were made based on public comments. This section highlights the most significant of the clarifications and revisions that were made based on public comments.

1. Location information (section 804 (1,5))

The FTC staff has made adjustments to two comments to acknowledge that a debt collector who is seeking location information by mail may identify his employer when expressly asked to do so. The staff added parenthetical references to comment #4 to section 804, and to comment #4 to section 807(14), which discusses section 804(1) and (5) under the heading "relation to other sections."

One public commenter pounted out that if the person from whom the locaton information is sought replies by expressly requesting the name of the employer of the individual debt collector who sent the letter,[1] sections 804(1) and 804(5) may appear to place conflicting obligations on the debt collection firm. On the one hand, section 804(1) requires a debt collector employee, in communications seeking location information, to "identify his employer" if "expressly requested." Yet section 804(5) generally prohibits a debt collector from using "any language or symbol on any envelope or in the contents of any communication effected by the mails or telegram that indicates that the debt collector is in the debt collection business or that the communication relates to the collection of a debt."

The FTC staff believes a proper interpretation of the FDCPA is to read section 804(1) as controlling this situation, because it specifically addresses the situation in which an individual expressly requests the name of the debt collection firm. In that case, we believe that the debt collection firm must reveal its identity in order to acquire location information. The comments bearing on this issue have therefore been changed to reflect that position.

2. Contact limited to consumer's attorney (section 805(a))

Public commenters argued forcefully that comment #3, stating that a debt collector could not communicate with a consumer who stated that an attorney would represent him with respect to all *future* debts, would place an unreasonable burden on the debt collector. They reported that the standard operating procedure for many debt collectors is to close the consumer's file once a debt is collected or efforts to collect it cease. Should a second debt from the same consumer be assigned to the debt collector, therefore, the collector might be unaware of the previous file on that debtor and would not know whether the consumer was represented by an attorney with respect to all future debts. These commenters contend that the only way a debt collector could comply with our proposed interpretation would be to check every new debtor file against the closed files to determine whether (1) the collector had ever previously contacted that debtor, (2) the debtor had previously been represented by an attorney, and (2) the debtor had given the collector a blanket notice of legal representation. They suggested instead that, when contacted about a subsequent debt, the consumer should simply inform the debt collector that he is still represented by an attorney and that the debt collector should contact the attorney.

The FTC staff now believes that the portion of comment #3 in the proposed Commentary regarding future representation is simply not supported by the statute, or envisioned by its legislative history. Furthermore, it could easily be the case that the attorney in fact no longer represents the consumer. Accordingly, the staff has modified the second paragraph of comment #3 to section 805(a) to replace the broad reference to "all current and future debts" with the more appropriate "other debts."

3. Consumer consent to third party contacts (section 805(b))

The statement in comment #1 that consumers consent to third party contacts "may be presumed from circumstances" has been deleted. One public commenter expressed concern that this formulation might open the door to overreaching by debt collectors. The deleted phrase was not necessary to the point involved—that consent need not necessarily be in writing—which is better made by providing a clear example of such consent.

4. Lists of debtors (Section 806(3))

One public commenter noted that this section of the proposed Commentary did not completely reflect the FDCPA's reference to sections of the Fair Credit Reporting Act. The description has been amended and a comment has been added to reflect that relationship, in accord with a prior staff opinion on the section and a Commission interpretation on the FCRA.

5. Statement by debt collector of possible action (Section 807(5))

A revision was made to correct the Commentary's inadvertent reference to the *creditor*, rather than to the *debt collector*, in comment #3 to this section. Comment #3 concerns statements by the debt collector about action that is unlikely to be taken in a particular case. Obviously, as several public commenters pointed out, the creditor's knowledge that action is unlikely is not automatically imputed to the debt collector.

6. Documents deceptive as to authorship (Section 807(9))

An appropriate clause has been added to the description and to comment #1, to give a more complete discussion of this section than in the proposed Commentary, which focused only on documents that fraudulently appear to be government documents. One public commenter correctly pointed out that the statute covers a much wider range of deceptive practices as to the source of the document.

7. Letters marked "personal" or "confidential" (Section 808(8))

Comment #3 to this section has been expanded to assert that use of the term "Personal" or "Confidential", as well as

[1] Such a communication would be signed by the individual debt collector, without indicating that the letter is from a debt collection firm.

the word "Telegram" or the like, does not violate this section.

One public commenter stated that debt collectors use designations of this sort to protect the consumer's privacy by attempting to ensure that the envelope is not opened by unauthorized persons, and argued that such terms are essentially part of the letter's address.

The FTC staff agrees that the proposed change is logical. The staff has already recognized that a rigid, literal approach to section 808(8) would lead to absurd results (i.e., taken literally, it would prohibit showing any part of the consumer's address on the envelope). The legislative purpose was to prohibit a debt collector from using symbols or language on envelopes that would reveal that the contents pertain to debt collection—not to totally bar the use of harmless words or symbols on an envelope. Indeed, it was for this reason that comment #3 to this section of the proposed Commentary (in accord with prior informal staff advice) explicitly recognized that the term "Telegram" or similar designation on an envelope does not violate this section.

8. Waiver of venue provision (Section 811)

Numerous public commenters objected to comment #1 to this section, indicating a fear that the staff's interpretation would lead to a flood of waiver provisions hidden in the fine print of consumer credit contracts. Although the FTC staff believes that these parties misread the comment, which clearly stated that any waiver "must be provided to the debt collector," the comment has been expanded to be even more explicit on the point.

Significant Public Comments Not Adopted

There were several areas in which public commenters suggested changes in the Commentary that were not adopted. This section discusses the most significant of those proposals, and sets forth the staff's principal reasons for maintaining its position.

1. Contacts in which the collector does not mention the debt (Sections 803(2), 805(a), 805(c))

Several public commenters contended that the FTC staff's treatment of certain contacts consumers as violations of the FDCPA was incorrect because the contacts did not involve a "communication" under the definition provided in section 803(2), which refers to "conveying of information regarding a debt directly or indirectly to any person." These commenters argued that contacts that do not explicitly refer to the debt are not "communications" and, hence, do not violate any provision where that term is used.

The FTC staff continues to believe that some contacts with consumers can violate section 805(a) or section 805(c) because they at least "indirectly" refer to the debt, even if the obligation isn't specifically mentioned. For example, there is no doubt that a debt collector who has previously contacted a consumer about a debt violates section 805(a) if he calls the consumer at 3 AM and says only only "Hi, this is Joe, I haven't forgotten you"—the words may not refer to the debt, but the consumer will know from previous collection efforts by "Joe" what the call is about. The words "or indirectly" in the definition make it clear that Congress intended a common sense approach to this situation. Furthermore, the word "communication" (or variations thereof) is used six times in section 804, which authorizes the seeking of location information from third parties with the general requirement that the debt will *not* be disclosed to such parties, demonstrating that this term was not intended to be limited throughout the statute to acts that specifically refer to the debt, regardless of the definition set forth in section 803(2).

2. Definition of "location information" (section 803(7))

Public commenters made varying suggestions that would effectively amend the section's definition of "location information"—i.e., "a consumer's place of abode and his telephone number at such place, or his place of employment." One public commenter expressed the view that a debt collector was somehow limited by this language to obtaining only one of the three enumerated items (home address or home phone or work address), while others suggested that we interpret the definition to include a fourth item (work phone). Because no public commenter provided a convincing rationale for its position, and because the FTC staff believes that the definition is clear, both suggestions were declined.

3. Use of "copy of a judgment" in notice (section 807(2)(A))

Some public commenters criticized the staff's statement in comment #3 to section 807(2) that the validation notice provided by a debt collector to comply with section 809(a)(4) may use the phrase "copy of a judgment" even where no judgment exists. Staff had previously advised in informal opinion letters that the use of those words violated section 807(2)(A) because they suggested that a judgment existed when it did not. Because the practical effect of these interpretations was to make verbatim use of the statutory language of section 809(a)(4)) of violation of section 807(2)(A), they were rejected by the leading court decision [2] and by the staff in the proposed Commentary. The FTC staff continues to believe its reasons for revising prior staff opinions (discussed in item 5 of the notice in the Federal Register dated March 7, 1986) are well-founded, and thus it has adhered to that position.

One public commenter suggested that we might also permit the phrase "copy of *the* judgment" as well. Because the phrase used in section 809(a)(4) is "copy of *a* judgment" (emphasis added) and this language led to the staff's current interpretation, the Commentary has not been revised on this point.

4. False allegations of fraud (section 807(7))

Some public commenters contended that the language of this section, which outlaws the "false representation or implication that the consumer committed any crime or other conduct *in order to disgrace the consumer*" (emphasis added) demonstrates that specific intent is essential to a violation. The FTC staff agrees that some element of intent is involved, but believes that an intent to disgrace can be inferred from the nature of the acts the consumer is being accused of—fraud (comment 1) or crime (comment 2). Therefore, the comments on this section have not been changed.

5. Disclosure of debt collection purpose (section 807(11))

Several public commenters questioned the staff's refusal to construe section 807(11) as requiring debt collectors to disclose the purpose of each and every written and oral contact, pointing out that court decisions have gone both ways on the issue. The staff's position, reflected in the Commission's Sixth and Seventh Annual Reports to Congress—that such disclosures need not be made where they are obvious or have already been made—has not changed, and the comments provide no new argument for revising that view.

Other public commenters asked the staff to retract the comment stating that a debt collector may not send a note saying only "please call me right away" to a consumer whom the collector has not previously contacted. They argued that such a note could not violate this

[2] *Blackwell v. Professional Business Services of Georgia, Inc.*, 526 F. Supp. 535, 538–39 (N.D. Ga. 1981).

section because it made no reference to the debt and therefore was not a "communication," as defined in section 803(2). Because the staff believes that (1) the intent of section 807(11) was to require that debt collectors' purposes be known to parties they contact, and (2) the use of the term "communication" in other sections of the FDCPA shows that its construction is not always limited to the definition set forth in section 803(2), this comment was retained.[3]

6. Elements of unfairness (section 808)

Some public commenters criticized comment #2, which concerns general violations of this section of the FDCPA, for construing the term "unfair" in the same way as the Commission has construed it under section 5 of the FTC Act. They argued that the comment would, in effect, repeal some of the subsections of section 808 because the proscribed conduct would not cause the type of injury required, or would not be considered unfair based on a cost/benefit analysis. Because the location of the comment—under section 808 *generally*, as opposed to any of its subsections—makes it clear that the staff did not intend to negate any of the eight types of conduct specified by Congress to be a violation of this provision in subsections (1) through (8), the staff retained this comment.

Other public commenters asked that comment #2 be expanded to state that section 808 does not cover inadvertent acts or any act that was reasonably calculated to collect the debt. Because this comment was meant simply to reflect the FTC staff's view that the Commission's approach to "unfair practices" (as reflected in its treatment of that concept in section 5 of the FTC Act) is applicable in analyzing general violations of section 808, comment #2 has not been substantially revised.

7. Details of validation notices (section 809(a))

Some public commenters objected to the staff's view that section 809(a) imposes no requirements as to form, sequence, location, or type size of the notice (comment 3); to our reasons for reversing prior informal opinions to the contrary (item 10 in the March 7, 1986 notice in the **Federal Register**); and to our view that the notice may be provided orally (comment 5). However, the public commenters provided no new analysis to change the staff's reading of the section. Therefore, the Commentary has not been changed on this point.

[3] See discussion of FDCPA section 804 in item 1 of this section of this notice.

8. Proper forum for suit on an oral contract (section 811(a)(2))

One public commenter suggested deletion of comment 4 to section 811. Section 811(a)(2) clearly states that there are only two districts where suit may be brought by a debt collector on a debt—where the consumer "signed the contract sued upon" and where the consumer "resides at the commencement of the action." The staff decided to retain the comment, which simply notes the obvious fact that if there is only an oral agreement (which by definition can not be "signed"), suit may only be brought where the consumer resides.

9. Miscellaneous requests for added comments.

Some public commentors made a number of suggestions that the FTC staff establish *new* principles in the Commentary.[4] Although not all of the proposals were without merit, the staff believes it is unwise to add major new sections to the final version of the Commentary to address issues that have never been the subject of staff correspondence.

New Comments Based on Recent Staff Letters To Attorneys

The staff has added comments to reflect the large volume of written advice it has provided to attorneys following repeal of the "attorney-at-law" exemption in July 1986.[5] This section synthesizes the conclusions reached in the most significant additions made to the Commentary based on this recent correspondence.

1. Coverage (Sections 803(2, 5, 6), 811)

Attorneys or law firms that engage in traditional debt collection activities (sending dunning letters, making collection calls to consumers) are covered by the FDCPA, but those whose practice is limited to legal activities are not covered.[6] Similarly, filing or service of a complaint or other legal paper (or transmission of a notice that is a legal prerequisite to enforcement of a debt) is not a "communication" covered by the FDCPA, but traditional collection efforts are covered.[7]

A student loan is a "debt" covered by the FDCPA;[8] however, alimony, tort claims, and non-pecuniary obligations are not covered.[9]

A salaried attorney who collects debts on behalf of, and in the name of, his creditor employer,[10] and a state educational agency that collects student loans,[11] are exempt from coverage by the FDCPA.

Debt collectors (including attorney debt collectors) are subject to the venue limitations of the FDCPA.[12]

2. Communications by debt collectors (sections 805(b), 806(3–4))

An attorney debt collector, who represents either (1) a creditor or (2) a debt collector that previously tried to collect an account, may report his collection efforts to the debt collector.[13] An attorney may communicate with a witness in a lawsuit that has been filed.[14]

A debt collector may provide a list of consumers, against whom judgments have been entered, to an investigator in order to locate such individuals.[15] A debt collector may place a public notice required by law as a prerequisite to enforcing the debt.[16]

3. Dispute and verification (section 809)

An attorney debt collector must provide the required validation notice, even if a previous debt collector (or the creditor) has given such notice.[17] A debt collector does not comply with the obligation to verify the debt simply by including proof with the first communication to the consumer.[18]

[4] The principal proposals were that the staff add to the Commentary (1) a lengthy new comment in section 803(6) that a party could be a "debt collector" with respect to some accounts but not others, (2) a definition of "default" in connection with section 803(6)(G)(iii) (now section 803(6)(F)(iii)) concerning accounts not in default when received, (3) a statement that section 806(3) does not prohibit a debt collector from responding to a specific credit reference inquiry from a creditor, (4) substantial new material to various comments in section 807(14) to cover a situation where one debt collector provides services as a contractor for another debt collector, (5) a statement that section 808(1) does not prohibit an agreement between a consumer and debt collector, and (6) a statement that the verification required by section 809(b) may be provided by an agent of the debt collector.

[5] Although most of the issues raised in those letters related to attorneys as debt collectors, a few of them also asked for interpretations on other issues as well. For the sake of completeness, all significant staff opinions included in this correspondence (which has been widely circulated already) have been included in the Commentary.

[6] Section 803(6), comments 1–2.

[7] Section 803(2), comment 2; section 809(a), comments 6–7.

[8] Section 803(5), comment 1.

[9] Section 803(5), comment 2.

[10] Section 803(6)(A), comment 4(a).

[11] Section 803(6)(C), comment 4(c).

[12] Section 811, comment 6.

[13] Section 805(b), comment 8.

[14] Section 805(b), comment 8.

[15] Section 806(3–4), comment 5.

[16] Section 806(3–4), comment 6.

[17] Section 809(a), comment 7.

[18] Section 809(b), comment 1.

An attorney debt collector may take legal action within 30 days of sending the required validation notice, regardless of whether the consumer disputes the debt; if the consumer disputes the debt, the attorney may still take legal action but must cease other collection efforts (*e.g.*, letters or calls to the consumer) until verification is obtained and mailed to the consumer.[19]

4. Permissible forum to enforce a judgment on a debt (section 811)

If a judgment has been obtained from a forum that satisfies the requirements of this section, a debt collector may bring suit to enforce it in another jurisdiction.[20]

By direction of the Commission.

Donald S. Clark,

Secretary.

Federal Trade Commission Staff Commentary on the Fair Debt Collection Practices Act

Introduction

This Commentary is the vehicle by which the staff of the Federal Trade Commission publishes its interpretations of the Fair Debt Collection Practices Act (FDCPA). It is a guideline intended to clarify the staff interpretations of the statute, but does not have the force or effect of statutory provisions. It is not a formal trade regulation rule or advisory opinion of the Commission, and thus is not binding on the Commission or the public.

The Commentary is based primarily on issues discussed in informal staff letters responding to public requests for interpretations and on the Commission's enforcement program, subsequent to the FDCPA's enactment. It is intended to synthesize staff views on important issues and to give clear advice where inconsistencies have been discovered among staff letters. In some cases, reflection on the issues posed or relevant court decisions have resulted in a different interpretation from that expressed by the staff in those informal letters. Therefore, the Commentary supersedes the staff views expressed in such correspondence.

In many cases several different sections or subsections of the FDCPA may apply to a given factual situation. This results from the effort by Congress in drafting the FDCPA to be both explicit and comprehensive, in order to limit the opportunities for debt collectors to evade the underlying legislative intention. Although it may be of only technical interest whether a given act violates one, two, or three sections of the FDCPA, the Commentary frequently provides cross references to other applicable sections so that it may serve as a more comprehensive guide for its users. The Commentary attempts to discuss the more common overlapping references, usually under the heading "Relation to other sections," and deals with issues raised by each factual situation under the section or subsection that the staff deems most directly applicable to it.

The Commentary will be revised and updated by the staff as needed, based on the experience of the Commission in responding to public inquiries about, and enforcing, the FDCPA. The Commission welcomes input from interested industry, consumer, and other public parties on the Commentary and on issues discussed in it.

The staff will continue to respond to requests for informal interpretations. Updates of the Commentary will consider and, where appropriate, incorporate issues raised in correspondence and other public contacts, as well as the Commission's enforcement efforts. Therefore, a party who is interested in raising an issue for inclusion in future editions of the Commentary does not need to make any formal submission or request to that effect.

The Commentary should be used in conjunction with the statute. The abbreviated description of each section or subsection in the Commentary is designed only as a preamble to discussion of issues pertaining to each section and is not intended as a substitute for the statutory text.

The Commentary should not be considered as a reflection of all court rulings under the FDCPA. For example, on some issues judicial interpretations of the statute vary depending on the jurisdiction, with the result that the staff's enforcement position can not be in accord with all decided cases.

Section 801—Short Title

Section 801 names the statute the "Fair Debt Collection Practices Act."

The Fair Debt Collection Practices Act (FDCPA) is Title VIII of the Consumer Credit Protection Act, which also includes other federal statutes relating to consumer credit, such as the Truth in Lending Act (Title I), the Fair Credit Reporting Act (Title VI), and the Equal Credit Opportunity Act (Title VII).

Section 802—Findings and Purpose

Section 802 recites the Congressional findings that serve as the basis for the legislation.

Section 803—Definitions

Section 803(l) defines "Commission" as the Federal Trade Commission.

1. *General.* The definition includes only the Federal Trade Commission, not necessarily the staff acting on its behalf.

Section 803(2) defines "communication" as the "conveying of information regarding a debt directly or indirectly to any person through any medium."

1. *General.* The definition includes oral and written transmission of messages which refer to a debt.

2. *Exclusions.* The term does not include formal legal action (e.g., filing of a lawsuit or other petition/pleadings with a court; service of a complaint or other legal papers in connection with a lawsuit, or activities directly related to such service). Similarly, it does not include a notice that is required by law as a prerequisite to enforcing a contractual obligation between creditor and debtor, by judicial or nonjudicial legal process.

The term does not include situations in which the debt collector does not convey information regarding the debt, such as:

- A request to a third party for a consumer to return a telephone call to the debt collector, if the debt collector does not refer to the debt or the caller's status as (or affiliation with) a debt collector.
- A request to a third party for information about the consumer's assets, if the debt collector does not reveal the existence of a debt.
- A request to a third party in connection with litigation (e.g., requesting a third party to complete a military affidavit that must be filed as a prerequisite to enforcing a default judgment, if the debt collector does not reveal the existence of the debt."

Section 803(3) defines "consumer" as "any natural person obligated or allegedly obligated to pay any debt."

1. *General.* The definition includes only a "natural person" and not an artificial person such as a corporation or other entity created by statute.

Section 803(4) defines "creditor" as "any person who offers or extends credit creating a debt or to whom a debt is owed". However, the definition excludes a party who "receives an assignment or transfer of a debt in default solely for the purpose of facilitating collection of such debt for another."

1. *General.* The definition includes the party that actually extended credit or became the obligee on an account in the normal course of business, and excludes

a party that was assigned a delinquent debt only for collection purposes.

Section 803(5) defines "debt" as a consumer's "obligation . . . to pay money arising out of a transaction in which the money, arising out of a transportation in which the money, property, insurance, or services (being purchased) are primarily for personal, family, or household purposes. . . ."

1. *Examples.* The term includes:

• Overdue obligations such as medical bills that were originally payable in full within a certain time period (e.g., 30 days).

• A dishonored check that was tendered in payment for goods or services acquired or used primarily for personal, family, or household purposes.

• A student loan, because the consumer is purchasing "services" (education) for personal use.

2. *Exclusions.* The term does not include:

• Unpaid taxes, fines, alimony, or tort claims, because they are not debts incurred from a "transportation (involving purchase of) property * * * or services * * * for personal, family or household purposes."

• A credit card that a cardholder retains after the card issuer has demanded its return. The cardholder's account balance is the debt.

• A non-pecuniary obligation of the consumer such as the responsibility to maintain adequate insurance on the collateral, because it does not involve an "obligation * * * to pay money."

Section 803(6) defines "debt collector" as a party "who uses any instrumentality of interstate commerce or the mails in * * * collection of * * * debts owed * * * another."

1. *Examples.* The term includes:

• Employees of a debt collection business, including a corporation, partnership, or other entity whose business is the collection of debts owned another.

• A firm that regularly collects overdue rent on behalf of real estate owners, or periodic assessments on behalf of condominium associations, because it "regularly collects * * * debts owned or due another."

• A party based in the United States who collects debts owned by consumers residing outside the United States, because he "uses * * * the mails" in the collection business. The residence of the debtor is irrelevant.

• A firm that collects debts in its own name for a creditor solely by mechanical techniques, such as (1) placing phone calls with pre-recorded messages and recording consumer responses, or (2) making computer-generated mailings.

• An attorney or law firm whose efforts to collect consumer debts on behalf of its clients regularly include activities traditionally associated with debt collection, such as sending demand letters (dunning notices) or making collection telephone calls to the consumer. However, an attorney is not considered to be a debt collector simply because he responds to an inquiry from the consumer following the filing of a lawsuit.

2. *Exclusions.* The term does not include:

• Any person who collects debts (or attempts to do so) only in insolated instances, becuause the definition includes only those who "regularly" collect debts.

• A credit card issuer that collects its cardholder's account, even when the account is based upon purchases from participating merchants, because the issuer is collecting its own debts, not those "owed or due another."

• An attorney whose practice is limied to legal activities (e.g., the filing and prosecution of lawsuits to reduce debts to judgment).

3. *Application of definition to creditor using another name.* Creditors are generally excluded from the definition of "debt collector" to the extent that they collect their own debts in their own name. However, the term specifically applies to "any creditor who, in the process of collecting his own debts, uses any name other than his own which would indicate that a third person is" involved in the collection.

A creditor is a debt collector for purposes of this act if:

• He uses a name other than his own to collect his debts, including a fictitious name.

• His salaried attorney employees who collect debts use stationery that indicates that attorneys are employed by someone other than the creditor or are independent or separate from the creditor (e.g., ABC Corp. sends collection letters on stationery of "John Jones, Attorney-at-Law").

• He regularly collects debts for another creditor; however, he is a debt collector only for purposes of collecting these debts, not when he collects his own debt in his own name.

• The creditor's collection division or related corporate collector is not clearly designated as being affiliated with the creditor; however, the creditor is not a debt collector if the creditor's correspondence is clearly labeled as being from the "collection unit of the (creditor's name)," since the creditor is not using a "name other than his own" in that instance.

Relation to other sections. A creditor who is covered by the FDCPA because he uses a "name other than his own" also may violate section 807(14), which prohibits using a false business name. When he falsely uses an attorney's name, he violates section 807(3).

4. *Specific exemptions from definition of debt collector.*

(a) *Creditor employees.* Section 803(6)(A) provides that "debt collector" does not include "any officer or employee of a creditor while, in the name of the creditor, collecting debts for such creditor".

The exemption includes a collection agency employee, who works for a creditor to collect in the creditor's name at the creditor's office under the creditor's supervision, because he has become the *de facto* employee of the creditor.

The exemption includes a creditor's salaried attorney (or other) employee who collects debts on behalf of, and in the name of, that creditor.

The exemption does not include a creditor's former employee who continues to collect accounts on the creditor's behalf, if he acts under his own name rather than the creditors's.

(b) *Creditor-controlled collector.* Section 803(6)(B) provides that "debt collector" does not include a party collecting for another, where they are both "related by common ownership or affiliated by corporate control, if the (party collects) only for persons to whom it is so related or affiliated and if the principal business of such person is not the collection of debts".

The exemption applies where the collector and creditor have "common ownership or * * * corporate control." For example, a company is exempt when it attempts to collect debts of another company after the two entities have merged.

The exemption does not apply to a party related to a creditor if it also collects debts for others in addition to the related creditors.

(c) *State and federal officials.* Section 803(6)(C) provides that "debt collector" does not include any state or federal employee "to the extent that collecting or attempting to collect any debt is in the performance of his official duties".

The exemption applies only to such governmental employees in the performance of their "official duties" and, therefore, does not apply to an attorney employed by a county government who also collected bad checks for local merchants where that activity is outside his official duties.

The exemption includes a state educational agency that is engaged in the collection of student loans.

(d) *Process servers.* Section 803(6)(D) provides that "debt collector" dos not include "any person while serving or attempting to serve legal process on any other person in connection with the judicial enforcement of any debt".

The exemption covers marshals, sheriffs, and any other process servers while conducting their normal duties relating to serving legal papers.

(e) *Non-profit counselors.* Section 803(6)(E) provides that "debt collector" does not include "any nonprofit organization which, at the request of consumers, performs bona fide consumer credit counseling and assists consumers in the liquidation of their debts by receiving payments from such consumers and distributing such amounts to creditors".

This exemption applies only to non-profit organizations; it does not apply to for-profit credit counseling services that accept fees from debtors and regularly transmit such funds to creditors.

(f) *Miscellaneous.* Section 803(6)(F) provides that "debt collector" does not include collection activity by a party about a debt that "(i) is incidental to a bona fide fiduciary obligation or * * * escrow arrangement; (ii) * * * was originated by such person; (iii) * * * was not in default at the time it was obtained by such person; or (iv) (was) obtained by such person as a secured party in a commercial credit transaction involving the creditor."

The exemption (i) for bona fide fiduciary obligations or escrow arrangements applies to entities such as trust departments of banks, and escrow companies. It does not include a party who is named as a debtor's trustee solely for the purpose of conducting a foreclosure sale (i.e., exercising a power of sale in the event of default on a loan).

The exemption (ii) for a party that originated the debt applies to the original creditor collecting his own debts in his own name. It also applies when a creditor assigns a debt originally owed to him, but retains the authority to collect the obligation on behalf of the assignee to whom the debt becomes owed. For example, the exemption applies to a creditor who makes a mortgage or school loan and continues to handle the account after assigning it to a third party. However, it does not apply to a party that takes assignment of retail installment contracts from the original creditor and then reassigns them to another creditor but continues to collect the debt arising from the contracts, because the debt was not "originated by" the collector/first assignee.

The exception (iii) for debts not in default when obtained applies to parties such as mortgage service companies whose business is servicing current accounts.

The exemption (iv) for a secured party in a commercial transaction applies to a commercial lender who acquires a consumer account that was used as collateral, following default on a loan from the commercial lender to the original creditor.

(g) *Attorneys.* A provision of the FDCPA, as enacted in 1977 (former section 803(6)(F)), providing that "debt collector" does not include "any attorney-at-law collecting a debt as an attorney on behalf of and in the name of a client," was repealed by Pub. L. 99–361, which became effective in July 1986. Therefore, an attorney who meets the definition set forth in section 803(6) is now covered by the FDCPA.

Section 803(7) defines "location information" as "a consumer's place of abode and his telephone number at such place, or his place of employment."

This definition includes only residence, home phone number, and place of employment. It does not cover work phone numbers, names of supervisors and their telephone numbers, salaries or dates of paydays.

Section 803(8) defines "state" as "any State, territory, or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any political subdivision of any of the foregoing."

Section 804—Acquisition of Location Information

Section 804 requires a debt collector, when communicating with third parties for the purpose of acquiring information about the consumer's location to "(1) identify himself, state that he is confirming or correcting location information concerning the consumer, and, only if expressly requested, identify his employer;" (2) not refer to the debt, (3) usually make only a single contact with each third party, (4) not communicate by post card, (5) not indicate the collection nature of his business purpose in any written communication, and (6) limit communications to the consumer's attorney, where the collector knows of the attorney, unless the attorney fails to respond to the communication.

1. *General.* Although the FDCPA generally protects the consumer's privacy by limiting debt collector communications about personal affairs to third parties, it recognizes the need for some third party contact by collectors to seek the whereabouts of the consumer.

2. *Identification of debt collector (section 804(1)).* An individual employed by a debt collector seeking location information must identify himself, but must not identify his employer unless asked. When asked, however, he must give the true and full name of the employer, to comply with this provision and avoid a violation of § 807(14).

An individual debt collector may use an alias if it is used consistently and if it does not interfere with another party's ability to identify him (*e.g.,* the true identity can be ascertained by the employer).

3. *Referral to debt (section 804(2)).* A debt collector may not refer to the consumer's debt in any third party communication seeking location information, including those with other creditors.

4. *Reference to debt collector's business (section 804(5)).* A debt collector may not use his actual name in his letterhead or elsewhere in a written communication seeking location information, if the name indicates collection activity (such as a name containing the word "debt", "collector", or "collection"), except when the person contacted has expressly requested that the debt collector identify himself.

5. *Communication with consumer's attorney (section 804(6)).* Once a debt collector learns a consumer is represented by an attorney in connection with the debt, he must confine his request for location information to the attorney. (See also comments on section 805(a)(2)).

Section 805—Communication in Connection With Debt Collection

Section 805(a)—Communication with the consumer. Unless the consumer has consented or a court order permits, a debt collector may not communicate with a consumer to collect a debt (1) at any time or place which is unusual or known to be inconvenient to the consumer (8AM–9PM is presumed to be convenient), (2) where he knows the consumer is represented by an attorney with respect to the debt, unless the attorney fails to respond to the communication in a reasonable time period, or (3) at work if he knows the consumer's employer prohibits such contacts.

1. *Scope.* For purposes of this section, the term "communicate" is given its commonly accepted meaning. Thus, the section applies to contacts with the consumer related to the collection of the debt, whether or not the debt is specifically mentioned.

2. *Inconvenient or unusual times or places (section 805(a)(1)).* A debt collector may not call the consumer at any time, or on any particular day, if he has credible information (from the consumer or elsewhere) that it is inconvenient. If the debt collector does not have such information, a call on Sunday is not *per se* illegal.

3. *Consumer represented by attorney (section 805(a)(2)).* If a debt collector learns that a consumer is represented by an attorney in connection with the debt, even if not formally notified of this fact, the debt collector must contact only the attorney and must not contact the consumer.

A debt collector who knows a consumer is represented by counsel with respect to a debt is not required to assume similar representation on other debts; however, if a consumer notifies the debt collector that the attorney has been retained to represent him for other debts placed with the debt collector, the debt collector must deal only with that attorney with respect to such debts.

The creditor's knowledge that the consumer has an attorney is not automatically imputed to the debt collector.

4. *Calls at work (section 805(a)(3)).* A debt collector may not call the consumer at work if he has reason to know the employer forbids such communication (e.g., if the consumer has so informed the debt collector).

Section 805(b)—Communication with third parties. Unless the consumer consents, or a court order or section 804 permits, "or as reasonably necessary to effectuate a postjudgment judicial remedy," a debt collector "may not communicate, in connection with the collection of any debt, with any person other than the consumer, his attorney, a consumer reporting agency if otherwise permitted by law, the creditor, the attorney of the creditor, or the attorney of the debt collector."

1. *Consumer consent to the third party contact.* The consumer's consent need not be in writing. For example, if a third party volunteers that a consumer has authorized him to pay the consumer's account, the debt collector may normally presume the consumer's consent, and may accept the payment and provide a receipt to the party that makes the payment. However, consent may not be inferred only from a consumer's inaction when the debt collector requests such consent.

2. *Location information.* Although a debt collector's search for information concerning the consumer's location (provided in § 804) is expressly excepted from the ban on third party contacts, a debt collector may not call third parties under the pretense of gaining information already in his possession.

3. *Incidental contacts with telephone operator or telegraph clerk.* A debt collector may contact an employee of a telephone or telegraph company in order to contact the consumer, without violating the prohibition on communication to third parties, if the only information given is that necessary to enable the collector to transmit the message to, or make the contact with, the consumer.

4. *Accessibility by third party.* A debt collector may not send a written message that is easily accessible to third parties. For example, he may not use a computerized billing statement that can be seen on the envelope itself.

A debt collector may use an "in care of" letter only if the consumer lives at, or accepts mail at, the other party's address.

A debt collector does not violate this provision when an eavesdropper overhears a conversation with the consumer, unless the debt collector has reason to anticipate the conversation will be overhead.

5. *Non-excepted parties.* A debt collector may discuss the debt only with the parties specified in this section (consumer, creditor, a party's attorney, or credit bureau). For example, unless the consumer has authorized the communication, a collector may not discuss the debt (such as a dishonored check) with a bank, or make a report on a consumer to a non-profit counseling service.

6. *Judicial remedy.* The words "as reasonably necessary to effectuate a postjudgment judicial remedy" mean a communication necessary for execution or enforcement of the remedy. A debt collector may not send a copy of the judgment to an employer, except as part of a formal service of papers to achieve a garnishment or other remedy.

7. *Audits or inquiries.* A debt collector may disclose his files to a government official or an auditor, to respond to an inquiry or conduct an audit, because the disclosure would not be "in connection with the collection of any debt."

8. *Communications by attorney debt collectors.* An attorney who represents either a creditor or debt collector that has previously tried to collect an account may communicate his efforts to collect the account to the debt collector. Because the section permits a debt collector to communicate with "the attorney of the creditor, or the attorney of the debt collector", communications between these parties (even if the attorney is also a debt collector) are not forbidden.

An attorney may communicate with a potential witness in connection with a lawsuit he has filed (e.g., in order to establish the existence of a debt), because the section was not intended to prohibit communications by attorneys that are necessary to conduct lawsuits on behalf of their clients.

Section 805(c)—Ceasing communication. Once a debt collector receives written notice from a consumer that he or she refuses to pay the debt or wants the collector to stop further collection efforts, the debt collector must cease any further communication with the consumer except "(1) to advise the consumer that the debt collector's further efforts are being terminated; (2) to notify the consumer that the debt collector or creditor may invoke specified remedies which are ordinarily invoked by such debt collector or creditor; or (3) where applicable, to notify the consumer that the debt collector or creditor intends to invoke a specified remedy."

1. *Scope.* For purposes of this section, the term "communicate" is given its commonly accepted meaning. Thus, the section applies to any contact with the consumer related to the collection of the debt, whether or not the debt is specifically mentioned.

2. *Request for payment.* A debt collector's response to a "cease communication" notice from the consumer may not include a demand for payment, but is limited to the three statutory exceptions.

Section 805(d)—"consumer" definition. For section 805 purposes, the term "consumer" includes the "consumer's spouse, parent (if the consumer is a minor), guardian, executor, or administrator."

1. *Broad "consumer" definition.* Because of the broad statutory definition of "consumer" for the purposes of this section, many of its protections extend to parties close to the consumer. For example, the debt collector may not call the consumer's spouse at a time or place known to be inconvenient to the spouse. Conversely, he may call the spouse (guardian, executor, etc.) at any time or place that would be in accord with the limitations of section 805(a).

Section 806—Harassment or Abuse

Section 806 prohibits a debt collector from any conduct that would "Harass, oppress, or abuse any person in connection with the collection of a debt." It provides six examples of harassement or abuse.

1. *Scope.* Prohibited actions are not limited to the six subsections listed as

examples of activities that violate this provision.

2. *Unnecessary calls to third parties.* A debt collector may not leave telephone messages with neighbors when the debt collector knows the consumer's name and telephone number and could have reached him directly.

3. *Multiple contacts with consumer.* A debt collector may not engage in repeated personal contacts with a consumer with such frequency as to harass him. Subsection (5) deals specifically with harassment by multiple phone calls.

4. *Abusive conduct.* A debt collector may not pose a lengthy series of questions or comments to the consumer without giving the consumer a chance to reply. Subsection (2) deals specifically with harassment involving obscene, profane, or abusive language.

Section 806(1) prohibits the "use or threat of use of violence or other criminal means to harm * * * any person."

1. *Implied threat.* A debt collector may violate this section by an implied threat of violence. For example, a debt collector may not pressure a consumer with statements such as "We're not playing around here—we can play tough" or "We're going to send somebody to collect for us one way or the other."

Section 806(2) prohibits the use of obscene, profane, or abusive language.

1. *Abusive language.* Abusive language includes religious slurs, profanity, obscenity, calling the consumer a liar or a deadbeat, and the use of racial or sexual epithets.

Section 806(3) prohibits the "publication of a list of consumers who allegedly refuse to pay debts," except to report the items to a "consumer reporting agency", as defined in the Fair Credit Reporting Act or to a party otherwise authorized to receive it under that Act.

Section 806(4) prohibits the "advertisement for sale of any debt to coerce payment of the debt."

1. *Shaming prohibited.* These provisions are designed to prohibit debt collectors from "shaming" a customer into payment, by publicizing the debt.

2. *Exchange of lists.* Debt collectors may not exchange lists of consumers who allegedly refuse to pay their debts.

3. *Information to creditor subscribers.* A debt collector may not distribute a list of alleged debtors to its creditor subscribers.

4. *Coded lists.* A debt collector that publishes a list of consumers who have had bad debts, coded to avoid generally disclosing the consumer's identity (e.g., showing only the drivers license number and first three letters of each consumer's name) does not violate this provision, because such publication is permitted under the Fair Credit Reporting Act.

5. *List for use by investigator.* A debtor collector does not violate these provisions by providing a list of consumers against whom judgments have been entered to a private investigator in order to locate such individuals, because section 805(b) specifically permits contacts "reasonably necessary to effectuate a post-judgment judicial remedy."

6. *Public notice required by law.* A debt collector does not violate these provisions by providing public notices that are required by law as a prerequisite to enforcement of a security interest in connection with a debt.

Section 806(5) prohibits contacting the consumer by telephone "repeatedly or continuously with intent to annoy, abuse, or harass any person at the called number."

1. *Multiple phone calls.* "Continuously" means making a series of telephone calls, one right after the other. "Repeatedly" means calling with excessive frequency under the circumstances.

Section 806(6) prohibits, except where section 804 applies, "the placement of telephone calls without meaningful disclosure of the caller's identity."

1. *Aliases.* A debt collector employee's use of an alias that permits identification of the debt collector (*i.e.*, where he uses the alias consistently, and his true identity can be ascertained by the employer) constitutes a "meaningful disclosure of the caller's identity."

2. *Identification of caller.* An individual debt collector must disclose his employer's identity, when discussing the debt on the telephone with consumers or third parties permitted by section 805(b).

3. *Relation to other sections.* A debt collector who uses a false business name in a phone call to conceal his identity violates section 807(14), as well as this section.

Section 807—False or Misleading Representations

Section 807 prohibits a debt collector from using any "false, deceptive, or misleading representation or means in connection with the collection of any debt." It provides sixteen examples of false or misleading representations.

1. *Scope.* Prohibited actions are not limited to the sixteen subsections listed as examples of activities that violate this provision. In addition, section 807(10), which prohibits the "use of any false representation or deceptive means" by a debt collector, is particularly broad and encompasses virtually every violation, including those not covered by the other subsections.

Section 807(1) prohibits "the false representation or implication that the debt collector is vouched for, bonded by, or affiliated with the United States or any State * * *"

1. *Symbol on dunning notice.* A debt collector may not use a symbol in correspondence that makes him appear to be a government official. For example, a collection letter depicting a police badge, a judge, or the scales of justice, normally violates this section.

Section 807(2) prohibits falsely representing either "(A) the character, amount, or legal status of any debt; or (B) any services rendered or compensation which may be lawfully received by" the collector.

1. *Legal Status of debt.* A debt collector may not falsely imply that legal action has begun.

2. *Amount of debt.* A debt collector may not claim an amount more than actually owed, or falsely assert that the debt has matured or that it is immediately due and payable, when it is not.

3. *Judgment.* When a debt collector provides the validation notice required by section 809(a)(4), the notice may include the words "copy of a judgment" whether or not a judgment exists, because section 809(a)(4) provides for a statement including these words. Compliance with section 809(a)(4) in this manner will not be considered a violation of section 807(2)(A).

Section 807(3) prohibits falsely representing or implying that "any individual is an attorney or that any communication is from an attorney."

1. *Form of legal correspondence.* A debt collector may not send a collection letter from a "Pre-Legal Department," where no legal department exists. An attorney may use a computer service to send letters on his own behalf, but a debt collector may not send a computer-generated letter deceptively using an attorney's name.

2. *Named individual.* A debt collector may not falsely represent that a person named in a letter is his attorney.

3. *Relation to other sections.* If a creditor falsely uses an attorney's name rather than his own in his collection communications, he both loses his exemption from the FDCPA's definition of "debt collector" (Section 803(6)) and violates this provision.

Section 807(4) prohibits falsely representing or implying to the consumer that nonpayment "will result in the arrest or imprisonment of any

person or the seizure, garnishment, attachment, or sale of any property or wages of any person * * *"

Section 807(5) prohibits the "threat to take any action that cannot legally be taken or that is not intended to be taken."

1. *Debt collector's statement of his own definite action.* A debt collector may not state that he will take any action unless he intends to take the action when the statement is made, or ordinarily takes the action in similar circumstances.

2. *Debt collector's statement of definite action by third party.* A debt collector may not state that a third party will take any action unless he has reason to believe, at the time the statement is made, that such action will be taken.

3. *Statement of possible action.* A debt collector may not state or imply that he or any third party may take any action unless such action is legal and there is a reasonable likelihood, at the time the statement is made, that such action will be taken. A debt collector may state that certain action is possible, if it is true that such action is legal and is frequently taken by the collector or creditor with respect to similar debts; however, if the debt collector has reason to know there are facts that make the action unlikely in the particular case, a statement that the action was possible would be misleading.

4. *Threat of criminal action.* A debt collector may not threaten to report a dishonored check or other fact to the police, unless he actually intends to take this action.

5. *Threat of attachment.* A debt collector may not threaten to attach a consumer's tax refund, when he has no authority to do so.

6. *Threat of legal or other action.* Section 807(5) refers not only to a false threat of legal action, but also a false threat by a debt collector that he will report a debt to a credit bureau, assess a collection fee, or undertake any other action if the debt is not paid. A debt collector may also not misrepresent the imminence of such action.

A debt collector's implication, as well as a direct statement, of planned legal action may be an unlawful deception. For example, reference to an attorney or to legal proceedings may mislead the debtor as to the likelihood or imminence of legal action.

A debt collector's statement that legal action has been recommended is a representation that legal action may be taken, since such a recommendation implies that the creditor will act on it at least some of the time.

Lack of intent may be inferred when the amount of the debt is so small as to make the action totally unfeasible or when the debt collector is unable to take the action because the creditor has not authorized him to do so.

7. *Illegality of threatened act.* A debt collector may not threaten that he will illegally contact an employer, or other third party, or take some other "action that cannot legally be taken" (such as advising the creditor to sue where such advice would violate state rules governing the unauthorized practice of law). If state law forbids a debt collector from suing in his own name (or from doing so without first obtaining a formal assignment and that has not been done), the debt collector may not represent that he will sue in that state.

Section 807(6) prohibits falsely representing or implying that a transfer of the debt will cause the consumer to (A) lose any claim or defense, or (B) become subject to any practice prohibited by the FDCPA.

1. *Referral to creditor.* A debt collector may not falsely state that the consumer's account will be referred back to the original creditor, who would take action the FDCPA prohibits the debt collector to take.

Section 807(7) prohibits falsely representing or implying that the "consumer committed any crime or other conduct in order to disgrace the consumer."

1. *False allegation of fraud.* A debt collector may not falsely allege that the consumer has committed fraud.

2. *Misrepresentation of criminal law.* A debt collector may not make a misleading statement of law, falsely implying that the consumer has committed a crime, or mischaracterize what constitutes an offense by misstating or omitting significant elements of the offense. For example, a debt collector may not tell the consumer that he has committed a crime by issuing a check that is dishonored, when the statute applies only where there is a "scheme to defraud."

Section 807(8) prohibits "Communicating or threatening to communicate to any person (false) credit information * * *, including the failure to communicate that a disputed debt is disputed."

1. *Disputed debt.* If a debt collector knows that a debt is disputed by the consumer, either from receipt of written notice (section 809) or other means, and reports it to a credit bureau, he must report it as diputed.

2. *Post-report dispute.* When a debt collector learns of a dispute after reporting the debt to a credit bureau, the dispute need not also be reported.

Section 807(9) prohibits the use of any document designed to falsely imply that it issued from a state or federal source, or "which creates a false impression as to its source, authorization, or approval."

1. *Relation to other sections.* Most of the violations of this section involve simulated legal process, which is more specifically covered by section 807(13). However, this subsection is broader in that it also covers documents that fraudulently appear to be official government documents, or otherwise mislead the recipient as to their authorship.

Section 807(10) prohibits the "use of any false representation or deceptive means to collect or attempt to collect any debt or to obtain information concerning a consumer."

1. *Relation to other sections.* The prohibition is so comprehensive that violation of any part of section 807 will usually also violate subsection (10). Actions that violate more specific provisions are discussed in those sections.

2. *Communication format.* A debt collector may not communicate by a format or envelope that misrepresents the nature, purpose, or urgency of the message. It is a violation to send any communication that conveys to the consumer a false sense of urgency. However, it is usually permissible to send a letter generated by a machine, such as a computer or other printing device. A bona fide contest entry form, which provides a clearly optional location to enter employment information, enclosed with request for payment, is not deceptive.

3. *False statement or implications.* A debt collector may not falsely state or imply that a consumer is required to assign his wages to his creditor when he is not, that the debt collector has counseled the creditor to sue when he has not, that adverse credit information has been entered on the consumer's credit record when it has not, that the entire amount is due when it is not, or that he cannot accept partial payments when in fact he is authorized to accept them.

4. *Misrepresentation of law.* A debt collector may not mislead the consumer as to the legal consequences of the consumer's actions (*e.g.*, by falsely implying that a failure to respond is an admission of liability).

A debt collector may not state that federal law requires a notice of the debt collector's intent to contact third parties.

5. *Misleading letterhead.* A debt collector's employee who is an attorney may not use "attorney-at-law"

stationery without referring to his employer, so as to falsely imply to the consumer that the debt collector had retained a private attorney to bring suit on the account.

Section 807(11) requires the debt collector to "disclose clearly in all communications made to collect a debt or to obtain information about a consumer, that the debt collector is attempting to collect a debt and that any information obtained will be used for that purpose", except where section 804 provides otherwise.

1. *Oral communications.* A debt collector must make the required disclosures in both oral and written communications.

2. *Disclosure to consumers.* When a debt collector contacts a consumer and clearly discloses that he is seeking payment of a debt, he need not state that all information will be used to collect a debt, since that should be apparent to the consumer. The debt collector need not repeat the required disclosure in subsequent contacts.

A debt collector may not send the consumer a note saying only "please call me right away" unless there has been prior contact between the parties and the collector is thus known to the consumer.

3. *Disclosures to third parties.* Except when seeking location information, the debt collector must state in the first communication with a third party that he is attempting to collect the debt and that information will be used for that purpose, but need not do so in subsequent communications with that party.

Section 807(12) prohibits falsely representing or implying that "accounts have been turned over to innocent purchasers for value."

1. *Relation to other sections.* Section 807(6)(A) prohibits a false statement or implication that threatening to affect the consumer's rights may be affected by transferring the account; this subsection forbids falsely stating or implying that a transfer to certain parties has occurred.

Section 807(13) prohibits falsely representing or implying that "documents are legal process."

1. *Simulated legal process.* A debt collector may not send written communications that deceptively resemble legal process forms. He may not send a form or a dunning letter that, taken as a whole, appears to simulate legal process. However, one legal phrase (such as "notice of legal action" or "show just cause why") alone will not result in a violation of this section unless it contributes to an erroneous impression that the document is a legal form.

Section 807(14) prohibits the "use of any business, company, or organization name other than the (collector's) true name".

1. *Permissible business name.* A debt collector may use a name that does not misrepresent his identity or deceive the consumer. Thus, a collector may use its full business name, the name under which it usually transacts business, or a commonly-used acronym. When the collector uses multiple names in its various affairs, it does not violate this subsection if it consistently uses the same name when dealing with a particular consumer.

2. *Creditor misrepresentation of identity.* A creditor may not use any name that would falsely imply that a third party is involved in the collection. The in-house collection unit of "ABC Corp." may use the name "ABC Collection Division," but not the name "XYZ Collection Agency" or some other unrelated name.

A creditor violates this section if he uses the name of a collection bureau as a conduit for a collection process that the creditor controls in collecting his own accounts. Similarly, a creditor may not use a fictitious name or letterhead, or a "post office box address" name that implies someone else is collecting his debts.

A creditor does not violate this provision where an affiliated (and differently named) debt collector undertakes collection activity, if the debt collector does business separately from the creditor (e.g., where the debt collector in fact has other clients that he treats similarly to the creditor, has his own employees, deals at arms length with the creditor, and controls the process himself).

3. *All collection activities covered.* A debt collection business must use its real business name, commonly-used name, or acronym in both written and oral communications.

4. *Relation to other sections.* If a creditor uses a false business name, he both loses his exemption from the FDCPA's definition of "debt collector" (section 803(6)) and violates this provision. If a debt collector falsely uses the name of an attorney rather than his true business name, he violates section 807(3) as well as this section. When a debt collector uses a false business name in a phone call, he violates section 806(6) as well as this section.

When using the mails to obtain location information, a debt collector may not (unless expressly requested by the recipient to identify the firm) use a name that indicates he is in the debt collection business, or he will violate section 804(5). When a debt collector's employee who is seeking location information replies to an inquiry about his employer's identity under section 804(1), he must give the true name of his employer.

Section 807(15) prohibits falsely representing or implying that documents are not legal process forms or do not require action by the consumer.

1. *Disguised legal process.* A debt collector may not deceive a consumer into failing to respond to legal process by concealing the import of the papers, thereby subjecting the consumer to a default judgment.

Section 807(16) prohibits falsely representing or implying that a debt collector operates or is employed by a "consumer reporting agency" as defined in the Fair Credit Reporting Act.

1. *Dual agencies.* The FDCPA does not prohibit a debt collector from operating a consumer reporting agency.

2. *Misleading names.* Only a bona fide consumer reporting agency may use names such as "Credit Bureau," "Credit Bureau Collection Agency," "General Credit Control," "Credit Bureau Rating, Inc.," or "National Debtors Rating." A debt collector's disclaimer in the text of a letter that the debt collector is not affiliated with (or employed by) a consumer reporting agency, will not necessarily avoid a violation if the collector uses a name that indicates otherwise.

3. *Factual issue.* Whether a debt collector that has called itself a credit bureau actually qualifies as such is a factual issue, to be decided according to the debt collector's actual operation.

Section 808—Unfair Practices

Section 808 prohibits a debt collector from using "unfair or unconscionable means" in his debt collection activity. It provides eight examples of unfair practices.

1. *Scope.* Prohibited actions are not limited to the eight subsections listed as examples of activities that violate this provision.

2. *Elements of unfairness.* A debt collector's act in collecting a debt may be "unfair" if it causes injury to the consumer that is (1) substantial, (2) not outweighed by countervailing benefits to consumers or competition, and (3) not reasonably avoidable by the consumer.

Section 808(1) prohibits collecting any amount unless the amount is expressly authorized by the agreement creating the debt or is permitted by law.

1. *Kinds of amounts covered.* For purposes of this section, "amount" includes not only the debt, but also any incidental charges, such as collection

charges, interest, service charges, late fees, and bad check handling charges.

2. *Legality of charges.* A debt collector may attempt to collect a fee or charge in addition to the debt if either (a) the charge is expressly provided for in the contract creating the debt and the charge is not prohibited by state law, or (B) the contract is silent but the charge is otherwise expressly permitted by state law. Conversely, a debt collector may not collect an additional amount if either (A) state law expressly prohibits collection of the amount or (B) the contract does not provide for collection of the amount and state law is silent.

3. *Legality of fee under state law.* If state law permits collection of reasonable fees, the reasonableness (and consequential legality) of these fees is determined by state law.

4. *Agreement not in writing.* A debt collector may establish an "agreement" without a written contract. For example, he may collect a service charge on a dishonored check based on a posted sign on the merchant's premises allowing such a charge, if he can demonstrate that the consumer knew of the charge.

Section 808(2) prohibits accepting a check postdated by more than five days unless timely written notice is given to the consumer prior to deposit.

Section 808(3) prohibits soliciting any postdated check for purposes of threatening or instituting criminal prosecution.

Section 808(4) prohibits depositing a postdated check prior to its date.

1. *Postdated checks.* These provisions do not totally prohibit debt collectors from accepting postdated checks from consumers, but rather prohibit debt collectors from misusing such instruments.

Section 808(5) prohibits causing any person to incur telephone or telegram charges by concealing the true purpose of the communication.

1. *Long distance calls to the debt collector.* A debt collector may not call the consumer collect or ask a consumer to call him long distance without disclosing the debt collector's identity and the communication's purpose.

2. *Relation to other section.* A debt collector who conceals his purpose in asking consumers to call long distance may also violate section 807(11), which requires the debt collector to disclose his purpose in some communications.

Section 808(6) prohibits taking nonjudicial action to enforce a security interest on property, or threatening to do so, where (A) there is not present right to the collateral, (B) there is no present intent to exercise such rights, or (C) the property is exempt by law.

1. *Security enforcers.* Because the FDCPA's definition of "debt collection" includes parties whose principal business is enforcing security interests only for section 808(6) purposes, such parties (if they do not otherwise fall within the definition) are subject only to this provision and not to the rest of the FDCPA.

Section 808(7) prohibits "Communicating with a consumer regarding a debt by post card."

1. *Debt.* A debt collector does not violate this section if he sends a post card to a consumer that does not communicate the existence of the debt. However, if he had not previously disclosed that he is attempting to collect a debt, he would violate section 807(11), which requires this disclosure.

Section 808(8) prohibits showing anything other than the debt collector's address, on any envelope in any written communication to the consumer, except that a debt collector may use his business name if it does not indicate that he is in the debt collection business.

1. *Business names prohibited on envelopes.* A debt collector may not put on his envelope any business name with "debt" or "collector" in it, or any other name that indicates he is in the debt collection business. A debt collector may not use the American Collectors Association logo on an envelope.

2. *Collector's name.* Whether a debt collector/consumer reporting agency's use of his own "credit bureau" or other name indicates that he is in the collection business, and thus violates the section, is a factual issue to be determined in each individual case.

3. *Harmless words or symbols.* A debt collector does not violate this section by using an envelope printed with words or notations that do not suggest the purpose of the communication. For example, a collector may communicate via an actual telegram or similar service that uses a Western Union (or other provider) logo and the word "telegram" (or similar word) on the envelope, or a letter with the word "Personal" or "Confidential" on the envelope.

4. *Transparent envelopes.* A debt collector may not use a transparent envelope, which reveals language or symbols indicating his debt collection business, because it is the equivalent of putting information on an envelope.

Section 809—Validation of Debts

Section 809(a) requires a collector, within 5 days of the first communication, to provide the consumer a written notice (if not provided in that communication) containing (1) the amount of the debt and (2) the name of the creditor, along with a statement that he will (3) assume the debt's validity unless the consumer disputes it within 30 days, (4) send a verification or copy of the judgment if the consumer timely disputes the debt, and (5) identify the original creditor upon written request.

1. *Who must provide notice.* If the employer debt collection agency gives the required notice, employee debt collectors need not also provide it. A debt collector's agent may give the notice, as long as it is clear that the information is being provided on behalf of the debt collector.

2. *Single notice required.* The debt collector is not required to provide more than one notice for each debt. A notice need not offer to identify the original creditor unless the name and address of the original creditor are different from the current creditor.

3. *Form of notices.* The FDCPA imposes no requirements as to the form, sequence, location, or typesize of the notice. However, an illegible notice does not comply with this provision.

4. *Alternate terminology.* A debt collector may condense and combine the required disclosures, as long as he provides all required information.

5. *Oral notice.* If a debt collector's first communication with the consumer is oral, he may make the disclosures orally at that time in which case he need not send a written notice.

6. *Legal action.* A debt collector's institution of formal legal action against a consumer (including the filing of a complaint or service of legal papers by an attorney in connection with a lawsuit to collect a debt) or transmission of a notice to a consumer that is required by law as a prerequisite to enforcing a contractual obligation is not a "communication in connection with collection of any debt," and thus does not confer section 809 notice-and-validation rights on the consumer.

7. *Collection activities by attorneys.* An attorney who regularly attempts to collect debts by means other than litigation, such as writing the consumer demand letters (dunning notices) or calling the consumer on the phone about the obligation (except in response to a consumer's call to him after suit has been commenced), must provide the required notice, even if a previous debt collector (or creditor) has given such a notice.

8. *Effect of including proof with first notice.* A debt collector must verify a disputed debt even if he has included proof of the debt with the first communication, because the section is intended to assist the consumer when a debt collector inadvertently contacts the

VOL 53 ISS 239 DEC 13 1988 UMI

wrong consumer at the start of his collection efforts.

Section 809(b) requires that, if the consumer disputes the debt or requests identification of the original creditor in writing, the collector must cease collection efforts until he verifies the debt and mails a response. Section 809(c) states that a consumer's failure to dispute the validity of a debt under this section may not be interpreted by a court as an admission of liability.

1. *Pre-notice collection.* A debt collector need not cease normal collection activities within the consumer's 30-day period to give notice of a dispute until he receives a notice from the consumer. An attorney debt collector may take legal action within 30 days of sending the notice, regardless of whether the consumer disputes the debt. If the consumer disputes the debt, the attorney may still take legal action but must cease collection efforts until verification is obtained and mailed to the consumer.

A debt collector may report a debt to a credit bureau within the 30-day notice period, before he receives a request for validation or a dispute notice from the consumer.

Section 810—Multiple Debts

Section 810 provides: "If any consumer owes multiple debts and makes any single payment to any debt collector with respect to such debts, such debt collector my not apply such payment to any debt which is disputed by the consumer and, where applicable, shall apply such payment in accordance with the consumer's directions."

Section 811—Legal Actions by Debt Collectors

Section 811 provides that a debt collector may sue a consumer only in the judicial district where the consumer resides or signed the contract sued upon, except that an action to enforce a security interest in real property which secures the obligation must be brought where the property is located.

1. *Waiver.* Any waiver by the consumer must be provided directly to the debt collector (not to the creditor in the contract establishing the debt), because the forum restriction applies to actions brought by the debt collector.

2. *Multiple defendants.* Since a debt collector may sue only where the consumer (1) lives or (2) signed the contract, the collector may not join an ex-husband as a defendant to a suit against the ex-wife in the district of her residence, unless he also lives there or signed the contract there. The existence of community property at her residence that is available to pay his debts does not alter the forum limitations on individual consumers.

3. *Real estate security.* A debt collector may sue based on the location of a consumer's real property only when he seeks to enforce an interest in such property that secures the debts.

4. *Services without written contract.* Where services were provided pursuant to an oral agreement, the debt collector may sue only where the consumer resides. He may not sue where services were performed (if that is different from the consumer's residence), because that is not included as permissible forum location by this provision.

5. *Enforcement of judgments.* If a judgment is obtained in a forum that satisfies the requirements of this section, it may be enforced in another jurisdiction, because the consumer previously has had the opportunity to defend the original action in a convenient forum.

6. *Scope.* This provision applies to lawsuits brought by a debt collector, including an attorney debt collector, when the debt collector is acting on his own behalf or on behalf of his client.

Section 812—Furnishing Certain Deceptive Forms

Section 812 prohibits any party from designing and furnishing forms, knowing they are or will be used to deceive a consumer to believe that someone other than his creditor is collecting the debt, and imposes FDCPA civil liability on parties who supply such forms.

1. *Practice prohibited.* This section prohibits the practice of selling to creditors dunning letters that falsely imply that a debt collector is participating in collection of the debt, when in fact only the creditor is collecting.

2. *Coverage.* This section applies to anyone who designs, complies, or furnishes the forms prohibited by this section.

3. *Pre-collection letters.* A form seller may not furnish a creditor with (1) a letter on a collector's letterhead to be used when the collector is not involved in collecting the creditor's debts, or (2) a letter indicating "copy to (the collector)" if the collector is not participating in collecting the creditor's debt. A form seller may not avoid liability by including a statement in the text of a form letter that the sender has not yet been assigned the account for collection, if the communication as a whole, using the collector's letterhead, represents otherwise.

4. *Knowledge required.* A party does not violate this provision unless he knows or should have known that his form letter will be used to mislead consumers into believing that someone other than the creditor is involved in collecting the debt.

5. *Participation by debt collector.* A debt collector that uses letters as his only collection tool does not violate this section, merely because he charges a flat rate per letter, if he is meaningfully "participating in the collection of a debt." The consumer is not misled in such cases, as he would be in the case of a party who supplied the creditor with form letters and provided little or no additional service in the collection process. The performance of other tasks associated with collection (*e.g.*, handling verification requests, negotiating payment arrangements, keeping individual records) is evidence that such a party is "participating in the collection."

Section 813—Civil Liability

Section 813 (A) imposes civil liability in the form of (1) actual damages, (2) discretionary penalties, and (3) costs and attorney's fees, (B) discusses relevant factors a court should consider in assessing damages, (C) exculpates a collector who maintains reasonable procedures from liability for an unintentional error, (D) permits actions to be brought in federal or state courts within one year from the violation, and (E) shields a defendant who relies on an advisory opinion of the Commission.

1. *Employee liability.* Since the employees of a debt collection agency are "debt collectors," they are liable for violations to the same extent as the agency.

2. *Damages.* The courts have awarded "actual damages" for FDCPA violations that were not just out-of-pocket expenses, but included damages for personal humiliation, embarrassment, mental anguish, or emotional distress.

3. *Application of statute of limitation period.* The section's one year statute of limitations applies only to private lawsuits, not to actions brought by a government agency.

4. *Advisory opinions.* A party may act in reliance on a formal advisory opinion of the Commission pursuant to 16 CFR 1.1–1.4, without risk of civil liability. This protection does not extend to reliance on this Commentary or other informal staff interpretations.

Section 814—Administrative Enforcement

Section 814 provides that the principal

federal enforcement agency for the FDCPA is the Federal Trade Commission, but assigns enforcement power to other authorities empowered by certain federal statutes to regulate financial, agricultural, and transportation activities, where FDCPA violations relate to acts subject to those laws.

Section 815—Reports to Congress by Commission

Section 815 requires the Commission to submit an annual report to Congress which discusses its enforcement and other activities administering the FDCPA, assesses the degree of compliance, and makes recommendations.

Section 816—Relations to State Laws

Section 816 provides that the FDCPA pre-empts state laws only to the extent that those laws are inconsistent with any provision of the FDCPA, and then only to the extent of the inconsistency. A State law is not inconsistent if it gives consumers greater protection than the FDCPA.

1. *Inconsistent laws.* Where a state law provides protection to the consumer equal to, or greater than, the FDCPA, it is not pre-empted by the federal statute.

Section 817—Exemption For State Regulation

Section 817 orders the Commission to exempt any class of debt collection practices from the FDCPA within any State if it determines that State laws regulating those practices are substantially similar to the FDCPA, and contain adequate provision for enforcement.

1. *State exemptions.* A state with a debt collection law may apply to the Commission for an exemption. The Commission must grant the exemption if the state's law is substantially similar to the FDCPA, and there is adequate provision for enforcement. The Commission has published procedures for processing such applications (16 CFR 901).

Section 818—Effective Date

Section 818 provides that the FDCPA took effect six months from the date of its enactment.

1. *Key dates.* The FDCPA was approved September 20, 1977, and became effective March 20, 1978.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Initial Review Committees and Science Advisory Board; Meeting Agendas; January

AGENCY: Alcohol, Drug Abuse, and Mental Health Administration.

ACTION: Notice of meetings.

SUMMARY: This notice sets forth schedules and proposed agendas of the forthcoming meetings of the agency's initial review committees and a science advisory board in the month of January 1989.

The Extramural Science Advisory Board, NIMH, will discuss the peer review process and the extramural program in the behavioral sciences of the National Institute of Mental Health.

The review committees will be performing initial review of applications for Federal assistance. Therefore, portions of these meetings will be closed to the public as determined by the Administrator, ADAMHA, in accordance with 5 U.S.C. 552(b) (6) and 5 U.S.C. app. 2 10(d). Notice of these meetings is required under the Federal Advisory Committee Act, Pub. L. 92-463.

Committee Name: Clinical Biology Subcommittee of the Psychopathology and Clinical Biology Research Review Committee, NIHM.

Date and Time: January 18–20: 9:00 a.m.

Place: Chevy Chase Holiday Inn, 5520 Wisconsin Avenue, Chevy Chase, MD 20815.

Status of Meeting: Open—January 18: 9:00–10:00 a.m., Closed—Otherwise.

Contact: Maureen Eister, Parkland Building, Room 9C–08, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–1340.

Purpose: The committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of activities in the fields of research and research training in the areas of clinical psychopathology and clinical biology as they relate to mental health, with recommendations to the National Advisory Mental Health Council for final review.

Committee Name: Extramural Science Advisory Board, NIMH.

Date and Time: January 22–24: 10:00 a.m.

Place: January 22—Bethesda Marriott, 5151 Pooks Hills Road, Bethesda, Maryland 20814.

January 23–24—National Institutes of Health, Building 31, Conference Room 9, 9000 Rockville Pike, Bethesda, MD 20892.

Status of Meeting: Open.

Contact: Anthony Pollitt, Parklawn Building, Room 17C–20, 5600 Fishers Lane, Rockville, MD 20857, (301) 443–3175.

Purpose: The Extramural Science Advisory Board, NIMH, advises the Secretary of Health and Human Services, the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, and the Director, National Institute of Mental Health, on the direction scope, balance, and emphasis of the Institute's extramural science programs.

Committee Name: Psychopathology Subcommittee of the Psychopathology and Clinical Biology Research Review Committee, NIMH.

Date and Time: January 25–27: 9:00 a.m.

Place: Congressional Days Inn, 1775 Rockville Pike, Rockville, MD 20852.

Status of Meeting: Open—January 25: 9:00–10:00 a.m., Closed—Otherwise.

Contact: Emilie A. Embrey, Parklawn Building, Room 9C–08, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–1340.

Purpose: The committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of activities in the fields of research and research training in the areas of clinical psychopathology and clinical biology as they relate to mental health, with recommendations to the National Advisory Mental Health Council for final review.

Substantive information, summaries of the meetings, and rosters of committee members may be obtained as follows: Ms. Joanna Kieffer, NIMH Committee Management Officer, Room 9–105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–4333.

Date: December 7, 1988.

Peggy W. Cockrill,

Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

BILLING CODE 4160-20-M

Food and Drug Administration

[Docket No. 88N-0415]

Drug Export; Ifex (Ifosfamide) For Injection

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Bristol-Myers Co., has filed an application requesting approval for the export of the human drug Ifex (ifosfamide) for injection to Canada.

ADDRESS. Relevant information on this application may be directed to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human drugs under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

FOR FURTHER INFORMATION CONTACT: Rudolf Apodaca, Division of Drug Labeling Compliance (HFD–310), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8063.

SUPPLEMENTARY INFORMATION: The Drug Export Amendments Act of 1986 (Pub. L. 99–660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of drugs that are not currently approved in the United States. The approval process is governed by section 802(b) of the act. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Bristol-Myers Co., 345 Park Ave., New York, NY 10154, has filed an application requesting approval for the export of human drug Ifex (ifosfamide) for injection, to Canada. This drug is to be used in the treatment of cancer. The application was received and filed in the Center for Drug Evaluation and Research on November 23, 1988, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by December 23, 1988, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802, Pub. L. 99–660 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Drug Evaluation and Research (21 CFR 5.44).

Dated: December 2, 1988.

Daniel L. Michels,

Director, Office of Compliance, Center for Drug Evaluation and Research.

[FR Doc. 88–28567 Filed 12–12–88; 8:45 am]

BILLING CODE 4160–01–M

Office of Child Support Enforcement

Privacy Act of 1974; Revision To Existing System of Records

AGENCY: Office of Child Support Enforcement (OCSE), DHHS.

ACTION: Notice of Revision of Privacy Act System of Records.

SUMMARY: Notice is hereby given that OCSE is amending one of its system of records, the Federal Parent Locator Service (FPLS), DHHS/OCSE No. 09–90–0074. This system was last published at 52 FR 29732, August 11, 1987. The notice is being changed to reflect a change in the system location, system manager(s), address and routine uses of records maintained.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Donna Bonar, Program Operations Division, Office of Child Support Enforcement, 370 L'Enfant Promenade SW., Washington, DC 20447, (202) 252–5411.

The applicable text of the system of records is revised and an addition made to routine uses:

09–90–0074

SYSTEM NAME:

The Federal Parent Locator Service and Federal Tax Offset System, DHHS/OCSE.

SYSTEM LOCATION:

Office of Child Support Enforcement, Department of Health and Human Services, 370 L'Enfant Promenade SW., Washington, DC 20447, (202) 252–5411.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In cases involving International Child Support cases, the FPLS will route the name and SSN of the absent parent to the U.S. Department of State. The State Department will review the cases to identify politically sensitive requests.

Information on any case identified as "sensitive" by the State Department will not be released.

* * * * *

THE U.S. DEPARTMENT OF STATE IS DESIGNATED AS THE CENTRAL AUTHORITY:

According to Public Law 100–300, Section 7(d), "The President shall designate a Federal agency * * * which may obtain information from the Federal Parent Locator Service." Executive Order 12648 of August 11, 1988 states, "The Department of State is hereby designated as the Central Authority of the United States for the purposes of the Hague Convention on the Civil Aspects of International Child Abduction."

* * * * *

SYSTEM MANAGER(S) AND ADDRESS:

Director, Program Operations Division, Office of Child Support Enforcement, Department of Health and Human Services, 370 L'Enfant Promenade, 4th Floor, Washington, DC 20447.

* * * * *

Date: December 5, 1988.

Approval:

Robert C. Harris,

Associate Deputy Director, Office of Child Support Enforcement.

BILLING CODE 4150–04–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N–88–1902]

Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notices.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork

Reduction Act. The Department is soliciting public comments on the subject proposals.

ADDRESS: Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 755–6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notices list the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Date: November 22, 1988.

John T. Murphy,

Director, Information Policy and Management Division.

Proposal: Program Utilization for use in the Section 8 Existing Housing and Housing Voucher Programs
Office: Housing
Description of The Need For The Information And Its Proposed Use: Under the Section 8 Certificate Program, this information collection provides data to HUD in monitoring the use of Certificates of Family Participation and housing vouchers. These data provide HUD with the number of families under a housing assistance program contract and housing voucher contract, and also the degree of success experienced by program participants in locating and renting suitable housing.
Form Number: HUD–52683
Respondents: State or Local Governments
Frequency of Submission: Monthly, Quarterly, and Annually
Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Monthly reporting	2,000		12		.21		5,100
Quarterly reporting	2,000		4		.14		1,152
Annually reporting	2,000		1		1.30		2,588

Total Estimated Burden Hours: 8,840
Status: Extension
Contact: Gwendolyn S. Carter, HUD, (202) 755–6477; John Allison, OMB, (202) 395–6880

Date: November 21, 1988.

Proposal: Certificate of Need for Health Facility and Assurance of Enforcement of State Standards
Office: Housing
Description of The Need For The Information And Its Proposed Use: Sections 232 and 242 of the National Housing Act authorize mortgage insurance for nursing homes and/or intermediate care facilities (ICFs), board care homes, and hospitals. The form, Certificate of Need, is used and needed by the nursing homes, ICFs, and hospitals to obtain approval for an insured loan.
Form Number: HUD–2576–HF
Respondents: State or Local Governments, Businesses or Other For-Profit, and Non-Profit Institutions
Frequency of Submission: On Occasion
Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Certificate	100		1		.2		20
Study	20		1		150.0		3,000
Recordkeeping	120		1		.2		24

Total Estimated Burden Hours: 3,044
Status: Reinstatement

Contact: C. Edward Lewis, Jr., HUD, (202) 755–6223; John Allison, OMB, (202) 395–6880

Date: November 22, 1988.

BILLING CODE 4210–01–M

[Docket No. N–88–1901]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 755–6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: This Notice informs the public that the Department has submitted to OMB, for emergency processing, an information collection package with respect to the Comprehensive Homeless Assistance Plan (CHAP) under Subtitle A of Title IV of the Stewart B. McKinney Homeless Assistance Act (Pub. L. 100–77, approved July 22, 1987).

The information collection requirements in this package are the result of amendments to the CHAP contained in the Stewart B. McKinney Homeless Assistance Amendments Act of 1988, Pub. L. 100–628 (Approved November 7, 1988). Under Section 485 of the 1988 McKinney Act, the Department has 60 days from the date of statutory enactment (i.e., by January 6, 1989 in which to publish a notice implementing the new provisions. In order to meet this statutory deadline, the Department has requested OMB to complete its paperwork review of the Emergency Shelter Grants Notice by December 12, 1988. Any control number issued by OMB to cover this emergency situation would be valid for no more than 90 days.

To ensure that the public has an adequate opportunity to comment on these information collection requirements, HUD also intends to submit the CHAP Notice to OMB for regular paperwork review. The public will then have an additional 60 day period in which to comment on the paperwork requirements.

The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of reponse; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3407 of the Paperwork Reduction Act, 44 U.S.C. 3507; section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Date: December 7, 1988.

John T. Murphy,

Director, Information Policy and Management Division.

Proposal: Comprehensive Homeless Assistance Plan (FR–2386)
Office: Community Planning and Development
Description of the Need for the Information and Its Proposed Use: States, metroplitan cities, and urban counties are required to submit a comprehensive homeless assistance plan and annual progress report in order to receive assistance under Title IV—Housing Assistance.
Form Number: None
Respondents: State or Local Governments and Non-Profit Institutions
Frequency of Submission: Annually
Reporting Burden:

	Number of respondents	x	Frequency of response	x	Hours per response	=	Burden hours
Annual submission of CHAPS	375		1		31.00		11,625.00
Sharing of information copies of CHAPs	375		1		.75		281.25
Assurance of drug-free homeless facility	375		1		.25		93.75
Annual performance report	375		1		16.00		6,000.00
Substantive response to HUD recommendations on annual performance report	125		1		3.00		375.00

Total Estimated Burden Hours: 18,375
Status: Revision
Contact: James R. Broughman, HUD, (202) 755–5977; John Allison, OMB, (202) 395–6880.

[Finance Docket No. 31370]

Orlando Utilities Commission; Operation Exemption; Between a Point Near Taft, FL, and Stanton Energy Center, FL

Orlando Utilities Commission (OUC) has filed a notice of exemption to operate as a Class III rail carrier over an existing spur track owned by OUC between a point near Taft, FL, and Stanton Energy Center, FL.[1]

The line extends from a location approximately 1.8 miles south of Taft and extends east and north for a distance of approximately 17.54 miles to the property boundary of the Stanton Energy Center, a coal-fueled electric generating facility owned and operated by OUC. The spur track, including sidings and sidetracks, is approximately 25.24 miles of trackage. All trackage is located in Orange County, FL. Any comments must be filed with the Commission and served on Tom B. Tart, Orlando Utilities Commission, 500 South Orange Avenue, Orlando, FL 32802; Frederic L. Wood, 1275 K Street, NW., Washington, DC 10005; and Ken van Assendserp, Gallie's Hall, Suite 200, 225 South Adams Street, Tallahassee, FL.

The notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: December 8, 1988.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035–01–M

[1] The Railway Labor Executives' Association (RLEA) and the United Transportation Union filed an unsupported request for labor protection, claiming that this transaction is subject to the mandatory labor protection provisions of 49 U.S.C. 11347. OUC replied, seeking denial of the request. Since this transaction involves an exemption from 49 U.S.C. 10901, only a showing of exceptional circumstances will justify the imposition of labor protective conditions. RLEA's and UTU's request is denied because the requisite showing has not been made. *See Class Exemption—Acq. & Oper. of R. Lines under 49 U.S.C. 10901*, 1 I.C.C.2d 810 (1985).

[Docket No. AB-55 (Sub-No. 266)]

CSX Transportation, Inc.; Abandonment Between West Cedartown, GA and Maxwellborn, AL in Polk County, GA and Cleburne and Calhoun Counties, AL

The Commission has issued a Decision and Certificate authorizing CSX Transportation, Inc. to abandon its 28.65-mile rail line between milepost SG 632.35 (West Cedartown, GA) and milepost SG-661.00 (Maxwellborn, AL) in Polk County, GA and Cleburne and Calhoun Counties, AL. The certificate will become effective 30 days after publication in the **Federal Register** unless the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and it is likely that the assistance would fully compensate the railroad.

Requests for public use conditions must be filed with the Commission and the applicant within 10 days after publication.

Any financial assistance offer must be filed with the Commission and the applicant no later than 10 days from publication of this notice. The following notation shall be typed in bold face on the lower left-hand corner of the envelope containing the offer: "Rail Section, AB-OFA." Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27. Requests for public use conditions must conform with 49 CFR 1152.28(a)(2).

Decided: December 5, 1988.

By the Commission, Chairman Gradison, Vice Chairman Andre, Commissioners Simmons, Lamboley, and Phillips. Chairman Gradison commented with a separate expression. Commissioner Lamboley dissented with a separate expression.

Noreta R. McGee,

Secretary.

Badlands Shot Hole Service, Dickinson, ND; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on September 19, 1988 in response to a worker petition which was filed on behalf of workers at Badlands Shot Hole, Dickinson, North Dakota

All workers of Badlands Shot Hole, Dickinson, North Dakota were separated from the subject firm more than one year prior to the date of the petition. In accordance with section 223(b) of the Omnibus Trade and Competitivenes Act of 1988, as amended by Pub. L. 100–418, no certification may apply to any worker whose last total or partial separation from the subject firm occurred before October 1, 1985. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC, this 21st day of November, 1988.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Reda Pump Division TRW Energy Products Group; Marshall, TX; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on October 3, 1988 in response to a worker petition which was filed on behalf of workers at Reda Pump Division, TRW Energy Products Group,

Marshall, Texas. The workers were engaged in the production of electrical, submergible, and centrifugal pumps for the oil drilling industry.

All workers were separated from the subject firm more than one year prior to the date of the petition. Section 223 of the Act specifies that no certification may apply to any worker whose last separation occurred more than one year before the date of the petition. Consequently, further investigation has been terminated.

Signed at Washington, DC, this 29th day of November 1988.

BILLING CODE 4510-30-M

Job Training Partnership Act; Annual Program Report and Quarterly Financial Report for Worker Adjustment Programs

AGENCY: Employment and Training Administration, Labor.

ACTION: Proposed Annual Program Report and Quarterly Financial Report for Worker Adjustment Programs; request for comments.

SUMMARY: The Department of Labor is requesting comments on a proposed new reporting system needed to comply with the Economic Dislocation and Worker Adjustment Assistance (EDWAA) Act, which amended Title III of the Job Training Partnership Act (JTPA). The new provisions call for a new substate delivery system, new organizational units to provide rapid response assistance to workers and communities undergoing major layoffs, an emphasis on quality training, and other new and expanded approaches to serving dislocated workers. Amendments also revise the provisions regarding the Secretary's responsibilities and authority for setting performance standards, for monitoring performance and expenditures, for reallotment determinations, and for record keeping and reporting. The proposed system consists of an annual report of program outcomes and worker characteristics, and a quarterly financial report of funding availability and expenditures. These reports are needed (1) to set transitional substate performance standards and for future standards-setting, (2) to adjust standards for varying types of training to enable States to award incentives for long-term training, (3) to calculate reallotments and for financial reconciliation, (4) for program administration, management and oversight, and (5) for public and congressional information.

DATE: Comments must be submitted on or before January 6, 1989.

ADDRESS: Comments should be addressed to the Assistant Secretary of Labor for Employment and Training, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. Attention: Karen Greene. Comments should also be sent to the OMB reviewer, Bernard Eydt: Telephone (202) 395-6880; Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Karen Greene. Telephone (202) 535-0687.

SUPPLEMENTARY INFORMATION: The Department of Labor is proposing a new reporting system for dislocated workers. The system includes two reports; Workers Adjustment Annual Program Report and the Worker Adjustment Quarterly Financial Report. The proposed reports have been forwarded to the Office of Management and Budget (OMB) for review pursuant to the provisions of the Paperwork Reduction Act. The Department is also publishing the proposed reports in the **Federal Register** in order to obtain broad comment on the Department's intended EDWAA reporting requirements. Upon completion of the OMB review, the Department will notify the worker adjustment system of any resulting changes.

A. Authority and Purpose of the Worker Adjustment Program Reporting Requirements

Reporting instructions are necessary to comply with the provisions of JTPA regarding the Secretary's responsibilities and authority for setting performance standards and for record-keeping and reporting as indicated below.

- Section 106—*Performance Standards*. This section directs the Secretary to prescribe standards for dislocated worker programs under Title III. The new provisions amend (e) of this section to direct the Secretary to establish parameters within which Governors may vary standards for substate areas based on local economic factors, characteristics of the population to be served and types of services to be provided. Section 106(g)(2) further requires an adjustment in performance standards to account for the difference in costs resulting from serving workers receiving needs-related payments.
- Section 165—*Reports, Record Keeping, and Investigations.* This section requires States and substate grantees to maintain records and report information regarding program performance and fiscal management as specified by the Secretary.
- Section 169—*Administrative Provisions.* The Secretary is directed at (d)(1) to submit an annual report to Congress summarizing program achievements and problems in meeting statutory objectives and, where appropriate, suggest recommendations for program modifications or administrative action.
- Section 303—*Reallotment.* This section requires the Secretary to recapture all unexpended funds in excess of 20 percent of a State's prior year's allotment, plus any other unexpended funds from the year preceding that prior year. These funds will be realloted to those State that have expended at least 80 percent of their prior year's allotment.
- Section 311—*Incentives.* This section mandates that each State plan include incentives for programs that provide long-term training.
- Section 315—*Cost Limitations.* This section describes the limits on expenditures for retaining activities, needs-related payments and supportive services, and administration to which States and substate grantees must adhere.
- Section 322—*Federal Oversight.* The Secretary is directed at (a)(4) to monitor performance and expenditures of Title III programs and annually certify compliance with standards prescribed by the Secretary under 106(g).

These provisions require a new statewide worker adjustment reporting system to conform to programmatic changes and Departmental policy. The new reports include (1) quarterly State financial, and (2) expanded annual performance reporting at the State and substate levels. Justification for more frequent statewide expenditure reporting, and expanded annual reporting at the State and substate level, is:

- Quarterly reporting of expenditures is necessary to comply with the new reallotment requirements, increased Federal monitoring responsibility, and budget preparation. It is anticipated that more frequent monitoring will enable to the Department and States to identify financial management problems—especially those associated with the implementation of a new program during the first two years—and resolve them before the year's end to minimize Federal reallotment actions.
- Data on program performance, participant characteristics and types of services provided must be collected at

the substate level in order to set substate standards.

• Without substate data, objective and defensible local standards cannot be set because the effects on performance of varying significant local conditions cannot be systematically estimated.

• Federal reporting is the most cost effective method for collecting consistent financial, program activity and performance information needed for program management, oversight, and public information/congressional requests to show the status of high interest activities and program achievements. In addition, such a system ensures the comparability of the data across States and substate areas to make objective compliance, reallotment, budget and performance assessment determinations.

B. Reasons For Revisions

These revisions are being proposed for several reasons:

• The Department anticipates adding new standards in the future—postprogram job retention, a measure of pre/postprogram wage, and separate placement levels for programs offering basic readjustment services only as compared to those providing retraining. Data collection must begin in Program Year 1989 for the Secretary and governors to have adequate information to set and adjust these standards no later than PY 1992.

• The Department is considering adding a process measure for monitoring State rapid response activities. Data on the timeliness and scope of rapid response events will be used by the Department to make more objective assessments about the administrative management of this new activity for purposes of responding to the required report to Congress and on-going programmatic oversight.

• Reporting of training duration and completions by major area of retraining specified in the Act will enable the Department to improve its adjustments to program outcomes by accounting for differences in program intervention and duration. These data will also be used by States to make objective incentive awards for longer-term training, as required in the Act.

• New activities and service levels for newly defined eligibility groups will become the subject of public and congressional inquiry as the program is implemented.

C. Proposed Changes

Worker Adjustment Annual Program Report (9019)

The Department is proposing the following additions to currently reported items for inclusion in the Worker Adjustment Annual Program Report:

Status of Certificates of Continuing Eligibility:

• Number of Certificates of Countinuing Eligibility issued.

• Number of certificates redeemed.

These data items address a new program feature which has congressional interest. The total number of certificates issued is useful for public information and program oversight to determine the extent to which substate grantees are extending eligibility to displaced workers who do not immediately enroll in the program. In addition, data on number of participants who have redeemed certificates will identify a unique group within the eligible population. Performance expectations may differ for this group compared to other participants because they initially chose to postpone enrollment in EDWAA until after attempts to obtain employment or other training.

Performance Outcomes:

• Number placed by major program activity.

A subset of terminations who entered employment is needed to calculate separate employment rates for those in retraining programs and for basic readjustment services only.

• Numbers relocated in jobs out of area.

A subset of entered enployments from retraining that identifies those individuals who were placed in jobs outside the area. Data will identify those localities that have few alternative job sources, necessitating securing a placement outside the local labor market. Large numbers of relocations may identify programs in declining local economies, which are expected to have lower overall placement rates/wages and higher costs due to relocation expenses. Data will be used to adjust standards to account for these faltering economies.

• Called back/remained with the layoff employer.

• Transferred to other JTPA programs.

• Entered non-JTPA training.

A subset of terminations added to identify those for whom placement in unsubsidized employment was not the most appropriate outcome.

These three subsets of terminations identify those recalled to their old jobs or who are provided training elsewhere through Trade Adjustment Assistance (TAA), local labor union or other JTPA service provider. Data will allow States to account for what might otherwise be an excessive amount of negative terminations. These terminations reflect compliance with other programmatic goals—coordination and rapid response—in which participants receive services and/or training prior to dislocation, yet are not placed when they leave the program.

Replacement Wage Outcome:

• Average Hourly Wage (Pre-program): Necessary data element to compute the proposed replacement wage standard and/or an adjustment to the placement rate/job retention standard that accounts for participants' previous work experience.

Characteristics that affect outcomes:

• Age distinctions: (30–44 and 45–54 years olds). These distinctions were made to emphasize the differing levels of difficulty programs faced in placing adults at their prime versus pre-retirement age.

• Educational category: Allows adjustment to standards for those advantaged by having more education (college graduate and above).

• Economically disadvantaged: Allows adjustment to standards for those facing barriers to employment.

• Eligibility categories: Identifies groups that will be the focus of congressional interest, be indicators of dislocated worker coverage and have differing impacts on performance (e.g., those affected by substantial lay-off as opposed to previously self-employed or dis-placed homemaker). Identifying more adequately those eligible participants with more readily transferable skills as compared to those with minimal or obsolete skills will enable States to adjust performance standards for varying levels of service to those groups.

• Trade Readjustment Assistance (TRA) claimant: Enables standards to be adjusted for those participants who need long-term training in order to qualify for benefits who might otherwise not participate in such training because of insufficient supplemental income. This item is also included due to high congressional interest in tracking agency coordination.

• Veterans: The total number is included in response to congressional interest in the extent of service to this group. Breakout for Vietnam-era veterans is needed to comply with the statutory requirement to adjust standards for groups specifically cited in the Act at section 106(d)(3) as having special circumstances.

• Needs-related Recipients/ Payments: total expenditures and numbers of participants receiving payments are necessary to make mandated adjustment for the higher costs of serving those receiving needs-related payments; and/or an adjustment ot the placement/job retention standards to account for those in long-term training who might otherwise not participate in such training because of insufficient supplemental income.

Program Activity:

• Receipt of major program activity.

Differentiating between receipt of retraining and basic readjustment services alone is a critical distinction for estimating performance. Length of participation in training, placement and wage levels differ significantly depending on whether participants receive services only, or any retraining. Thus, data are necessary to make adjustments to standards based on the percentage of terminees in each major program activity. This information is essential for program management to determine how many received retraining, as compared to the total expenditures for this activity.

• Duration of retraining received:

—Less than 26 weeks
—26–51 weeks
—52 or more weeks

Distinguishes between short-term, long-term and multiyear training which will be critical in monitoring how well the system is meeting long-term training goals of the program. This information will enable States to make incentive awards based on objective measures of longer-term training as required by the Act. Data will also account initially of what might otherwise be considered excessive negative terminations and higher costs—in the lengthier or multi-year programs—until a sufficient number of participants complete the program.

• Completions of retraining by specific activity:

—Basic Education
—Occupational Skills Training
—On-the-Job Training
—General Educational Development Attainment

Reporting retraining completions by specific activitiy will provide program oversight data that relates the volume of those who complete each retraining activity to a program's success in attaining placements and higher wages for participants. Data will be critical for adjusting and rewarding program performance by accounting for differences in program interventions.

With the Departmental emphasis on substantive retraining, this information will be most timely in improving national and State standard-setting to adjust for quality of training.

The Department is proposing the follwing addition (Part B of the Worker Adjustment Annual Program Report) as a statewide summary of new rapid response activities.

• Number of Worker Adjustment and Retraining Notification (WARN) notices received.

• Number of rapid response contacts made:

—1–49 affected employees
—50–499 affected employees
—500 or more affected employees

• Number of labor-management committees formerd.

• Number of assessments for conducting a plant purchase study.

• Accrued costs of assessments.

These reporting items enable the Department to assess the effectiveness of rapid response activities in meeting program goals—timeliness and scope of onsite interventions and labor-management cooperation. These items will be used for program oversight to relate expenditures on rapid response to some measure of the scope and intensity of plant closures and layoffs that occur within States in a program year. As a new State responsibility, rapid response acitvities will be the focus of congressional and public interest.

Worker Adjustment Quarterly Financial Report (9020)

The Department is proposing the following financial report to be prepared by States on a quarterly basis to carry out the increased oversight and reallotment responsibilities of the new EDWAA provisions. This report is necessry to:

• Calculate reallotment;

• Facilitate financial reconciliation through more timely monitoring of expenditures;

• Prepare annual budgeting documents;

• Inform Congress about the impact of reallotment, new cost limitations and new program activities; and

• More closely oversee program service and expenditures for purposes of Federal administration and management.

The quarterly financial report will comprise the following information:

Funding availability: (Formual-Funded and Secretary's National Reserve grants).

• Current year.

• Reallotted funds (for Formula-Funded grants only).

• Unexpected prior year.

• Unexpected previous year.

Data on funding availability by year of allotment are needed to comply with statutory provisions requiring annual reallotments, and limiting obligational authority to three years.

Accrued expenditures: (Formula-Funded and Secretary's National Reserve grants).

• Current year allotment.

• Prior year allotment.

• Previous year allotment.

These data are needed to comply with required program administration and monitoring activities, including reallotments of excess unexpended funds, and in the case of National Reserve, review and approval of additional grant requests.

Funds reserved for substate grantees in need:

• Current year's reserve.

• Amount distributed within State to substate grantees.

Governor's Substate Discretionary Allocations:

These data are needed to comply with required program administration and monitoring activities to track the flow of funds in a timely manner. Analysis of expenditure and identification of causes of underexpenditure leading to reallotment will require information on the timeliness of within State distribution of funds.

Expenditures distributed by cost category: (State and substate funds)

• Rapid Response.

• Basic Readjustment.

• Retraining.

• Needs-Related Payments.

• Supportive Services.

• Administration.

Data are needed for required program administration and monitoring to track the flow of funds in a timely manner. Analysis of expenditures and timely identification of (1) causes of underexpenditures leading to reallotment; and (2) causes of overexpenditure leading to non-compliance with new cost limitations will assist the Department and States in reconciling financial management problems and in taking corrective action before deficiencies become serious enough to warrant reallotment or audit disallowances.

The method of data collection and frequency of reporting will be changed to permit fiscal data to be collected quarterly and program information and outcome data to be reported by substate grantees and forwarded to Governors. The State forwards reports to the

Department. The purpose of this reporting is to (1) enable the Secretary to establish performance standards, monitor statewide activities at the national level and calculate reallotments, (2) allow Governors to adjust standards for substate areas, (3) evaluate performance against standards, monitor local activities at the State level and make incentive determinations for long-term training, and (4) enable the Secretary to report to Congress and the Treasury and to prepare annual budgetary documents.

D. Public Comment

In the development of this new reporting system, meeting were held in September to obtain feedback from individuals from all sectors of the JTPA system regarding actual field experiences. In all, over 50 State and local policy makers, administrators, technicians and service providers, and other interested individuals participated in the various discussions held on the new reporting requirements. This request for comments is another important part of the participatory process.

E. Cost to the System

This data request is expected to increase the overall reporting burden as these proposed reports will not replace current Title III reporting for up to two years. Once the worker adjustment program is completely implemented, however, the net increase in costs should be minimal as existing management information systems in most States already collect (1) financial information on a quarterly, if not monthly basis; and (2) detailed information on each participant at entry, participation in program activities during enrollment, and at time of followup—13 weeks postprogram.

F. OMB Submission

The documents appended to this notice have been submitted to OMB for review under the Paperwork Reduction Act as a new information collection system.

Signed at Washington, DC, this 30th day of November, 1988.

Roberts T. Jones,

Assistant Secretary for Employment and Training.

Appendix—Worker Adjustment Annual Program Report and Quarterly Financial Report

Worker Adjustment Program Annual Program Report (ETA 9019)

1. Purpose

The Economic Dislocation and Worker Adjustment Assistance Act (EDWAA) Annual Program Report (WAPR), Part A, displays cumulative data on participation, termination, performance measures and the socio-economic charcteristics of all terminees on an annual basis. The information will be used to determine levels of program service and performance measures. Selected information will be aggregated to provide quantitative program accomplishments on a local, State, and national basis.

Part B displays cumulative information on selected Rapid Response activities in the State. Part C is a financial summary of Secretary's National Reserve Grants projects in the State.

These reporting requirements have been approved by the Office of Management and Budget (OMB) according to the Paperwork Reduction Act of 1980, as amended, under OMB Approval No. 1205_____, expiration date _____.

2. General Instructions

The Governor will submit: (1) a separate WAPR for *each* designated Substate Area (SSA) (a Statewide summary of these SSA data need not be submitted); (2) a separate WAPR covering participants and terminees in statewide, regional or industrywide projects funded under section 302(c)(1)(B) of EDWAA; and (3) a separate WAPR covering participants and terminees in projects funded under Secretary's National Reserve Grants (Section 302(a)(2)). Recipients may determine whether the reports are submitted on WAPR forms or as a computer printout, with data, including signature and title, date signed and telephone number, arrayed as indicated on the WAPR form. If revisions are made to the WAPR data after the reporting deadline, revised copies of the WAPR should be submitted to DOL as soon as possible according to the required reporting procedures.

Note. For WAPR reporting purposes, EDWAA shall refer to: (1) programs operated by Substate grantees with funds authorized under Sections 302(c)(2) and 302(d) or otherwise distributed by the Governor uder Section 302(c)(1)(E) and (2) projects operated by the Governor with funds authorized under Sections 302(c)(1) and 302(a)(2) of EDWAA.

The reporting period begins on the starting date of each Job Training Partnership Act (JTPA) program year, as stated in section 161 of the JTPA. Reports are due in the National and Regional Offices no later than 45 days after the end of each program year. Two copies of the WAPR are to be provided to: Employment and Training Administration, U.S. Department of Labor, ATTN: TSVR—Rm. S-5306, 200 Constitution Avenue NW., Washington, DC 20210.

At the same time an additional copy of the WAPR is to be provided to the appropriate Regional Administrator for Employment and Training in the DOL Regional Office that includes the State in which the JTPA recipient is located.

Note. The current JASR, ETA 8580 (June 1988), is to continue to be used for programs operating with PY88 and earlier year's funds. The WAPR is to be used beginning July 1, 1989, for PY89 programs funded under EDWAA.

3. Facsimile of Form

See the following page.

4. Instructions for Completing the Worker Adjustment Program Annual Program Report (WAPR)

a. *State/Substate Area Name and Address.* On separate Section 302(c)(1) and Section 302(a)(2) reports, enter the name and address of the State agency that will administer the Statewide programs. For SSA reports, enter the name and address of the Substate grantee that will administer the SSA programs.

REMARKS:

BILLING CODE 4510-30-C

b. *ETA/SSA Code.* Enter the ETA-assigned Substate Area Code number on SSA reports. On State reports enter NA.

c. *Report Period.* Enter in "Form" the beginning date of the designated JTPA program year and enter in "To" the ending date of that progam year.

d. *Signature and Title.* (at bottom of the page) The authorized official signs here and enters his/her title.

e. *Date Signed.* Enter the date the report was signed by the authorized official.

f. *Telephone Number.* Enter the area code and telephone number of the authorized official.

5. General Information

Unless otherwise indicated, data reported on characteristics of terminees should be based on information collected at the time of eligibility determination.

Characteristics Information Obtained on an Individual at the Time of Eligibility Determination for the Recipient's EDWAA Program Should Not be Updated When the Individual Terminates From the EDWAA Program

Part A. Dislocated Worker Activities

This part is to be completed on single separate reports for: (1) *each* Substate Area; (2) all Statewide, Regional and Industrywide programs administered by the Governor, on a combined basis (Section 302(c)(1); and (3) all projects, on a combined basis, funded under Section 302(a)(2), Secretary's National Reserve Grants.

Section I—Participation and Termination Summary. Section I displays the EDWAA program's accomplishments in terms of the total cumulative number of participants in the program and the number and types of terminations from the program, as of the end of the reporting period.

Entries for Items I.A, I.B. and I.C. are cumulative from the beginning of the program year through the end of the reporting period.

Item I.A. *Issued Certificate of Continuing Eligibility (CCE)*

Enter the total number of applicants to whom a Certificate of Continuing Eligibility was issued during this program year, as provided in Section 316(b) of EDWAA, by the Substate grantee through the end of the reporting period. NOTE: Enter zero for this item on the Governor's State report (Section 302(c)(1)), and the report for Secretary's National Reserve Grants (Section 302(a)(2)).

Item I.B. Total Participants

Enter the total number of participants (as defined below), including both those on board at the beginning of the program year and those who have entered during the program year.

"Participant" means any individual who has: (1) been determined eligible for participation upon intake; and (2) started receiving Basic Readjustment Services or Retraining funded under EDWAA, following intake. Individuals who receive *only* outreach and/or intake and initial assessment, post-termination counseling or postprogram follow-up are excluded. NOTE: Also exclude individuals who receive *only* Rapid Response Assistance and information, per Section 314(b), provided by the State's Disclocated Worker Unit.

Item I.B.1. All CCES Redeemed for Retraining

Enter the total number of *unexpired* participant CCEs, regardless of year issued, redeemed for Retraining during this program year by the Substate grantee, through the end of the reporting period. Include all CCEs so redeemed that were issued by any Substate grantee for periods not to exceed 104 weeks prior to redemption. This item is a sub-breakout of Item I.B. NOTE: Enter zero for this item on the Governor's State report (Section 302(c)(1)), and the report for Secretary's National Reserve Grants (Section 302(a)(2)).

Item I.C. Total Terminations

Enter the total number of participants who terminated (as defined below) from the program during the reporting period. Include all participants who received no Basic Readjustment Services (except supportive services and/or counseling) or Retraining for 90 days. *This item is the sum of Items I.C.1. through I.C.6.*

"Termination" means the separation of a participant from the program who is no longer receiving Basic Readjustment Services or Retraining funded under EDWAA. Individuals may be considered participants for up to 90 days after last receipt of Basic Readjustment Services or Retraining, during which time they may continue to receive supportive services, as provided in Section 314 (c)(15) of EDWAA. For purposes of calculating average weeks participated, this single 90-day period between "last receipt of Basic Readjustment Services or Retraining under EDWAA" and actual date of termination is defined as "inactive status" and is not to be included in "Average Weeks Participated". Terminees may continue to receive counseling necessary to assist in the retention of employment, for not more than 6 months following last receipt of Basic Readjustment Services or Retraining.

Item I.C.1. Entered Unsubsidized Employment from Retraining

Enter the total number of participants who, at termination, entered full- or part-time unsubsidized employment from Retraining through the end of the reporting period. (These participants may or may not have received Basic Readjustment Services.) This item is a sub-breakout of Item I.C.

Item I.C.1.a. Relocated Out of Area.

Enter the total number of participants who, at termination, entered unsubsidized employment after relocating outside the Substate Area which provided such relocation assistance, or within or outside of the State, if this assistance was provided by a Statewide SSA or by a program administered by the Governor. This item is a sub-breakout of Item I.C.1.

Item I.C.2. Entered Unsubsidized Employment From Basic Readjustment Services Only

Enter the total number of participants who, at termination, entered full- or part-time unsubsidized employment from Basic Readjustment Services ONLY through the end of the reporting period. This item is a sub-breakout of Item I.C.

Item I.C.3. Called Back/Remained With the Layoff Employer

Enter the number of terminees from the Title III program who, after being laid off by an employer, were recalled by that employer to a permanent job. Also include Title III program terminees who remained in a permanent job with an employer after receipt of a layoff notice from that employer. This item is a sub-breakout of Item I.C. NOTE: Do not include such terminees in the entry for Item I.C.1. above.

Item I.C.4. Transferred to Other JTPA Programs

Enter the number of terminees so transferrred to programs funded under another JTPA title including Title III-Formula and Title III-National Reserve. Also include on this line terminees who transferred to EDWAA programs operated by another Substate grantee, or to EDWAA programs operated by the Governor (and conversely). This item is a sub-breakout of Item I.C.

Item I.C.5. Entered Non-JTPA Training

Enter the number of terminees who entered, during the program year, training not funded with JTPA monies. This item is a sub-breakout of Item I.C.

Item I.C.6. All Other Terminations

Enter by column the total number of participants who were terminated for reasons other than those in Items I.C.1. through I.C.5., successful or otherwise, through the end of the reporting period.

Section II—Terminee Performance Measures Information. Section II displays performance measures/parameters information. As indicated previously, data reported on characteristics of terminees should be based on information collected at time of eligibility determination unless otherwise indicated.

Governors may develop any participant record which meets the requirements of Section 629.35(c) and (d) of the JTPA regulations. The DOL/ETA *Technical Assistance Guide: The JTPA Participant Record,* dated May 1983, may be used as a reference.

Line Item Definitions and Instructions

Sex

Line 1 Male
Line 2 Female

Distribute the terminees according to Sex. The sum of Lines 1 and 2 should equal Item I.C.

Age

Line 3 29 and Under
Line 4 30–44
Line 5 45–54
Line 6 55 and Over

Distribute the terminees according to Age. The sum Lines 3 through 6 should equal Item I.C.

Education Status

Line 7 Less Than High School
Line 8 High School Graduate or Equivalent (No Post-High School)
Line 9 Post-High School Attendee
Line 10 College Graduate and Above

Distribute the terminees according to Education Status. The sum of Lines 7 through 9 should equal Item I.C. NOTE: Line 10 is a sub-breakout for a specific group included in Line 9.

Family Status

Line 11 Single Head of Household with Department(s) Under Age 18.

Enter the total number of terminees for whom the above Family Status classification applies.

RACE/Ethnic Group

Line 12 White (Not Hispanic)
Line 13 Black (Not Hispanic)
Line 14 Hispanic
Line 15 American Indian or Alaskan Native
Line 16 Asian or Pacific Islander

Distribute the terminees according to the Race/Ethnic Groups listed above. For purposes of this report, Hawaiian Natives are to be recorded as "Asian or Pacific Islander". The sum of Lines 12 through 16 should equal Item I.C.

Other Barriers to Employment

Line 17 Limited English Language Proficiency
Line 18 Handicapped
Line 19 Reading Skills Below 7th Grade Level
Line 20 Economically Disadvantaged

Enter the total number of terminees for whom *each* of the above Other Barriers to Employment apply.

Dislocated Status

Line 21 Terminated/Laid Off
Line 22 Plant Closure/Substantial Layoff
Line 23 Long-term Unemployed
Line 24 Previously Self-Employed
Line 25 Additional Dislocated Worker (Displaced Homemaker)

Distribute ther terminees according to Dislocated Status, as defined in Section 301(a) of the Act and further defined in 20 CFR 631.3 of the regulations. *Lines 21 through 25 are mutually exclusive and the sum of these five lines should equal Item I.C.* Include a terminee in the entry for the *single* most appropriate of the five status lines in this grouping for which s/he qualifies.

Benefits Status

Lien 26 U. C. (Unemployment Compensation) Claimant
Line 27 TRA (Trade Readjustment Assistance) Claimant

Enter the total number of terminees for whom each of the above benefits status classifications apply.

Labor Force Status

Line 28 Unemployed: 15 or More Weeks of Prior 26 Weeks

Enter the total number of terminees for whom the above Labor Force Status classification applies.

Veteran Status

Line 29 Veteran (Total)
Line 30 Vietnam Era

Enter the total number of terminees for whom *each* of the above Veterans classifications apply, as defined in Section 4 (26)(A)(B) and (D) of the Act. Line 30 is a sub-breakout for a specific group included in Line 29.

Other Program Information

Line 31 Average Weeks Participated

Enter the average number of weeks of participation in the EDWAA program for all terminees. Weeks of participation include the period from the date an individual becomes a participant in EDWAA through the date of a participant's last receipt of Basic Readjustment and/or Retraining. Exclude the single period of up to 90 days during which an individual may remain in an inactive status prior to termination. Time in inactive status for all terminees should not be counted toward the actual number of weeks participated. Inactive status is defined as that period between "last receipt of Basic Readjustment Services and/or Retraining under EDWAA" and actual date of termination. (See Item I.C.)

To calculate this entry: Count the number of days participated for each terminee, including weekends, from the start date of his/her participation in EDWAA until his/her last receipt of Basic Readjustment Services and/or Retraining under EDWAA. Divide this result by 7. This will give the number of weeks participated for that terminee. Sum all the terminees' weeks of participation and divide the result by the number of terminees, as entered in Item I.C. This entry should be reported to the nearest whole week.

Line 32 Average Hourly Wage—Pre-Program

Enter the average hourly pre-EDWAA wage of all terminees. In calculating this average, use the hourly wage from the job of dislocation, *unless that job ended more than 52 weeks before the date of application to the EDWAA program.* If the job of dislocation ended more than 52 weeks prior to date of application to the EDWAA program, use the hourly wage from the most recent job, if any. Those terminees who had no employment during the 52 weeks immediately before EDWAA should be counted as "$0.00" hourly wage. NOTE: Record the number of individuals with "$0.00" hourly wages in "Remarks" on Part A, Page 2.

To calculate this entry: Sum the pre-program hourly wage for all terminees shown in Item I.C. Divide the result by the number of terminees shown in Item I.C. NOTE: For the calculation, use the hourly wage regardless of whether the individual was employed full- or part-time.

Line 33 Average Hourly Wage at Termination

Enter the average hourly wage at termination for the total number of terminees in Items I.C.1. through I.C.3.

To calculate this entry: Sum the hourly wage at termination for all the terminees shown in Items I.C.1. through I.C.3. Divide the result by the number of terminees shown in Items I.C.1. through I.C.3.

Hourly wage includes any bonuses, tips, gratuities and commissions earned.

Line 34 Total Program Costs (Federal Funds)

Enter the total accrued expenditures, through the end of the reporting period, of the funds allocated to the SSA under Sections 302(c)(2) and 302(d) of the Act or otherwise distributed by the Governor to the SSAs under Section 302(c)(1)(E). On the separate WAPRs: (1) covering participants and terminees projects funded under Section 302(c)(1); (2) or participants and terminees in Secretary's National Reserve Grants projects funded under Section 302(a)(2) of EDWAA, enter the total expenditures for all participants and terminees served in such programs through the end of the reporting period. Include expenditures of Federal funds only.

Note.—Entries will be made to the nearest dollar. Negative entries are not acceptable. The WAPR program cost data will be compiled on an accrual basis. If the recipient's accounting records are not normally maintained on an accrual basis, the accrual information should be developed through an analysis of the records on hand or on the basis of best estimates.

The sum of the entries for Line 34, Total Program Costs, of the WAPR (i.e., total for the State's SSAs under EDWAA) should equal the entry for Col. b., Line 22, Total Accrued Costs (Substate) of the WQFR, for the same recipient, that includes the final quarter of the same program year.

Line 34 on the WAPR for the Governor's Statewide activity (Section 302(c)(1)), should equal Line 22 on the WQFR for the same recipient that includes the final quarter of the same program year; and Line 34 on the WAPR for the Secretary's National Reserve Grants (Section 302(a)(2)) to the State should equal Line 16 on that WQFR.

Line 35 Needs-Related Payments

Enter the total accrued expenditures for needs-related payments to eligible dislocated workers who do not qualify or have ceased to qualify for Unemployment Compensation, in order to enable such workers to participate in training or education programs under EDWAA (Section 314(e)). This is a sub-breakout of Line 34.

Line 36 Needs-Related Recipients

Enter the total of eligible dislocated workers who received the needs-related payments, as entered in Line 35, in order to enable such workers to participate in training or education programs under EDWAA.

Line 37 Total Available Federal Funds

Enter the total Federal funds available for the EDWAA program described on this report including (1) unexpended funds carried over from previous program years, (2) funds allocated or awarded for this program year, and (3) any reallocation that *increased or decreased* the amount of funds available for expenditure through the end of this reporting period. Entries will be made to the nearest dollar.

Section III—Follow-up Information. Section III displays information based on follow-up data which must be collected through participant contact to determine an individual's labor force status and earnings, if any, during the 13th full calendar week after termination and the number of weeks s/he was employed during the 13-week period. Follow-up data should be collected from participants whose 13th full calendar week after termination ends during the program year (the follow-up group). Thus, follow-up will be conducted for individuals who terminate during the first three quarters of the program year and the last quarter of the previous program year.

In order to ensure consistency of data collection and to guarantee the quality of the follow-up information, follow-up procedures must satisfy certain criteria. (See the Follow-up Guidelines included in these WAPR instructions, Appendix A.) Other procedures used to collect the follow-up data are at the discretion of the Governors.

Note.—Every precaution must be taken to prevent a "response bias" which could arise because it may be easier to contact participants who were employed at termination than those who were not and because those who entered employment at termination are more likely to be employed at follow-up. Special procedures have been developed by which SSAs and States can monitor response bias. If your response rates for those who were and were not employed at termination differ by more than 5 percentage points, the follow-up entries for the WAPR must be calculated using the "Worksheet for Adjusting Follow-up Performance Measures" in the Follow-up Technical Assistance Guide. *If the response rates differ by 5 percentage points or less,* the following instructions for completing Lines 38–42 may be used.

Line 38 Employment Rate at Follow-up

Enter the employment rate at follow-up.

Calculate the employment rate by dividing the total number of respondents who were employed (full-time or part-time) during the 13th full calendar week after termination by the total number of respondents (i.e., terminees who completed follow-up interviews). Then multiply the result by 100. This entry should be reported to the nearest one decimal (00.0).

Line 39 Average Hourly Wage at Follow-up

Enter the average hourly wage of those employed (full-time or part-time) at follow-up.

To calculate this entry: Sum the hourly wage of each respondent employed at follow-up; and, if appropriate, add tips, overtime, bonuses, etc. Divide the sum of hourly wage for all respondents employed during the 13th full calendar week after termination by the number of respondents employed at the time of follow-up. Respondents not employed at follow-up are not included in this average. This entry should be reported to the nearest whole dollar.

Weekly earnings include any wages, bonuses, tips, gratuities, commissions *and* overtime pay earned.

Line 40 Average Number of Weeks Worked in Follow-up Period

Enter the average number of weeks worked in follow-up period.

To calculate the average number of weeks worked (full-time or part-time), divide the sum of the number of weeks worked during the 13 full calendar weeks after termination for all respondents who worked, by the *total* number of all respondents, whether or not they worked any time during this 13-week follow-up period. This entry should be reported to the nearest one decimal (00.0).

Line 41 Sample Size

Enter by column the size of the actual sample selected to be contacted for follow-up.

Note.—If oversampling was used, the sample size should include all those selected, not just the required minimum sample size. Those deceased or severely incapacitated to the point of being unable to respond at follow-up may be excluded from the sample size.

Line 42 Response Rate

Enter the overall response rate, i.e., the percentage of complete surveys obtained.

To calculate the overall response rate, divide the number of terminees with complete follow-up information by the total number of terminees included in

the follow-up sample (Line 45) and multiply by 100. This entry should be reported to the nearest whole percent.

Note.—Complete follow-up information consists of substantive answers to the required follow-up questions and may not include "don't know", "no answer" or "don't remember".

Section IV—Retraining/Basic Readjustment Services. Section IV displays information relevant to program activities.

Line 43 Received Basic Readjustment Services ONLY

Enter the total number of terminees, regardless of type of termination, who received Basic Readjustment Services ONLY, as indicated in Section 314(c) of the Act.

Note.—Individuals who receive only outreach and/or intake and initial assessment services are not participants/terminees.

Line 44 Received ANY Retraining Activity
Line 45 Less than 26 Weeks
Line 46 26–51 Weeks
Line 47 52 or More Weeks

Enter the total number of terminees, regardless of type of termination, who received ANY Retraining activity included in Section 314(d) of the Act. Lines 45–47 are sub-breakouts of Line 44 and should be used to distribute terminees who received ANY Retraining activity by actual length of stay in all Retraining activities, *whether or not such Retraining was completed.* These terminees may or may not have received Basic Readjustment Services. The sum of Lines 45–47 should equal Line 44.

Line 48 Completed Classroom Training: Basic Education
Line 49 Completed Classroom Training: Occupational Skills
Line 50 Completed On-the-job Training
Line 51 Attained GED

Enter the total number of terminees for which *each* of these Retraining completion/attainment classifications apply. A terminee should be included in *all* appropriate categories.

Note.—Basic Education in Line 48 includes remedial reading, writing, mathematics and/or English for non-English speakers. Attained GED in line 51 includes the attainment of a GED or a high school diploma upon completion of any training.

Part B. Rapid Response Activities

This part is to be completed on a single form for all EDWAA Rapid Response activities in the State and is to be submitted only with the Governor's Statewide Part A report (section 302(c)(1)). This part provides a summary of Rapid Response activities, on a statewide basis, from the beginning of the program year through the end of the reporting period. Entries are to be made as follows:

Line 52 WARN Notices Received

Enter the number of notices received under the Worker Adjustment and Retraining Notification Act (WARN) by the State Dislocated Worker Unit from the beginning of the program year.

Line 53 Number of Rapid Response Contacts

Enter the number of on-site rapid response contacts with employer and employee representatives, preferably *within 48 hours,* after the Dislocated Worker Unit became aware of a current or projected closure or substantial layoff. The purpose of such contacts are to 1) provide information on and facilitate access to available public programs and services and 2) provide emergency assistance adapted to the particular closure or layoff. (Section 314(b)(1)(A)).

Line 54 1–49 Affected Employees
Line 55 50–499 Affected Employees
Line 56 500 or More Affected Employees

Distribute by group, the number of Affected Employees included in the current or projected permanent closure or substantial layoff to which a rapid response contact was made, as reported in Line 53. The sum of the entries for Lines 54 through 56 should equal Line 53.

Note.—The entry for line 53 should be the same or greater than the entry for Line 52.

Line 57 Number of Labor-Management Committees Formed

Enter the number of labor-management committees formed through efforts of the dislocated worker unit. These committees may or may not have been formed in response to an announcement of a current or projected permanent closure or substantial layoff. (Section 314(b)(1)(B))

Line 58 Number of Assessments for Conducting a Plant Purchase Study

Enter the number of situations involving an impending permanent closure or substantial layoff in which the State provided EDWAA funds, *where other public or private sources were not expeditiously available,* for a preliminary assessment of the advisability of conducting a comprehensive study exploring the feasibility of having a company or group, including the workers, purchase the plant and continue its operation. (Section 314(b)(2))

Line 59 Accrued Costs for Assessments

Enter the accrued costs of EDWAA funds provided by the State for the preliminary assessments in Line 58. Entries will be made to the nearest whole dollar.

Part C. Secretary's National Reserve Program Summary

This part is to be completed on a single form and is to be submitted only with the Statewide Part A report for Secretary's National Reserve Grants activity for all projects in the State operated with Section 302(a)(2) funds.

This part provides a summary of program activity supported with Secretary's National Reserve funds through the end of the reporting period. Entries are to be made as follows:

Line 60 Total Federal Funds Available

Enter the total Federal funds available for expenditure during the current program year. This includes the current year Secretary's National Reserve funds and unexpected National Reserve funds from prior years available for expenditure during the current year. Entries will be made to the nearest dollar.

Note.—Line 60 on this report should equal Line 12 on the WQFR, for the same recipient, that includes the final quarter of the same program year.

Line 61 Total Accrued Costs

Enter the total actual accrued costs during the report period, without regard to the year the funds were distributed to projects. This line is the sum of Lines 62 through 67. Entries will be made to the nearest whole dollar.

Note.—Line 61 on this report should equal Part A, Line 34 on this report and Line 16 on the WQFR, for the same recipient, that includes the final quarter of the same program year.

Line 62 Rapid Response

Enter the accrued costs that can be allocated to the Rapid Reponse services cost category (20 CFR 631.13(b)) under the Governor's Reserve column only. This line is a sub-breakout of Line 61.

Line 63 Basic Readjustment

Enter the accrued costs that can be allocated to the Basic Readjustment services cost category (20 CFR 631.13(c)). This is a sub-breakout of Line 61.

Line 64 Retraining

Enter the accrued costs that can be allocated to the Retraining services cost category (20 CFR 631.13(d)). This line is a sub-breakout of Line 61.

Line 65 Needs-Related Payments

Enter the accrued costs that can be allocated to the Needs-Related Payments cost category (20 CFR 631.13(e)). This line is a sub-breakout of Line 61.

Line 66 Supportive Services

Enter the accrued costs that can be allocated to the Supportive Services cost category (20 CFR 631.13(f)). This line is a sub-breakout of Line 61.

Line 67 Administration

Enter the accrued costs that can be allocated to the Administration cost category (20 CFR 631.13(g)). This line is a sub-breakout of Line 61.

Public reporting burden for this collection of information is estimated to average 97 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this burden to the Office of Information Management, Department of Labor, Room N–1301, 200 Constitution Avenue, NW., Washington, DC 20210; and to the Office of Management and Budget, Paperwork Reduction Project (1205–), Washington, DC 20503.

Appendix A

Follow-up Guidelines

To ensure consistent data collection and as accurate information as possible, procedures used to obtain follow-up information must satisfy the following criteria:

- Participant contact should be conducted by telophone or in person. Mail questionnaires may be used in those cases where an individual does not have a telephone or cannot be reached.
- Participant contact must occur as soon as possible after the 13th full calendar week after termination but no later than the 17th calendar week after termination.
- Data reported are to reflect the individual's labor force status and earnings during the 13th full calendar week after termination and the number of weeks s/he was employed throughout the 13-week period after termination.
- Interview questions developed by DOL (see following Exhibit) must be used to determine the follow-up information reported on the WAPR. respondents must be told that responding is voluntary and that information provided by them will be kept confidential. Other questions may be included in the interview. Attitudinal questions may precede DOL questions, but questions related to employment and earnings must follow.
- Attempts must be made to contact *all* individuals unless terminee populations are large enought to use sampling.
- At least six attempts may need to be made to contact enough individuals in the follow-up group to obtain the required response rate.
- For each SSA and for Statewide and National Reserve reports (WAPR), minimum response rates of 70% are required for each of the following two groups of dislocated workers: those who entered employment at termination and those who did not enter employment at termination. The response rate is calculated as the number of terminees with complete follow-up information divided by the total number of terminees included in the group eligible for follow-up.

Exhibit

Minimum Postprogram Data Collection Questions

A. I want to ask you about the week starting on Sunday, ____, and ending on Saturday, ____, which was (last week/two/three/four weeks ago).

1. Did you do any work for pay during that week?

____Yes [Go to 2]
____No [Go to C]

2. How many hours did you work in that week?

____ Hours

3. How much did you get paid per hour in that week?

____ Dollars per hour

4. How much extra, if any, did you earn in that week from tips, overtime, bonuses, commissions, or any work you did on the side, before deductions?

____ Dollars

B. Now I want to ask you about the entire 13 weeks from Sunday, ____, to Saturday, ____.

5. Including the week we just talked about, how many weeks did you work at all for pay during the 13-week period?

____ Weeks [Go to end]

Alternative Questions

C. If answered "NO" to Question 1:
Now I want to ask you about the entire 13 weeks from Sunday, ____, to Saturday, ____.

6. Did you do any work for pay during that 13-week period?

____Yes [Go to 7]
____No [Go to end]

7. How many weeks did you do any work at all for pay during that 13-week period?

Sampling Procedures

Where sampling is used to obtain participant contact information, it is necessary to have a system which ensures consistent random selection of sample participant from *all* terminees in the group requiring follow-up.

- No participant in the follow-up group may be arbitrarily excluded from the sample.
- Procedures used to select the sample must conform to generally accepted statistical practice, e.g., a table of random numbers or other random selection techniques must be used.
- The sample selected for contact must meet minimum sample size requirements indicated in Table 1.

The use of sampling will depend on whether the terminee populations are large enought to provide estimates which meet minimum statistical standards. If the number of terminees for whom follow-up is required is less than 138, sampling cannot be used. In such cases attempts must be made to contact all the appropriate terminees.

Minimum Sample Sizes for Follow-up

To determine the minimum number of terminees to be included in the follow-up sample, refer to Table 1 in the following instructions. Find the row in the left-hand column that contains the planned number of dislocated worker terminees. The required minimum sample size is given in the middle column of that row. The last column gives sampling percentages that will assure that the minimum sample size is obtained.

Correcting for Differences in Response Rates

Different response rates for those terminees who entered employment at termination and those who did not are expected to bias the performance estimates because those who entered employment at termination are more likely to be employed at follow-up. It is assumed that those who were employed at termination are easier to locate than those who were unemployed because the interviewer has more contact sources (e.g., name of employer). The resulting response bias can artificially inflate performance results at follow-up.

To account for this problem, separate response rates should be calculated for those who were employed at termination and for those who were not.

If the response rates of those employed at termination and those not employed differ by more than 5 percentage points, then the "Worksheet for Adjusting Follow-up Performance Measures" in the Follow-up Technical Assistance Guide must be used to correct the follow-up measures.

TABLE 1.—MINIMUM SAMPLE SIZES FOR FOLLOW-UP

Number of terminees in follow-up population	Minimum sample size	Sampling percentages
1 to 137	All	100
138 to 149	137	94
150 to 159	143	92
160 to 169	149	89
170 to 179	154	87
180 to 189	159	85
190 to 199	164	84
200 to 224	175	82
225 to 249	185	78
250 to 274	194	74
275 to 299	202	71
300 to 349	217	67
350 to 399	229	62
400 to 449	240	57
450 to 499	250	53
500 to 599	265	50
600 to 749	282	44
750 to 999	302	38
1,000 to 1,499	325	30
1,500 to 1,999	338	22
2,000 to 2,999	352	17
3,000 to 4,999	364	12
5,000 or more	383	7.3

Appendix B—Definitions of Terms Necessary for Completion of Reports

Employment/Training Services

Assessment—services are designed to initially determine each participant's employability, aptitudes, abilities and interests, through interviews, testing and counseling to achieve the applicant's employment related goals.

Follow-up—is the collection of information on a terminee's employment situation at a specified period after termination from the program.

Intake—includes the screening of an applicant for eligibility and: (1) A determination of whether the program can benefit the individual; (2) an identification of the employment and training activities and services which would be appropriate for that individual; (3) a determination of the availability of an appropriate employment and training activity; (4) a decision on selection for participation and (5) the dissemination of information on the program.

Outreach—activity involves the collection, publication and dissemination of information on program services directed toward economically disadvantaged and other individuals eligible to receive JTPA training and support services.

Education Status

Less Than High School—An adult or youth: (1) who is not attending school full-time and has not received a high school diploma or a GED certificate; or (2) who has not received a high school diploma or GED certificate and is enrolled full-time in an elementary, secondary or postsecondary-level vocational, technical, or academic school or is between school terms and intends to return to school.

High School Graduate or Equivalent (No Post-High School)—An Adult or youth who has received a high school diploma or GED Certificate, but who has not attended any postsecondary vocational, technical, or academic school.

Post High School Attendee—An adult or youth who has received a high school diploma or GED certificate and has attended (or is attending) any postsecondary-level vocational, technical, or academic school.

College Graduate—A terminee who has received a degree (usually a BA or BS) conferred by a four-year college, university or professional school or an advanced degree from one of these institutions.

Family Status

Single Head of Household—A single, abandoned, separated, divorced or widowed individual who has responsibility for one or more dependent children under age 18.

Race/Ethnic Group

White (Not Hispanic)—A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

Black (Not Hispanic)—A person having origins in any of the black racial groups of Africa.

Hispanic—A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin (including Spain), regardless or race.

Note.—Among persons from Central and South American countries, only those who are of Spanish origin, descent, or culture should be included in the Hispanic category. Persons from Brazil, Guiana, and Trinidad, for example, would be classified according to their race, and would not necessarily be included in the Hispanic category. Also, the Portugese should be excluded from the Hispanic category and should be classified according to their race.

American Indian or Alaskan Native—A person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander—A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent (e.g., India, Pakistan, Bangladesh, Sri Lanka, Nepal, Sikkim, and Bhutan), or the Pacific Islands. This area includes, for example, China, Japan, Korea, the Philippine Islands, and Samoa. Hawaiian natives are to be recorded as Asian or Pacific Islanders.

Other Barriers to Employment

Limited English Language Proficiency—Inability of an applicant, whose native language is not English, to communicate in English, resulting in a job handicap.

Handicapped Individual—Any individual who has a physical or mental disability which for such individual constitutes or results in a substantial handicap to employment. NOTE: This definition includes disabled veterans for reporting purposes.

Reading Skills Below 7th Grade Level—An adult or youth assessed as having English reading skills below the 7th grade level on a generally accepted standardized test.

Economically Disadvantaged—An individual who (A) receives, or is a member of a family which receives, cash welfare payments under a Federal, State, or local welfare program; (B) has, or is a member of a family which has, received a total family income for the six-month period prior to application for the program involved (exclusive of unemployment compensation, child support payments, and welfare payments) which, in relation to family size, was not in excess of the higher of (i) the poverty level determined in accordance with criteria established by the Director of the Office of Management and Budget, or (ii) 70 percent of the lower living standard income level; (C) is receiving food stamps pursuant to the Food Stamp Act of 1977; (D) is a foster child on behalf of whom State or local government payments are made; or (E) in cases permitted by regulations of the Secretary, is an adult handicapped individual whose own income meets the requirements of clause (A) or (B), but who is a member of a family whose income does not meet such requirements.

Dislocated Status

Previously Self-Employed—An individual is to be considered self-employed if he/she has established a business which meets at a minimum the definition contained in IRS Publication No. 334, Tax Guide for Small Business Part I (i.e., A business is an activity entered into for the purpose of making a profit. Two characteristic elements of a business are regularity of activities and transactions and the production of income.). When a State or local statute contains stricter requirements for determining the existence of a business,

that statute should be followed. (Self-employed individuals include farmers and ranchers.)

Additional Dislocated Worker (Displaced Homemaker)—An individual whom:

(A) Was a fulltime homemaker for a substantial number of years; and

(B) Derived the substantial share of his or her support from:

(i) A spouse and no longer receives such support due to the death, divorce, permanent disability of, or permanent separation from the spouse; or

(ii) Public assistance on account of dependents in the home and no longer receives such support.

Benefits Status

Unemployment Compensation Claimant—Any individual who has filed a claim and has been determined monetarily eligible for benefit payments under one or more State or Federal unemployment compensation programs, and who has not exhausted benefit rights or whose benefit year has not ended.

Trade Readjustment Assistance Claimant—Any individual who has filed a claim and has been determined monetarily eligible for benefit payments under the TAA program, and who has received, or is receiving, or during the course of participation in EDWAA begins to receive, such benefit payments.

Labor Force Status

Unemployed: 15 or More Weeks of Prior 26 Weeks—An individual who is unemployed at the time of eligibility determination and has been unemployed for any 15 or more of the 26 weeks immediately prior to such determination, has made specific efforts to find a job throughout the period of unemployment, and is not classified as "Not in Labor Force".

Veteran Status

Veteran—An individual who served in the active military, naval, or air service (of the U.S.), and who was discharged or released therefore under conditions other than dishonorable.

Note.—The term "active" means full-time duty in the Armed Forces, other than duty for training in the reserves or National Guard. Any period of duty for training in the reserves or National Guard, including authorized travel, during which an individual was disabled from a disease or injury incurred or aggravated in the line of duty, is considered "active" duty.

Vietnam-Era Veteran—A veteran, any part of whose active military, naval, or air service occured between August 5, 1964 and May 7, 1975.

Program Costs

Accrued Expenditures—The allowable charges incurred during the program year to date requiring provision of funds for: (1) Goods and other tangible property received; and (2) costs of services performed by employees, contractors, subrecipients, and other payees.

Note.—These charges do not include "resources on order", i.e., amounts for contracts, purchase orders and other obligations for which goods and/or services have not been received.

Worker Adjustment Program Quarterly Financial Report (ETA 9020)

1. Purpose

The Worker Adjustment Program Quarterly Financial Report (WQFR) for the Economic Dislocation and Worker Adjustment Assisatnce (EDWAA) program displays data on fund availability, accrued costs, total participants, and total terminations on a cumulative quarterly basis. These data will be used to determine levels of program service and expenditures for State and total substate grantees. Selected information will be aggregated to provide quantitative program accomplishments on a State and national basis. Reallotment of formula funds, pursuant to Section 303 of EDWAA, will be based on these expenditure reports.

These reporting requirements have been approved by the Office of Management and Budget (OMB) according to the Paperwork Reduction Act of 1980, as amended, under OMB Approval No. _____.

2. General Instructions

A single WQFR covering EDWAA programs will be submitted by the Governor on a Statewide basis. Entries are to be *cumulative* for the program year to date. Each report period begins on the start date of each program year, as stated in Section 161 of the Job Training Partnership Act. Reports are due in the National office no later than thirty (30) days after the end of each program quarter (i.e., submitted no later than 10/31; 1/31; 4/30; and 7/31).

Two copies of *each* WFQR are to be provided to: U.S. Department of Labor, ETA, Attention: TSVR—Room S–5306, 200 Constitution Avenue, NW., Washington, DC 20210.

An additional copy of each WQFR is to be provided to the appropriate Regional Administrator for Employment and Training in the DOL Regional Office that includes the State in which the JTPA recipient is located.

Recipients may determine whether the report is submitted on this form or as a computer printout, with data arrayed as indicated in this format, including identification and signature blocks.

Note: The current JTPA Semiannual Status Report (JSSR, ETA 9009) is to continue to be used for Title III funds allotted to States for Program Year (PY) 1988 and earlier that are expended under regulations published in the **Federal Register** on February 12, 1988. The WQFR is to be used beginning July 1, 1989, for all funds expended under the EDWAA provisions.

4. Instructions for Completing the Worker Adjustment Program Quarterly Financial Report

a. *State Name and Address.* Enter the name and address of the recipient.

b. *Governor/Secretary Agreement Number.* Enter the recipient's Governor/Secretary Agreement number, as assigned by ETA in a separate issuance.

c. *Report Period.* Enter in "From" the beginning date of the designated JTPA program year, and enter in "To" the ending date of the report period, as specified above.

d. *Signature and Title* (at bottom of page). The authorized official of the Governor signs here and enters his or her title.

e. *Date.* Enter the date the report was signed by the authorized official.

f. *Telephone No.* Enter the area code and telephone number of the authorized official.

Special Note: All availability and expenditures entries on the WQFR will be made to the nearest dollar. This information is to be completed *cumulatively* for the end of each program quarter from the beginning of the program year. Expenditures reported on the WQFR will be compiled on an accrual basis. If the recipient's accounting records are not normally maintained on an accrual basis, the accrual information should be developed through an analysis of the records on hand or on the basis of best estimates.

Section I—Formula Allotment and Reallotment to the State

Line 1 Total Availability

Enter the total funds available for the EDWAA program that were allotted by formula, including (1) funds allotted for this program year pursuant to Section 302(a)(1); (2) unexpended formula-allotted funds carried over from earlier program years; and (3) any reallotment that *increased or decreased* the amount of formula funds available for expenditure through the end of the reporting period pursuant to Section 303. NOTE: This line is the sum of Lines 2, 4 and 5.

Line 2 Current Year Allotment

Enter the total formula-allotted funds for this program year. Include any reallotment that affected the amount of funds available.

Line 3 Reallotted Funds

Enter any reallotment that *increased or decreased* the amount of formula funds available for expenditure through the end of the reporting period. This line is a sub-breakout of Line 2. NOTE: Respondents must indicate either a plus (+) or a minus (−).

Line 4 Unexpended Prior Year Funds

Enter the total unexpended funds, if any, from last year's formula allotment (including reallotted funds, if any) that were carried in for use in the current program year.

Line 5 Unexpended Previous Year Funds

Enter the total unexpended funds, if any, from last year's formula allotment (including reallotted funds, if any) for the year before last year (i.e., 2 years before this program year) that were carried in for use in the current program year.

Line 6 Total Accrued Expenditures

Enter the total accrued expenditures for formula funded EDWAA programs. Include accrued expenditures of funds available from allotments for the current, prior and previous program years. This line is the sum of Lines 7, 8 and 9.

"Accrued Expenditures" are the allowable charges incurred during the program year to date requiring provision of funds for: (1) Goods and other tangible property received; and (2) costs of services performed by employees, contractors, subrecipients, and other payees. These charges do not include "resources on order" (i.e., amounts for contracts, pruchase orders and other obligations for which the goods and/or services have not yet been received).

Line 7 Current Year Allotment

Line 8 Prior Year Allotment

Line 9 Previous Year Allotment

Distribute the total actual expenditures during this report period included in Line 6 by current year, prior year, or previous year fund source.

Section II—Funds Reserved for Substate Grantees in Need

Line 10 Current Year Funds Reserved

Enter the current program year Section 302(c)(2) funds reserved by the Governor for distribution to substate grantees in need.

Line 11 Reserve Funds Distributed to Substate Grantees

Enter the amount of current year Section 302(c)(2) funds that have been distributed to substate grantees in need through the end of the report period. This line is a sub-breakout of Line 10.

Section III—Secretary's National Reserve Grants to the State

Line 12 Total Funds Available

Enter the amount of Section 302(a)(2) funds received from the Secretary's National Reserve that were available for expenditure during the current program year. This line is the sum of Lines 13 through 15.

Line 13 Current Year Grants

Line 14 Prior Year Grants

Line 15 Previous Year Grants

Enter by current, prior or previous year the total National Reserve funds awarded to the State during that year which remained available for expenditure during the current program year.

Line 16 Total Accrued Expenditures

Enter the total actual section 302(a)(2) accrued expenditures for projects using these funds. This line is the sum of Lines 17 through 19.

Line 17 Current Year Grants

Line 18 Prior Year Grants

Line 19 Previous Year Grants

Distribute the total actual expenditures during this report period by current year, prior year or previous year according to when the National Reserve Grants were awarded to the State.

Section IV—Program Summary

This section provides a summary of program activity supported with formula-allotted funds at the State and substate levels through the end of the reporting period. Entries are to be made under the appropriate column heading as follows:

a. Governor's Reserve

All entries in this column refer to activities and services administered by the Governor pursuant to section 302(c)(1).

b. Substate

All entries in this column refer to activities and services administered by the substate grantees pursuant to section 302(d) as well as section 302(c)(1)(E) and 302(c)(2).

Line 20 Total Federal Funds Available

Enter the total Federal funds available for expenditure during the current program year. This includes the current year formula allotment, reallotted and reallocated funds, and unexpended formula-allotted funds from prior or

previous years that are available for expenditure during the current year.

Line 21 Governor's Substate Discretionary Allocations

Enter the total funds allocated by the Governor to substate grantees pursuant to section 302(c)(1)(E) under the Governor's Reserve column only. This is a sub-breakout of Line 20. Since these funds are not available for expenditure by the Governor, they are not included in the Governor's Reserve costs identified in Lines 22 through 28, nor the Governor's Reserve participants and terminations in Lines 29 and 30. These funds are to be included in the Program Summary under the Substate column for Lines 20 through 28. The sum of entries in Columns a and b on Line 20 minus this entry should equal the Total Availability on Line 1.

Line 22 Total Accrued Costs

Enter the total actual accrued costs during the report period, without regard to the year the funds were allotted to the State or allocated to State or substate grantees. The sum of the entries in the two columns on Line 22 should be equal to Total Accrued Expenditures on Line 6. This line is the sum of Lines 23 through 28.

Line 23 Rapid Response

Enter the accrued costs allocable to the Rapid Response services cost category (20 CFR 632.13(b)) under the Governor's Reserve column only. This line is a sub-breakout of Line 22.

Line 24 Basic Readjustment

Enter the accrued costs allocable to the Basic Readjustment services cost category (20 CFR 632.12(c)). This line is a sub-breakout of Line 22, and does not include amounts reported on Line 28.

Line 25 Retraining

Enter the accrued costs allocable to the Retaining services cost category (20 CFR 631.13(d)). This line is a sub-breakout of Line 22, and does not include amounts reported on Line 28.

Line 26 Needs-Related Payments

Enter the accrued costs allocable to the Needs-Related Payments cost category (20 CFR 631.13(e)). This line is a sub-breakout of Line 22, and does not include amounts reported on Line 28.

Line 27 Supportive Services

Enter the accrued costs allocable to the Supportive Services cost category (20 CFR 631.13(f)). This line is a sub-breakout of Line 22, and does not include amount reported on Line 28.

Line 28 Administration

Enter the accrued costs allocable to the Administration cost category (20 CFR 631.13(g)). This line is a sub-breakout of Line 22.

Line 29 Total Participants

Enter the total number of participants (as defined below) who were on board at the beginning of the program year and those who have entered during the program year. Governor's Reserve programs include those Statewide, regional and industrywide projects provided for at section 302(c)(1)(B).

"Participant" means any individual who has (1) been determined eligible for participation upon intake; and (2) started receiving basic readjustment services or retraining under EDWAA following intake. Individuals who receive only outreach and/or intake and initial assessment, post-termination counseling, or post-program followup, are excluded.

Note: Exclude individuals who receive only Rapid Response assistance and information provided by the State Dislocated Worker Unit.

Line 30 Total Terminations

Enter the total number of participants who terminated from the program (see definition of "termination" below) during the reporting period. Include all those participants who received no basic readjustment services (except supportive services and/or counseling) or retraining for 90 days.

"Termination" means the separation of a participant from the program who is no longer receiving basic readjustment services or retraining funded under EDWAA. Individuals may be considered participants for up to 90 days after last receipt of basic readjustment services or retraining, during which time they may continue to receive supportive services, as provided for in section 314(c)(15). Terminees may continue to receive counseling necessary to assist in the retention of employment for not more than 6 months following last receipt of basic readjustment services or retraining.

5. *Reporting Burden.* Public reporting burden for this collection of information is estimated to average eight hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this burden to the Office of Information Management, U.S. Department of Labor, Room N–1301, 200 Constitution Avenue, NW., Washington, DC 20210; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

BILLING CODE 4510-30-M

Job Training Partnership Act: Proposed Performance Standards for Programs Funded Under the Economic Dislocation and Worker Adjustment Assistance Act

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of proposed performance standards for the Economic Dislocation and Worker Adjustment Assistance Program; request for comments.

SUMMARY: The Employment and Training Administration (ETA) is publishing proposed performance standards for the Job Training Partnership Act Title III dislocated worker programs. Title III recently was revised by the Economic Dislocation and Worker Adjustment Assistance (EDWAA) Act (Title VI, Subtitle D, of the Omnibus Trade and Competitiveness Act of 1988), necessitating the issuance of standards for the new worker adjustment program. The worker adjustment program provides for a new substate delivery system, the ability to provide rapid response and early intervention to workers and to communities undergoing major layoffs, coordination to foster labor-management and community partnerships, and emphasis on quality training and other new and expanded approaches to serving dislocated workers.

DATE: Written comments are invited from the public. Comments must be submitted on or before January 12, 1989.

ADDRESS: Comments should be addressed to the Assistant Secretary of Labor, Employment and Training Administration, U.S. Department DC 20210, Attention: Karen Greene, Chief, Adult and Youth Standards Unit, Room N–5310.

FOR FURTHER INFORMATION CONTACT: Mrs. Karen Greene. Telephone: (202) 535–0687.

SUPPLEMENTARY INFORMATION: The Job Training Partnership Act (JTPA) under Title III provides employment and training assistance to dislocated workers. Title III recently was revised by the Economic Dislocation and Worker Adjustment Assistance (EDWAA) Act (Title VI, Subtitle D, of

the Omnibus Trade and Competitiveness Act of 1988). Regulations for Title III, as revised, are published at 20 CFR Part 631, 53 FR 41572–41589 (October 24, 1988).

Section 106 of the JTPA requires the Secretary of Labor to prescribe performance standards for dislocated worker programs under Title III. Performance standards for Title III, prior to its revision by EDWAA, were published at 53 FR 7252 (March 7, 1988). Amendments to Title III necessitate this proposed revision of those standards. The current performance management system for dislocated worker programs will also be revised to account for the new programmatic features introduced by the EDWAA provisions. The proposed standards are described in this notice and in the attached draft Training and Employment Guidance Letter.

The Department of Labor (Department) is proposing a transition strategy for the implementation of EDWAA performance standards. Initially, a single performance standard, the entered employment rate, is proposed for the worker adjustment program for Program Year (PY) 1989 (July 1, 1989–June 30, 1990) as well as an optional wage at placement goal. Additional measures of job retention, replacement wage and postprogram and/or other standards will be implemented as appropriate after data are available from the substate reporting system proposed for the revised Title III programs.

The national numerical level for the entered employment rate is the same as that issued in the **Federal Register** on March 7, 1988 at 53 FR 7252 and is set at 64 percent. The entered employment rate level in PY 1990 will be revised.

A. Purpose of Performance Standards

Pursuant to section 106(g) of the JTPA, the Secretary of Labor shall prescribe performance standards for programs under Title III based on placement and retention in unsubsidized employment. These measures of performance reflect Congress' desire to emphasize program outcomes for individuals that assess how well the JTPA system is meeting its statutory goals of increased employment and earnings and reduced welfare dependency. Title III performance standards measure the effectiveness of worker adjustment programs to adequately prepare dislocated workers to reenter productive employment and to enable them to retain that employment over time. The new provisions contain a number of program features which emphasize the importance of quality training in ensuring the employability of dislocated workers. Other program objectives—increased coordination, timely service delivery to workers and communities undergoing economic change, and improved fiscal accountability—are designed to ensure that service and funding decisions will support the goals of the Act.

For PY 1989 the Secretary intends to set an entered employment rate standard and an optional wage at placement goal for Title III. To ensure systemwide accountability, substate areas and statewide programs will be subject to performance standards. Proposed reporting for the worker adjustment program will begin to gather the data needed to set and adjust a postprogram employment or other job retention standard, replacement wage, and any other standards appropriate for dislocated worker programs for future implementation.

Prior to EDWAA, substate administration was not required for dislocated worker programs; therefore, substate client characteristics and program performance data were not collected. Because of limited data, adequate adjustment models for follow-up standards for Title III are not currently available. Data from an alternative national database—the JTPA Quarterly Survey—will enable the Department to issue initial adjustment models for Governors' use in setting substate entered employment rate standards and placement wage goals that account for variations in worker characteristics, program design, and economic conditions.

B. Authority To Issue Performance Standards

Section 106(g) of the JTPA directs the Secretary to establish performance standards for Title III dislocated worker programs.

C. Public Comment and Participation

The Department is committed to a participatory process in the development of performance standards. In September 1988 the Department met with State and local job training administrators, private industry council (PIC) representatives, service providers and members of public interest groups to obtain field information critical to the development of these standards. This request for comments is another important part of the participatory process.

The Secretary especially requests comments on the following issues:

What are the critical responsibilities and activities in the worker adjustment program for which performance standards should account and how can these best be measured?

What are the appropriate performance outcomes for the worker adjustment program which help ensure the program is achieving a positive return on the public's investment?

D. Background

Since PY 1986, States have been required to set an entered employment rate standard and an optional cost standard for their Title III programs. In PY 1988 Governors were again required to set an entered employment rate standard, but the cost standard was replaced with an optional measure of job quality—the placement wage standard. A national entered employment rate was issued for States to use as a guide in setting their own standards. No incentives or sanctions were applied to these standards and no adjustment methodology was issued due to the lack of substate data.

E. Rationale for Substate Standards, Incentives, and Sanctions

Under the new provisions, funds are to flow to substate areas to provide services to dislocated workers. Section 106 of the JTPA requires the Secretary to establish standards for dislocated workers programs, and the Title III amendments call for the Secretary to set parameters to guide Governors in adjusting substate area standards for varying local conditions. National standards are set with adjustments available for substate areas based on who is being served and what services are being provided.

The revised Title III provisions do not specifically set aside funds for incentives. However, a portion of the 40 percent funds reserved for State activities under section 302(c)(1) should be used for rewarding substate area performance, in particular those programs that provide lengthier, more substantive training to ensure the long-term employability of participants. Departmental regulations clarify that sanctions in section 106(h) apply to worker adjustment programs. Because the new Title III provisions enable Governors to redesignate substate areas every two years, the additional imposition of a reorganization plan will not be required. For the transition year (PY 1989), rewards and sanctions are not required; however, States should establish such policies for implementation in PY 1990.

F. Rationale for the Proposed Measure

The appropriateness of any performance standard should be judged

by the extent to which it measures the goals of the program. The goals of the worker adjustment program are to adequately prepare workers for reemployment and to ensure their continued employability through a broad range of quality retaining, services and participant support. The measures defined in JTPA section 106(g) as appropriate for dislocated worker programs are placement and retention in unsubsidized employment.

As a transition strategy, the entered employment rate standard is proposed as the only measure against which performance will be assessed for PY 1989, continuing the standard set in PY 1988. The level may be updated in PY 1990 at the beginning of the next two-year cycle after the worker adjustment program is fully operational. The Department will provide guidance on adjusting substate area standards in early January. Additional measures will be adopted for this program in PY 1992 when sufficient substate data become available.

Signed at Washington, DC, this 7th day of December, 1988.

Roberts T. Jones,

Assistant Secretary for Employment and Training.

Training and Employment Guidance Letter No.

From: Roberts T. Jones, Assistant Secretary of Labor.

Subject: Secretary's Performance Standards for Programs Funded Under the Economic Dislocation and Worker Adjustment Assistance (EDWAA) Act for Program Year 1989.

1. Purpose

To transmit to the State Worker Adjustment Liaisons the Secretary's national numerical standards and implementing instructions for new programs serving dislocated workers for PY 1989.

2. Background

Section 106(g) of the Job Training Partnership Act (JTPA) directs the Secretary to establish performance standards for dislocated worker programs. The Secretary also issues instructions for implementing standards and parameter criteria for States to follow in adjusting the Secretary's standards for substate areas.

3. Performance Management Goals for Program Year 1989

Program Year 1989 marks the beginning of a new performance management system, while serving as a transition year between the former Title III program and the Economic Dislocation and Worker Adjustment Assistance (EDWAA) Act. The objective of performance standards is to measure the effectiveness of worker adjustment programs in meeting the immediate goal of obtaining reemployment for dislocated workers and the long-term goal of their continued employment.

4. Performance Measures for PY 1989

One performance measure will be required for the worker adjustment transition year. This measure is the entered employment rate. An optional average wage at placement may also be adopted by Governors. The proposed reporting system will collect the data needed to set and adjust a job retention, replacement wage, postprogram and/or other standards appropriate for dislocated worker programs for future implementation.

5. Secretary's National Numerical Standards for PY 1989

The numerical standard is derived from the PY 1986 Title III performance data reported on the JTPA Annual Status Report (JASR). Although a new delivery system and broadened services are identified in the amended Title III program—and a new reporting system, with more appropriate data elements to account for EDWAA changes has been proposed—the JASR is the only data base available to set measures and standards for dislocated workers.

An entered employment rate of 64 percent is the Secretary's national standard for PY 1989 and is the departure point for adjustments using the Department's optional adjustment model. Governors may also establish an average wage at placement goal. The entered employment rate of 64 percent is set at a level that if worker adjustment programs continue to perform in the same manner as JTPA, Title III in PY 1986, 75 percent of the system should exceed this standard.

6. Implementation Provisions

The following implementation requirements must be followed:

a. Required standards.

Governors are required to set for each substate area a numerical performance standard for entered employment.

b. Setting the standards.

The Governor may set the substate area standards by using the Secretary's numerical standard or by adjusting this standard. Such adjustments must conform to the Secretary's parameters described below: Procedures must be:

- Responsive to the intent of the Act;
- Consistently applied among substate areas;
- Objective and equitable throughout the State; and
- In conformance with widely accepted statistical criteria.

Source data must be:

- Of public use quality; and
- Available upon request.

Results must be:

- Documented; and
- Reproducible.

Adjustment factors must be limited to:

- Economic factors;
- Labor market conditions;
- Characteristics of the population to be served;
- Geographic factors; and
- Types of services to be provided.

The Department has developed an initial adjustment methodology which will be available in January 1989 for Governors to use at their option. The Department's methodology conforms to the parameter criteria cited above. Should the Governor choose to use an alternative methodology, or further adjust the Departmental model, it must conform to the parameter criteria and be documented in the State plan prior to the program year to which it applies. The State Job Training Coordinating Council must have an opportunity to consider adjustments to the Secretary's standard and to recommend variations.

c. Performance standards definitions.

Governors must compute the performance of their substate areas according to the following definitions:

(1) Entered employment rate

—Number of individuals who entered employment at termination as a percentage of the total number of persons who terminated.

(2) Average wage at placement

—Average hourly wage for all persons who entered employment at the time of termination.

7. Application of the Performance Standards

Performance standards are to be applied to all programs funded under section 302. This includes all of section 302(c)(1) State activities, section 302(c)(2) and 302(d) substate area activities, and programs operated under the section 302(a)(2) Secretary's National Reserve.

8. State Action

States should ensure that all substate grantees are promptly informed of this planning and policy guidance.

9. Inquiries

Questions concerning this issuance may be directed to Karen Greene at (202) 535–0687.

BILLING CODE 4510–30–M

Mine Safety and Health Administration

[Docket No. M–88–219–C]

Kerr-McGee Coal Corp.; Petition for Modification of Application of Mandatory Safety Standard

Kerr-McGee Coal Corporation, P.O. Box 727, Harrisburg, Illinois 62946 has filed a petition to modify the application of 30 CFR 75.1805 (examination of electrical equipment; recording requirements; approved books) to its Galatia Mine 56–1 (I.D. No. 11–02752) located in Saline County, Illinois. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that the results of examinations of electrical equipment required to be conducted under the provisions of certain standards be recorded in a book entitled "Examination of Electrical Equipment".

2. As an alternate method, petitioner proposes to use computer-generated forms as permanent records in hanging book binders in lieu of an approved book entitled "Examination of Electrical Equipment."

3. In support of this request, petitioner states that—

(a) The forms for the electrical equipment are generated by a maintenance computer, kept on file, and updated with pertinent information;

(b) The computer-generated records are used in the examinations and maintenance of the electrical equipment;

(c) All exceptions, maintenance work done during the inspections, and special notes concerning the inspections are recorded on the computer-generated forms and are stored on tape in the computer files. An exception report is generated by the computer each week and sent to the Maintenance Managers and the Electrical Instrumentation Foremen; and

(d) In the event that an inspection work request generated by the computer is not logged in as completed by the due date, a report is printed within four days and sent to the Maintenance Managers informing them that the inspection is overdue.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before January 12, 1988. Copies of the petition are available for inspection at that address.

Date: December 6, 1988.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Senior Executive Service (SES) Performance Review Board; Members

AGENCY: National Archives and Records Administration.

ACTION: Notice.

SUMMARY: Notice is hereby given of the names of members of the Performance Review Board for the National Archives and Records Administration.

FOR FURTHER INFORMATION CONTACT: James C. Megronigle, Assistant Archivist for Management and Administration, National Archives and Records Administration (NA), 8th and Pennsylvania Avenue NW., Washington, DC 20408.

SUPPLEMENTARY INFORMATION: Section 4314(c) (1) through (5) of Title 5, U.S.C., requires each agency to establish, in accordance with regulations prescribed by the Office of Personnel Management, one or more SES performance review boards. The board shall review performance ratings for SES members and make recommendations to the appointing authority on senior executive performance.

The Members of the Performance Review Board for the National Archives and Records Administration are James C. Megronigle, Assistant Archivist for Management and Administration, John T. Fawcett, Assistant Archivist for Presidential Libraries, and Linda N. Brown, Assistant Archivist for Public Programs. These appointments supercede all previous appointments.

Dated: December 6, 1988.

Don W. Wilson,

Archivist of the United States.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–603]

Environmental Assessment and Finding of No Significant Impact; All Chemical Isotope Enrichment, Inc.

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of 10 CFR Part 50.34(a)(10), 50.34(b)(6)(v), and Appendix E to 10 CFR Part 50 to All Chemical Isotope Enrichment, Inc. (AlChemIE or "the applicant") for the AlChemIE Facility-1 CPDF located on the Federal reservation at Oak Ridge, Tennessee.

Environmental Assessment

Identification of Proposed Action: On April 28, 1988, the Commission noticed the receipt of application for construction permit and operating license, availability of applicant's environmental report, consideration of issuance of construction permit and notice of opportunity for hearing for AlChemIE Facility-1 CPDF in the **Federal Register** (53 FR 15317). As indicated in that Notice, the applicant intends to use centrifugal machines to enrich non-radioactive isotopes. As further indicated in that Notice, a license is required from the Commission for the above purpose, however, such a license would only govern possession of the centrifuge machines, but not the enriched stable isotopes produced.

Although the enriching of stable isotope is not ordinarily within the regulatory authority of the Commission, any equipment or device capable of enriching uranium, if intended for commercial use, must be licensed by the Commission. Since the centrifuge machines AlChemIE will obtain from the Department of Energy are capable of enriching uranium, their possession and use must be licensed. The Commission rule which governs the licensing of production facilities is 10 CFR Part 50. Since all of the centrifuge machines proposed for use at the CPDF have been tested using uranium hexafluoride, a thin film of a contamination has been left in each machine, primarily in the rotor.

The deposited material is uranyl fluoride, UO_2F_2, a reaction product

formed when small amounts of moisture remaining in the low vacuum system react with the uranium hexafluoride. The Department of Energy has determined that the uranium contamination is sufficiently fixed that it did not carry over with either product or tails in tests with stable isotopes.

The applicant has conservatively assumed the occurrence of an accident which releases a fraction of the uranium and is then inhaled by a nearby operator. The resultant does is inconsequential. NRC staff analysis confirms this conclusion.

On August 17, 1988, the applicant requested a specific exemption from 10 CFR 50.34(a)(10) and (b)(6)(v). Both of these paragraphs refer to Appendix E to 10 CFR Part 50, "Emergency Planning and Preparedness for Production and Utilization Facilities." Thus the regulations is question are, on their face, applicable to the applicant's proposed operations. However, the content of the requirements is entirely related to potential radiological hazards, as indicated in the introduction in Appendix E, and as may be discerned throughout the Appendix. Since the only radioactive material to be possessed by the applicant is the uranium which previously became firmly fixed to the centrifuge machines, but is not available for dispersal, there is no potential radiological hazard for which planning and preparedness is necessary. Therefore, the action proposed is to exempt the applicant from the requirement to prepare an emergency plan in accordance with Appendix E to 10 CFR Part 50, which would have no practical effect.

The Need for the Proposed Action: The proposed action is needed since the preparation of an emergency plan for AlChemIE Facility-1 CPDF is unnecessary and would be inconsistent with the Commission's jurisdiction over the applicant as stated above.

Enviromental Impact of the Proposed Action: Since there is no potential radiological hazard associated with the applicant's proposed activities, the proposed action would have no environmental impact.

Alternative to the Proposed Action: The alternative to the proposed action is the preparation of an emergency plan consistent with the provisions of Appendix E to 10 CFR Part 50. However, such an emergency plan prepared for AlChemIE Facility-1 CPDF related to potential radiological hazard would serve no useful purpose based on the activities the applicant proposes to conduct.

Alternative Use of Resources: The proposed action does not involve the use of any resources.

Agencies and Persons Consulted: The NRC staff reviewed the licensee's request which supports the proposed exemption. The NRC staff did not consult other agencies or persons.

Finding of No Significant Impact: The Commission has determined not to prepare an environmental impact statement for the proposed exemption. Based on the environmental assessment, we conclude that the proposed action will not have a significant adverse affect on the quality of the human environment.

For details with respect to this proposed action see the applicant's request for the exemption, dated August 17, 1988, and the **Federal Register** notice discussed earlier, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC.

Dated at Rockville, Maryland, this seventh day of December, 1988.

For the Nuclear Regulatory Commission.

Richard E. Cunningham,

Director, Division of Industrial and Medical Nuclear Safety Office of Nuclear Material Safety and Safeguards.

[FR Doc. 88-28637 Filed 12-12-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-604]

Environmental Assessment and Finding of No Significant Impact; All Chemical Isotope Enrichment, Inc.

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of 10 CFR Part 50.34(a)(10), 50.34(b)(6)(v), and Appendix E to 10 CFR Part 50 to All Chemical Isotope Enrichment, Inc. (AlChemIE or "the applicant") for the AlChemIE Facility-2 Oliver Springs located at a site proposed for Oliver Springs, Tennessee.

Environmental Assessment

Idenification of Proposed Action: On April 28, 1988, the Commission noticed the receipt of application for construction permit, availability of applicant's environmental report, consideration of issuance of construction permit and notice of opportunity for hearing all AlChemIE Facility-2 Oliver Springs in the **Federal Register** (53 FR 15317). As indicated in that Notice, the applicant intents to use centrifugal machines to enrich non-radioactive isotopes. As further indicated in that Notice, a license is required from the Commission for the above purpose, however, such a license would only govern possession of the centrifuge machines, but not the enriched stable isotopes produced.

Although the enriching of stable isotope is not ordinarily within the regulatory authority of the Commission, any equipment or device capable of enriching uranium, if intended for commercial use, must be licensed by the Commission. Since the centrifuge machines AlChemIE will obtain from the Department of Energy are capable of enriching uranium, their possession and use must be licensed. The Commission rule which governs the licensing of production facilities is 10 CFR Part 50. Since all of the centrifuge machines proposed for use at the CPDF have been tested using uranium hexafluoride, a thin film of a contamination has been left in each machine, primarily in the rotor.

The deposited material is uranyl flouride, UO_2F_2, a reaction product formed when small amounts of moisture remaining in the low vacuum system react with the uranium hexafluride. The Department of Energy has determined that the uranium contamination is sufficiently fixed that it did not carry over with either product or tails in tests with stable isotopes.

The applicant has conservatively assumed the occurrence of an accident which releases a fraction of the uranium and is then inhaled by a nearby operator. The resultant dose is inconsequential. NRC staff analysis confirms this conclusion.

On August 17, 1988, the applicant requested a specific exemption from 10 CFR 50.34(a)(10) and (b)(6)(v). Both of these paragraphs refer to Appendix E to 10 CFR Part 50, "Emergency Planning and Preparedness for Production and Utilization Facilities." Thus the regulations in question are, on their face, applicable to the applicant's proposed operations. However, the content of the requirements is entirely related to potential radiological hazards, as indicated in the introduction in Appendix E, and as may be discerned throughout the Appendix. Since the only radioactive material to be possessed by the applicant is the uranium which previously became firmly fixed to the centrifuge machines, but is not available for dispersal, there is no potential radiolocical hazard for which planning and preparedness is necessary.

Therefore, the action proposed is to exempt the applicant from the requirement to prepare an emergency plan in accordance with Appendix E to 10 CFR Part 50, which would have no practical effect.

The Need for the Proposed Action: The proposed action is needed since the preparation of an emergency plan for AlChemIE Facility-2 Oliver Springs is unnecessary and would be inconsistent with the Commission's jurisdiction over the applicant as stated above.

Environmental Impact of the Proposed Action: Since there is no potential radiological hazard associated with the applicant's proposed activities, the proposed action would have no environmental impact.

Alternative to the Proposed Action: The alternative to the proposed action is the preparation of an emergency plan consistent with the provisions of Appendix E to 10 CFR Part 50. However, any emergency plan prepared for AlChemIE Facility-2 Oliver Springs related related to potential radiological hazard would serve no useful purpose based on the activities the applicant proposes to conduct.

Alternative Use of Resources: The proposed action does not involve the use of any resources.

Agencies and Persons Consulted: The NRC staf reviewed the licensee's request which supports the proposed exemption. The NRC staff did not consult other agencies or persons.

Finding of No Significant Impact: The Commission has determined not to prepare an enviromental impact statement for the proposed exemption. Based on the environmental assessment, we conclude that the proposed action will not have a significant adverse affect on the quality of the human environment.

For details with respect to this proposed action see the applicant's request for the exemption, dated August 17, 1988, and the **Federal Register** notice discussed earlier, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC.

Dated at Rockville, Maryland, this 7th day of December, 1988.

For the Nuclear Regulatory Commission.

Director, Division of Industrial and Medical Nuclear Safety Office of Nuclear Material Safety and Safeguards.

[FR Doc. 88-28638 Filed 12-12-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-269, 50-270, and 50-287]

Duke Power Co.; Environmental Assessment and Finding of No Significant Impact

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of exemption from certain requirements of 10 CFR Part 50, Appendix R, to the Duke Power Company (Duke/licensee) for the Oconee Nuclear Station, Units 1, 2, and 3, located at the licensee's site in Oconee County, South Carolina.

Environmental Assessment

Identification of Proposed Action

The proposed action would grant exemptions from certain requirements of Appendix R, "Fire Protection Program For Nuclear Power Facilities Operating Prior To January 1, 1979." Duke has requested five exemptions: four from the requirements of Section III.G.2.a and one from Section III.G.2.d. Section III.G.2.a requires separation of cables and equipment and associated non-safety circuits of redundant trains by a fire barrier having a three-hour rating. Structural steel forming a part of or supporting such fire barriers shall be protected to provide fire resistance equivalent to that required of the barrier. Section III.G.2.d requires separation of cables and equipment and associated non-safety circuits of redundant trains by a horizontal distance of more than twenty feet with no intervening combustibles or fire hazards.

The Need for the Proposed Action

The proposed exemptions are needed because of plant specific circumstances as described in the licensee's submittals regarding three-hour fire barriers or redundant components separated by distances of less than twenty feet. Duke has demonstrated that equivalent protection is provided by the existing fire barriers for the fire hazards to which they are exposed. Use of the existing fire barriers and fire detection and suppression are the most practical means for meeting the intent of Appendix R, and literal compliance would not significantly enhance fire protection capability.

Environmental Impacts of the Proposed Action

The proposed exemptions, based on the existing physical plant design and fire protection features, will provide a degree of fire protection that is equivalent to that required by Appendix R for the affected areas of the plant such that there is no increase in the risk of fires at these facilities. Consequently, the probability of fires has not been increased and the post-fire radiological releases will not be greater than previously determined, nor do the proposed exemptions otherwise affect radiological plant effluents. Therefore, the Commission concludes that there are no significant radiological environmental impacts associated with these proposed exemptions.

With regard to potential non-radiological impacts, the proposed exemptions involve features located entirely within the restricted area as defined in 10 CFR Part 20. They do not affect non-radiological plant effluents and have no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed exemptions.

Alternative to the Proposed Action

Because the Commission has concluded there are no measurable environmental impacts associated with the proposed exemptions, any alternatives with equal or greater environmental impact need not be evaluated. The principal alternative to the exemptions would be to require rigid compliance with the applicable portions of Sections III.G.2.a and d of the Appendix R requirements. Such action would not enhance the protection of the environment and would result as unjustified costs for the licensee.

Alternative Use of Resources

This action does not involve the use of resources not previously considered in the "Final Environmental Statement related to the Operation of the Oconee Nuclear Station, Units 1, 2 and 3," dated March 1972.

Agencies and Persons Consulted

The NRC staff has reviewed Duke's request that supports the proposed exemptions. The NRC staff did not consult with other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemptions.

Based upon the foregoing environmental assessment, the NRC staff concludes that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see Duke's letters dated November 11 and October 24, 1983, August 14, 1984, February 28 and September 30, 1985, December 26, 1986,

and April 21, 1987. The letters are available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC, and at the Oconee County Library, 501 West South Broad Street, Walhalla, South Carolina 29691.

Dated at Rockville, Maryland, this 5th day of December 1988.

For the Nuclear Regulatory Commission.

David B. Matthews,

Director, Project Directorate II–3, Division of Reactor Projects I/II Office of Nuclear Reactor Regulation.

[FR Doc. 88–28632 Filed 12–12–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–458]

Gulf States Utilities Co.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering the issuance of an amendment to Facility Operating License No. NPF–47 issued to Gulf States Utilities Company, (the licensee), for operation of the River Bend Station, Unit 1, located in West Feliciana Parish, Louisiana.

Environmental Assessment

Identification of the Proposed Action

The proposed amendment would revise the provisions in Technical Specifications (TS) 4.9.6.1.c and 4.9.6.2.c to permit decreasing the minimum water coverage for irradiated fuel and control rods during their handling.

The proposed action is in accordance with the licensee's application for amendment dated August 12, 1988.

Need for the Proposed Action

The proposed change to the TS is required to relieve the licensee from the unnecessary hardship due to the narrow operating bands for pool levels in the containment and fuel building. The narrow operating bands have made it difficult to maintain the pool levels where the high or low water level annunciators are not actuated. The proposed action would also permit an easier transfer through the fuel transfer shield and would permit placing control rods on hangers provided for their storage in the fuel building pool.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revisions to the Technical Specifications. The proposed revisions would reduce the minimum water coverage above a single spent fuel assembly in the storage pool from 8 feet 6 inches to 8 feet 2 inches, and above an irradiated control rod from 8 feet 6 inches to 6 feet 9 inches. TS 4.9.6.1 would be modified to require demonstration that the normal uptravel stop interlock of the refueling platform main hoist maintains at least 8 feet 2 inches of water coverage above the top of the active irradiated fuel and that the normal uptravel stop interlock of the frame-mounted and monorail-mounted auxiliary hoists maintain at least 6 feet 9 inches of water coverage above the top of the irradiated control rod. The surveillance requirements of TS 4.9.6.2 would be modified in a similar manner to require demonstration that the normal uptravel stop interlock on the fuel handling platform main hoist maintains at least 8 feet 2 inches of water coverage above the top of the active irradiated fuel and that the normal uptravel stop interlock of the monorail-mounted auxiliary hoist maintains at least 6 feet 9 inches of water coverage above the top of the irradiated control rod.

The pool water (as well as the water level above the reactor pressure vessel flange) will remain unchanged at a minimum of 23 feet above the spent fuel in the storage racks. Therefore, the proposed change would not increase the probability or consequences of any accident previously evaluated.

The licensee estimated a radiation dose rate increase to personnel on the refueling platform of 0.2 mrem per hour due to the reduction of water coverage above the active zone of the irradiated fuel and 0.3 mrem per hour from an irradiated control rod. In addition, the licensee estimated that personnal radiation exposure over the plant design life would increase by 0.2 man-Rem from irradiated fuel and 0.01 man-Rem from irradiated control rods. Thus, there is no significant increase in the allowable individual or cumulative occupational radiation exposure.

There are no changes being made in the types of any effluents that may be released offsite and the offsite dose consequences of a postulated fuel handling accident will not be affected by the proposed changes to the TS and the resulting offsite dose would remain well within the 10 CFR Part 100 guidelines.

Accordingly, the Commission concludes that this proposed action would result in no significant radiological environmental impact.

With regard to potential nonradiological impacts, the proposed change to the TS involve systems located within the restricted areas as defined in 10 CFR Part 20. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed amendment.

The Notice of Consideration of Issuance of Amendments and Opportunity for Hearing in connection with this action was published in the **Federal Register** on August 25, 1988 (53 FR 32484) and a correction was pulbished on October 24, 1988 (53 FR 41634). No request for hearing or petition for leave to intervene was filed following these notices.

Alternative to the Proposed Action

Since the Commission concluded that there is no significant adverse environmental effect that would result from the proposed action, alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and would result in reduced operational flexibility.

Alternative Use of Resources

This action does not involve the use of resources not previously considered in the Final Environmental Statement for the River Bend Station, Unit 1, dated January 1985.

Agencies and Persons Consulted

The NRC Staff has reviewed the licensee' request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed license amendment.

Based upon this environmental assessment, we conclude that the proposed action will not have a significant adverse effect on the quality of the human environment.

For further details with respect to this action, see the application for amendment dated August 12, 1988 which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and at the Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803.

Dated at Rockville, Maryland, this 29th day of November, 1988.

For the Nuclear Regulatory Commission.

Jose A. Calvo,

Director, Project Directorate—IV, Division of Reactor Projects—III, IV, V and Special Projects Office of Nuclear Reactor Regulation.

[FR Doc. 88–28633 Filed 12–12–88; 8:45 am]

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards; Revised Meeting Agenda

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on December 15–17, 1988, in Room P–114, 7920 Norfolk Avenue, Bethesda, Md. Notice of this meeting was published in the **Federal Register** on December 1, 1988.

Thursday, December 15, 1988, Room P–114, 7920 Norfolk Avenue, Bethesda, MD

8:30–8:45 A.M.: Chairman's Comments (Open)—The ACRS chairman will report briefly regarding items of current interest.

8:45–10:45 A.M.: Sodium Advanced Fast Reactor (SAFR) (Open)—Report of ACRS subcommittee chairman regarding the review of this type of standardized nuclear plant (initial session). Meeting with representatives of NRC and DOE.

11:00–12:00 Noon: Equipment Qualification-Risk Scoping Study (Open)—Report of ACRS subcommittee chairman regarding review and comment of this Scoping Study. Meeting with representatives of NRC Staff, as appropriate.

1:00–2:00 P.M.: Equipment Qualification-Risk Scoping Study (Open)—Continue meeting/discussion of Equipment Qualification-Risk Scoping Study.

2:00–4:15 P.M.: Containment System (Open)—Comments by ACRS subcommittee chairman regarding proposed NRC recommendations for containment performance and improvements for BWR Mark I containment. Meeting with representatives of NRC Staff, as appropriate.

4:15–6:30 P.M.: NRC Quantitative Safety Goals (Open)—Remarks by ACRS subcommittee chairman regarding proposed NRC Staff plan for implementation of NRC's Safety Goal Policy. Meeting with representatives of the NRC Staff, as appropriate.

Friday, December 16, 1988, Room P–114, 7920 Norfolk Avenue, Bethesda, MD

8:30–9:30 A.M.: Meeting with Director, NRC Office of Nuclear Regulatory Research (Open)—Briefing and discussion of items of mutual interest.

9:30–12:00 Noon: Energency Core Cooling Systems (Open)—Comments by ACRS subcommittee chairman regarding proposed NRC Code Scaling Applicability and Uncertainty (CSAU) Evaluation Methodology proposed for use with best-estimate ECCS evaluation models. Meeting with representatives of NRC Staff.

12:00–12:30 P.M.: Future ACRS Activities (Open)—Discuss anticipated subcommittee activities and discuss items proposed for consideration by the full Committee, including Split of responsibilities between ACRS/ACNW.

1:45–3:00 P.M.: Meeting with Director, Office of Governmental and Public Affairs (Open/Closed)—Briefing regarding US–USSR Exchange of Safety-Related Information.

(Portions of this session will be closed as necessary to discuss information provided in confidence by a foreign source.)

3:15–4:45 P.M.: Operator Requalification (Open)—Briefing regarding lessons learned from implementation of revised operator requalification methodology (Draft Examiner Standard 601).

4:45–6:30 P.M.: Nuclear Power Plant Operations (Open)—Briefing regarding action taken in response to LaSalle Nuclear Station core power oscillation transient.

Saturday, December 17, 1988, Room P–114, 7920 Norfolk Avenue, Bethesda, MD

8:30–9:00 A.M.: Election of ACRS Officers for CY 1989 (Closed)—Discussion and election of ACRS chairman and vice-chairman for CY 1989 and Member-at-Large for ACRS Planning Subcommittee and report regarding Appointment of New Members.

(This session will be closed to discuss information the release of which would constitute a clearly unwarranted invasion of personal privacy.)

9:00–12:00 Noon: Preparation of ACRS Report (Open)—Discuss proposed ACRS reports.

1:00–2:00 P.M.: ACRS Subcommittee Activities (Open)—Report of the December 1, 1988 meeting regarding International Seminar on Quality and Quality Control and report of visit to E. Fermi Nuclear Plant.

2:00–3:00 P.M.: ACRS Activities (Open)—Discuss area of interest/activity.

I have determined in accordance with Subsection 10(d) P.L. 92–463 that it is necessary to close portions of this meeting as noted above to discuss information the release of which of which would represent a clearly unwarranted invasion of personal privacy [5 U.S.C. 552b(c)(6)], to discuss Information provided in confidence by a foreign source [5 U.S.C. 552b(c)(4)], and to discuss Proprietary Information applicable to matters being considered [5 U.S.C. 552b(c)(4)].

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 301/492–8049), between 8:15 A.M. and 5:00 p.m.

Dated: December 7, 1988.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 88–28640 Filed 12–12–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. 50–334 and 50–412]

Duquesne Light Co. et al.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. DPR–66 and NPF–73 issued to Duquesne Light Company, et. al. (the licensee), for operation of the Beaver Valley Power Station, Units 1 and 2, located in Beaver County, Pennsylvania.

Environmental Assessment

Identificaiton of Proposed Action

The proposed amendments would exclude all containment isolation spring- and weight-loaded check values not subject to Type-C testing from the lift test requirements of Specification 4.6.3.1. Other tests currently specified by regulation and the Technical Specifications (TS) are not affected by these amendments.

The proposed amendments are in accordance with Duquesne Light Company's application dated June 22, 1988.

The Need for the Proposed Action

The proposed changes to the TS are needed since the lift tests can be shown to be unnecessary for the valves involved. Performing unnecessary tests only increases resource expenditures and increases occupational radiological exposure for no gain in safety.

BEST COPY AVAILABLE

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revisions to Technical Specifications. The proposed revisions would only eliminate certain tests for these check valves, and would have no other effect on plant design or operation. Therefore, the proposed changes do not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that these proposed actions would result in no significant radiological environmental impact.

With regard to potential non-radiological impacts, the proposed changes to the TS involve the containment system which is located within the restricted area as defined in 10 CFR Part 20. They do not affect non-radiolgical plant effluents and have no other environmental impacts. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed amendments.

The Notice of Consideration of Issuance of Amendments and Opportunity for Prior Hearing in connection with this action was published in the **Federal Register** on August 16, 1988 (53 FR 30880). no request for hearing or petition for leave to intervene was filed following this notice.

Alternative to the Proposed Action

Since the Commission concluded that there are no signficiant environmental effects that would result from the proposed actions, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendments. This would not reduce environmental impacts of plant cperation and would only continue to require that unnecessary tests be performed.

Alternative Use of Resources

These actions do not involve the use of any resources not previously considered in the Final Environmental Statement (FES) for the Beaver Valley Power Station, Unit 1, dated July 1973, and the FES for Unit 2 dated September 1985.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The staff has determined not to prepare an environmental impact statement for the proposed amendments.

Based upon the foregoing environmental assessment, we concluded that the proposed actions will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for amendments dated June 22, 1988, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, Washington, DC and at the B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, PA 15001.

Dated at Rockville, Maryland, this 1st day of December, 1988.

For the Nuclear Regulatory Commission.

Lee H. Bettenhausen,

Acting Director, Project Directorate I–4, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

[Docket No. 50–206]

Southern California Edison Co. et al.; Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 116 to Provisional Operating License No. DPR–13, issued to Southern California Edison Company and San Diego Gas and Electric Company (the licensees), which revised

the license for operation of the San Onofre Nuclear Generating Station, Unit No. 1, located in San Diego County, California. The amendment was effective as of the date of issuance.

The amendment authorizes transshipment of spent fuel from the Unit No. 1 spent fuel pool, and, taken together with Amendment Nos. 63 and 52 to Unit Nos. 2 and 3 respectively, grants authority to store the Unit No. 1 spent fuel in the spent fuel pools at Unit Nos. 2 and 3.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on June 24, 1988 (53 FR 23820). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environment Assessment related to this action which was published in the **Federal Register** on November 30, 1988 (53 FR 48347) and has concluded that an environmental impact statement need not be prepared because operation of the facility in accordance with this amendment will have no significant adverse effect on the quality of the human environment.

For further details with respect to the action see (1) the application for amendment dated April 28, 1988, as supplemented April 25, June 10, September 23, October 18, November 10, and December 1, 1988, (2) Amendment No. 116 to License No. DPR–13, (3) the Commission's related Safety Evaluation and (4) the Commission's Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555, and at the General Library, University of California, P.O. Box 19557, Irvine, California 92713. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects—III, IV, V and Special Projects.

Dated at Rockville, Maryland, this 2d day of December, 1988.

For the Nuclear Regulatory Commission.

Charles M. Trammell,

Senior Project Manager, Project Directorate V, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 88–28631 Filed 12–12–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–206]

Southern California Edison Co., and San Diego Gas and Electric Co., (San Onofre Nuclear Generating Station, Unit No. 1); Consideration of Issuance of Amendment to Provisional Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Provisional Operating License No. DPR–13 issued to Southern California Edison Company, *et al.* (the licensee), for operation of San Onofre Nuclear Generating Station, Unit No. 1, located in San Diego County, California. The request for amendment was submitted by letter dated November 7, 1988.

The proposed amendment would change the power supply for motor-operated valve MOV–358 (emergency core cooling recirculation flow to loop "C") from motor control center No. 3 (MCC–3) to the Uninterruptible Power Supply (UPS) to eliminate a single failure suseptibility in the recirculation system.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By January 12, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject provisional operating license, and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petitions for leave to intervene. Requests for a hearing and petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition, and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene must set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may

be delivered to the Commission's Public Document Room, 2120 L Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to George W. Knighton: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel-White Flint, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Charles R. Kochner, Assistant General Counsel, and James Beoletto, ESQ., Southern California Edison Company, P.O. Box 800, Rosemead, California 91770, attorneys for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC, and at the General Library, University of California, P.O. Box 19557, Irvine, California 92713.

Dated at Rockville, Maryland, this 1st day of December 1988.

For the Nuclear Regulatory Commission.

George W. Knighton,

Project Director, Project Directorate V, Division of Reactor Projects—III, IV, V and Special Projects.

[FR Doc. 88–28634 Filed 12–12–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–112]

University of Oklahoma Research Reactor; Proposed Issuance of Orders Authorizing Disposition of Component Parts and Terminating Facility License

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of Orders authorizing the University of Oklahoma (the licensee) to dismantle the reactor facility and dispose of the component parts, and termination of Facility License No. R–53, in accordance with the licensee's application dated October 25, 1988.

The first of these Orders would be issued following the Commission's review and approval of the licensee's detailed plan for decontamination of the facility and disposal of the radioactive components, or some alternate disposition plan for the facility. This Order would authorize implementation of the approved plan. Following completion of the authorized activities and verification by the Commission that acceptable radioactive contamination levels have been achieved, the Commission would issue a second Order terminating the facility license and any further NRC jurisdiction over the facility. Prior to issuance of each Order, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

By January 13, 1989, the licensee may file a request for a hearing with respect to issuance of the subject Orders and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the action under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). the Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Charles L. Miller: petitioner's name and

telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Mr. Fred Gipson, Chief Legal Counsel, University of Oklahoma, 660 Parrington Oval, Room 213, Norman, Oklahoma 73019, attorney for licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petitioner and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the licensee's application dated October 25, 1988, which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC.

Dated at Rockville, Maryland, this 7th day of December 1988.

For the Nuclear Regulatory Commission.

Charles L. Miller,

Director, Standardization and Non-Power Reactor Project Directorate, Division of Reactor Projects III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

SECURITIES AND EXCHANGE COMMISSION

Forms Under Review by Office of Management and Budget

Agency Clearance Office—Kenneth Fogash, (202) 272–2142

Upon written request copy available from: Securities and Exchange Commission, Office of Consumer Affairs, Washington, DC 20549.

Extension

Regulation A, SEC File No. 270–110

Form F–6, SEC File No. 270–270

Notice is hereby given that pursuant to the Paperwork Reduction of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted Form F–6 (17 CFR 239.36) for approval of an extension of clearance.

Regulation A is a stream-lined registration provision for small issues, affecting 326 filers at an estimated 912 burden hours per response.

Form F–6 is used by depository banks to register American Depositary Receipts of foreign companies pursuant to the Securities Act of 1933. All filings on Form F–6 are prepared and filed by a limited number of banks that act as depositaries.

Currently, 339 Forms F–6 are filed annually at an estimated one burden hour per response.

Direct general comments to Gary Waxman at the address below. Direct any comments concerning the accuracy of the estimated average burden hours for compliance with SEC rules and forms to Kenneth A. Fogash, Deputy Executive Director, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549–6004 and Gary Waxman, Clearance Officer, Office of Management and Budget (Paperwork Reduction Projects 3235–286 and 3235–0292), Room 3228, New Executive Office Building, Washington, DC 20503.

Jonathan G. Katz,

Secretary.

December 9, 1988.

BILLING CODE 8010–01–M

[Rel. No. 34–26344; File No. SR–DTC–88–19]

Self-Regulatory Organizations; Filing of Proposed Rule Change; The Depository Trust Company Relating to Its Automated Tender Offer Program

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on November 23, 1988, The Depository Trust Company filed with the Securites and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change involves the Automated Tender Offer Program ("ATOP") of The Depository Trust Company ("DTC"), as described in the DTC Memorandum dated November 10, 1988 which is attached as Exhibit 2 to DTC's filing on Form 19b–4, File No. SR–DTC–88–19.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the place specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purposes of, and Statutory Basis for, the Proposed Rule Change

The proposedc rule change will automate further the manner in which tender and exchange offers can be processed through DTC's facilities. A principal feature of ATOP is the elimination of hardcopy (i.e., paper) letters of transmittal signed by DTC's Participants. In place of the signed letters of transmittal, DTC will receive electronic instructions from Participants and will transmit electronically messages containing those instructions to computer terminals in the offices of high volume tender and exchange agents. The electronic instructions received by DTC from Participant and transmitted to the tender or exchange agent will include a single character by which the Participant acknowledges its receipt of, and agreement to be bound by, the offeror's letter of transmittal. ATOP will alleviate problems arising from the use of hardcopy documents in tender and exchange offers, such as the risk of loss, delay during shipment and the expense and labor involved in the physical handling of documents. In addition, ATOP will provide agents for tender and exchange offers with an improved ability to control the processing of such offers by making a variety of information available to the agent (and to the offeror) while an offer is open. ATOP will not change current practices regarding the preparation and distribution of tender and exchange offer materials, including letters of transmittal.

The proposed rule change is consistent with the requirements of the Securities and Exchange Act of 1934 and the rules and regulations thereunder applicable to DTC since the proposed rule change will automate further the processing of tender and exchange

offers involving securities on deposit at DTC. The proposed rule change will be implemented consistently with the safeguarding of securities and funds in DTC's custody or control or for which it is responsible since the proposed rule change enhances DTC's existing services for tender and exchange offers.

(B) Self-Regulatory Organization's Statement on Burden on Competition

DTC perceives no impact on competition by reason of the proposed rule change.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The proposed rule change was developed at the request of Participants who wish to maximize the electronic instructions they convey to and through DTC and after discussions with agents for tender and exchange offers. Written comments from DTC Participants or others have not been solicited or received on the proposed rule change. The DTC Memorandum attached as Exchibit 2 to DTC's filing on Form 19b–4, File No. SR–DTC–88–19, is being distributed to agents for tender and exchange offers and other interested persons.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and published its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securites and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by January 3, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: December 7, 1988.

BILLING CODE 8010–01–M

[Rel. No. 34–26346; File No. PHLX 88–37]

Self-Regulatory Organizations; Proposed Rule Change by the Philadelphia Stock Exchange, Inc. Relating to French Franc Contract Specifications

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on November 18, 1988, the Philadelphia Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Philadelphia Stock Exchange, Inc. ("PHLX" or the "Exchange") proposes to change, pursuant to Exchange Rule 1013 Units of Trading and rule 1012(c) Series of Options Open for Trading, the size of the French franc foreign currency options contracts listed and eligible for trading on the PHLX. The PHLX proposes that the unit of trading respecting the French franc foreign currency options be increased to 250,000 francs from 125,000 francs presently. Additionally, the PHLX proposes to amend Rule 1034 regarding the minimum fractional change *i.e.*, minimum premium change for dealing on the Exchange on option contracts on the French franc from $.00005 to $.00002. The text of the proposed rule change is set forth below [Brackets] indicate deletions; *italics* indicates additions.

Minimum Fractional Changes

Rule 1034. The minimum fractional change for dealing on the Exchange in option contracts shall be as follows:

(i) In the case of options on stocks, one-eighth point in option contracts trading at $3.00 per share per option or higher, and one-sixteenth point in option contracts trading under $3.00 per share per option.

(ii) In the case of options on foreign currencies, $.0001 for option contracts on the British pound, $.0001 for option contracts on the German mark, $.0001 for option contracts on the Swiss franc, $.0001 for option contracts on the Canadian dollar, $.0001 for option contracts on the Australian dollar, $.0001 for option contracts on the ECU, *$.0002* [$.00005] for option contracts on the French franc and $.000001 for option contracts on the Japanese yen.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statements of the Purpose of, and Statutory Basis for the Proposed Rule Change

The purpose of the proposed rule change is to increase the size of the unit of trading respecting French franc foreign currency options contracts from to 125,000 francs to 250,000 francs and enable market participants to more competitively transact business in this product. In recent months a number of market participants trading French franc options, as well as the PHLX Upstairs Advisory Committee, have maintained that the French franc options contract unit of trading was too small.

Currently, the French franc options contract is the smallest PHLX options contract, as measured by the dollar amount of underlying foreign currency. The increase in the size of the unit of trading in the French franc contract will bring it into a dollar range comparable to other foreign currency options contracts traded on the PHLX. In this regard, a French franc foreign currency

options contract of 250,000 francs represents a dollar value at current spot of $41,022.50 U.S., whereas the comparable ECU contract dollar value, for example, is $72,537.50 U.S., the Japanese yen contract dollar value is $49,862.50 U.S., the Canadian dollar contract value is $40,705.00 U.S., and the Australian dollar contract value is $41,055.00 U.S. Pursuant to its Rule 1012(a)(ii), the PHLX proposes to initiate trading and open French franc foreign currency options series respecting units of trading of 250,000 French francs in puts and calls with both American and European style expirations commencing on February 13, 1989. In order to prevent investor confusion the PHLX proposes not to continue to add French franc foreign currency options contract series with units of trading of 125,000 francs after the February 1989 expiration. The PHLX proposes to continue to trade those open and outstanding French franc options series with units of trading of 125,000 francs until their expiration in December 1989.

Additionally, by decreasing the minimum premium change from the equivalent of $6.25 per tick to $5.00 per tick the PHLX will enable market participants to more effectively trade and hedge their over the counter currency risk with Exchange traded French franc foreign currency options. In this regard, the Exchange understands that over-the-counter French franc currency options are usually transacted on a smaller tick basis than .00005.

The proposed rule change is based on section 6(b)(5) of the Securities Exchange Act of 1934 in that it is designed to facilitate transactions in the French franc foreign currency options contracts.

B. Self-Regulatory Organizations Statement on Burden on Competition

The PHLX does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days or such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approved such proposed rule change, or,

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by January 3, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

First Investors Kildoyle Fund, Inc.; Notice of Application

December 7, 1988. Q04

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "1940 Act").

Applicant: First Investors Kildoyle Fund, Inc.

Relevant 1940 Act Section: Section 8(f) and Rule 8f-1 thereunder.

Summary of Application: Applicant seeks an order declaring that it has ceased to be an investment company.

Filing Date: The application was filed on November 30, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 29, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549; Applicant, 120 Wall Street, New York, NY 10005.

FOR FURTHER INFORMATION CONTACT: Paul J. Heaney, Financial Analyst (202) 272-3420, or Brion R. Thompson, Branch Chief (202) 272-3016 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. On July 15, 1983, Applicant filed Form N-8A to register under the 1940 Act as an open-end, diversified management investment company. On July 15, 1983, Applicant also filed Form N-1 pursuant to the 1940 Act and the Securities Act of 1933, but such registration statement did not become effective and Applicant never made a public offering of its securities. Applicant does not have any assets or liabilities. Applicant has no shareholders and is not now engaged, nor does it propose to engage, in any business activities other than those necessary for the winding-up of its affairs.

2. Applicant is a duly organized and existing corporation under the laws of the State of Maryland. Applicant will not dissolve and intends to maintain its corporate existence under Maryland State law.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

National Rural Utilities Cooperative Finance Corporation; Notice of Application

December 7, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for an amended order under the Investment Company Act of 1940 ("1940 Act").

Applicant: National Rural Utilities Cooperative Finance Corporation.

Relevant 1940 Act Sections: Exemption requested pursuant to sections 6(c) and 6(e) from all provisions of the 1940 Act, with certain exceptions.

Summary of Application: Applicant seeks an order pursuant to sections 6(c) and 6(e) amending a prior order (Investment Company Act Rel. No. 15811, June 16, 1987, "Prior Order") exempting certain trusts ("Trust") established or to be established by Applicant, each Trust to hold a note guaranteed by the Rural Electricification Administration evidencing loans used to refinance certain borrowings from the Federal Financing Bank, from all provisions of the 1940 Act other than sections 26 (with certain exceptions), 36, 37 and (to the extent necessary to implement the foregoing Sections) 38 through 53 thereof in connection with the issuance of certificates ("Certificates") by each Trust to Applicant and the subsequent resale of the Certificates to the public by Applicant. The purpose of the requested amended order is to extend the relief granted in the Prior Order to Trusts established on behalf of certain rural telephone systems (the Prior Order contemplated only rural electric systems) and to consolidate into the requested amended order certain miscellaneous changes in the factual description of Applicant's proposal.

Filing Date: The application was filed on September 29, 1988 and a letter was submitted November 17, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the requested exemption will be granted. Any interested person may request a hearing on the application or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., December 29, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, in the case of an attorney-at-law, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549; Applicant, c/o Mark L. Weissler, Milbank, Tweed, Hadley & McCloy, 1 Chase Manhattan Plaza, New York, NY 10005.

FOR FURTHER INFORMATION CONTACT: Thomas Mira, Staff Attorney (202) 272-3047, or Brion Thompson, Branch Chief (202) 272-3016 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. Applicant is a tax exempt, not-for-profit cooperative association that was established by its members to provide them with a source of financing to supplement the loan programs of the Rural Electrification Administration of the United States Department of Agriculture ("REA"). Applicant's members are generally non-profit cooperative electric utilities and service organizations and represent 95% of the total number of such entities in the United States. Under the Prior Order, Applicant presently conducts a program ("Program") to assist rural electric systems ("Electric Borrowers") in refinancing certain borrowings from the Federal Financing Bank of the United States Treasury Department ("FFB Loans") as permitted by an amendment to the Rural Electrification Act of 1936. The FFB Loans are repaid from the proceeds of loans made by Applicant ("Private Loans"), repayment of which is guaranteed by the REA, which loans are evidenced by notes ("Private Notes") each deposited in a Trust. Each Trust's investment activities consist of receiving a single Private Note, issuing the Certificates representing the beneficial interest of the Trust, and collecting payments on the Private Note. The Certificates are issued initially to Applicant but may be resold to the public. The trust agreements governing each Trust will qualify under the Trust Indenture Act of 1939 if the Certificates are offered to the public. The trusteee of each Trust is a commercial bank having capital and surplus of at least $50 million.

2. Applicant now proposes to extend the Program to cover refinancing of FFB Loans by rural telephone systems ("Telephone Borrowers"). The legislation under which the Program was organized treats Electric Borrowers and Telephone Borrowers indiscriminately. To extend the Program, Applicant will act, in part, through Rural Telephone Finance Cooperative ("RTFC"), a cooperative of which Applicant is a member that makes loans to Telephone Borrowers. Applicant manages RTFC pursuant to a management contract and, under RTFC's charter, appoints a majority of its board of directors. Applicant combines RTFC's financial results with its own in Applicant's financial statements, as required by generally accepted accounting principals in light of Applicant's control over RTFC and the complete integration of the two entities' operations.

3. Under the Program as revised, the Trusts would be established and operate in substantially the same manner as under the Prior Order, except that in the case of a Telephone Borrower, RTFC (rather than Applicant as in the case of Electric Borrowers) would make the Private Loans the proceeds of which would be used to prepay the FFB Loans being refinanced. RTFC would derive its funds through a loan from (or borrowing guaranteed by) Applicant. Applicant would guarantee performance by RTFC of its obligations as lender. RTFC would receive the Certificates issued by each Trust holding a Private Note evidencing the Private Loan made by RTFC. Under the proposed amended order, REA would continue to provide the same full faith and credit obligation of the United States with respect to any principal and interest due on a Private Note as was provided under the Prior Order.

4. Applicant will continue to act as servicer for all Trusts, unless REA interprets applicable regulations to require that RTFC so act with respect to Telephone Borrowers, in which case RTFC will subcontract its servicing obligations to Applicant. Applicant will also guarantee RTFC's performance of its obligations as lender and as servicer or otherwise provide RTFC with credit support satisfactory to REA as permitted under applicable regulations. Given its responsibilities as servicer, Applicant will continue to sign registration statements under the Securities Act of 1933 with respect to the Certificates.

5. Applicant also proposes to amend the Prior Order to reflect the following changes in the Program:

(a) If the rate on a Private Note is fixed after a period during which it has borne interest at a variable rate, any savings theretofore realized (that is, the amount by which the interest rate it has actually borne is less than the weighted average rate on the refinanced FFB

Loans (the "FFB Rate"), will be available, as contemplated by applicable regulations, to permit fixing of a rate in excess of the FFB Rate to the extent of the savings. In no case would there be any change in the interest rates on the Certificates once they had been sold to the public.

(b) During the period when a Private Note bears interest at a variable rate, it may generally be prepaid on five days' notice rather than on 30 days notice as was stated in the application on which the Prior Order was granted. Funds deposited for prepayment of such Private Note during this period will be invested not for 30 days but only for the period between notice of prepayment and distribution to Certificateholders (a minimum of five and a maximum of 10 days). Funds will be invested only in instruments maturing before the date of distributions.

(c) Enforcement expenses and (unless REA consents in a particular transaction) offering costs for the Certificates will no longer be included in REA-guaranteed interest on the Private Notes. Instead, the servicer will be relegated to an unsecured claim for these expenses directly against the borrower, and offering costs (if REA does not permit otherwise) will be paid by the borrower at closing or financed by Applicant or RTFC for the borrower outside the refinancing transaction. Since the servicer will have no claim for these expenses and costs from the Trusts, it remains true (as stated in the original application) that payment of these costs and expenses will not reduce distributions to Certificateholders.

(d) The original application indicates that earnings on funds invested pending distribution to Certificateholders will be either paid to Applicant or returned to the borrower (or to REA to the extent of unreimbursed payments on the REA guaranty). Under the amended order the borrower and REA, and not Applicant, will receive all such earnings.

(e) While Applicant still holds the Certificates, the rate on a Private Note, once fixed, must remain so fixed until the maturity of the Private Note.

Applicant's Legal Conclusions

1. The requested amended order is necessary and appropriate in the public interest because Congress has acted to encourage prepayment of the FFB Loans with private capital, the structure proposed has been approved by REA and accommodates the government's concerns about issuance of federally guaranteed debt directly to the public and the investment activities of the Trusts will be very limited.

2. The requested amended order is consistent with the protection of investors because the limited activity of the Trusts and the extreme safety of the assets they will hold obviate the need for the complex regulatory safeguards of the 1940 Act. Finally, Applicant's proposal is consistent with the purposes fairly intended by the policy and provisions of the 1940 Act because the Trusts' operations will not lend themselves to the abuses against which the 1940 Act is directed.

Applicant's Conditions

If the requested exemption is granted, Applicant agrees that the Trusts will comply with the following conditions:

1. To be subject pursuant to Section 6(e) of the 1940 Act to sections 26 (with the following exception), 36, 37 and (to the extent necessary to implement the foregoing sections) 38 through 53 of the 1940 Act. They will not be subject to the provisions of section 26(a)(2) of the 1940 Act to the extent such provisions are inconsistent with the servicer compensation arrangements (including the scheduled servicing fee and reimbursements for certain expenses) described in the application, which Applicant believes are fair and reasonable in light of the function the servicer undertakes.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

SMALL BUSINESS ADMINISTRATION

[License No. 06/06-0188]

MVenture Corp.; Application for Conflict of Interest Transaction

Notice is hereby given that MVenture Corp (MVC), 1717 Main, Dallas, Texas 75201, a Federal Licensee under the Small Business Investment Act of 1958, as amended (the Act), has filed an application with the Small Business Administration (SBA) pursuant to § 107.903(b)(1) of the Regulations governing small business investment companies (13 CFR 107.903(b)(1) (1988)) for an exemption from the provisions of the cited Regulations.

MVC proposes to invest $600,000 in NYS Entertainment, Ltd. (NYSEL), 4312 Bordeaux, Dallas, Texas 75205.

The proposed financing is brought within the purview of § 107.903(b)(1) of the Regulations because the proposed General Partner of NYSEL will be 25 percent-owned by an Associate of MVC, Mr. Raymond A. Hay. Mr. Hay is an Associate of MVC by virtue of the fact that he is a Director of MCorp, the indirect majority stockholder of MVC. His stock ownership of MCorp is de minimus.

Notice is hereby given that any interested person may, not later than fifteen (15) days from the date of publication of this Notice, submit written comments on the proposed transaction to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, DC 20416.

A copy of this Notice will be published in a newspaper of general circulation in Dallas, Texas.

[License No. 06/06-0298]

Southern Ventures, Inc.; Issuance of a Small Business Investment Company License

On September 30, 1988, a notice was published in the **Federal Register** (Vol. 53, No. 190 Page 38399) stating that an application has been filed by Southern Ventures, Inc., with the Small Business Administration (SBA) pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1988) for a license as a small business investment company.

Interested parties were given until close of business October 30, 1988, to submit their comments to SBA. No comments were received.

Notice is hereby given that, pursuant to section 301(c) of the Small Business Investment Act of 1958, as amended, after having considered the application and all other pertinent information, SBA issued License No. 06/06-0298 on November 30, 1988, to Southern Ventures, Inc. to operate as a small business investment company.

New York Harbor Traffic Management Advisory Committee; Meeting

AGENCY: Coast Guard, DOT.

ACTION: Notice of meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 USC App. I), notice is hereby given of a meeting of the New York Harbor Traffic Management Advisory Committee to be held on January 26, 1989, in the Conference Room, second floor, U.S. Coast Guard Marine Inspection Office, Battery Park, New York, New York, beginning at 10:00 a.m.

The agenda for this meeting of the New York Harbor Traffic Management Advisory Committee is as follows:

1. Introductions.
2. Feedback on Group New York's Anchorage Management performance and the monitoring of channel 13 VHF-FM.
3. Update Kill Van Kull/Newark Bay Dredging Project.
4. Update on Navy Homeport project.
5. Discuss impact of revised Captain of the Port zones.
6. Topics from the floor.
7. Review of agenda topics and selection of date for next meeting.

The New York Harbor Traffic Management Advisory Committee has been established by Commander, First Coast Guard District to provide information, consultation, and advice with regard to port development, maritime trade, port traffic, and other maritime interests in the harbor. Members of the Committee serve voluntarily without compensation from the Federal Government.

Attendance is open to the interested public. With advance notice to the Chairperson, members of the public may make oral statements at the meeting. Persons wishing to present oral statements should so notify the Executive Director no later than the day before the meeting. Any member of the public may present a written statement to the Committee at any time.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander L. Brooks, USCG, Executive Secretary, NY Harbor Traffic Management Advisory Committee, Port Safety Office, Building 109, Governors Island, New York, NY 10004; or by calling (202) 668-7834.

Dated: December 1, 1988.

R.I. Rybacki,

Rear Admiral, U.S. Coast Guard Commander, First Coast Guard District.

Federal Aviation Administration

[Summary Docket No. PE-88-47]

Petition for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before January 4, 1989.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-10), Petition Docket No. _____, 800 Independence Avenue SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-10), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267-3132.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, DC, on December 7, 1988.

Deborah E. Swank,

Acting Manager, Program Management Staff.

Petitions for Exemption

Docket No.: 24283
Petitioner: American Flyers
Regulations Affected: 14 CFR 141.91(a)
Description of Relief Sought: To extent Exemption No. 4419A that allows petitioner to conduct flight training and instruction in its approved courses of training at its satellite base located at Houston, Texas, and to conduct a pilot ground school at its facility in Farmers Branch, Texas.

Docket No.: 25671
Petitioner: Rocky Mountain Helicopters, Inc.
Sections of the FAR Affected: 14 CFR 135.63(c)
Description of Relief Sought: To allow emergency helicopter hospital service without preparing the load manifest for multiengine helicopters operated by petitioner. Also, to provide for the relief of preparing a load manifest in duplicate containing information concerning the load of the aircraft.

Docket No.: 060CE
Petitioner: Fairchild Aircraft Corp.

Sections of the FAR Affected: 14 CFR 23.3(d)

Description of Relief Sought: Petition for exemption from § 23.3(d) to allow an optional cabin attendant seat.

Docket No.: 22451.

Petitioner: Air Transport Association of America.

Sections of the FAR Affected: 14 CFR 121.613, 121.619, and 121.625.

Description of Relief Sought/ Disposition: To extend and amend Exemption No. 3585A, as amended, granted to People Express Airlines, Inc. (PEA), that allows PEA to (1) dispatch and airplane, under IFR, to a destination airport; and (2) list an alternate airport for that destination airport when the weather forecasts for either one or both of those airports indicate by the use of conditional words such as "occasionally," "intermittently," "briefly," or "a chance of," in the remarks section of such reports, that the weather could be below authorized weather minimums at the time of arrival, provided that the information contained in the main body of the weather reports or forecasts used by the certificate holder's dispatch center show, for each flight to be dispatched, that the weather at the destination airport and the alternate airport for that destination airport, listed in the dispatch release, will be at or above authorized weather minimums at the time of arrival. The amendment, if granted, would grant relief to ATA member airlines and any other similarly situated Part 121 certificate holders.

Grant, November 1, 1988, Exemption No. 3585F

Docket No.: 24056.

Petitioner: Aviation Methods, Inc.

Sections of the FAR Affected: 14 CFR 61.58(c)(1).

Description of Relief Sought/ Disposition: To allow petitioner's pilots to complete 100 percent of their required pilot-in-command 24-month biennial proficiency check requirements in an FAA-approved simulator for the F–27/ 227 aircraft.

Grant, November 23, 1988, Exemption No. 4997

Docket No.: 25254.

Petitioner: Omniflight Helicopters, Inc.

Regulations Affected: 14 CFR 43.3(g).

Description of Relief Sought/ Disposition: to allow petitioner's pilots to replace medical oxygen cylinders on petitioner's helicopter after such cylinders have been depleted.

Denial, November 29, 1988, Exemption No. 4999

Docket No.: 25560.

Petitioner: Lake Mead Air, Inc.

Sections of the FAR Affected: 14 CFR 135.143(b).

Description of Relief Sought/ Disposition: To correct a typographical error in Condition No. 2 in Exemption No. 4968, that permits petitioner to operate single-engine airplanes using an FAA-approved minimum equipment list subject to certain conditions and limitations.

Grant, November 29, 1988, Exemption No. 4968A

Docket No.: 25596.

Petitioner: Air Service Center, Inc.

Sections of the FAR Affected: 14 CFR 141.35(d)(4)(i).

Description of Relief Sought/ Disposition: to allow Mr. Robert J. Larbes to be designated as petitioner's chief flight instructor without meeting certain experience requirements for such designation.

Denial, October 31, 1988, Exemption No. 4992

Docket No.: 25740.

Petitioner: Pan American World Airways, Inc.

Sections of the FAR Affected: 14 CFR 121.411(a)(1), (2), (3), and (6) and 121.413(b) and (c).

Description of Relief Sought: To allow petitioner to utilize certain highly qualified pilot flight and simulator instructors from Aeroformation for the purpose of training petitioner's initial cadre of pilots in the Airbus Industries A320 type airplane on Toulouse, Franc, without holding appropriate U.S. certificated and ratings and without meeting all of the applicable training requirements of Subpart N of Part 121

Grant, November 29, 1988, Exemption No. 4998

BILLING CODE 4910–13–M

Operating Limitations at O'Hare International Airport; Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of public meeting.

SUMMARY: This notice announces a meeting to discuss the terms under which air carriers and commuter operators may use slots at O'Hare International Airport, including provisions for operation outside designated slot time periods, and to discuss air carrier and commuter operator schedules which will meet those conditions. The meeting is subject to a limited grant of antitrust immunity by the Department of Transportation for meeting participants.

DATE: The meeting will be held on Wednesday, December 14, 1988, at 10:00 a.m. The meeting will continue on Thursday, December 15 if necessary.

ADDRESS: The meeting will be held at the Marriott Crystal Gateway Hotel, 1750 Jefferson Davis Highway, Crystal City, Arlington, VA.

FOR FURTHER INFORMATION CONTACT: David L. Bennett, Manager, Airspace and Air Traffic Law Branch, AGC–230, Telephone: (202) 267–3491, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

SUPPLEMENTARY INFORMATION:

Background

In meetings held in Washington, DC, in March and April 1987, 6 air carriers serving O'Hare International Airport agreed to adjust their schedules at ORD in order to eliminate scheduling peaks and to distribute flights more evenly throughout the day, thereby reducing flight delays. In order to permit the necessary scheduling flexibility, the Federal Aviation Administration (FAA) agreed to permit carriers holding ORD slots to operate a slot outside of the half-hour time period of that slot, subject to certain limitations. Air Traffic Control (ATC) has express authority to authorize such exceptions to the High Density Rule quotas under FAR 93.123(a).

This arrangement was made formal in agreements submitted to the Office of the Secretary of Transportation and approved on May 29, 1987 (DOT Order 87–5–82). Two of those agreements, with American Airlines and United Air Lines, remain in effect.

The schedules initially approved by the FAA resulted in a depeaking of schedules which reduced operating delays and reduced ATC workload. However, the agreements did not require FAA approval of subsequent schedule changes. Since that time carriers have made incremental but significant changes to the schedules initially approved.

As a result of the effect of current operations on ATC resources in the

VOL 53 ISS 239 DE 13 1988 UMI

Chicago area, the FAA has implemented traffic flow management procedures at O'Hare and Midway Airports on a regular basis to ensure an operationally acceptable level of arriving traffic. Also, the FAA has recently completed a System Safety and Efficiency Review of operations at O'Hare Airport and is in the process of implementing a number of the operational and procedural recommendations of that review.

In order to further improve the operational situation at O'Hare, the agency is convening a meeting to discuss the ATC authorization to schedule flights outside of designated slot time periods, the conditions that should apply to such an authorization, and the revision of air carrier and commuter operator schedules consistent with those conditions.

Public Meeting

This notice announces a meeting to discuss the terms under which air carriers and commuter operators may use slots at O'Hare International Airport, including provision for operation outside designated slot time periods, and to discuss air carrier and commuter operator schedules which will meet those conditions. The meeting is open to the public and all interested persons are invited to attend. The meeting will be held at the Marriott Crystal Gateway Hotel in Crystal City, Virginia. The meeting will begin at 10:00 a.m. on December 14, 1988, and will continue on December 15 if necessary.

The Office of the Secretary of Transportation has issued a limited grant of discussion authority and antitrust immunity for air carriers and commuter operators participating in discussions at the meeting. (DOT Order 88–12–12; December 7, 1988).

Issued in Washington, DC, on December 8, 1988.

John H. Cassady,

Assistant Chief Counsel, Regulations and Enforcement Division.

BILLING CODE 4910–13–M

National Highway Traffic Safety Administration

Rulemaking, Research and Enforcement Programs; Public Meeting

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice.

SUMMARY: This notice announces a public meeting at which NHTSA will answer questions from the public and the automobile industry regarding the agency's rulemaking, research and enforcement programs.

DATES: The agency's regular, quarterly public meeting relating to the agency's rulemaking, research and enforcement programs will be held on January 19, 1989, beginning at 10:30 a.m. Questions relating to the agency's rulemaking, research and enforcement programs, must be submitted in writing by January 12, 1989. If sufficient time is available, questions received after the January 12 date may be answered at the meeting. The individual, group or ccmpany submitting a question does not have to be present for the question to be answered. The agency will attempt to mail a consolidated list of questions submitted by January 12, and issues to be discussed, to interested persons by January 17, 1989. This list will also be available at the meeting.

ADDRESS: Questions for the January 19 meeting relating to the agency's rulemaking, research, and enforcement programs should be submitted to Barry Felrice, Associate Administrator for Rulemaking, Room 5401, 400 Seventh Street, SW., Washington, DC 20590. The public meeting will be held in Room 2230, Department of Transportation Headquarters Building, 400 Seventh Street, SW., Washington, DC 20590.

SUPPLEMENTARY INFORMATION: NHTSA will hold its regular, quarterly meeting to answer questions from the public and industry regarding the agency's rulemaking, research, and enforcement programs on January 19, 1989. The meeting will begin at 10:30 a.m., and will be held in Room 2230, Department of Transportation Headquarters Building, 400 Seventh Street, SW., Washington, DC 20590. The purpose of the meeting is to focus on those phases of these NHTSA activities which are technical, interpretative or procedural in nature. A transcript of the meeting will be available for public inspection in the NHTSA Technical Reference Section in Washington, DC within four weeks after the meeting. Copies of the transcript will then be available at twenty-five cents for the first page and five cents for each additional page (length has varied from 100 to 150 pages) upon request to NHTSA Technical Reference Section, Room 5108, 400 Seventh Street, SW., Washington, DC 20590.

Issued on December 8, 1988.

Barry Felrice,

Associate Administrator for Rulemaking.

BILLING CODE 28659

Maritime Administration

[Docket S–843]

Lykes Bros. Steamship Co., Inc.; Request To Exceed Its Contractual Maximum Sailing Allowance on Trade Route 13 (U.S. South Atlantic & Gulf/Mediterranean) and To Exceed Its Maximum Privilege Service Between Ports on the U.S. Atlantic and Gulf and Ports in Southwest Asia From Suez to Burma

Lykes Bros. Steamship Co., Inc. (Lykes), by letter dated December 8, 1988, has requested a one-time only increase in its maximum annual subsidized sailing authority from 48 to 49 on its Trade Route 13 (U.S. Atlantic & Gulf/Mediterranean) service; and a one-time only increase in its maximum privilege service allowance from 16 to 17 on its Trade Route 18 privilege service between the U.S. Atlantic and Gulf and ports in Southwest Asia from Suez to Burma.

Lykes advises that its vessel *Ashley Lykes*, Voyage 105, sailed outbound from the U.S. Great Lakes on a Line G (Trade Area 4) voyage in late September. While en route back to the Great Lakes, the vessel has encountered very heavy seas in the Atlantic and has been forced to substantially reduce its speed. As a result of these heavy seas, a passenger was seriously injured, and the vessel was forced to deviate to the Azores on November 30, where proper medical care could be provided. Prior to this heavy weather, the vessels's ETA at Montreal was November 25. After sailing from Azores, however, the vessel's ETA at Montreal was revised to December 6.

The vessel has continued to encounter bad weather, and as of December 8 was about 1,300 miles from Montreal. It is now impossible for the ship to meet its schedule to load the relief cargo destined for India at three Great Lakes ports (Duluth, Superior and Milwaukee), and general cargo for Alexandria at Milwaukee, prior to the closing of the Welland Canal on December 24. Recognizing this, the U.S. Department of Agriculture has agreed to allow Lykes to load this relief cargo (approximately 9,200 metric tons of canned vegetable oil and bagged food stuffs) in the U.S. Gulf. Lykes will bear the cost of moving all of the cargo from the Great Lakes to the U.S. Gulf. Because of the unusual circumstances surrounding this frustrated Great Lakes vessel call, and the need to load this cargo at an alternate port (Pensacola ETA December 16), Lykes requests a one-time only increasee in its maximum subsized

sailing authority on Trade Routes 13 and 18. Lykes advised that this Great Lakes cargo is the only cargo the vessel will be loading in the U.S. Gulf. The only other cargo to be carried on the vessel is to be loaded at Baltimore and discharged at Alexandria, Egypt. This is cargo that the Ashley Lykes was already scheduled to lift, and the call at Baltimore would, of course, be an unsubsidized deviation.

Lykes avers that this voyage would have been abandoned and the relief cargo would have probably moved foreign-flag if Lykes had not made the commitment to provide substitute service, at great additional cost. Lykes emphasis that the voyage is therefore, in reality, a Great Lakes voyage.

This application may be inspected in the Office of the Secretary, Maritime Administration. Any person, firm, or corporation having any interest in such request and desiring to submit comments concerning the application must file written comments in triplicate with the Secretary, Maritime Administration, Room 7300, Nassif Building, 400 Seventh Street SW., Washington, DC 20590. Comments must be received no later than 5:00 P.M. on December 15, 1988. This notice is published as a matter of discretion and publication should in no way be considered a favorable or unfavorable decision on the application, as filed or as may be amended. The Maritime Subsidy Board will consider any comments submitted and take such action with respect thereto as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No. 20.804 (Operating-Differential Subsidies).

By Order of the Maritime Subsidy Board.
Dated: December 9, 1988.

James E. Saari,

Secretary.

Sunshine Act Meetings

Federal Register
Vol. 53, No. 239
Tuesday, December 13, 1988

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

TIME AND DATE: 11:00 a.m., Monday December 19, 1988.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Report of the operations review of the Division of Human Resources Management.
2. Proposals regarding a Federal Reserve Bank's building requirments.
3. Federal Reserve Bank and Branch director appointments.
4. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
5. Any items carried forward from a priviously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: December 9, 1988.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 88-28764 Filed 12-9-88; 3:50 pm]

BILLING CODE 6210-01-M

FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

TIME AND DATE: 10:00 a.m., Friday, December 16, 1988.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Summary Agenda:

Because of their routine nature, no substantive discussion of the following items is anticipated. These matters will be voted on without discussion unless a member of the Board requests that an item be moved to the discussion agenda.

1. Preemption determination under Regulation CC (Availability of Funds and Collection of Checks) regarding the funds availability laws of New Jersey. (Proposed earlier for public comment; Docket No. R-0647).
2. Cost of Federal Reserve notes in 1989.

Discussion Agenda:

3. Publication for comment of proposed amendments to Regulation Z (Truth in Lending) implementing the Fair Credit and Charge Card Disclosure Act to require certain disclosures by credit and charge card issuers.
4. Proposed adoption of the Board's capital adequacy guidelines. (Proposed earlier for public comment; Docket No. R-0628)
5. Proposed 1989 Federal Reserve Bank budgets.
6. Any items carried forward from a previously announced meeting.

Note: This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by calling (202) 452-3684 or by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, DC 20551.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204.

Dated: December 9, 1988.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 88-28683 Filed 12-9-88; 10:14 am]

BILLING CODE 6210-01-M

FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

TIME AND DATE: Approximately 11:30 a.m., Friday, December 16, 1988, following a recess at the conclusion of the open meeting.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: December 9, 1988.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 88-28684 Filed 12-9-88; 10:14 am]

BILLING CODE 6210-01-M

FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

TIME AND DATE: 10:00 a.m., December 19, 1988.

PLACE: 5th Floor, Conference Room, 805 Fifteenth Street NW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED

1. Approval of minutes of last meeting.
2. Thrift Savings Plan activities report by Executive Director.
3. Status of legislative proposals.
4. Adoption of agency seal.

CONTACT PERSON FOR MORE INFORMATION: Tom Trabucco, Director, or Catherine Ball, Deputy Director, Office of External Affairs, (202) 523-5660.

Dated: December 9, 1988.

Francis X. Cavanaugh,

Executive Director, Federal Retirement Thrift Investment Board.

[FR Doc. 88-28736 Filed 12-9-88; 2:49 pm]

BILLING CODE 6760-01-M

NATIONAL MEDIATION BOARD

TIME AND DATE: 2:00 p.m., Wednesday, January 4, 1989.

PLACE: Board Hearing Room, 8th Floor, 1425 K Street NW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Ratification of the Board actions taken by notation voting during the month of December 1988.
2. Other priority matters which may come before the Board for which notice will be given at the earliest practicable time.

SUPPLEMENTARY INFORMATION: Copies of the monthly report of the Board's notation voting actions will be available from the Executive Director's office following the meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Charles R. Barnes, Executive Director, Tel.: (202) 523-5920.

Date of Notice: December 8, 1988.

Charles R. Barnes,

Executive Director, National Mediation Board.

[FR Doc. 88-28702 Filed 12-9-88; 2:49 pm]

BILLING CODE 7550-01-M

NUCLEAR REGULATORY COMMISSION

DATE: Weeks of December 12, 19, 26, 1988 and January 2, 1989.

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

STATUS: Open and Closed.

MATTERS TO BE CONSIDERED:

Week of December 12

Thursday, December 15

3:30 p.m.
Affirmation/Discussion and Vote (Public Meeting)
a. Promulgation of Final Rule Required by the Omnibus Budget Reconcilation Act of 1987 (Tentative)

Week of December 19—Tentative

BILLING CODE 7715-01-M

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of December 12, 1988.

Closed meetings will be held on Tuesday, December 13, 1988, at 9:30 a.m. and 2:30 p.m. An open meeting will be held on Tuesday, December 13, 1988, at 10:00 a.m.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4)(8), (9)(a) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at closed meetings.

Commissioner Cox, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matter of the closed meeting scheduled for Tuesday, December 13, 1988, at 9:30 a.m., will be:

Litigation matter.

The subject matter of the open meeting scheduled for Tuesday December 13, 1988, at 10:00 a.m., will be:

Consideration of a proposed rule change by the National Association of Securities Dealers, Inc. ("NASD") to define the term professional trading account and to prohibit NASD member firms from effecting transactions on behalf of professional trading accounts using the Small Order Execution System. For further information, please contact Katherine England at (202) 272-2378.

The subject matter of the closed meeting scheduled for Tuesday, December 13, 1988 at 2:30 p.m., will be :

Settlement of administrative proceedings of an enforcement nature.
Institution of injunctive actions.
Settlement of injunctive actions.
Institution of administrative proceeding of an enforcement nature.
Formal orders of investigation
Litigation matters.
Consideration of *amicus* participation.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Brent Taylor at (202) 272-2200.

Jonathan G. Katz,

Secretary.

December 12, 1988.

Corrections

Federal Register
Vol. 53, No. 239
Tuesday, December 13, 1988

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP88-140-004]

Midwestern Gas Transmission Co.; Tariff Filing

Correction

In notice document 88-28145 appearing on page 49355 in the issue of Wednesday, December 7, 1988, the docket number was incorrect and should appear as set forth above.

BILLING CODE 1505-01-D

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 177 and 179

[OPP-260051; FRL-3384-7]

Food Additive Regulations Concerning Pesticide Residues; Procedural Regulations

Correction

In proposed rule document 88-24125 beginning on page 41126 in the issue of Wednesday, October 19, 1988, make the following corrections:

§ 177.98 [Corrected]

1. On page 41134, in the first column, in § 177.98 introductory text, in the fourth line, "date" should read "data".

§ 179.80 [Corrected]

2. On page 41139, in the second column, in § 179.80(b), in the seventh line, "pareties" should read "parties".

§ 179.95 [Corrected]

3. On page 41141, in the third column, in § 179.95(c), in the first line, "whenever" was misspelled; and in the third line, "evidence" was misspelled.

§ 179.117 [Corrected]

4. On page 41143, in the first column, in § 179.117(a), in the first line, "of the" should read "or".

8 CFR Part 217

[INS No. 1135-88]

Visa Waiver Pilot Program; Adjacent Islands and Transit Passengers

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule amends the current regulations on the Visa Waiver Pilot Program as provided at section 313 of the Immigration Reform and Control Act of 1986 (Pub. L. 99-603) to permit the temporary absence of aliens admitted under this program to travel to certain adjacent islands as well as to foreign contiguous territory within the 90-day period of admission. In addition, the rule is amended to authorize passengers who are in transit through the United States to avail themselves of the program, if otherwise eligible. The rule will enhance international travel, and would ease the administrative burden of carriers that are responsible for passengers in transit without visas.

EFFECTIVE DATE: December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Yanghe Peggy Wong, Assistant Chief Inspector, Immigration and Naturalization Service, 425 I Street, NW., Room 7123, Washington, DC 20536. Telephone: (202) 633-2745.

SUPPLEMENTARY INFORMATION: The Visa Waiver Pilot Program was implemented on July 1, 1988, allowing British citizens with the right of abode in the United Kingdom to apply for admission into the United States without a visa as nonimmigrant visitors for business or pleasure for ninety days or less by arriving in the United States on carriers participating in the program. The designation of Japan is effective December 15, 1988 and the corresponding regulations are included in another part of this issue of the **Federal Register**.

First, the Visa Waiver Pilot Program regulations are amended to include for eligibility under the program, those who are in direct transit without visas, provided that they meet the eligibility criteria for admission under the program. Under regular procedure, nonimmigrant visitors for business or pleasure are permitted to present valid nonimmigrant visitors visas even if in transit through the United States. Further, the statute (8 U.S.C. 1187(a)(1)) places no limit on the minimum length of stay under the waiver program. Therefore, including in the program those in transit without visas is consistent with the procedures already in place for passengers in transit with visas. In addition to enhancing international travel, this amendment would ease the administrative and custodial burdens of carriers that are responsible for passengers in transit without visas.

Second, the regulations are amended to permit the temporary absence to adjacent islands, within the 90-day period of authorized stay under the Visa Waiver Pilot Program, as well as to contiguous territory. The amendment also includes a definition of the term "adjacent islands".

Compliance with 5 U.S.C. 533 as to notice of proposed rulemaking and delayed effective date is unnecessary because this rule will facilitate international travel and will have a favorable impact on the public and on the United States economy.

Further, the Immigration and Naturalization Service has decided to invoke the exception to the thirty-day effective date requirement of 5 U.S.C. 553(d), making the final rule effective December 15, 1988. Any further delays would seriously impede the travel of thousands of travelers to the United States.

In accordance with 5 U.S.C. 605(b), the Commissioner certifies that this rule will not have a significant economic impact on a substantial number of small entities.

This is not a major rule within the meaning of section 1(b) of E.O. 12291, nor does this rule have federalism implications warranting the preparation of a Federal Assessment in accordance with E.O. 12612.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget in accordance with the provisions of the Paperwork Reduction Act and are cited under § 299.5 of this chapter.

List of Subjects in 8 CFR Part 217

Administrative practice and procedures, Aliens, Reporting and recordkeeping requirements, Passports and visas.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

PART 217—VISA WAIVER PILOT PROGRAM

1. The authority citation for Part 217 is revised to read as follows:

Authority: 8 U.S.C. 1103, 1187; 8 CFR 2.

2. In § 217.2 a new paragraph (d) is added to read as follows:

§ 217.2 Eligibility.

* * * * *

(d) *Aliens in transit.* An alien who is in transit through the United States is eligible to apply for admission under this program, provided that he or she meets the eligibility criteria set forth in paragraph (a) of this section.

* * * * *

§ 217.3 [Amended]

3. In § 217.3(c) the heading and the introductory text are amended by adding the term "or adjacent island" after the word "territory".

4. In § 217.3, paragraph (d) is added to read as follows:

§ 217.3 Maintenance of status.

* * * * *

(d) *Adjacent islands.* The term "adjacent islands" means Anguilla, Antigua, Aruba, Bahamas, Barbados, Barbuda, Bermuda, Bonaire, British Virgin Islands, Cayman Islands, Cuba, Curacao, Dominica, the Dominican Republic, Grenada, Guadeloupe, Haiti, Jamaica, Marie-Galante, Martinique, Miquelon, Montserrat, Saba, Saint-Barthelemy, Saint Christopher, Saint Eustatius, Saint Kitts-Nevis, Saint Lucia, Saint Maarten, Saint Martin, Saint Pierre, Saint Vincent and Grenadines, Trinidad and Tobago, Turks and Caicos Islands, and other British, French and Netherlands territory or possession bordering on the Caribbean Sea.

BILLING CODE 4410-10-M

---

8 CFR Part 217

[INS No. 1131-88]

Visa Waiver Pilot Program

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule adds Japan as a designated country under the Visa Waiver Pilot Program as provided at section 313 of the Immigration Reform and Control Act of 1986 (Pub. L. 99-603). It will facilitate international travel, streamline and reduce the work of affected agencies, and ensure that vital national interests are protected.

EFFECTIVE DATE: December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Yanghe Peggy Wong, Assistant Chief Inspector, Immigration and Naturalization Service, 425 I Street, NW., Room 7123, Washington, DC 20536, Telephone: (202) 633–2745.

SUPPLEMENTARY INFORMATION: The Visa Waiver Pilot Program was implemented on July 1, 1988, allowing British citizens with the right of abode in the United Kingdom to apply for admission into the United States without a visa as nonimmigrant visitors for business or pleasure for ninety days or less by arriving in the United States on carriers participating in the program.

Under the final rule published on June 30, 1988, the United Kingdom was the only country designated to receive these benefits for its nationals. Japan, having agreed to reciprocal treatment for United States citizens entering Japan under similar circumstances, is added now as one of the countries participating in the Pilot Program by the Secretary of State and the Attorney General, acting jointly through their designees. (See the Department of State Rule published elsewhere in this issue of the **Federal Register**). Section 217.5(a) is amended by adding a new sentence at the end thereof which sets forth the names of designated countries, the United Kingdom (effective as of July 1, 1988) and Japan (effective December 15, 1988). Therefore, effective on December 15, 1988, citizens of Japan shall be eligible for participation in the Visa Waiver Pilot Program. Compliance with 5 U.S.C. 533 as to notice of proposed rulemaking and delayed effective date is unnecessary because this rule will facilitate international travel and will have a favorable impact on the public and on the United States economy.

Further, the Immigration and Naturalization Service has decided to invoke the exception to the thirty-day effective date requirement of 5 U.S.C. 553(d), making the final rule effective December 15, 1988. If the Service had to wait thirty days before implementing the regulations, potentially thousands of travelers would be forced to cancel their travel plans to the United States at the height of the winter travel season for the Japanese. It is in the public interest to commence the program for the Japanese on December 15, 1988.

In accordance with 5 U.S.C. 605(b), the Commissioner certifies that this rule will not have a significant economic impact on a substantial number of small entities.

This is not a major rule within the meaning of section 1(b) of E.O. 12291, nor does this rule have federalism implications warranting the preparation of a Federal Assessment in accordance with E.O. 12612.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget in accordance with the provisions of the Paperwork Reduction Act and are cited under § 299.5 of this chapter.

List of Subjects in 8 CFR Part 217

Administrative practice and procedures, Aliens, Reporting and recordkeeping requirements, Passports and visas.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

PART 217—VISA WAIVER PILOT PROGRAM

1. The authority citation for Part 217 continues to read as follows:

Authority: 8 U.S.C. 1187.

2. In § 217.5, paragraph (a) is revised to read as follows:

§ 217.5 Designated countries.

(a) *Countries.* Japan (effective December 15, 1988) and the United Kingdom (effective July 1, 1988) have been designated as Visa Waiver Pilot Program countries based on the criteria set forth at sections 217(a)(2)(A) and 217(c) of the Act.

* * * * *

Date: December 5, 1988.

BILLING CODE 4410-10-M

DEPARTMENT OF STATE

Bureau of Consular Affairs

22 CFR Part 41

[108.877]

Visas; Passports and Visas Not Required for Certain Nonimmigrants

AGENCY: Bureau of Consular Affairs, DOS.

ACTION: Final rule.

SUMMARY: This final rule amends the regulations at 22 CFR 41.2(l) to bestow a benefit upon certain classes of aliens. Paragraph (l) waives the visa requirement for certain nonimmigrants applying for admission to the United States as visitors for a period not to exceed ninety days. Under established procedures, a nonimmigrant alien who wishes to enter the United States as a visitor must obtain a nonimmigrant B–2 visa. Only the United Kingdom was a designated country to receive this benefit as of July 1, 1988. Japan is added as a designated country, effective on December 15, 1988. On and after that date Japanese citizens may avail themselves of this benefit.

EFFECTIVE DATE: December 15, 1988.

FOR FURTHER INFORMATION CONTACT: A. Roy Mackay, Deputy Chief, Legislation and Regulations Division, Visa Office, Washington, DC 20520 (202) 663–1205.

SUPPLEMENTARY INFORMATION: On pages 24903–24904 of the **Federal Register** of June 30, 1988 the Department of State published a final rule amending 22 CFR § 41.2. The final rule contained provisions designed to facilitate the admission of nonimmigrant alien visitors through the use of the United States Visa Waiver Pilot Program established by section 313 of the Immigration Reform and Control Act of 1986 (IRCA), Pub. L. 99–603 (section 217 of the Immigration and Nationality Act (8 U.S.C. 1187)). The Pilot Program waives the nonimmigrant visa requirement for admission of certain aliens into the United States for a period not to exceed ninety days. Under that final rule the United Kingdom was the only country designated to receive these benefits for its nationals. Japan, having agreed to reciprocal treatment for United States citizens entering Japan under similar circumstances, is added now as one of the countries participating in the Pilot Program by the Secretary of State and the Attorney General, acting jointly through their designees. (See the Immigration and Naturalization Service Rule published elsewhere in this issue of the **Federal Register**.) Section 41.2(l) is amended by adding a new sentence at the end thereof which sets forth the names of designated countries, the United Kingdom (effective as of July 1, 1988) and Japan (effective December 15, 1988). Therefore, effective on December 15, 1988, citizens of Japan shall be eligible for participation in the Nonimmigrant Visa Waiver Program. This final rule is not considered to be a major rule for purposes of E.O. 12291 nor is it expected to have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

PART 41—NONIMMIGRANT CLASSES—WAIVER OF PASSPORT AND/OR VISA REQUIREMENTS

In view of the foregoing, Part 41 is amended as follows:

1. The authority citation for Part 41 continues to read:

Authority: Sec. 104, 66 Stat. 174, 8 U.S.C. 1104; Sec.109(b)(1), 91 Stat. 847; Sec. 313, 100 Stat. 3435, 8 U.S.C. 1187 and 1182.

2. Paragraph (l) of § 41.2 is revised to read as follows:

§ 41.2 Waiver by the Secretary of State and Attorney General of passport and/or visa requirements for certain categories of nonimmigrants.

* * * * *

(l) *Visa Waiver Pilot Program.* Notwithstanding the provisions of paragraphs (a) through (k) of this section, a visa is not required of any person who is eligible to apply for admission to the United States as a Visa Waiver Pilot Program applicant pursuant to the provisions of section 217 of the Act, if such a person is a citizen of a country designated as a participant in the Visa Waiver Pilot Program, who seeks admission to the United States for a period of 90 days or less as a visitor for business or pleasure. Countries so designated are: the United Kingdom (effective July 1, 1988) and Japan (effective December 15, 1988).

Date: November 28, 1988

Joan M. Clark,

Assistant Secretary for Consular Affairs.

DEPARTMENT OF HEALTH AND HUMAN SERVICES (HHS)

Office of Human Development Services

[Program Announcement No. AOA-89-1]

Fiscal Year 1989 Discretionary Funds Program; Availability of Funds and Request for Applications

AGENCY: Administration on Aging, HHS.

ACTION: Announcement of availability of funds and request for applications under the Administration on Aging's Discretionary Funds Program.

SUMMARY: The Administration on Aging (AoA) announces the beginning of its Discretionary Fund Program (DFP) for Fiscal Year 1989. Funding for AoA discretionary grants is authorized by Title IV of the Older Americans Act, Pub. L. 89-73, as amended.

This program announcement consists of three parts. Part I provides background information, discusses the purpose of the AoA Discretionary Funds Program, and lists the statutory funding authority. Part II describes the programmatic priorities under which AoA solicits applications for funding for projects. Part III describes in detail the application process and provides guidance on how to prepare and submit an application.

All of the forms necessary to submit an application are published as part of this announcement following Part III. No separate application kit is necessary for submitting an application. If you have a copy of this announcement, you have all the information and forms required to prepare and submit an application.

Grants will be made under this announcement subject to the availability of funds for the support of these activities.

DATE: The closing date for receipt of applications under this announcement is March 17, 1989.

ADDRESS: Application receipt point: Department of Health and Human Services, Grants and Contracts Management Division, Acquisition and Assistance Management Branch, 200 Independence Avenue, SW., Room 349F, Washington, DC 20201, Attn: AoA-89-1.

FOR FURTHER INFORMATION CONTACT: Department of Health and Human Services, Administration on Aging, Office of Program Development, 330 Independence Avenue, SW., Room 4260, Washington, DC 20201, telephone (202) 245-0441. For information regarding specific priority areas, please contact either Ms. Irma Tetzloff at 202/245-1268 (Priority Areas 2.2, 3.1, 3.2, and 3.3) or Mr. Alfred Duncker at 202/245-1269 (Priority Areas 1.1, 1.2, 1.3, 2.1, and 3.4).

SUPPLEMENTARY INFORMATION:

Part I—Preamble

A. Objectives of the Administration on Aging (AoA)

Consistent with its responsibilities for carrying out the Older Americans Act, the Administration on Aging has recently published a set of National Objectives in aging. These Objectives aim toward the establishment of a comprehensive system of community services that responds to the talents and needs of older persons in each and every community of the nation. Accessibility to such systems is an absolute necessity if all older persons are to have reasonable opportunities to lead independent and dignified lives in their own homes and communities for as long as possible. A statement of the AoA objectives is presented below:

Objectives for Implementation of the Older Americans Act for Fiscal Year 1989

All older people should have the opportunity to live independent, meaningful, and dignified lives in their own home and community for as long as possible today and in the future. Every community should have a system of services and opportunities to help older people serve and be served where they live. Older people, their family and friends must be familiar with the system and feel that it responds to them.

Listed below are the elements that comprise a comprehensive community system of services for older persons. These elements constitute the objectives that have been established for the Older Americans Act for FY 1989.

(1) To have a visible focal point of contact in each community where anyone can go or call for help, information or referral on any aging issue;

(2) To provide a range of options for services and opportunities that respond to the talents and the needs of older persons in each community;

(3) To assure that the options in each community are readily accessible to all older persons: the independent, semi-dependent and totally dependent, no matter what their income;

(4) To expand the commitment of public, private, voluntary and personal resources to support a system of services for older persons in each community;

(5) To assure collaborative decision-making among public, private, voluntary, religious and fraternal organizations and older people in each community in the development and maintenance of systems of services for older persons;

(6) To offer special help or targetted resources in each community for the most vulnerable older persons, those most in danger of losing their independence;

(7) To assure in each community an effective referral from agency to agency concerning the needs of older persons so that information or assistance is received, no matter how or where contact is made;

(8) To assure that each community system of services for older persons provides sufficient flexibility to respond with appropriate individualized assistance, especially for the vulnerable older person;

(9) To assure a unique character for the service system for older persons which is tailored to the specific nature of the community; and

(10) To assure that each community system of services for older persons is directed by leaders in the community who have the respect, capacity and authority necessary to convene all interested persons, assess needs, design solutions, track overall success, stimulate change and plan community responses for the present and for the future.

B. The AoA Discretionary Funds Program

The Discretionary Funds Program, as authorized by Title IV of the Older Americans Act, constitutes the major research, demonstration, training, education, and development effort of the Administration on Aging. The principal mission of the Title IV discretionary program is to assist in making the comprehensive community-based systems of options for older persons envisioned in the Older Americans Act—and underscored by AoA's Fiscal Year 1989 Objectives—a reality throughout the nation.

Toward this end, AoA seeks to fund projects which:

- Analyze trends and anticipate social issues that will become paramount in the future;
- Improve the effectiveness and efficiency of programs for the elderly by testing new models, systems and approaches for providing and delivering services; and
- Provide training, technical assistance, and information that will increase our ability to serve older people effectively, skillfully, and compassionately.

C. Linking Title IV Discretionary Resources to AoA's Objectives

Several of the AoA National Objectives outlined above constitute the organizing framework both for AoA's FY 1988 discretionary grant program initiatives and for the FY 1989 Priority Areas described in this Discretionary Funds Program announcement. Thus, the potential applicant is well advised to consider AoA's FY 1989 Title IV funding priorities not in isolation, but rather as part of a consistent effort to link systematically the discretionary program resources available under Title IV to the attainment of AoA's National Objectives. That linkage is demonstrated in more graphic terms by the following chart which arrays the FY 1988 AoA priority areas, and their concomitant 1988–1989 funding commitments, under the governing AoA Objective.

Fiscal Year 1988 Title IV Initiatives Responsive to AoA Objectives

FY 1988 priority areas arrayed by AoA objectives	Funding commitments	
	FY 1988	Estimated FY 1989 continuation costs
A. Targeting Resources to the Vulnerable Elderly		
Research on Indian Elderly	$494,835	0
Preventing Alcoholism Among Older Indians	204,481	0
National Aging Resource Center (NARC)—Elder Abuse	199,999	$400,000
NARC—Long Term Care Ombudsman	387,488	500,000
NARCs—Minority Aging, Rural Elderly	399,968	800,000
B. Assuring Collaborative Decision-Making		
Preventing Fire/Smoke Related Injuries	543,412	0
NARCs—Long Term Care	1,197,725	2,400,000
NARC—Health Promotion	223,008	400,000
C. Promoting State and Community Leadership		
Field Initiated Research	1,186,741	995,618
Statewide Short-Term Training	1,675,302	0
Aging Content in Professional Academic Training	2,017,015	0
Accrediation in Aging	568,399	0
Minority Training & Development	1,543,915	200,000
National Leadership Institute on Aging	326,690	500,000
SUA Leadership in Housing	542,695	588,756
D. Providing a Range of Options		
Education for Self Care	1,876,629	0
Legal Assistance	1,847,922	1,811,388
Quality Assurance	1,472,360	1,265,456
Total	16,708,584	9,861,218

As the chart shows, the Administration on Aging allocated almost $17 million in FY 1988 to new Title IV discretionary program projects in support of four (4) principal AoA Objectives:

A. Targeting Resources to the Vulnerable Elderly

B. Assuring Collaborative Decision-Making

C. Promoting State and Community Leadership

D. Providing a Range of Options

In FY 1989, the continuation costs for these projects are estimated at close to $10 million, a substantial investment of Title IV resources in AoA's national objectives. The Discretionary Funds Program priority areas presented in this announcement complement and expand upon that effort. Operating in tandem, these new and continuation projects represent a Title IV program commitment of over $16 million in FY 1989 toward the establishment or strenthening of a comprehensive system of services for older persons in every community of the nation.

D. Technical Assistance Workshops for Prospective Applicants

Workshops will be held in Washington, DC, and several other cities to provide guidance and technical assistance to prospective applicants. Please call the appropriate AoA contact person for the time and location of the technical assistance workshop you are interested in attending.

City	AoA contact person
Washington, DC	Edwin Marcus (202) 245–0441.
Boston, MA	Franklin Ollivierre (617) 565–1158.
New York, NY	Judith Rackmill (212) 264–2974.
Philadelphia, PA	Paul E. Ertel, Jr. (215) 596–6891.
Atlanta, GA	Franklin Nicholson (404) 331–5900.
Chicago, IL	Eli Lipschultz (312) 353–6503.
Dallas, TX	John Diaz (214) 767–2971.
Kansas City, MO	Richard Burnett (816) 426–2955.
Denver, CO	Clint Hess (303) 844–2951.
San Francisco, CA	John McCarthy (415) 556–6003.
Seattle, WA	Chisato Kawabori (206) 442–5341.

E. Statutory Authority

The statutory authority under which grants and cooperative agreements will be awarded through the AoA Discretionary Funds Program is:

- Title IV of the Older Americans Act, as amended (42 U.S.C. 3001 et seq.).

Part II—Priority Areas

This part contains an index of the AoA priority areas in this Discretionary Funds Program (DFP) announcement. The priority areas are referenced under the relevant AoA objective heading. Following the index, each priority area is described in detail.

Applications should be directly and explicitly responsive to the express concerns of a particular priority area. Applicants should peruse the priority area description before committing time

and resources to the preparation and submission of an application.

A. Eligible Applicants

Each priority area description specifies which organizations are eligible to apply under that priority area. Applications from organizations that do not meet the eligibility standards for the specific priority area will be screened out and not reviewed. Whatever the priority area, applications from individuals can not be considered because they are ineligible to receive a grant award under the provisions of Title IV of the Older Americans Act.

Any non-profit organization applying under this Program Announcement that is not a current DHHS grantee should verify its non-profit status by either (1) making reference to its listing in the Internal Revenue Service most recent list of tax-exempt organizations, or (2) submitting a copy of its IRS Code Section 501(c)(3) letter from IRS. A non-profit applicant can not be funded without acceptable proof of its status.

B. Available Funds

Under each priority area, AoA has estimated the number of projects to be funded and has set limits on the duration of those projects as well as on the Federal share of project costs. Applications which exceed the restriction on length of project period or request more than the limit placed on the Federal share of project costs will be screened out and not reviewed.

C. Priority Areas Indexed By AoA Objective

I. Targeting Resources to the Vulnerable Elderly

1.1 Alternatives to Guardianship
1.2 Developing Minority Elderly Agendas in National Organizations
1.3 Studies on Alcohol Abuse and Alcoholism Among the Aged

II. Assuring Collaborative Decision-Making

2.1 Community Systems Development Efforts
2.2 Prototype Health Education and Promotion Programs

III. Promoting State and Community Leadership

3.1 Gerontological Training and Development
3.2 Short Term Training and Continuing Education
3.3 Minority Management Traineeship Programs
3.4 Field Initiated Research and Demonstrations

Priority Area Descriptions

I. Targeting Resources to the Vulnerable Elderly

1.1 *Alternatives to Guardianship.* Among the most vulnerable elderly are those in danger of being placed in the legal status of guardianship. In most cases, these older individuals find themselves outside the formal system of services and cut off from the options available to others in the community.

Recent developments in the area of guardianship have shown that the current system is in need of improvement in many ways. Most importantly there is a need for less restrictive alternatives. AoA has supported, and continues to support, grants in the area of alternatives to guardianship, However, much still needs to be done in this area. Therefore, we invite organizations to submit applications which encourage the further development of alternatives to guardianship through: *research* which increases our understanding of the issues; *model projects* which demonstrate new and innovative methods and techniques for helping older people at risk of, or those currently under, guardianship; and *training* programs which teach families, professionals, and other concerned individuals about alternatives to the traditional guardianship programs.

Research programs are expected to provide information which is national in scope. Demonstrations may be Statewide or local in scope but should have the potential for replicability throughout the country. Training projects may be developed and tested locally but should be able to be replicated in other places. Demonstrations and training may involve a single project with multiple sites distributed nationally. However structured, the application must clearly demonstrate that the proposed activities will be (1) linked with the network of State Agencies on Aging and, where appropriate, their Area Agencies on Aging and (2) supportive of the community systems they are building or strengthening under the Older Americans Act. AoA will arrange for coordination among all projects funded under this priority area as well as related grants funded during FY 1988.

The following are some areas in which research, demonstrations, and/or training projects might be developed. However, applications are not limited to these areas and innovative concepts and approaches are encouraged. AoA believes that in addressing the issue of guardianship, as in other areas of service needs, communities should have a system that is sufficiently flexible to respond to an individual's special needs through a range of service options that are accessible and acceptable to that older person. This priority area is intended to develop and disseminate new knowledge and techniques that ultimately will assist communities to be responsive to the needs of older people in danger of guardianship.

1. *Early Intervention*: The National Center for Health Statistics (based on the National Health Interview Survey) estimates that approximately 5% of those 65+ have difficulty in managing money. For those 85+, the number increases to 24%. Inability to manage finances is often a reason for applying for a guardianship. Therefore, one of the most important services which can help older people to avoid guardianship is personal financial management assistance, which is designed to provide a range of services based upon the needs of the individual older person. It can help an individual to organize his finances, to pay his bills (using his own money), and to provide a representative payee.

AoA would like to examine the possibility that assistance and education, before the issue reaches the crisis stage, might reduce the level of service required, delay the need for the service or even make the service unnecessary.

This early intervention project would develop high quality community education modules which would help individuals learn to organize their basic finances. Individual assistance should be provided to insure that those older people needing more direct assistance, receive it. Much previous work has been done on more sophisticated money management issues such as financial planning but little has been done on simple issues like paying bills or balancing the checkbook. Specific target audiences might include:

- Families where one spouse handles all financial matters and the other spouse would find it difficult to take over the function in a crisis situation;
- Newly bereaved widows or widowers;
- Adult children who are caregivers of older parents; and
- Employees of financial institutions who work with older people.

This project must involve collaboration between service providers, family caregiving organizations, the appropriate State Agency(ies) on Aging, where applicable, their Area Agencies on Aging, and financial institutions in the community.

2. *Development and Testing of a National Training Model on Guardianship:* Most individuals working with older people are not familiar with the range of options available to older people when some assistance is required to continue living independently. In particular, the necessary groundwork needs to be laid for educating and training those who staff the Courts, Social/Protective Services agencies, and other appropriate organizations about alternatives to guardianship. For this purpose, applications are sought for the development and testing of a national training module which could be adapted by local communities to train a broad range of officials and others involved in planning and implementing alternatives to guardianship. While the details of guardianship vary from State to State, the needs of older wards and potential wards are similar. A national module on alternatives to guardianship would simplify the ability of communities to provide such training. It would also encourage communities to develop programs which provide alternatives to guardianship.

Applicants in this area are expected to describe a detailed dissemination and utilization plan as part of their implementation strategy to assure the use of the training modules at the community level after completion of the development stage.

3. *Use of Expert Systems:* One of the strategies currently used to support the use of alternatives to guardianship is an assessment of an individual at risk of guardianship by a multidisciplinary team. This technique insures that all aspects of the older person's situation are taken into account and allows the use of the least restrictive alternative. While this type of coordination is a very positive move toward coordination within the community, it is also expensive, requires a heavy use of staff time, and is difficult to achieve.

One alternative would be the use of expert systems on computers. These computer systems distill the issues which are important in making professional judgments and organize them in a computer. Such a system would allow a single professional to better understand the older person's total situation, consult with the appropriate other professionals and make accurate judgments. It should be very clear that the computer will support professional expertise and judgment, not replace it. Projects will not be considered which suggest decision making by computer.

Applications to conduct this type of project should include, in particular, a state of the art section on current attempts to use expert systems in the area of supportive services, and a section which shows how the proposed project will build upon that body of existing knowledge and practice.

4. *Increased Knowledge:* The lack of basic knowledge about the guardianship system, especially about guardians and wards, makes it difficult to determine the most effective means of improving the guardianship system to better serve older people. There are few answers to such basic questions as:

- How many older people currently are under guardianships? Figures ranging between 300,000 and 500,000 have been suggested.
- What causes older people to be brought into the court system?
- What are the characteristics of these older people?
- Who are their guardians and what are their characteristics?
- What happens to older people after they become wards?

A survey of several varied communities, supplemented by the use of secondary data, could help develop answers to these questions and provide the information to help plan future activities concerning alternatives to institutionalization.

Public and private nonprofit organizations, institutions and agencies are eligible to apply under this priority area. AoA anticipates that a total Federal share of up to $400,000 per year will be available to fund up to 4 projects in this priority area. The project period may not exceed 24 months. Approval of continuation requests beyond the initial 12-month budget period will depend upon a determination of the grantee's performance.

1.2 *Developing Low Income Minority Elderly Agendas in National Organizations.* This priority area is aimed at broadening the range of national organizations that are actively committed to meeting the needs of low income minority elderly. While the Administration on Aging (AoA) recognizes the importance of continuing to support organizations that have traditionally served and represented low income minority elderly, the introduction of the concerns of low income minority elderly into the agendas of national organizations will provide a much needed expanded base of resources and options for this population to draw upon.

This priority area seems especially timely as there are indications that low income minority aging concerns are being recognized by a growing number of national organizations. AoA has encouraged greater attention to the special needs of low income minority aging populations and has supported an extensive array of research, demonstration, and training projects focused on such matters as:

- Developing approaches to increase minority elderly participation in programs designed to serve the needs of older persons;
- A minority management traineeship program to increase the number of minorities in management/administrative positions in aging agencies; and
- A training program for Directors of Indian Programs under Title VI of the Older Americans Act.

Additionally, in 1988, AoA funded a National Resource Center on Ethnic Minority Aging under the joint auspices of the Center on Aging, San Diego State University and the Andrus Gerontology Center, University of Southern California.

Applications under this priority area are invited from national organizations committed to establishing or expanding an agenda of activities designed to improve the lives of low income minority aging persons. Those organizations applying under this priority area which already have an aging agenda must show how AoA support will significantly expand their ability to promote the interests of low income minority elderly.

Applicants should describe the full range of activities which will be carried out to address low income minority elderly concerns; demonstrate convincingly that those activities will result in significant national and/or community level changes in the organization's goals and operations; and show how the proposed project will have a sustained impact on the applicant organization's capacity to address low income minority aging issues, particularly at the community level. Applicants should also describe how their proposed activities will be appropriately linked with the network of State Agencies on Aging and, where applicable, their Area Agencies on Aging and with the Community systems they are building or strengthening under the Older Americans Act.

The types of project activities to be undetaken by national organizations must be linked to outcomes that demonstrate the organization's commitment to meeting the needs and responding to the talents of low income minority elderly. Those activities, include, but are not limited to, the following:

1. Developing capacity to focus the organization's activities at State and

local levels on low income minority elderly issues, i.e. special committees, offices, publications, research agenda;

2. Developing membership awareness of low income minority elderly issues, i.e. annual meeting presentations, articles in organization's journals;

3. Developing local chapter programs, in conjunctions with State Agencies on Aging and their Area Agencies on Aging, designed to meet the unique needs of low income minority elderly;

4. Developing community-based demonstration projects responsive to the needs and talents of low income minority elderly, in conjunction with State Agencies on Aging and their Area Agencies on Aging;

5. Developing or expanding national service projects to low income minority elderly, with such projects responsive to their needs, their talents, and their community and neighborhood settings;

6. Providing critical information to institutions associated with the organization's activities to increase knowledge about minority aging issues; and

7. Conducting research on minority leaderly issues or promoting such research as it relates to the organization's special area of expertise.

Eligibility to apply under this priority area is restricted to non-profit, national organizations. It is expected that up to 7 projects will be funded for up to two years with a maximum annual Federal share of $150,000 per project per year. Approval of continuation requests beyond the initial 12 month budget period will depend upon a determination of the grantee's performance and success in improving the quality of life of low income minority elders in the community where they live.

1.3 *Studies of Alcohol Abuse an Alcoholism Among the Aged.* Under the Older Americans Act, as amended, the Commissioner on Aging is authorized to support research to develop an information and knowledge base useful for the purpose of formulating public policy on behalf of elderly people. This research can, among other purposes, establish data bases which yield estimates of the incidence and prevalence of alcoholism and alcohol-related problems among older people. These studies may also generate working hypotheses concerning the etiology of alcohol problems, in the elderly population or segments of that population, including such probable causative factors as retirement and the resultant major changes in life style.

Alcoholism is America's third largest health problem, following heart disease and cancer. Acccording to the National Institute on Alcohol Abuse and Alcoholism, it afflicts 10 million people, costs 60 billion dollars, and is implicated in 200,000 deaths per year. The prevalence of alcoholism is reported to be lower among the elderly than middle aged persons, but its detection is difficult and vulnerability to harm is great in the elderly due to pharmacologic and physiologic factors. Elderly person suffering from alcohol abuse are frequently misdiagnosed and mismanaged by health care providers, social agencies and families due to the lack of understanding of the problem within this age group.

The social dynamics and epidemiological factors associated with alcoholism among older people are important areas for research because of the rapidly increasing numbers of elderly in the United States. Society is becoming more sensitive to their presence and issues related to their health and well-being. The use and misuse of alcohol by older people in the population have increased dramatically over the last 20 years with a concomitant impact on societal resources. This priority area is aimed at gaining greater understanding of these problems and their consequences.

Today AoA, as authorized by the Older Americans Act of 1965, as amended, provides funds to State Agencies on Aging in every State and most of these States also have designated a Statewide network of Area Agencies on Aging that assist communities to develop comprehensive systems of services for their elderly citizens. One of AoA's priorities is to ensure that older people have access to the needs of supportive community services that can respond to the needs of the most vulnerable older people, especially those most in danger of losing their independence, e.g., sufferers of alcoholism and alcohol abuse.

AoA recognizes that there have been efforts by several agencies and groups, over the past two decades, to address the concerns of aging and alcohol use on a national level and many avenues of research have been opened, but not fully addressed. In reviewing the literature on studies about aging and alcoholism, it is readily evident that most of what is reported is based on small studies and surveys that are neither age nor alcohol specific and the data are quite inadequate for drawing conclusions about problems in the older aged group. Studies focused on the problems that are found primarily among the aged would provide a firmer foundation for the development of policy and implementation of programs for detection, prevention, and treatment.

Acknowledging the multifaceted and complex nature of the problem area and the multidisciplinary approaches to addressing the issues, AoA invites applicants to conduct research in the following areas:

- Examine alcohol consumption patterns of the aged and their relationship to retirement, bereavement, changes in discretionary income, and other related factors.
- Examine the question: Are age-related differences in alcohol consumption patterns expressing individual behavior changes associated with the aging process, or are they reflecting historical or cultural experiences of particular age cohorts?

Applicants must provide a detailed description of a proposed study designed to investigate the given problem area; describe the significance of the proposed research in terms of how the knowledge to be gained could be used, benefits to be derived, and the potential implications for the aged population, policymakers and service providers; and develop a plan for dissemination of the results to appropriate audiences to promote widespread understanding of the problems of alcohol abuse and alcoholism among the aged population.

Public and private nonprofit organizations, institutions and agencies are eligible to apply under this priority area. AoA expects to fund up to two projects under this priority area with a Federal share of up to $125,000 per project per year, and a project duration of up to 24 months.

II. Assuring Collaborative Decision-Making.

2.1 *Community Systems Development Efforts.* The 1987 Amendments to the Older Americans Act and the parallel 1988 Title III regulations strongly emphasize the leadership and advocacy roles of the aging network—State Agencies on Aging, Area Agencies on Aging and aging service providers—in building responsive community based systems for older persons. Inherent in the process of system building is the critical role that State Agencies on Aging and their Area Agencies must play in assisting community leadership to make the best use of all programs and resources available at the community level to develop options which are readily accessible to the elderly and their caregivers.

Last year, through a series of grants to State Agencies on Aging, the Administration on Aging encouraged the development of leadership roles for

State Agencies through collaborative efforts in elderly housing. The response to the priority area by State Agencies was gratifying and showed strong interest in developing collaborative arrangements with housing related organizations at the State and community level.

The purpose of this priority area is to further encourage and support State Agencies on Aging in their efforts to foster effective collaborative efforts at the community level designed to meet the needs and respond to the talents of older Americans. These efforts should reflect defined needs and goals, with strategies and programs to meet these needs. They should result in improved coordination and more efficient use of resources from all sources—both public and private. They should contribute toward the building of a flexible system of services that enables the elderly to maintain their independence and dignity in communities throughout the State or throughout one or more planning and service areas in the State.

Applicants should focus on one or more unmet service needs particularly critical to the older population of the target geographic area of the State. Two outcomes are expected. The first is a demonstration of effective models for developing collaborative efforts by State Agencies on Aging at the State level which will have a direct and immediate impact on community systems in the State. State Agencies on Aging can play a leadership role in influencing the variety of State actions that can effect the cost, availability and types of services offered to the elderly in communities throughout the State. They can work with other State Agencies, statewide organizations representing providers in the public and private sectors, and organizations representing older persons and family caregivers, to develop a framework of collaboration which provides a responsive system of services in communities across the State.

The second expected outcome is the development of effective roles for State Agencies on Aging in encouraging their Area Agencies on Aging to work with individual communities in their planning and service area to establish new collaborative efforts essential for effective community based systems of services. State Agencies on Aging are expected to provide project funds as well as a high level of technical assistance to their Area Agencies on Aging participating in this effort. Area Agencies on Aging are expected to engage in activities which help local communities within a PSA respond to their older residents.

Only State Agencies on Aging are eligible to apply under this priority area. Applications must clearly demonstrate the collaborative nature of the proposed activities. Applications must identify the specific geographic areas of the State, their Area Agencies, where applicable, and the specific communities that will be the target of the proposed collaborative effort. To the extent possible, letters of commitment from the leadership of individual communities that will participate in the effort would be desirable.

It is expected that up to four (4) projects will be funded for up to two years with a maximum annual Federal share of $200,000 per project per year.

2.2 *Prototype Health Education and Promotion Programs.* The Administration on Aging is continuing to expand activities that assist older people in their efforts to prevent disease and promote healthy life styles. Demographic trends indicate that the older segment of America's population is growing rapidly. Increasingly heavy demands will be placed upon our health care delivery system. The American Medical Association has calculated that 55 percent of all disease, disability and death can be attributed to life style. Many of the health problems the elderly experience reflect past life styles and/or are compounded by present life styles. As we recognize these factors and their negative implications for health, our need for expanded, flexible health promotion programs becomes more important.

To encourage the development of prototype health education and health promotion programs, AoA has been promoting partnerships between health care professionals and older people that result in the older person's acquisition of the knowledge to effectively prevent disease and/or control chronic conditions. Since 1984, the AoA/U.S. Public Health Service National Health Promotion Initiative has been the primary vehicle for demonstrating programs that promote preventive health care through education. Past activities supported under the AoA Discretionary Grants Program have complemented efforts in the area of disease prevention and health promotion.

The 1987 amendments to the Older Americans Act present AoA with the opportunity to significantly increase these efforts. Section 422(a)(2), which was enacted with these amendments, authorizes AoA to support the design and development of prototype health education and promotion programs for older people. In addition, the 1988 U.S. Surgeon General's Workship on Health Promotion and Aging identified several areas for potential AoA action. This priority area has been developed in response to section 422(a)2 and the Surgeon General's Workshop recommendations.

The purpose of this priority area is to solicit applications which propose efforts by institutions of higher education (as described below) in collaboration with State Agencies on Aging, together with their Area Agencies on Aging, along with other appropriate public and private agencies, to design and development of prototype health education and promotion programs which may be adopted by States and their Area Agencies on Aging. Applications submitted under this priority area must propose collaborative projects to develop models for subsequent replication by States of effective educational strategies for identifying and encouraging the use of appropriate techniques for recognizing the symptoms of and/or preventing disability and disease; recognizing the early warning signs of disease and chronic conditions; and identifying solutions for problem behaviors that contribute to unhealthy life styles. Projects should be designed to (a) encourage older people to recognize the importance of assuming an active role in the management of their own health care and in identifying and seeking appropriate medical care when it is indicated and/or (b) train health and social service professionals to assist older adults and their families in the area of health promotion.

Applicants are encouraged to focus on one or more of the following topical areas:

(1) *Mental Health and Depression:* Applicants should develop programs which are accessible and acceptable to older persons which promote preventive and early intervention strategies for identifying depression with attention to drug induced symptoms and physical causes. Programs should be based on strategies to foster positive adaptation to illness and other later-life crises and the appropriate use of the range of existing formal services and informal caregiving.

(2) *Nutrition Education:* Applicants should develop programs which assist State Agencies on Aging in carrying out their mandates under the Older Americans Act to conduct nutrition education as part of the Title III congregate and home delivered meal program. Such strategies should be

VOL
53
ISS
239
DE
13
1988
UMI

directed to motivating older people to make positive behavioral changes in their cooking and eating habits. Strategies must be based on behavioral objectives which are clearly related to the intended results.

(3) *Injury Prevention:* Applicants should develop strategies that promote collaboration among families and community organizations that interact with older adults in educating older people and their families about risk factors, resources for modification of living environments and the importance of injury prevention.

(4) *Smoking Cessation:* Applicants should develop strategies to encourage State and local agencies and public and private organizations to conduct educational campaigns aimed at older persons which incorporate strong smoking cessation messages based on the principle that it is never too late to stop smoking. Such campaigns would be particularly appropriate to discourage smoking in areas where older persons are likely to frequent. Projects should be directed toward educating older persons, professionals, and caregivers about the benefits of smoking cessation for older persons and on how to establish smoking cessation programs for older persons.

(5) *Hearing Impairment:* Applicants should proposed programs to reach older persons who may suffer from hearing impairment in order to educate older persons about the identification of the symptoms of hearing impairment and how to seek a proper evaluation and diagnosis. Programs also should provide information to older persons and their families about technologies available to relieve hearing impairments.

(6) *Physical Fitness and Exercise:* Applicants should develop model courses and inservice training programs that educate older people, their families, and professionals about the benefits of physical activity for the aging. Applicants should explain how their proposed activities will be coordinated with existing community physical fitness programs for persons of all ages.

(7) *Alcoholism:* Applicants should propose to train formal and informal caregivers; develop alternative models of detection and intervention; design public education strategies for prevention of late onset alcoholism; and address the special problems of older Native Americans.

Projects may be national or statewide in scope. Proposed activities must be the development and testing of prototype or model health education and health promotion programs which are appropriate for subsequent adoption and replication by the State or in other States. Projects must involve collaboration with the State Agency(ies) on Aging and involve State health promotion and aging coalitions and other appropriate national, statewide aging and/or professional organizations and health care agencies. Applications should identify all organizations that will collaborate on the project and include a description of the nature and scope of that collaboration. Evidence of such collaboration should be clearly presented, with the roles of all participants defined. Written assurances must be included with the application.

Applicants should be aware that AoA has funded a National Aging Resource Center on Health Promotion and Wellness at the American Association for Retired Persons. Projects funded in this priority area will be expected to work cooperatively with this Center and to coordinate their activities in areas where both are active.

Eligible applicants under this priority area are limited to public or private institutions of higher education with graduate programs that have capability in the following areas: public health; medical science; psychology; pharmacology; nursing; social work; health education; nutrition; or gerontology. Schools of public health are especially encouraged to submit applications under this priority area and will be given special consideration. Awards will be made after consultation with the appropriate State Agency(ies) on Aging to assure that the proposed project is compatible with their health promotion and education program strategies. AoA plans to fund up to seven projects under this priority area. Federal share may be up to $150,000 per project and a duration of up to 17 months.

III. Promoting State and Community Leadership

3.1 *Gerontological Training and Development.* Recent studies and reports funded by the Administration on Aging and others have identified a critical need for faculty development in gerontology and geriatrics. These studies indicate that all health and human services professional schools should have faculty with expertise in aging to teach their students about the aging process. They also should be able to assume leadership roles in training personnel to participate in community based service systems for older persons. Course offerings by academic institutions are strongly influenced by the formal preparation, research interests and departmental teaching orientation of new and tenured faculty.

These same studies also point to the need for specific faculty and institutional development at minority institutions to increase the numbers of minorities prepared for employment in the field of aging. Additionally, the Administration on Aging is interested in capitalizing upon the experience of established gerontological programs to work with and increase the capacity of less developed programs.

In response to the cited needs in the field, the Administration on Aging is proposing three areas for submission of applications under this priority area.

Faculty Development. The Administration on Aging is soliciting applications to conduct training activities in two categories: in-service faculty development and statewide or regional workshops.

1. Applications are requested for in-service faculty development programs that have the following characteristics:

- Involve at least 10 persons with instructional or faculty appointments in academic institutions or campuses outside the applicant organization.
- Have structured intermittent or continuous programmatic activity for participants for at least two academic semesters or three academic quarters.
- Require written commitment from participants and their academic chair or dean to develop or enhance teaching of aging concepts within one year of completion of their training.

2. Applications are requested for programs that support statewide or regional workshops for development of teaching faculty in human service and related discipline and professional instructional programs. Workshop topics must focus on one or more of the following areas:

- Course or content development in core topical area of psychology, biology/physiology or sociology of aging.
- Course or content development in applied knowledge areas of counseling, mental health, community service development for the elderly.
- Course or content development in planning, administration, management and evaluation of aging social service programs and community/in-home service system development.
- Course or content development in health promotion, health services, long-term care management for non-health care professionals.

Faculty and Institutional Development in Minority Institutions. Many institutions of higher education with predominately minority enrollments, including the Historically Black Colleges and Universities (HBCUs), could benefit from assistance in developing and

upgrading gerontological training programs. In particular, assistance is needed in the areas of faculty and institutional development.

The Administration on Aging solicits applications from institutions of higher education that place an emphasis on faculty development in efforts to establish and/or upgrade gerontological training programs. Programs can use the team approach in working together or a mentoring approach. In addition, applications are invited for the initiation of nationwide or region-wide faculty exchange programs between developing geronology programs at HBCUs, other predominately minority institutions, and comprehensive, established gerontology programs. This exchange program is designed to afford faculty at minority and non-minority institutions opportunities to transfer knowledge and share experiences and information in their areas of expertise.

Applications should include the following:

(1) Written assurance from each of the institutions involved in the collaborative effort regarding the types of activities planned and how they will be carried out.

(2) Written commitment from an appropriate official of the developing institution that the aging training program will continue after the funding period.

(3) Written commitment and plans from faculty participants and an appropriate official from the institutions to develop and/or enhance teaching of aging concepts within one year of program completion.

Curriculum Replication Consortium Program. For several years, the Administration on Aging has funded projects to develop gerontology curricula specifically for certain professions and paraprofessions that impact upon the lives of the elderly. Recent studies indicate that there continues to be a need to include aging content in the academic schooling of students preparing for employment in these professions and paraprofessions. Professionals and paraprofessionals who would benefit from specialized gerontological content in their career preparation include, physicians, psychiatrists, dentists, dental hygienists, pharmacists, podiatrists, audiologists, other allied health professionals, planners, clergy, and home economists.

The Administration on Aging is interested in disseminating curriculum in which gerontological knowledge has been integrated into the regular training of various professionals and paraprofessional disciplines. These projects will involve using the expertise of those institutions that have successfully developed gerontology curricula to collaborate with other schools that have little or no experience in developing curricula.

Applications are solicited from institutions of higher education, or national and state professional organizations that have demonstrated experience in curriculum development to work with three to five institutions interested in developing gerontology programs of instruction. The curriculum should focus on aging concepts and best practices for working with the elderly. Each application should include the following:

(1) A statement clearly specifying the profession or paraprofession being targeted.

(2) Written assurances from the institutions that will be involved in the collaborative arrangement.

(3) Evidence that the collaborative effort is based on a documented need for content in the profession targeted as well as a need for technical assistance by the institutions involved.

AoA plans to fund up to seven projects under this priority area with a Federal share of up to $150,000 per project and a project duration of up to 17 months. Applicants are encouraged to develop close linkages with State Agencies on Aging as well as other relevant professional organizations.

3.2 *Short Term Training and Continuing Education.* Applications are requested from State Agencies on Aging, State and national professional and aging service organizations, academic institutions and other non-profit organizations with training missions, to develop proven programs and materials for specialized training of professionals and paraprofessionals who directly impact the quality of life of older persons. Applications are sought which focus on short term and continuing education and training for groups of individuals who perform the same or similar functions or roles in serving the elderly, regardless of whether they share previous formal education in the same discipline or employment under the same professional or paraprofessional category.

Applicants must give explicit reasons why the need for training is not currently being met, and why Federal support will enable the applicant to overcome obstacles that cannot be met through allocation of existing local resources. Support will not be provided for applications which primarily seek AoA funding for existing training programs or replication of training curricula available through other sources.

Applicants must also indicate their awareness of funded, on-going Federal training projects related to the content area proposed, and how their application differs from those projects. To the extent possible, applicants should draw upon existing successful curricula and materials as they develop their curricula and materials. It is suggested that applicants contact the appropriate AoA funded National Resource Center if their training touches upon that topic area (e.g. long-term care, elder-abuse, ombudsman, health promotion, rural, minorities). Information on current projects and the National Resources Centers may be found in the AoA Compendium of Current Projects (write: Office of Program Development, AoA, 330 Independence Avenue, SW., Washington, DC 20201).

Applications are encouraged which:

(1) Focus on preparation of persons performing key roles in developing community and in-home supportive services for frail elderly.

(2) Emphasize preparation of minority personnel and individuals working with minority older persons.

(3) Include cost-sharing of individual training events with recovery through employing agency or participant payment of on-site costs.

(4) Involve applicable State Agencies on Aging in preparation and implementation of project design to assure compatibility of the proposed programs with their strategies and those of their Area Agencies on Aging, as appropriate.

(5) Have concrete plans for continuation of post-grant training activity.

(6) Involve representation of trainees and employers in development of training objectives, content and material preparation.

(7) Emphasize competency-based skill development as learner objectives.

(8) Use appropriate, cost-effective, and tested technology for delivery of training.

(9) Include post-training follow-up activity to reinforce and evaluate utilization of training content.

(10) Have dissemination plans for both professional and practice communities at the State and national levels.

(11) Include information and distribution of reference material during training sessions that identify and explain the functions and services of the Older American Network.

Low priority will be given to applicants which request support for:

VOL
53
ISS
239
DE
13
1988
UMI

(1) Purchase of computers and audio-visual equipment unless a very strong rationale is provided as to why they are necessary and cost effective.

(2) Trainee stipend and expense support, except for low-income paraprofessionals. (If support is requested for trainee costs, an explanation must be given as to how the applicant expects to continue post-grant training without further AoA support).

(3) Development of new training curricula and materials unless evidence can be provided that no existing materials can be adapted, revised, modified, or supplemented with the consent of the original developer if not in the public domain.

(4) Development of training programs for personnel working in Federal programs which have provision for administrative or discretionary support of training, or in which the training proposed is mandated by State or Federal law. Training which include persons involved in such programs must indicate evidence of cost-sharing and involvement by responsible program agencies or their contractors and grantee, and identify in the application appropriate Federal program representative at the State or Regional Office level.

AoA expects to fund up to four projects under this priority area, with a Federal share of up to $100,000 per project, and a maximum duration of up to 17 months.

3.3 *Minority Management Traineeship Programs.* The Administration on Aging (AoA) is interested in funding special training projects to increase the number of qualified minorities in key management/administrative positions in State and Area Agencies and other agencies and organizations which impact on the elderly. Applications are solicited from State Agencies on Aging, Area Agencies on Aging where the proposal has the endorsement of their State Agency on Aging, educational institutions, Indian Tribal Organizations funded under Title VI of the Older Americans Act, and other appropriate aging related organizations to participate in the Minority Management Traineeship Program. The objective of this program is to increase the professional credentials of minority trainees to help these individuals make the transition from a staff level position to a managerial/administrative position.

The program is designed to assist highly motivated minority professionals with advanced degrees or persons with a bachelor's degree and several years of significant prior aging program experience to work in settings where they can serve as trainee in a managerial or administrative position. It is hoped that training experience will either result in the permanent placement of the individual as a manager, supervisor or administrator in the host organization providing the training experience or will equip participants in the program to be hired in comparable positions in other agencies or institutions upon completion of the training experience. Trainees selection should be based upon a strong commitment to work in the field of aging.

Applicants should seek commitments from host agencies who are willing to provide a varied work experience with ample opportunity for the trainee(s) to assume a managerial role. Trainees should be given on-the-job instruction, support, counseling, and feedback about work performance. The grantee organization under this priority area must be in a position to provide administrative support to trainees and host institutions, on site monitoring of the work experience on a periodic basis and assistance in the placement of trainees once the training experience is completed.

Applications should contain information about the host agencies, procedures for selecting and recruiting trainees, a description of the traineeship itself and information about training and supervision associated with the traineeship. Applicants must include a plan for assuring placement of trainees in a management or administrative position in an organization which serves older persons upon completion of the training program.

The level of Federal financial participation in projects under this priority area is somewhat limited; therefore, care should be taken to assure that stipends are commensurate with the cost of living in a particular geographic area and the qualifications and experience of a particular trainee. Applicants should endeavor to obtain other financial support for the trainee program. Host agency cost sharing is strongly encouraged.

AoA expects to fund up to three projects under this priority area with a Federal share of up to $200,000 per project, and a project duration of up to 17 months.

3.4 *Field Initiated Research and Demonstration Projects.* The establishment in every community of a comprehensive and coordinated community-based system of services for older persons has long been the cornerstone of the Older Americans Act and, in turn, the principle goal of the Administration on Aging. The 1987 Amendments to the Act have reinforced the priority placed on developing and implementing effective community service systems, while stimulating renewed attention to the creation of community focal points for achieving optimum colocation and coordination of services for older individuals. These two policy themes were underscored in 1988 by the Administration on Aging through the issuance of regulations for the Implementation of Title III of the Older Americans Act. The emphasis on building community based systems of care was given even further prominence on September 1, 1988, as the Administration on Aging published a set of National Objectives for Implementation of the Older Americans Act for Fiscal Year 1989. These objectives embody ten (10) specific elements, all of which are components of a comprehensive community system of services for the elderly.

In the past several years, the Administration on Aging has provided Title IV discretionary program resources for projects focused on community service systems to advance our knowledge and/or to test new approaches in this critical area. This priority area represents a further commitment of R&D resources, but for research and demonstration projects that reflect the heightened policy and program context for community service system changes resulting from the 1987 legislation and the new Title III regulations referred to above. This priority area addresses the leadership, organizational change, and policy reform issues at stake in creating community-based systems of services for the elderly. It is directed toward determining:

- Through policy-oriented research, whether and how these recent Federal legislative and regulatory policy decisions are being translated into practical reality at State and local levels. The research should relate the changes being made in terms of the *FY 1989* AoA Objectives for Implementation of the Older Americans Act, a copy of which has been reproduced in Part I of this Announcement.
- Through manpower research, the types of professional and paraprofessionals most critical to a viable community service system and what the supply and demand issues are for those occupations.
- Through program-level demonstrations, the kinds of community service system reforms which are required for the establishment of a comprehensive service system responsive to the needs of their older

citizens. Project activities should be fully documented as to the types and scope of reforms made, the problems encountered, the results achieved and the degree to which they help to implement one or more of the *FY 1989 AoA Objectives for Implementation of the Older Americans Act.*

All State, public and private nonprofit organizations, institutions, and agencies are eligible to submit an application under this priority area. Because the priority area has great relevance to State Agencies on Aging and their Area Agencies on Aging, all applications proposing activities which focus on specific geographic areas (a community, an area, a State, a selected group of States) must provide clear evidence of consultations with the leadership of the appropriate State Agency(ies) in the development of the proposal. Applicants are advised that, prior to funding decisions, AoA will consult with the cognizant State Agency(ies) on Aging.

AoA expects to fund up to three (3) projects under this priority area, with a Federal share of up to $150,000 per project per year, and a project duration of up to two years.

Part III—General Information and Guidelines for the Application Process and Review

This part contains general information for potential applicants and basic guidelines for submitting applications in response to this announcement. Application forms are provided along with detailed instructions for developing and assembling the application package for submittal. General guidelines on applicant eligibility are provided in Part I. Specific guidelines are provided in Part II under each priority area.

A. General Information

1. Review Process and Considerations for Funding

Within the limits of available Federal funds, AoA makes financial assistance awards consistent with the purposes of the statutory authorities governing the AoA Discretionary Funds Program and this announcement. The following steps are involved in the review process.

a. *Notification:* All applicants will automatically be notified of the receipt of their application and informed of the identification number assigned to it.

b. *Screening:* To insure that minimum standards of equity and fairness have been met, applications which do not meet the screening criteria listed in Section D below, *will not* be reviewed and will receive *no* further consideration for funding.

c. *Expert Review:* Applications that conform to the requirements of this program announcement will be reviewed and scored competitively against the evaluation criteria specified in Section G, below, by qualified persons from outside the Federal government and knowledgeable non-AoA Federal Government officials. These expert reviewers' scores and judgments are the primary basis for making award decisions.

d. *Other Comments:* AoA solicits comments from: other Federal Departments, Federal Regional Office staff, interested foundations, national organizations, specialists, experts, and State Agencies on Aging. These comments are considered by the Commissioner on Aging in making funding decisions.

e. *Other Considerations:* In making the funding award decisions, the Administration on Aging will pay particular attention to applications which focus on or feature: (1) Ethnic and/or racial minority populations and (2) a programmatic focus on those in greatest economic and social need.

Final decisions will also reflect the equitable distribution of assistance among: geographical areas of the nation, rural and urban areas, and ethnic populations. The Commissioner on Aging also guards against wasteful duplication of effort in making funding decisions.

f. *Other Funding Sources:* AoA reserves the option of discussing applications with, or referring them to, other Federal or non-Federal funding sources when this is determined to be in the best interest of the Federal government or the applicant.

g. *Decision-Making Process:* After the panel review sessions, applicants may be contacted by AoA staff to furnish additional information. Applicants who are contacted should not assume that funding is guaranteed. An award is official only upon receipt of the Financial Assistance Award (Form DCGM 3–785).

Timeframe: Applicants should be aware that the time interval between the deadline for submission of applications and the award of a grant may be as long as six months. This time is required to review and process grant application.

2. Notification Under Executive Order 12372

This is not a covered program under Executive Order 12372.

B. Deadline for Submission of Applications

The closing date for submission of applications under this program announcement is March 17, 1989. Applications must be either sent or hand-delivered to the address specified in Section D, below.

Hand-delivered applications are accepted during the normal working hours of 9:00 a.m. to 5:30 p.m., Monday through Friday. An application will be considered as meeting the deadline if it is either:

1. Received at the mailing address on or before the deadline date; or

2. Sent before midnight of the deadline date and received in time to be considered during the competitive review process. Applicants are strongly advised to obtain a legibly dated receipt from a commercial carrier or from the U.S. Postal Service as proof that the application was sent by the deadline date. If there is a question as to when an application was sent, applicants will be asked to provide proof that they have met the deadline date. Private metered postmarks are not acceptable as proof of a timely submittal.

Applications which do not meet the above deadline are considered late applications. The Acquisition and Assistance Management Branch will notify each late applicant that its application will not be considered in the current competition.

AoA may extend the deadline for all applicants because of acts of God, such as floods, hurricanes or earthquakes, when there is widespread disruption of the mail or when AoA determines an extention to be in the best interest of the government. However, if AoA does not extend the deadline for all applicants, it may not waive or extend the deadline for any applicant(s).

C. Grantee Share of the Project

Under the Discretionary Funds Program, AoA does not make grant awards for the entire project cost. Successful applicants must contribute $1 secured from non-Federal sources, for every $3 dollars received in Federal funding. The grantee share amounts to 25% of the entire project cost.

There is one exception to this cost sharing formula. Applications originating from American Samoa, Guam, the Virgin Islands or the Northern Mariana Islands. Applicants from these territories are covered by section 510(d) of Pub L. 95–134, which requires the Department to waive "any requirement for local matching funds under $200,000" for these territories.

The non-Federal share of total project costs for each budget period may be in the form of grantee-incurred *direct or indirect* costs, third party in-kind contributions, and/or grant related

income. AoA strongly encourages applicants to propose a grantee share which is more than 25% of the project costs. AoA also encourages applications where the matching requirement will be met in cash (as opposed to in-kind contributions) from non-Federal funding sources.

If the required non-Federal share is not met by a funded project, AoA will disallow any unmatched Federal dollars. Therefore, applicants should be sure of any amount proposed as match before including these funds in their budgets.

D. Application Screening Requirements

All applications will be screened to determine completeness and conformity to the requirements of this announcement. Applications which fail to meet one or more of the criteria described below will *not* be reviewed and will receive *no* further consideration for funding. Complete, conforming applications will be reviewed and scored competitively.

In order for an application to be reviewed, it must meet the following screening requirements:

1. The application must include a completed SF 424 Application Form with an original signature of an authorized certifying representative of the applicant institution;

2. The application must *not* exceed forty-five (45) double-spaced pages (not single or space-and-a half) exclusive of required forms and assurances. The following documents are excluded from the 45 page limitation: Standard Forms (SF) 424, 424A (including up to a three page budget justification) and 424B, proof of non-profit status, and indirect cost agreements. Limits within the forty-five (45) page application requirements are:

—Summary description (one page)
—Narrative (not to exceed thirty pages)
—Capability statement (not to exceed three pages including a one page organization chart)
—Up to 3 individual vitae not to exceed two pages each, and;
—Letters of commitment verifying readiness to participate in the project and describing specific commitments. (Letters that merely endorse the proposed project will not be given to reviewers.)

3. Applications must be postmarked by midnight, March 17, 1989, or hand-delivered by 5:30 p.m. on March 17, 1989 to the following address: Department of Health and Human Services, Grants and Contracts Management Division, Acquisition and Assistance Management Branch, 200 Independence Avenue, SW., Room 349F, Washington, DC 20201, Attn: AoA–89–1.

4. Applications must meet all eligibility requirements specific to the priority area under which they are being submitted including type of organization, duration of project, and maximum Federal funding to be requested.

Under No Circumstances Will Applications That Do Not Meet These Screening Requirements be Assigned to Reviewers.

E. Funding Limitations on Training Costs

Federal support for individuals who receive training within the project budgets of organizations funded under this announcement is subject to the following limitations:

1. Total support for any single individual enrolled in an academic program related to the grant cannot exceed $1,500 per semester of undergraduate study or $2,500 per semester of graduate study including: stipend, tuition, fees, books, etc.

2. Stipend, travel and per diem costs for in-service and continuing education activities are limited to low-income or minority individuals who are unemployed, self employed, or employed by non-profit community and tribal organizations providing direct services to older persons.

3. Federal, State and local employees, and service providers supported by Federal programs are not eligible to receive individual trainee support.

F. Funding Limitations on Indirect Costs

1. Training projects awarded to institutions of higher education, hospitals, and other non-profit institutions, are limited to a Federal reimbursement of indirect costs of eight (8) percent of the total allowable direct costs or, where a current agreement exists, the organization's negotiated indirect cost rate, whichever is lower. See Section K–2, Item 6j.

2. For all other applicants, indirect costs may be requested if the applicant has a negotiated indirect cost rate with the Department's Division of Cost Allocation or with another Federal agency. If a negotiated indirect cost rate is not currently established, in the interests of economy and efficiency we ask applicants to charge all costs as direct costs. If an award is made, the new grantee can then begin negotiations with DHHS for an indirect cost rate agreement.

G. Evaluation Criteria

Applications which pass the screening will be reviewed by a panel of at least three individuals. These reviewers will be primarily experts from outside the Federal government. Based on the specific programmatic considerations indicated in the individual priority area, reviewers will comment on and score the applications, focusing their comments and scoring decisions on the criteria below.

1. Need, objectives, and expected benefit: 30 points

a. Is the need clearly and specifically described, related to the priority area and supported by documentation?

b. Are the needs of low income and minority elderly included and discussed?

c. Are the objectives clearly stated, justified, and related to the problem area and stated need?

d. Is the state of the art, as discussed by the applicant, relevant to the proposed project, complete and up to date? Are references included?

e. Are the expected project benefits and/or results clearly described and related to the objectives of the project? Are they quantifiable and realistic? Will they result in changes of direct benefit to older people?

2. Methodology and Approach: 35 points

a. Does the approach have a logical and detailed plan for accomplishing the objectives of the project?

b. Does the proposed approach offer a reasonable prospect of success in achieving the project's objectives and expected benefits/results? Is it likely to work; are there any potential weaknesses in this approach? Are there any unnecessary or inappropriate objectives, tasks or sub-tasks?

c. Is a time-line chart given? Are the time sequences, including start and ending dates for objectives and tasks clearly identified? Are they logical in terms of their order and placement?

Applications for *demonstration* projects are expected to include an evaluation component as part of their methodology/approach. That evaluation component will be reviewed in terms of the following elements:

a. Are the criteria for evaluation linked to the objectives and expected benefits/results of the project?

b. Are the evaluation measures and instruments appropriate, practical and complete?

c. Will an outside evaluator be used to perform the evaluation?

3. Dissemination and Utilization: 10 Points

a. Are the products described in terms of potential use?

b. Do the dissemination and utilization activities go beyond the distribution of written materials?

c. Are the audiences for the products carefully chosen and described? Are the audiences likely to use the products?

d. Are networking techniques clearly and practically discussed? Are potential users involved early in the project?

e. Are the activities described in the plan practical, complete, and appropriate?

4. Level of Effort: 25 points

a. Is the project management plan adequate to assure appropriate control and oversight? Is a member of the applicant organization responsible for overall project management?

b. Are the number of people and allocations of time adequate to carry out the proposal effectively and efficiently? Is the staff chart consistent with the project plan expressed in the Methodology/Approach section?

c. Are the key staff qualified to do their assigned tasks? Are consultants and advisors used appropriately? Is the use of volunteers proposed and are they to be used appropriately with supervision and support from project staff?

d. Has the applicant identified and secured the commitment of organizations needed to carry out this project effectively?

e. Does the budget justification adequately describe the resources necessary to conduct the project? Is the budget reasonable as measured against the intended results?

f. Are the authors of the proposal, their relationship with the applicant agency and their intended role in the project, if any, identified?

H. The Components of an Application

In order to expedite the processing of applications, we request that you *adhere to the following instructions exactly.* Each application package should include:

1. A copy of the *Check List of Application Requirements* (See Section L, below) with all the completed items checked.

2. An original and two copies of the application, including:

- SF 424, Application for Federal Assistance, SF 424A (Budget) and SF 424B (Assurances). The original copy of the application must have an original signature in item 18d on the SF 424.
- Proof of non-profit status, as necessary;
- A copy of the applicant's indirect cost agreement, as necessary;
- Budget justification not to exceed three pages;
- Project summary description (one page);
- Program narrative (not more than 30 pages, double-spaced);
- Organizational capability statement including a 1 page organization chart (3 pages, double-spaced maximum);
- Letters of Commitment.

Each copy should be stapled securely (front and back if necessary) in the upper left corner. Pages should be sequentially numbered. In order to facilitate handling, please do not use covers, binders or tabs. Do not include extraneous materials such as agency promotion brochures, slides, tapes, film clips, etc. It is not feasible to use such items in the review process, and they will be discarded if included.

I. Communications with AoA

Do not include a self-addressed, stamped acknowledgment card. All applicants will automatically be notified of the receipt of their application and informed of the identification number assigned to it. This number and the priority area should be referred to in *ALL* subsequent communication with AoA concerning the application. If acknowledgment is not received within seven weeks after the deadline date, please notify the Acquisition and Assistance Management Branch by telephone at (202) 245–9016.

After an identification number is assigned and the applicant has been notified of the number, applications are filed numerically by identification number for quick retrieval. It will not be possible for AoA staff to provide a timely response to inquiries about a specific application unless the identification number and the priority area are given.

Applicants are to be advised that, prior to reaching a decision, AoA will not release information relative to an application other than that it has been received and that it is being reviewed. Unnecessary inquiries delay the process. Once a decision is reached, the applicant will been notified as soon as possible of the acceptance or rejection of the application.

J. Background Information and Guidance for Preparing the Application

1. Current Projects and Previous Project Results.

In the Program Narrative of the application (see Section K below) applicants are expected to demonstrate familiarity with recent and ongoing activity related to their proposal. To insure that information about AoA supported discretionary grant projects is conveniently available, AoA has disseminated this information widely. Source materials include:

a. For *Current AoA Projects:* A compendium of recently funded Title IV discretionary projects for FY 1987 and FY 1988 may be obtained by writing: Discretionary Project Compendium, Office of Program Development, Administration on Aging, 330 Independence Avenue, SW., Washington, DC 20201.

The information from the compendium is also included in *AgeLine (see below)*

b. *For Completed Project Information:* Copies of all AoA discretionary grant final reports and printed materials are sent to: Project SHARE, an abstract clearinghouse on human services issues; The National Technical Information Service (NTIS), an abstract clearinghouse and document source for Federally sponsored reports; AgeLine, a bibliographic database service sponsored by the AARP; and the U.S. Government Printing Office Library Program, a catalog and microfiche service for 1400 depository libraries located throughout the United States.

Information concerning access to the bibliographic and document referral services provided by these clearinghouses can be obtained through most public and academic libraries. For direct information use the following addresses and telephone numbers:

Project SHARE, P.O. Box 2309, Rockville, MD 20852, (301) 231–9539.

National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161, (703) 487–4600.

AgeLine Database, BRS Customer Services, 1200 Route 7, Latham, NY 12110, (800) 345–4277.

Acquisition Unit, Library Programs Service, U.S. Government Printing Office, North Capital and H Streets, NW., Washington, DC 20401, (202) 275–1070.

2. Demographic Information

Two publications which can help applicants to find demographic information on older people are:

a. *The Guide to 1980 Census Data on the Elderly* will aid applicant in using published Census data. Write to: Guide to 1980 Census Data on the Elderly, Administration on Aging, 330 Independence Ave., SW., Washington, DC 20201.

b. *Aging America* contains a wide range of statistical information on older people. For copies, write to: American Association of Retired Persons, 1909 K Street, NW., Washington, DC 20049.

3. Dissemination and Utilization

The purposes and expectations associated with Title IV discretionary projects extend well beyond the immediate confines of a particular project's local impact. Projects should have a ripple effect in the field of aging in terms of replicating their design, utilizing their results, and applying their benefits to a widening circle of older persons. This section suggests certain principles of dissemination which should be considered in developing your application:

- The most widely utilized projects make dissemination and utilization a central aspect of the project not a peripheral one,
- Dissemination starts at the beginning of a project not upon completion of the final report,
- Potential users should be involved in planning the project if possible,
- Products developed should be prepared with the needs of potential users in mind,
- Dissemination is a notworking process,
- At a minimum, dissemination should include sending out final products and making presentations at conferences,
- Coordination with other related projects may increase the chances of your products being used.

K. Completing the Application

Forms SF 424, SF 424A, and SF 424B have been reprinted for your convenience in preparing the application. Single-sided copies of all required forms must be used for submitting your application. You should reproduce single-sided copies from the reprinted form and type your application on the copies. Please do not use forms directly from the **Federal Register** announcement as they are printed on both sides of the page.

To assist applicants in completing Forms SF 424 and SF 424A correctly, samples of these forms have been provided as part of this announcement. These samples are to be used as a guide only. Please submit your application on the blank copies. When specific information is not required under this program, N/A (not applicable) has been preprinted on the form. All items which are not to be completed have been shaded.

Each copy of the application *must* contain Forms SF 424, SF 424A, and SF 424B. Prepare your application in accordance with the following instructions:

1. SF 424, Cover Page:

Complete only the items specified in the following instructions:

Top Left of Page. Enter the number of the priority area under which the application is being submitted in the box provided.

Item 1. Preprinted on the form.

Item 2. Date application submitted to AoA and applicant's control number (if applicable).

Item 3. Not applicable.

Item 4. Leave blank.

Item 5. Legal name of applicant, name of primary organizational unit which will undertake the assistance activity, complete address of the applicant, and name and telephone number of the person to contact on matters related to this application.

Item 6. Enter the employer identification number of the applicant organization as assigned by the Internal Revenue Service.

Item 7. Enter the appropriate letter in the space provided.

Item 8. Preprinted on form.

Item 9. Preprinted on form.

Item 10. Preprinted on form.

Item 11. The title should not exceed 10 to 12 words and 120 characters including spaces and punctuation. It should not repeat the title of the priority area or the name of the applicant institution.

Item 12. Leave blank.

Item 13. Enter the desired start date for the project, beginning on or after July 1, 1989, and the desired end date for the project. Projects are generally for 12 months, 24 months, or for the duration specified in the priority area description. Ensure that the duration of the project does not exceed the limitations indicated in the priority area description.

Item 14. List the applicant's Congressional district and any District(s) affected by the program or project.

Item 15. All budget information entered in these items should cover: (1) the total project period if that period is 17 months or less or (2) the first twelve months if the proposed project period exceeds 17 months.

The applicant should show the Federal grant support requested under sub-item 15a. Sub-items 15b–15e are considered cost-sharing or "matching funds". The value of third party in-kind contributions should be included on appropriate lines as applicable. It is important that the dollar amounts entered in sub-item 15b–15e total at least 25 percent of the total project cost (total project cost is equal to the requested Federal funds plus funds from non-Federal sources).

Check: Does all information entered in Items 15a to 15f over (1) the total project period if that period is 17 months or less or (2) the first twelve months if the proposed project period exceeds 17 months.

Item 16. Preprinted on form.

Item 17. This question applies to the applicant organization, not the person who signs as the authorized representative. Categories of debt include delinquent audit disallowances, loans and taxes.

Item 18. To be signed by an authorized representative of the applicant organization. A document attesting to that sign-off authority must be on file in the applicant's office.

2. SF 424A—Budget Information

This form is designed so that application can be made for funds from one or more grant programs. Sections A, B, C, and D, should include the Federal as well as non-Federal funding for the proposed project covering (1) the total project period of 17 months or less or (2) the first year if the proposed project exceeds 17 months.

Section A—Budget Summary

This section includes a summary of the budget. On line 5, enter total Federal Costs in column (e) and total Non-Federal Costs (including third party in-kind contributions but not program income in column (f). Enter the total of columns (e) and (f) in column (g).

Section B—Budget Categories

Under column (5) enter the total requirements for funds (both Federal and non-Federal) by object class category.

A separate *budget justification* should be included to fully explain and justify major items, as indicated below. The budget justification should not exceed three typed pages and should immediately follow SF 424 A.

Line 6a—Personnel: Enter the total costs of salaries and wages of applicant/grantee staff. Do not include the costs of consultants, which should be included under 6h., Other

Justification: Identify the principal investigator or project director, if known. Specify the percentage of time and titles of the organization's staff who will be working on the project as part of the budget justification.

Line 6b—Fringe Benefits: Enter the total costs of fringe benefits unless treated as part of an approved indirect cost rate.

Justification: Provide a break-down of amounts and percentages that comprise fringe benefit costs, such as health

insurance, FICA, retirement insurance, etc.

Line 6c—Travel: Enter total costs of out-of-town travel (travel requiring per diem) for staff of the project. Do not enter costs for consultant's travel or local transportation.

Justification: Include the total number of trips, destinations, length of stay, transportation costs and subsistence allowances.

Line 6d—Equipment: Enter the total costs of all equipment to be acquired by the project. For State and local governments, including Federally recognized Indian Tribes "equipment" is non-expendable tangible personal property having a useful life of more than two years and an acquisition cost of $5,000 or more per unit. For all other grantees, the threshold for equipment is $500 or more per unit. The higher threshold for State and local governments is effective October 1, 1988 through implementation of 45 CFR Part 92, Uniform Administrative Requirements for State and Local Governments.

Justification: Equipment to be purchased with federal funds must contain sufficient justification to determine that it is necessary for the conduct of the project and that the applicant organization of its sub-grantees do not have the equipment or a reasonable facsimile that would be available to the project. The justification also must contain plans for future use or disposal of the equipment after the project ends.

Line 6e—Supplies: Enter the total costs of all tangible expendable personal property (supplies) other than those included on line 6d.

Line 6f—Contractual: Enter the total costs of all contracts, including (1) procurement contracts (except those which belong on other lines such as equipment, supplies, etc.) and, (2) contracts with secondary recipient organizations including delegate agencies. Also include any contracts with organizations for the provision of technical assistance. Do not include payments to individuals on this line. if the name of contractor, scope of work, and estimated total are not available or have not been negotiated, include in Line 6h, "Other."

Justification: Attach a list of contractors indicating the name of the organization, the purpose of the contract and the estimated dollar amount.

Whenever the applicant/grantee intends to delegate part or all of the program to another agency, the applicant/grantee must provide a completed copy of this section [Section B, Budget Categories) for each delegate agency (contractor) by agency title, along with the supporting information. The total cost of all such agencies will be part of the amount shown on Line 6f. Provide back-up documentation identifying the name of contractor, purpose of contract and major cost elements.

Line 6g—Construction: Leave blank since new construction is not allowable and Federal funds are rarely used for either renovation or repair.

Line 6h—Other: Enter the total of all other costs. Such costs, where applicable, may include, but are not limited to, insurance, medical and dental costs, noncontractual fees and travel paid directly to individual consultants, local transportation (all travel which does not require per diem is considered local travel), space and equipment rentals, printing and publication, computer use, training costs, including tuition and stipends, training service costs including wage payments to individuals and supportive service payments, and staff development costs.

Line 6i—Total Direct Charges: Show the totals of Lines 6a through 6h.

Line 6j—Indirect Charges: Enter the total amount of indirect charges (costs). If no indirect costs are requested enter "none." This line should be used only when the applicant (except local governments) has a current indirect cost rate agreement approved by the Department of Health and Human Services or another Federal agency.

Applicants other than State and local governments are requested to enclose a copy of this agreement. Local and State governments should enter the amount of indirect costs determined in accordance with HHS requirements. When an indirect cost rate is requested, these costs are included in the indirect cost pool and should not be also charged as direct costs to the grant.

In the case of training grants to other than State or local governments (as defined in 45 CFR Part 74), Federal reimbursement of indirect costs will be limited to the lesser of the negotiated (or actual) indirect cost rate or 8 percent of the amount allowed for total project (Federal and non-Federal) direct costs exclusive of any equipment charges, rental of space, tuition and fees, post-doctoral training allowances, contractual items, and alterations and renovations. As part of the justification, applications subject to this limitation should specify that the Federal reimbursement will be limited to 8%.

For training grant applications, the entry under line 6j should be the total indirect costs being charged to the project. The Federal share of indirect costs is calculated as shown above. The applicant's share is calculated as follows:

(a) Calculate total project indirect costs (a*) by applying the applicant's approved indirect cost rate to the total project (Federal and non-Federal) indirect costs.

(b) Calculate the Federal share of indirect costs (b*) at 8 percent of the amount allowed for total project (Federal and non-Federal) direct costs exclusive of any equipment charges, rental of space, tuition and fees, post-doctoral training allowances, contractual items, and alterations and renovations.

(c) Subtract b* from a*. The remainder is what the applicant can claim as part of its matching cost contribution.

Link 6k—Total: Enter the total amounts of Lines 6i and 6j.

Line 7—Program Income: Enter the estimated amount of income, if any, expected to be generated from this project. Do not add or subtract this amount from the total project amount. Describe the nature, source, and anticipated use of income in the Program Narrative.

Section C—Non-Federal Resources

Line 12—Totals: Enter amounts of non-Federal resources that will be used on the grant. If third-party in-kind contributions are included, provide a brief explanation in the budget justification section.

Section D—Forecasted Cash Needs

Not applicable.

Section E—Budget Estimate of Federal Funds Needed for Balance of the Project

This section should only be completed if the total project period exceeds 17 months.

Line 20—Totals: Enter the estimated required *Federal* funds for the period covering months 13 through 24 under column "(b) First." If appropriate, enter the Federal funds needed for months 25 through 36 under "(c) Second."

Section F—Other Budget Information

Line 21—Direct Charges: Not applicable.

Line 22—Indirect Charges: Enter the type of indirect rate (provisional, predetermined, final or fixed) that will be in effect during the funding period, the estimated amount of the base to which the rate is applied, and the total indirect costs.

Line 23—Remarks: Provide any other explanations or comments deemed necessary.

3. SF 424B—Assurances

SF 424B, Assurances—Non-Construction Programs, contains all of the assurances required of applicants under the Discretionary Funds Program of the Administration on Aging. Please note that a duly authorized representative of the applicant organization must certify that the applicant is in compliance with these assurances.

With the possible exception of an Assurance of Protection of Human Subjects, no other assurances are required. For research projects in which human subjects may be at risk, an Assurance of Protection of Human Subjects may be needed. If there is a question regarding the applicability of this assurance, contact the Office of Research Risks of the National Institutes of Health at (301) 496–7041.

4. Project Summary Description

Clearly mark this separate page with the applicant name as shown in SF 424, item 5 and the priority area as shown in the upper left hand corner of SF 424. The summary description should not exceed 1,200 characters, including words, spaces and punctuation. These 1,200 characters become part of the computer data base on each project.

The description should be specific and concise. It should describe the objectives of the project, the approaches to be used and the outcomes expected. At the end of the summary, list major products that will result from the proposed project (such as software packages, materials, management procedures, data collection instruments, training packages or videos). The project summary description, together with the information on the SF 424, becomes the project "abstract." It is a major source of information about the proposed project and is usually the first part that the reviewers read in evaluating the application. Therefore, care should be taken to produce a summary which accurately and concisely reflects the proposal.

5. SF 424, Program Narrative

The Part IV, Program Narrative, is the most important part of the application. It should be clear, concise, and specific to the priority area under which the application is being submitted. In its description of the nature, scope, and objectives of the proposed project, the program narrative should provide information on how the application meets the evaluation criteria in Section G above.

Applicants are required to follow the format described below in preparing their applications, using the four headings for sections of the application:

a. *Objectives and need for assistance.* Pinpoint any relevant physical, economic, social, financial, institutional, or other problems requiring a solution. Demonstrate the need for the assistance and state the principal and subordinate objectives of the project. Supporting documentation or other testimonies from concerned interests other than the applicant may be used. Any relevant data based on planning studies should be included or footnoted.

b. *Results or Benefits Expected.* Identify results and benefits to be derived. The anticipated contribution to policy, practice, theory and/or research should be indicated.

c. *Approach.* Outline a plan of action pertaining to the scope and detail how the proposed work will be accomplished for each project. Cite factors which might accelerate or decelerate the work and your reasons for taking this approach as opposed to others. Describe any unusual features of the project, such as design or technological innovations, reductions in cost or time, or extraordinary social and community involvements. Provide for each assistance program quantitative projections of the accomplishments to be achieved, if possible. When accomplishments cannot be quantified, list the activities in chronological order to show the schedule of accomplishments and their target dates. Identify the kinds of data to be collected and maintained, and discuss the criteria to be used to evaluate the results and success of the project. Explain the methodology that will be used to determine if the needs identified and discussed are being met and if the results and benefits identified are being achieved. List each organization, cooperator, consultant, or other key individuals who will work on the project along with a short description of the nature of their effort or contribution.

d. *Geographic Location.* Give a precise location of the project and area to be served by the proposed project. Maps or other graphic aids may be attached.

This narrative must be no more than 30 double-spaced pages. It should be typed on a single-side of 8½" x 11" plain white paper with 1" margins on both sides. All pages of the narrative (including charts, tables, maps, exhibits, etc.) must be sequentially numbered, beginning with "Objectives and need for assistance" as page number one. Applicants should not submit reproductions or larger size paper, reduced to meet the size requirement.

The narrative should conclude by identifying the author(s) of the proposal, their relationship with the applicant, and the role they will play, if any, should the project be funded.

5. Organizational Capability Statement

A brief (maximum 3 double-spaced pages including a 1 page organization chart) background description of how the applicant agency (or the particular division of a larger agency which will have responsibility for this project) is organized and the types and quantity of services it provides or research capabilities it possesses. This description should cover capabilities not included in the program narrative under level of effort. It may include descriptions of any current or previous relevant experience or describe the competence of the project team and its demonstrated ability to produce a final product that is readily comprehensible and usable. An organization chart showing the relationship of the project to the current organization should be included.

L. Checklist for a Complete Application

The checklist below should be typed on 8½" x 11" plain white paper, completed and included in your application package. It is for use in ensuring proper preparation of your application.

Checklist

I have checked my application package to ensure that it includes the following:

—One original application plus two copies, which contains or is in accord with the following:
—SF 424, SF 424A—Budget Information, and SF 424B—Assurances;
—SF 424 has been completed according to the instructions, signed and dated by an authorized official (item 18), and the original has been included in the package to be mailed along with the two copies;
—As necessary, a copy of the current indirect cost rate agreement approved by the Department of Health and Human Services or another Federal agency;
—Summary description;
—Program Narrative (not more than 30 pages, double-spaced);
—Organizational capability statement (not more than 3 pages);
—SF 424B, Assurances;
—Up to 3 vitae of no more than 2 pages each;
—Proof of non-profit status, as necessary;
—Letters of Commitment;

VOL 53 ISS 239 DE 13 1988 UMI

—The original and two copies of the application have been stapled securely (no folders or binders) with the SF 424 as the first page of each copy of the application;
—The original application, the two copies of the application and the summary description should be packaged together so that they can be processed together.

M. Points to Remember

1. There are various page limitations on different parts of the application that must be adhered to. Before submitting your application, please review those requirements as spelled out in Section D.

2. You are required to send an original and two copies of an application.

3. Designate a priority area in the box provided at the top left hand corner of the SF 424.

4. The summary description of 1,200 characters or less is an essential element of the application. It is important that this accurately reflect the nature and scope of the proposed project.

5. In making certain that you have met the minimum required match (see Section C above), remember that you must match $1 for every $3 requested in Federal funding to reach 25% of the *total* project cost (the Federal share plus your cost share). For example, if your request for Federal funds is $150,000, then the required minimum match or cost sharing is $50,000. The total project cost is $200,000, of which your $50,000 share is 25%.

6. Indirect costs of training grants may not exceed 8%.

7. Follow the recommended format as closely as possible in preparing the program narrative. The format reflects the evaluative criteria which will be used by reviewers to evaluate applications.

8. Do not include general support letters endorsing the project. However, letters of commitment which describe and verify a tangible commitment, e.g., funds, staff, space should be included.

9. If duplicate applications are submitted under different priority areas, AoA reserves the right to select the single priority area under which it will be reviewed.

10. If more than one application is submitted, each should be submitted under separate cover.

11. Have someone other than the author(s): 1) apply the screening requirements to the application; and 2) review it based upon the evaluation criteria prior to its submission. In this way, applicants will gain a better sense of their application's quality and potential competitiveness.

12. Applications must be sent by midnight, or hand delivered (by 5:30 p.m.), no later than March 17, 1989 to: Department of Health and Human Services, Grants and Contracts Management Division, Acquisition and Assistance Management Branch, 200 Independence Avenue, SW., Room 349F, Washington, DC 20201, Attn: AoA–89–1.

Dated: December 5, 1988.

Carol Fraser Fisk,

Commissioner, Administration on Aging.

Otis R. Bowen,

Secretary of Health and Human Services.

ASSURANCES - NON-CONSTRUCTION PROGRAMS

Note: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of the project described in this application.

2. Will give the awarding agency, the Comptroller General of the United States, and if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.

3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.

4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.

5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§ 4728-4763) relating to prescribed standards for merit systems for programs funded under one of the nineteen statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).

6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§ 1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. §§ 6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§ 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.

Standard Form 424B (4-88)
Prescribed by OMB Circular A-102

7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.

8. Will comply with the provisions of the Hatch Act (5 U.S.C. §§ 1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§ 276a to 276a-7), the Copeland Act (40 U.S.C. § 276c and 18 U.S.C. §§ 874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 327-333). regarding labor standards for federally assisted construction subagreements.

10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.

11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§ 1451 et seq.); (f) conformity of Federal actions to State (Clear Air) Implementation Plans under Section 176(c) of the Clear Air Act of 1955, as amended (42 U.S.C. § 7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended, (P.L. 93-523); and (h) protection of endangered species under the Endangered Species Act of 1973, as amended, (P.L. 93-205).

12. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§ 1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.

13. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. 469a-1 et seq.).

14. Will comply with P.L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.

15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89-544, as amended, 7 U.S.C. 2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.

16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§ 4801 et seq.) which prohibits the use of lead based paint in construction or rehabilitation of residence structures.

17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act of 1984.

18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulation and policies governing this program.

[Docket No. 22320; Amdt. Nos. 43-30 and 91-206]

RIN 2120-AA19

Inoperative Instruments or Equipment

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: These amendments revise the Federal Aviation Regulations (FAR) to permit rotorcraft, nonturbine-powered airplanes, gliders, and lighter-than-air aircraft, for which an approved Master Minimum Equipment List has not been developed, to be operated with inoperative instruments and equipment not essential for the safe operation of the aircraft. Furthermore, these amendments permit general aviation operators of small rotorcraft, nonturbine-powered small airplanes, gliders, and lighter-than-air aircraft, for which a Master Minimum Equipment List has been developed, the option of operating under the minimum equipment list concept or in accordance with the provisions of this final rule.

EFFECTIVE DATE: December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Edna H. French-Manager, Project Development Branch (AFS-850) or John Lynch; General Aviation and Commercial Division, Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267-8150.

SUPPLEMENTARY INFORMATION:

Public Participation

These amendments are based on SNPRM No. 81-14A. All interested persons have been given an opportunity to participate in making these amendments, and due consideration has been given to their comments. Except for the changes discussed below, these amendments and the reasons for their adoption are the same as those stated in Notice 81-14A.

Background

Except as provided for in § 91.30, all instruments and equipment installed on an aircraft must be in operative condition for an operator to continue to meet the aircraft's airworthiness requirements. The FAA recognized that flight could be conducted with instruments and equipment inoperative under specified conditions with the adoption of the minimum equipment list (MEL) concept. Presently, the MEL concept extends to air carrier, commercial, and general aviation operators of multiengine aircraft, but only if the aircraft has a master MEL. Owners or operators of aircraft for which master MEL's have not been developed are required to adhere to § 91.165 which requires that all aircraft discrepancies which occur between required inspections be repaired in accordance with Part 43. This means that all of the aircraft's instruments and equipment must be operative, regardless of whether or not they are essential for the operation being conducted.

The FAA addressed this issue for operators of general aviation multiengine aircraft by issuing Amendment No. 91-157 (44 FR 43714; July 26, 1979). This amendment permitted the operation of multiengine aircraft with inoperative instruments or equipment within the limitations of §§ 91.29 and 91.165. After Amendment No. 91-157 was published, the FAA received strong negative reaction from the public. Generally, the commenters objected, because they believed the rules were confusing, the time allowed for compliance was insufficient, and very few master MEL's had been developed at the time. Many commenters stated that they use the listing in § 91.33 as the sole standard for determining whether or not an instrument or item of equipment is required to be operational. Although the FAA intended to provide relief to the general aviation community by issuing Amendment No. 91-157, it was perceived as restrictive and criticized as excluding single-engine aircraft. Therefore, the FAA issued Amendment No. 91-160 on October 26, 1979 (44 FR 62884; November 1, 1979), suspending § 91.30 so the FAA could study the matter further.

Following the suspension of § 91.30, operators desiring to use MEL's petitioned for exemptions from § 21.181. This allowed operators to obtain individual approvals to operate multiengine aircraft with inoperative instruments and equipment. The FAA was able to gain valuable information on the usefulness and safety aspects of MEL's when used in general aviation operations. Even though this experience was beneficial, processing exemptions was time consuming and costly to both the FAA and the public. Before the FAA reinstated § 91.30 on March 13, 1986, over 350 individual exemptions were processed.

On September 16, 1981, the FAA issued Notice of Proposed Rulemaking (NPRM) No. 81-14 (46 FR 52278; October 26, 1981). This notice proposed permitting the operation of aircraft with inoperative instruments and equipment not essential for the operation being conducted. The proposal included provisions to consolidate all MEL requirements of Parts 121, 125, and 135 into Part 91. It also proposed to broaden the application of these provisions to other aircraft and to allow the operation of aircraft without an MEL with certain instruments or items of equipment inoperative through an approved aircraft flight manual or operating limitations statement. Even though this notice received more favorable response than Amendment No. 91-157, the general aviation community still had concerns and objections, and the FAA decided that the proposal needed further revision.

The FAA reinstated Amendment No. 91-157 (50 FR 51188; December 13, 1985) on December 6, 1985. This permitted operators of multiengine aircraft, under specific conditions, to operate their aircraft with inoperative instruments and equipment. The FAA, in making the decision to reinstate § 91.30, determined the reasons for suspending the rule no longer existed. However, as was the case when Amendment No. 91-157 was first published, aircraft for which master MEL's had not been developed were still excluded. The reinstatement of § 91.30 provided immediate relief to operators of multiengine aircraft, and allowed additional time for the FAA to resolve the problems confronting operators of other aircraft.

The FAA issued a Notice of Meeting announcement (51 FR 18800; May 22, 1986) to solicit public participation for this ongoing rulemaking project. The FAA determined that prior to initiating any further rulemaking projects involving this subject, it would request assistance from the public. On June 17, 1986, a public meeting was held at the FAA Headquarters in Washington, DC. The meeting was attended by thirty-nine FAA and industry personnel. One of the principal industry comments was that requiring all instruments and equipment to be operative at all times was totally unacceptable. Furthermore, the attendees disagreed that § 91.165 requires all instruments and equipment to be operative at all times. Also, industry expressed a concern that the MEL approval process is unnecessarily burdensome for both Part 91 operators and the FAA. The attendees stated that the Flight Standards District Offices (FSDO) are already backlogged with priority work, and past experience has shown the minimum time to complete the MEL approval process is six months.

The commenters stated that general aviation operators have operated safely for years, using the instrument and equipment listings in § 91.33 as their sole reference for determining whether an instrument or item of equipment was required for the operation being conducted. The attendees requested that the FAA develop rules to permit the operation of aircraft with inoperative instruments and equipment, and suggested they follow the procedures that operators have used successfully for years. On December 15, 1987, the FAA issued Supplemental Notice of Proposed Rulemaking (SNPRM) No. 81–14A (52 FR 47680), in which it proposed the rules that are contained in this final rule document. The FAA's intent in proposing the rules contained in Notice No. 81–14A was to provide a realistic approach to the inoperative instruments and equipment issue in response to the concerns of the general aviation community. The FAA determined that general aviation operators of small aircraft were in need of relief from § 91.165. In developing these amendments, specifically § 91.30(d), the FAA utilized a philosophy and rationale similar to that used in the development of the MEL concept.
